*NOTE.—It will be noted that the figures relating to the imports of coin and bullion for the twelve months ending June, 1916, amounted to \$34,058,009, as against \$142,602,879 for the same period of 1914-15. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Acton, Ont.—August 14—Messrs. Henderson and Son's general store.

Berlin, Ont.—August 16—Mr. E. Webber's barn, north of Conestogo. Loss, \$3,000; partially insured.

Camp Hughes, Man.—August 14—Strand Theatre, owned by Mr. L. F. Allardt, Chicago.

Collette Siding, N.B.—August 14—Mr. F. Peters' barn. Loss, \$400.

Drummondville, Que.—August 21—Ætna Chemical Company's plant. Loss, \$125,000. Six deaths. Cause, overheated bearing.

East Zorra, Ont.—August 18—Mr. G. Turner's barn. Cause unknown.

Elora, Ont.—August 5—Mr. J. Thompson's residence. Loss, \$600.

Erindale, Ont.—August 16—Barn at Price's dairy farm.

Hull, Que.—August 16—National Theatre, Main Street. Loss, \$1,500.

Montreal, Que.—August 21—Bridge at Notre Dame Street and 38 freight cars. Cause, collision.

August 22—Starke-Seybold Company's premises, 14 St. Peter Street. Loss, \$3,000. Cause, dropped match.

Newmarket, Ont.—August 16—Mr. F. H. Robinson's grist mill at Glenville. Loss, \$6,000; insurance, \$1,000. Mr. F. M. Bogart's residence, Court Street. Loss, \$1,200.

Ottawa, Ont.—August 15—Mr. A. Kritch's residence, 203 Russell Avenue. Loss, \$300. Cause, spontaneous combustion.

Pembroke, Ont.—August 15—Pembroke Woolen Mills. Loss, \$10,000.

Sackville, N.B.—August 16—Caraquet and Gulf Shore Railway engine-shed.

St. Thomas, Ont.—August 20—Mr. R. Lindsay's barns, River Road, Southwold. Loss, \$4,000. Cause, lightning.

Sarnia, Ont.—August 21—Steamer "Saronic" with cargo of wheat, Cockburn Island, Georgian Bay.

Shediac, N.B.—August 15—Mr. R. C. Tait's warehouse. Loss, \$500; insured.

Teeswater, Ont.—August 16—Mr. J. Lippert's barn, Chepstow.

Toronto, Ont.—August 22—Interurban Electric Company's generator. Loss, \$5,000.

CANADA'S REAL ESTATE INVESTMENTS

Mr. John Aird, general manager of the Canadian Bank of Commerce, when interviewed in London by "Canada," said:—

"You remind me that, although a large amount of Canadian gilt-edged securities and railway and industrial bonds are held in this country, there is a large number of more speculative investors who have put their money into land and building lots, and you ask what likelihood there is of prices returning to the boom figures of 1912-13," said Mr. Aird. "Well, we do not wish to see them return to those prices. We would rather see a gradual improvement, and I think that has already commenced in actual city property—not in the outskirts—in places like Montreal, Toronto, Winnipeg, Vancouver and Victoria. Farm lands in the West, particularly those that are adjacent to railway lines, have held their value well, and will continue to do so, provided proper farming principles are adhered to, because such land has been bought at a low rate, and at the existing price it is well worth the money that was paid for it.

"The real estate situation will be helped by immigration. Notwithstanding the war, we are getting newcomers in the West from the United States. These are, from a farming point of view, the best class of immigrants we receive, from their knowledge of western climatic and farming conditions, and their possession of a certain amount of money."

Bank Figures After Two Years War

COMPARISONS indicate effects and changes that have occurred in Canada's Commercial and Financial fields during war time. Savings Deposits have grown monthly. Trend of Loans has been downward. Success of Canada's second war loan is assured.

	July, 1915.	June, 1916.	July, 1916.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	\$340,950,215	\$428,117,340	\$431,958,188	+ 26.6	+ 0.7
Deposits after notice	691,731,719	767,598,130	789,363,919	+ 14.1	+ 2.8
Current loans in Canada	758,349,517	747,470,541	740,040,741	— 2.3	— 0.9
Current loans elsewhere	41,784,633	60,081,584	62,356,259	+ 49.4	+ 3.8
Loans to municipalities	44,029,446	46,773,032	42,385,096	— 3.8	— 9.4
Call loans in Canada	71,168,233	86,776,474	87,355,648	+ 22.7	+ 0.6
Call loans elsewhere	117,821,174	182,757,015	177,121,733	+ 51.2	— 2.1
Circulation	100,412,424	123,373,395	123,530,451	+ 23	+ 1.2

THE above are the principal changes during July in the latest statement of the Canadian chartered banks to the government. Deposits continue to grow and those on demand were augmented by some \$3,000,000 during the month, while deposits after notice show approximately a growth of \$12,000,000. Current loans in Canada, which in June showed a decrease, are again less. Municipal loans also show a decrease. Circulation during June and July was comparatively stationary, increasing only \$157,000.

The following table shows the trend of the Canadian loans account for the past thirteen months:—

Loans.	Current in Canada.	Call in Canada.
1915—July	\$758,349,517	\$71,168,233
August	758,342,735	71,855,565
September	771,086,757	71,578,886
October	780,785,754	74,574,270
November	777,162,563	83,203,787
December	775,517,947	84,228,155
1916—January	758,500,492	82,584,659
February	760,873,181	81,949,125
March	770,130,526	81,747,512
April	777,764,682	82,527,448
May	763,136,917	84,826,636
June	747,470,541	86,776,474
July	740,040,741	87,355,648

Since the beginning of the year, current loans have decreased by \$11,000,000. In February and March these showed a broadening out, but since March have again contracted, while call loans in Canada since February have expanded from \$81,000,000 to \$87,000,000. The trend of current loans in Canada, as remarked in June, confirms the impression that the borrowing corporations of Canada are reducing their bank loans, as the result of existing financial conditions accruing from munition orders, etc.

The course of call loans abroad for the period beginning two months before the declaration of war, is of interest and is shown in the following table:—

1914—June	\$137,120,167	July	\$117,821,174
July	125,545,287	August	120,607,677
August	96,495,473	September	135,108,412
September	89,521,589	October	120,681,624
October	81,201,671	November	135,530,562
November	74,459,643	December	137,157,869
December	85,012,964	1916—January	134,248,552
1915—January	85,796,641	February	139,138,651
February	89,800,982	March	141,889,980
March	101,938,685	April	147,146,443
April	121,522,971	May	163,406,659
May	136,098,835	June	182,757,015
June	124,604,875	July	177,121,733

Call loans abroad for July show a decrease of \$5,600,000. This is the first decrease shown in this account since January, when a decrease from the December total of \$3,000,000 was registered.

The following table shows the course of the loan accounts for the past five years:—

	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
July, 1912	\$852,256,651	\$35,741,998	\$70,407,734	\$117,961,437
1913	858,429,069	42,960,513	67,991,255	89,266,235
1914	840,198,625	48,013,052	68,441,816	125,545,287
1915	758,349,517	41,784,633	71,168,233	117,821,174
1916	740,040,741	62,356,259	87,355,648	177,121,733

The above comparisons of five years' commercial banking loans is of interest, comparing as it does two years before the outbreak of war with the two succeeding years. In this record current loans in Canada reached their highest point in July, 1913, while the lowest is shown in this present return. Current loans elsewhere stand at their highest point, the lowest point being in July, 1912, of this

Of the deposit in Central Gold Reserves \$6,710,000 is in gold coin; the balance is in Dominion Notes.

comparison. Call loans in Canada show an appreciable growth as compared with either of the former years, and an increase over the July return of call loans elsewhere of some \$52,000,000.

The deposits record for the past five years for the month of July is given in the following table, compiled by *The Monetary Times* :—

July.	On demand.	After notice.	Total.
1912	\$372,012,494	\$640,592,345	\$1,012,604,839
1913	356,585,196	621,347,388	977,932,584
1914	346,854,051	671,214,125	1,018,068,176
1915	340,950,215	691,731,719	1,032,681,934
1916	431,058,188	789,363,919	1,221,222,107

Probably most interest in this return centres on the above record, that of deposits in Canada, in view of the flotation of Canada's second domestic war loan within the next few days. When war broke out depositors had savings totalling \$671,000,000, a year later they registered \$691,000,000.

Since August, 1915, with one exception, that of January, 1916, the monthly returns of the chartered banks have shown increases in after notice deposits. Canada's savings during the second year of war grew from \$692,000,000 to \$789,000,000, an increase of some \$97,000,000. Commercial deposit accounts, those on demand, grew from \$334,000,000 to \$431,000,000 during the second year of war.

Dominion Government--July, 1916

LIABILITIES

Loans from other banks in Canada secured, including bills re-discounted	Deposits made by and balances due to other banks in Canada	Due to banks and banking correspondents in the United Kingdom	Due to banks and banking correspondents elsewhere than in Canada or the U.K.	Bills payable	Acceptances under letters of credit	Liabilities not included under foregoing heads	Balances due to the Imperial Government	Total Liabilities	Aggregate amount of loans to directors, and firms of which they are partners	Average amount of current gold and subsidiary coin held during the month	Average amount of Dominion Notes held during the month	Greatest amount of notes in circulation at any time during the month

July	431,958,188	780,363,919

These figures of Canada's banking institutions, as a whole, show that Canada has successfully negotiated the second lap of a war, which has engaged the energies of its leaders in finance, banking, etc., but the end is not yet, despite prevailing prosperity and commercial activity. Further problems are ahead and will need the co-operation of all of our citizens. "It is peace, not war which in future must determine the basis of progress." For Sir Thomas White, minister of finance, has said that the military effort must be measured by the financial aid in this fact lies the greatest assurance of the success of the Allies, provided that their unquestionably superior financial strength can be brought fully to bear. Future bank statements will reveal the situation in Canada.

HOW GERMANY BUILT TRADE HERE

Scientific Commercial Attack—British Shipping Companies Criticized

Some interesting sidelights are thrown on the growth of German trade with Canada prior to the war in the report on Canadian trade, just published, by Mr. C. Hamilton Wickes, His Majesty's trade commissioner in Canada and Newfoundland. He points out that Germany provided in 1913 only 2 per cent. of the total imports into Canada, and would, therefore, appear, at a first glance, to be an almost negligible competitor in the Dominion markets. An examination of the imports of the articles comprising this 2 per cent. over a number of years will, however, reveal a remarkable growth, which can only mean that the articles have been carefully selected as the ground for scientific commercial attack.

The commissioner then compares the imports during the financial year, 1908-1909, with those during 1912-1913, recalling that in the former year there was still a surtax on goods imported from Germany into Canada, whereas in the latter year the surtax was no longer in operation, it having been removed in the year 1910. The table deals with the following items: Chemicals, dry goods, china and glass, fancy goods, groceries, rubber manufactures, paints and varnishes, paper and stationery, miscellaneous and raw material. Germany's exports to Canada of those items in the former year were approximately \$2,409,850, and in the latter year \$9,718,675. Another table shows that in the case of imports into Canada of "free" metal manufactures from Germany and from the United Kingdom, the proportional and actual increase in the value of imports from Germany was considerably greater than the proportional and actual increase in the value of the imports from the United Kingdom in the two years noted.

The chapter of the commissioner's report on enemy trade continues as follows: "Investigations made in the markets of Montreal show that an import of a few hundred dollars in one year of a particular commodity made in Germany represents the inception of a commercial attack in this particular line, which has grown to a substantial trade in a few years. In the year 1912-1913 about 27 per cent. of the total German imports into Canada were made up of items of approximately \$1,000 in value, and it is surmised that these items represent the beginning of German trade in particular commodities which commercial research had indicated would provide a rapidly growing trade.

To Push Particular Lines.

"The German manufacturer comes into the Canadian market to push some particular line well informed as to conditions, and the goods and prices of other manufacturers he will have to meet in competition. Moreover, he has laid plans for his scheme of operations before he starts, and if he finds it worth while, will spend a comparatively considerable amount of money in the effort to establish himself. He does not expect to make an immediate profit, but he does expect to create a demand for his goods, and, having been in the position to study in Germany the possibilities of trade with Canada, he usually succeeds when he does visit the Dominion in making the business pay for the outlay incurred. When he raises his prices, a diminution of trade does not follow, because a situation has been created by his energies which will bear enhanced prices. This method of making a market for one's goods is well enough known to the trading community, but has not of recent years characterized many lines of British manufacture, probably on account of lack of knowledge of conditions.

"German trade with Canada is bulky in nature, and the following list of commodities, taken from a previous report furnished by me in November, 1914, indicate the lines in which substantial success has been achieved, namely: Chemicals; dry goods, including articles of apparel, articles for household use, piece goods, sewing threads, yarns and noils; earthenware, china and glass; paints and varnishes; groceries; jewellery; leather; rubber manufactures; metal manufactures; simple forms, machines and machinery, hardware; paper and stationery; fancy goods; explosives; furnishings; musical instruments; seeds and plants and sporting goods. These lines are obviously of careful selection, and for such a growing Canada, should offer an increasing demand.

"Freight rates from German ports to Canada have from time to time been lower than rates from British ports, but it remains to be seen if they be so in the future. At any rate, cheap rates are a serious factor for the British manufacturer to compete with, combined as they are with an extensive use of such aids to commerce as the German Cartels and Banks, and subsidies.

"The standard explanation given by British shipping companies as to why they will carry similar goods at a lower freight rate from continental than from United Kingdom ports is that they do not see why they should not have a share of the trade to be carried, for the goods, they contend, would be forwarded in any case at the lower rates, but they do not appear to have considered that they were playing into German hands by taking these low rates, as their action assisted the German manufacturer to enter the Canadian market in competition with the British, and would eventually result in affecting the export of similar British goods.

In Stronger Position.

"It must be realized, moreover, that British companies could take goods only from German ports as the Germans permitted, whereas such a situation would never have been tolerated in the United Kingdom. Consequently, in all negotiations between British and German shipping companies the Germans were in the stronger position. Sooner or later the British company had to come to terms with the Germans. Always overhanging the former was the threatened entry of German shipping into British ports with offers of cut rates, and in such a case the position of the British companies, in view of the condition of public opinion prevailing before the war, would not have been promising. Moreover, it is understood that when the shipping companies of the two countries had come to an agreement the Germans could not be relied upon to keep it.

"German intentions as regards Canada must be judged from the fact that just prior to the war the Hamburg-American Line opened an office in Montreal, and, a year previous to the war, four large German forwarding agent firms had established organizations right through the Dominion. As customary with the Germans, they commenced by quoting rates which left them with little or no profit, and a serious feature of the campaign was that they obtained thereby the names of the Canadian customers of such British shippers as entrusted them with business, which information they utilized in the German manner by suggesting the names of German manufacturers able to supply similar goods.

Investigating the Market

"German methods of investigating a market challenge comparison with British methods, and a comparison appears to indicate that the science of commercial penetration has not received in the past the same attention in the United Kingdom as in Germany.

"One is perfectly familiar with reiterated advice to the British manufacturer to send travellers, and yet more travellers, into the Canadian market, and to publish catalogues in the currency of Canada, but it is clear that such advice is of little service unless accompanied with the necessary information as to the particular articles required by the market, and the communication of this information to those British manufacturers who are in a position to satisfy such requirements. In some such way only is it possible for British firms to judge whether an adequate return for the expense of sending travellers and compiling catalogues in accordance with Canadian requirements would ensue."

Mr. F. Armstrong has been appointed managing director of the Port Hope Sanitary Manufacturing Company, which acquired the Standard Ideal Company recently.

Application for letters patent is being made by the Bankers' Silver Black Fox Company, Limited, Charlottetown, P.E.I., \$115,000. F. E. Muzzy, J. Anderson, R. F. Spillet.

The Dominion Securities Corporation, Toronto, states in connection with subscriptions to the forthcoming domestic loan that it will make delivery and accept payment from subscribers at any point in Canada or the United States, and will hold in safe keeping the government interim certificates pending delivery of definite bonds, as well as attending to all details in exchanging interim for final securities, and placing the latter in the possession of the bond buyers.

DALLYING WITH RISK

A man who sells life insurance said to the writer: "I have a prospect for a \$50,000 life insurance policy; but it may take me three weeks to write the policy." Here is the case of a business man half convinced that he should take out a policy for \$50,000 on his life. Yet will he dally for three weeks with the risk of death coming, leaving his wife and family with little or no insurance, and an estate of questionable value. Few matters require such a quick decision as the acquirement of life insurance. Often is heard the story of those who die without it while engaged in a series of discussions with a life underwriter as to the need for protection. No man can afford to question whether or not he should carry life insurance. The matters for decision are how much insurance he can afford, what sort of a policy he desires and with which reputable company he will place his business.

As was recently pointed out by a New York insurance man, life insurance cannot always be bought when it is needed most. However much a man may require protection he may find to his dismay that no matter what he is willing to pay as an annual premium, it is impossible to obtain insurance because the company's medical examiners advise against his acceptance as an insurance risk. It is difficult to understand why so many men wait for so many years before giving the question the proper consideration. Every year which passes makes the annual premium higher and the chance of being accepted by the insurance company, more slender.

Here is a striking illustration, familiar to life insurance men. The mortality tables show that nine men out of every thousand die every year. Put a thousand of them side by side in a straight line faced by a like number of soldiers, each with a rifle in his hand; 991 of these rifles are loaded with blank cartridges but nine contain bullets. All these men are thirty-five years of age and they know that nine of their number will fall when the

command to fire is given, but they are unaware who these nine will be. At this moment there appears a life assurance agent, offering to each man the opportunity of protecting himself against the certainty of death in the ratio of 9 to 1,000. What happens? Every man of that thousand immediately steps forward and takes out life assurance.

WAR AND ECONOMY

When the Canadian citizen is spending his income in times of peace, he is hiring men to make things for his consumption and to wait upon him. In times of war, it is necessary that a large number of men stop production for private consumption and cease to wait upon one another as private consumers, commencing instead to produce things for the government, wait upon the government and serve it as soldiers. Therefore, private consumers must consume less and wait upon themselves instead of hiring others to do so. If the course of incomes and employment is not changed in time of war, the government has to compete for men and money. Consequently, prices are inflated, no matter where the money is obtained.

Discussing the financing of a great war, Professor T. N. Carver, of Harvard University, in a recent issue of The New York Annalist, says that the first great initial mistake which practically every government has made up to the present time in its war finance, is that it has hesitated to tax its people. "The only sound method of financing a war is to tax the people," he says, "and tax them to the bone. Leaving the people untaxed they continue spending their incomes as before, and that spending of income is a demand for men to produce supplies for private consumption, and to wait upon the consumers. The only way, then, in which the government can get these men is to outbid the private consumers with its new money. This competition between the private consumers and the government for men and supplies cannot by any possibility result in anything else than an inflation of prices."

In short, the people must purchase less as the government purchases more. One way to accomplish this is by means of voluntary war loans, such as Canada has issued, for example. "People who have been spending their money for other things may be induced to spend it for government bonds," says Professor Carver. "They must then cut down their purchases of supplies. This will reduce the demand for men to produce supplies for private individuals. These men who are released from general industry are then available to be hired by the money which is now in the hands of the government. This cannot result in inflation."

Another method of obtaining the desired result is by forced loans, a system which is not likely to be adopted in this country to any great extent. Taxation is a third method, and one which Great Britain has used to a marked degree. Should the war continue for any length of time it is quite possible that the Canadian war debt will amount to \$1,000,000,000, with an annual interest charge of \$50,000,000. That fact alone should be sufficient to induce economy on the part of governing authorities and individual citizens. As pointed out in a British government poster recently, which urged the sacrifice of luxury for victory, a diamond tiara will buy a field gun, a bottle of champagne and a box of cigars will buy five hundred cartridges and an automobile will purchase an aeroplane. It is a case of the British Empire first and self second.

AUGUST MUNICIPAL BOND SALES

Forthcoming War Loan Affected Municipal Market—
Borrowers Asked for Only Small Amounts

The municipal bond sales in Canada for August, as compiled by *The Monetary Times*, amounted to \$807,297, compared with \$1,485,225 for July and \$1,087,415 for the corresponding period of last year.

Comparing the record of August, 1915, with that of the month just ended, the bond sales are as follow:—

	1916.	1915.
Canada	\$807,297	\$1,087,415
United States	97,300	750,000
	<u>\$904,597</u>	<u>\$1,837,415</u>

The municipal bond sales in Canada during the first eight months of the past five years, according to *The Monetary Times'* bond record, were as follow:—

	1912.	1913.	1914.	1915.	1916.
Jan.	\$2,133,531	\$1,337,500	\$1,953,137	\$1,784,947	\$1,909,441
Feb.	2,596,378	1,038,806	5,995,336	3,047,011	1,419,909
Mar.	1,926,716	335,492	5,123,176	2,572,357	2,027,741
April	927,160	3,693,857	2,847,953	8,603,094	1,979,852
May	1,928,748	880,630	6,400,755	3,464,281	2,649,000
June	1,690,344	2,435,726	4,617,857	2,395,744	3,395,583
July	1,967,476	1,591,924	2,180,758	1,618,422	1,485,225
August	1,998,605	1,663,260	535,050	1,087,415	807,297

Canadian municipal bonds sold in the United States during the first eight months of 1916, compared with sales of 1914 and 1915, were as follow:—

	1914.	1915.	1916.
January	\$ 340,000	\$3,183,215	
February	50,000	6,471,000	899,500
March	18,000	6,543,947	595,000
April	25,000	7,100,825	2,158,000
May	1,750,000	600,000	7,219,000
June	2,100,000		3,168,743
July	1,130,000	890,000	3,540,000
August	35,000	750,000	97,300

The following are the particulars of the sales in Canada by provinces:—

Ontario	\$483,746
Saskatchewan	123,426
Quebec	108,000
Manitoba	79,525
Nova Scotia	12,500

CANADIAN BOND AND MORTGAGE CORPORATION

The Canadian Bond and Mortgage Corporation's annual statement shows a net profit of \$25,933 or 7.10 per cent. on the average capital employed. No fresh funds were borrowed during the year. The corporation's assets include mortgage investments, \$354,984; notes receivable from stockholders, \$39,050; accrued interest, \$13,684; bank balance, \$12,893, and total, \$428,058.

The capital liabilities amount to \$390,430, the profit and loss balance is \$6,680, and unpaid dividends, etc., \$947.

The corporation's officers are: president, J. C. McGavin; vice-presidents, C. H. Henderson and A. R. Davidson; secretary, R. F. McMillin.

BRAZILIAN TRACTION REPORT

The revenue of the well-managed Brazilian Traction, Light & Power Company in Canadian currency for the past year was divided as follows:—Revenue from securities owned and under contracts with subsidiary companies, \$5,339,192; interest on advances to subsidiary companies, \$273,683, making \$5,612,876. After deducting general and legal expenses, administration charges and interest on loans amounting to \$218,074, the surplus available for dividends was \$5,394,801. Four dividends at 1½ per cent. each on preference shares took \$600,000, and two dividends at 1½ per cent. each, and two at ½ of 1 per cent. each on ordinary shares absorbed \$4,249,380; the surplus carried forward in profit and loss being \$545,421.

The annual report points out in this connection that for some years prior to the outbreak of the European war, the value of the milreis for sight bills on London was approximately 16 pence. During the latter part of 1914, however, the average value fell to approximately 13 pence, and in 1915 it showed a further depreciation to an average of approximately 12½ pence. Converting the earnings during 1915 at the average rates prevailing prior to the war, the net revenue, in Canadian currency, would be increased by over \$3,000,000.

The gross earnings of the Rio de Janeiro in Brazilian currency, exceeded those of the previous year by 2,923,000 milreis, there being substantial increases in all departments except the tramways, the earnings of which were slightly below those of 1914. The increase in total net earnings in Brazil was 1,916,000 milreis. The Rio de Janeiro division's gross income in milreis, excluding Companhia Telefonica do Estado and Companhia Bragantina was tramway, 24,608,003; light and power, 16,684,680; telephone, 2,771,143; gas, 9,484,108; a total of 53,547,934 milreis.

The total gross income of the Sao Paulo division for the past four years is given in Brazilian currency as follows:—Tramways, 10,030,010 milreis; light and power, 6,652,043 milreis; a total of 16,682,053 milreis.

The Sao Paulo electric division earned 6,889,219 milreis. The directors sold all the coffee purchased for exchange purposes during the year 1914 and at the beginning of the year 1915, at prices which realized a sum in excess of that which it was estimated would have been received had the usual method of making remittances been followed.

TRUST AND LOAN COMPANIES' RETURNS

Mortgage Loans of Over \$50,000,000—Trust Companies' Liabilities to the Public Exceed \$40,000,000

The valuation of the assets of the 14 loan companies reporting to the minister of finance, amounts to \$71,992,666 as compared with \$70,588,091 in 1914. The companies reporting are: Canada Landed and National Investment Company, Limited, Canada Permanent Mortgage Corporation, Canadian Mortgage Investment Company, Central Canada Loan and Savings Company, Colonial Investment and Loan Company, Dymont Securities Loan and Savings Company, Eastern Canada Savings and Loan Company, Great West Permanent Loan Company, Hudson Bay Mortgage Corporation, Mortgage Corporation of Nova Scotia, Northern Mortgage Company of Canada, Port Arthur and Fort William Mortgage Company, Limited, Real Estate Loan Company of Canada, Limited, Societe de Prêts et Placements de Quebec.

These assets consist of real estate for companies' use, \$1,779,030; loans on mortgages and hypothèques, \$52,807,357; loaned on and invested in municipal and school securities, \$1,483,635; corporation bonds, \$2,062,710; stocks, \$7,314,803; and bank stocks, \$1,019,702; agency investments, \$22,950; cash, \$3,933,004; interest due, \$679,996; office furniture, \$51,113; other property, \$838,396.

The companies' liabilities to stockholders consist of paid-up capital, \$19,401,856; reserve fund, \$9,878,266; dividends unpaid, \$456,411; unappropriated profits, \$419,175. The liabilities to the public are as follows: Debentures payable in Canada, \$6,688,124; debentures payable elsewhere, \$22,279,861; debentures issued, \$1,390,869; deposits payable on demand, \$5,471,355; deposits payable after notice, \$3,721,839; interest due, \$340,627; miscellaneous, \$26,208; owing banks, \$9,509; other liabilities, \$1,808,904.

Loaned Twenty Million.

The loan companies declared dividends varying from 5 per cent. to 10 per cent., the total being \$1,522,057. During the year the sum of \$9,125,366 was loaned by these corporations as compared with \$15,290,344 in the last return. From borrowers the companies received \$14,173,074, from their depositors they received the sum of \$21,542,409, and repaid \$20,718,246.

The average rate of interest on mortgages was 7.706, and the average rate of interest on other securities, 5.406. The aggregate amount realized from compulsory proceedings taken was \$1,122,480 as compared with \$632,567. The value of mortgaged property held for sale was \$537,161, and \$354,743 was chargeable against mortgaged property held for sale. Four companies borrowed sums totalling \$1,404,416 for investment.

Trust Companies' Figures.

Thirteen trust companies reported last year to the department of finance. Their aggregate assets amount to \$7,306,350. The companies are as follows: Canada Permanent Trust Company, Canada Trust Company, Capital Trust Corporation, Limited, Chartered Trust & Executor Company, Consolidated Trust Company, Eastern Trust Company, Financial Trust Company, Limited, Imperial Trusts Company of Canada, Mercantile Trust Company of Canada, Limited, Prudential Trust Company, Limited, Sterling Trusts Corporation, Trust Company of North America, Limited, Western Trust Company.

Loans on real estate are the trust companies' largest asset, totalling \$3,972,520, the others being office premises, \$276,206; loans, \$102,395; government and municipal securities, \$876,760; loans on bank stocks, \$127,525; loans on company stocks, \$110,692; loans on securities, \$536,832; cash, \$172,448; interest due, \$175,323; office furniture, \$30,505; unpaid fees, \$68,830; other property, \$851,133.

The market value of real estate, government securities, etc., over book value, is shown as \$5,181.

The liabilities to shareholders are: Capital stock, paid up, \$5,307,128; reserve, \$1,159,479; unpaid dividends, \$53,599; unappropriated profits, \$180,139; other liabilities, due for interest, \$15,130; for salaries, etc., \$10,116; borrowed on credit of company, \$430,457; all other liabilities, \$153,179, making a total of \$7,306,350. The total liabilities to the public amount to \$40,730,033, consisting of money in trust for investment, \$3,113,170; trust funds for investment, guar-

anteed, \$6,613,929; estate trusts and agencies under administration, \$31,002,934. These investments on trust account consist of first mortgages on property in Canada, \$8,397,041; on property outside of Canada, \$3,870,474; government securities in Canada, \$280,245; government securities outside Canada, \$231,579; municipal securities, \$3,702,963; loans on municipal securities, \$30,510; school district bonds, \$126,222; securities authorized by terms of trust, \$5,804,827; investments other than the foregoing, \$5,744,482; holdings, which the companies as trustees kept uninvested, cash, \$778,473; uninvested and unrealized trust or agency assets, \$11,763,217, making a total investment on trust account of \$40,730,033.

An average rate of dividend of 5.9 was paid by the trust companies to their shareholders, which absorbed \$250,559. The average rate per cent. earned upon the trust companies' own investments was 6.935, upon trustee investments in mortgages, etc., 6.83, upon government securities, 5.8783, upon municipal and school securities, 6.3375, while the rate earned on other investments was 5.333.

NICKEL COMPANY'S PLANS

The International Nickel Company will spend about \$2,000,000 on the proposed new refinery which the company is to erect in Canada to produce all nickel needed by Great Britain and overseas dominions. This expenditure will be met from the company's treasury funds which approximate \$8,500,000.

A subsidiary concern has been formed in Canada to own and operate the new plant, and its \$5,000,000 capital stock will be owned by the International Nickel Company.

Under the agreement entered into between the company and the Canadian government officials, British nickel requirements will be made in Canada, the balance at the New Jersey refinery. It is estimated that the cost of producing refined nickel in Canada will be but little higher than in the older plant in the United States. Arrangements have already been entered into whereby the company will secure its power from the government at but little over the actual cost price.

ROBERT SIMPSON WESTERN, LIMITED, BONDS

An offering of bonds pointing to an interesting trade development in Canada is that of \$600,000 6 per cent. first mortgage serial gold bonds of the Robert Simpson Western, Limited, being made by the Dominion Securities Corporation, Toronto.

The Robert Simpson Western, Limited, has been incorporated and organized for the special purpose of handling the mail order business of the Robert Simpson Company, Limited, Toronto, in Western Canada from the city of Regina. The western company's entire issued capital stock is practically all owned and held by the Robert Simpson Company, Limited, which unconditionally guarantees payment of principal and interest of the former's bonds.

The assets behind the issue are the Robert Simpson Western, Limited—land, buildings and equipment, \$601,558; net liquid assets not less than \$600,000. The Robert Simpson Company, Limited—total net assets available for its guarantee of the bonds as per the last annual report, \$5,807,159, making total assets of \$7,008,717, as against the present serial issue of \$600,000. The annual interest on \$600,000 6 per cent. serial bonds is \$36,000, and the annual repayment of principal, \$40,000. An analysis of the total mail order business of the parent company for the year 1915 shows that the western section earned the sum of \$222,482, (or nearly three times the annual serial bond requirements). The average annual surplus of the Robert Simpson Company, Limited, available for guarantee (for four years ending January 31st, 1916), is \$680,041.

The bonds are coupon bonds in denominations of \$500 and \$1,000, unconditionally guaranteed by Robert Simpson Company, Limited, due July 1st, 1917-1931, and are redeemable at 103 on any interest date after July 1st, 1919.

Mr. William Wallace, for some fifteen years general manager of the Crown Life Insurance Company, has resigned, and has been succeeded by Mr. H. Roy Stephenson, the actuary and assistant general manager of the company.

(being at the rate of eleven per cent. per annum) upon the capital stock has been declared for the current quarter, and that the same will be payable at the office of the Bank, in Montreal, and at the Branches, on and after the SECOND DAY OF OCTOBER NEXT, to Shareholders of record on 15th September, 1916.

THE ANNUAL GENERAL MEETING

of the Shareholders of the Bank will be held at its banking house, in this City on MONDAY, the 6th of NOVEMBER NEXT, at three o'clock in the afternoon.

By order of the Board.

EDWARD C. PRATT,
General Manager.

Montreal, 18th August, 1916.

AUGUST FIRE LOSSES

Twelve Large Fires—Lightning was Cause of Several Farmers' Losses

The *Monetary Times'* estimate of Canada's fire loss during August amounted to \$803,109, as compared with July loss of \$1,159,285 and \$403,693 for the corresponding period of last year. The following is the estimate for the August losses:—

Fires exceeding \$10,000	\$623,000
Small fires	84,565
Estimates for unreported fires	95,634
	<u>\$803,109</u>

The *Monetary Times'* record for the past four years shows the following monthly losses:—

	1913.	1914.	1915.	1916.
Jan.	\$3,913,385	\$2,796,312	\$1,249,886	\$1,649,217
Feb.	2,037,386	2,920,749	1,019,556	3,275,600
March	1,710,756	2,660,666	1,631,696	1,406,501
April	1,470,622	1,916,235	1,463,747	1,460,437
May	2,123,868	1,935,516	881,855	1,850,205
June	3,069,446	1,267,416	1,157,156	494,557
July	2,579,698	2,033,139	773,260	1,159,285
August ...	3,034,775	2,921,379	403,693	733,199

The fires reported in August at which the losses amounted to \$10,000 and over were:—

Blind River, Ont., Aug. 1	Business section ..	\$175,000
St. Anne de la Pocatiere, Que. ...	Convent	50,000
Winnipeg, Man., Aug. 2	Factory	100,000
Aylmer, Que., Aug. 8	Store	10,000
Winnipeg, Man., Aug. 5	Club house	11,000
Grand Prairie, Alta., Aug. 10..	Business section ..	30,000
Winnipeg, Man., Aug. 11	Warehouse	25,000
Barrie, Ont., Aug. 15	Steamer	10,000
Pembroke, Ont., Aug. 15	Mills	10,000
Erindale, Ont., Aug. 16	Barns, etc.	15,000
Drummondville, Que., Aug. 21..	Factory	125,000
Shawinigan Lake, B.C., Aug. 22	Hotel	12,000
New Westminster, Aug. 25	Shingle mill	20,000
Bromhead, Sask., Aug. 30		50,000

Among the causes were lightning 18, spontaneous 4, matches 4, gasoline explosions 3, gasoline stove exploded 1, collision 1.

The structures damaged and destroyed were 23 barns and stables, 17 residences, 8 stores, 4 factories, 2 business sections, 2 theatres, 2 hotels, 2 bridges, 2 clubhouses, 2 mills, 2 steamers, 2 warehouses, 1 convent, 1 garage, 1 engine shed, 1 electric generator, 1 newspaper office, 1 icehouse, 1 yacht, 1 school.

The following table compiled by *The Monetary Times*, shows deaths caused by fire during the first eight months of 1916 compared with previous returns:—

	1909.	1910.	1911.	1912.	1913.	1914.	1915.	1916.
January ..	16	27	27	27	14	26	3	10
February ..	8	15	12	11	21	18	11	20
March	16	20	18	24	22	27	23	23
April	18	37	20	15	11	22	14	6
May	21	15	28	18	33	■	5	14
June	16	52	13	6	18	12	2	6
July	4	15	110	9	9	■	13	268
August ...	17	11	22	16	29	3	14	30

The fires at which fatalities occurred were:—

Belleville, Ont., Aug. 9		1
Quebec, Que., Aug. 10	Burning residence	2
Chatham, Ont., Aug. 10	Burns	1
Toronto, Ont., Aug. 14	Oil stove exploded	1
Drummondville, Que., Aug. 21	Explosion	10
Winnipeg, Man., Aug. 23	Matches set clothing alight	1
New Liskeard, Ont., Aug. 25..	Forest fires	12
Cornwall, Ont., Aug. 25	Burning building	1
Halifax, N.S., Aug. 28	Burning steamer	1
		<u>30</u>

BRITISH COLUMBIA LARGE COPPER PRODUCER

Miners Took Out 56,000,000 Pounds Last Year—Provincial Returns

"The gross value of British Columbia's mineral production for 1915 was \$29,447,508, an increase over that of the year 1914 of \$3,058,683, or nearly 12 per cent. The gross value of the metallic minerals recovered in 1915 was \$20,762,149, which represents an increase over last year of nearly \$5,000,000, a percentage increase of about 31 per cent." according to the return of Mr. W. F. Robertson, provincial mineralogist.

A comparison of the returns of the past two years is as follows:—

	1914.		1915.	
	Quantity.	Value.	Quantity.	Value.
Gold, placer (ounces) ..		\$ 565,000	38,500	\$ 770,000
Gold, lode (ounces) ..	247,170	5,109,004	250,021	5,167,934
Silver (ounces)	3,602,180	1,876,736	3,366,506	1,588,991
Lead (pounds)	50,625,048	1,771,877	46,593,590	1,939,200
Copper (pounds) ..	45,009,699	6,121,319	56,918,405	9,835,500
Zinc (pounds)	7,866,467	346,125	12,982,440	1,460,524
Coal (tons, 2,240lb.) ..	1,810,967	6,338,385	1,611,129	5,638,952
Coke (tons, 2,240lb.) ..	234,577	1,407,462	245,871	1,475,226
Miscellaneous products ..		2,852,917		1,571,181
		<u>\$26,388,825</u>		<u>\$29,447,508</u>

Not Many New Producers.

As the duration of the war was not expected to be very long, those mines not prepared to make a production in the near future could not expect to profit by higher prices, and, as capital was in demand for other purposes, the amount available for development was very slight.

The result has been that actual producers increased their outputs, but few new ones began a production, so that the amount of new development done throughout the year has been less than normal.

Copper Half of Output.

The features of the year are the very great increases in the copper and zinc productions, and, as the prices of both these metals seem to show no indication of serious decrease, while the present developments of properties give reason to expect further large increases in 1916, there is every cause to believe that the coming year will be a record one as far as the metalliferous mines are concerned.

It is to be noted that this past year the value of the copper output was practically 50 per cent. of that of the gross metalliferous production of the province.

The amount of copper produced by smelting in the province in 1915 was 56,918,405 lbs. fine copper, valued at the average New York market price for copper at \$9,835,500. These figures represent the amount of copper actually recovered, as nearly as it is possible to ascertain; the amount of copper really in the ores mined would be approximately 25 per cent. greater.

The amount of copper produced during the year 1915 is the largest in the history of copper-mining in the province; the highest previous production, made in 1912, was 51,456,537 lb., valued at \$8,408,513.

CANADA'S INCREASING TRADE RETURNS

Canada's total trade for July amounted to \$238,860,488, and for the four months ending July 31st it reached the total of \$766,372,832, as against \$371,646,906 in the corresponding period of last year.

The monthly summary shows that both exports and imports have contributed to the aggregate increase, with the larger figures in the export column. Imports for consumption amounted in value to \$63,622,587 in July as compared with \$26,622,190 in July last year, while in the four months' period they rose from \$134,729,377 to \$249,867,767. The July exports reached a value of \$104,064,270 compared with \$45,590,038.

Berlin	426,935		

ONTARIO'S BREACH OF FAITH?

Premier Hearst is expected to make a public reply to Prof. Mavor's revival in the London, England, press of the old controversy over the Ontario government's alleged breach of faith with British investors in Ontario electric undertakings, writes Windermere to The Montreal Star.

Commenting on Mr. Mavor's letter to the Economist, the finance editor of the Morning Post says:—

"If the interests of British investors in some great industrial undertakings in Canada are found to have suffered, not as a result of ordinary business vicissitudes, but by reason of actual domestic legislation, then the damage done to Canadian credit would be infinitely greater than any conceivable local advantage secured, whether of a political or a financial character.

"There must be no question of infringing rights which have been given private enterprises for consideration. It is on that point that clear statement is to be desired."

WEEKLY RAILWAY EARNINGS

The following are the earnings of Canada's transcontinental railways during the three weeks ended August 21st:—

Canadian Pacific Railway.				
	1916.	1915.		
August 7	\$2,985,000	\$1,787,000	+ \$1,198,000	
August 14	2,943,000	1,815,000	+ 1,128,000	
August 21	2,860,000	1,956,000	+ 904,000	
Grand Trunk Railway.				
August 7	\$1,256,376	\$ 993,773	+ \$ 262,603	
August 14	1,236,989	1,004,412	+ 232,577	
August 21	1,304,848	1,052,483	+ 252,365	
Canadian Northern Railway.				
August 7	\$ 868,000	\$ 438,500	+ \$ 429,500	
August 14	841,500	427,600	+ 413,900	
August 21	846,300	465,400	+ 380,900	

CANADIAN SECURITIES AND MOBILIZATION

Scheme B of the new British treasury plan of hypothecating Canadian and United States securities as collateral for British loans in New York, especially in lots smaller than even thousand pounds, has caused many inquiries in British financial papers, which show that with Canadians over here, it is little understood, writes Roland Hill to the Montreal Star.

One anxious Canadian investor asks how he can lend his Canada 4 cents redeemable at par in 1940, bought by him, having a deposit value now of only 84½.

He insists that while quite willing to lend them if they be returned, it is quite unfair that the British treasury should have the option only of paying him back in cash at the rate of 89½.

In the opinion of The Times, where this case is quoted, there is not the slightest chance of the government selling such deposited securities, so that depositors are likely to get them back intact after receiving an extra ½ per cent. interest in addition to dividends for the currency of the loan. If they imagine the treasury has the option of paying them back in cash to the amount of present deposits value, plus 5 per cent. without having sold them, that is a complete mistake.

Mr. H. D. Burns succeeds Mr. C. H. Easson as Toronto manager of the Bank of Nova Scotia. Mr. Burns was born in Digby, Nova Scotia, and has been connected with the Nova Scotia Bank for many years as manager and superintendent.

The Vulcan Iron Works is now negotiating with New Westminster, B.C., council for the lease of a waterfront site for the establishment of a boiler shop and foundry, and eventually a steel shipbuilding and repair yard, which it is proposed to equip with a floating drydock.

Mr. Frederick G. Donaldson is joining the staff of the Montreal Trust Company as assistant general manager. Captain Vincent J. Hughes, the general manager of the company, is going overseas with the Irish Rangers. Mr. Donaldson, until recently, was on the staff of the Royal Trust Company.

Ontario Insurance Rates Enquiry

Commission's Preliminary Sitting Reveals Extent of Investigation. Fire, Accident, Automobile, Plate Glass and Boiler Companies' Business Methods Under Examination.

UNUSUAL interest in insurance circles was aroused by the appointment of a commission to inquire into fire insurance rates in Ontario. Justice C. A. Masten has been chosen as the commissioner to conduct the investigation. At the preliminary sitting Justice Masten outlined the scope of the inquiry, which was indicated in last week's issue of *The Monetary Times*, as follows:—

"(1) To inquire into and report upon:—

"(a) The methods by which insurance companies registered or licensed by the province of Ontario, their representatives or agents, transact all classes of business except the business of life and marine insurance, but more particularly as to fire insurance, automobile insurance, plate glass insurance, boiler insurance and accident insurance.

"(b) The methods, rules, regulations and practices of all associations, of such insurance companies and associations of representatives or agents of such insurance companies with regard to making, promulgating, enforcing or controlling rates, commissions, forms, clauses, contracts or the placing of insurance.

"(c) The advisability of adopting statutory conditions for automobile, plate glass, boiler and accident insurance policies.

"(d) The existing laws of Ontario in relation to the foregoing and their practical operation.

"(e) The existing laws in Ontario in relation to unlicensed insurance and their practical operation.

"(f) Any matter arising out of the foregoing which it is necessary to investigate with a view to the above inquiries.

"(2) To make any such recommendations in regard to the above as he may think advisable."

Associations and Companies Interested.

The following associations were represented: Canadian Fire Underwriters, Accident Underwriters, Mutual Underwriters, Automobile Underwriters, and the Glass Underwriters and the Fire Chiefs' Association. Among the representatives present of the various companies doing business in Ontario were: Messrs. F. J. Lightbourn, Maryland Casualty; J. B. Laidlaw, Norwich Union; C. H. Neely, Ocean Accident; C. H. C. Fortner, Scott and Walmsey Companies; Mr. Ewing, Mutual Fire Companies; J. A. Robertson, secretary of the Canadian Fire Underwriters' Association; C. S. Wainwright, British-American and Western Companies; A. Wright, London and Lancashire; A. C. Stephenson, British Crown; P. A. McCallum, Hartford; A. M. M. Kirkpatrick, Home; J. R. Stewart, Aetna; T. H. Hall, General; T. E. Richardson, New York Underwriters; J. M. Murphy, Springfield; T. J. Barron, Merchants' Casualty; P. Robertson, insurance broker; and Mr. R. J. McClennan, on behalf of the Glass Underwriters' Association. Mr. D. L. McCarthy is the counsel watching the proceedings on behalf of the Canadian Fire Underwriters' Association.

No one appeared as representing any interests that may have given rise to this investigation. Hon. Justice Masten stated that the inquiry would be conducted on the best methods conducive to efficiency and expediency, and suggested that the principal consideration would be the rates of all classes of insurance with the exception of life and marine, which do not enter into this investigation. These will be considered in all their phases such as making the rate, legislation, etc.

Reports After Investigation.

The insurance department of Ontario was represented by deputy insurance superintendent Vale and provincial fire marshal E. P. Heaton, and evidence was submitted by both of these officials. Mr. E. P. Heaton submitted a complete report, resulting from an investigation conducted at the request of the attorney-general of Ontario, and divided into three parts, the first dealing with conditions in the province of Ontario and the other two parts with data and exhibits relating to insurance rates in the United States. Mr. Heaton's report, in part, reads as follows:—

"The fire insurance business of the province of Ontario is transacted by a number of companies which, by common consent, are known as 'Tariff' and 'Non-Tariff' companies, and before defining these terms or explaining how rates are made and maintained, it will be well to present a synopsis showing how the business of the province is divided between these two classes of companies.

"I have therefore prepared two statements which clearly show the distribution of the fire insurance business of the province and it should be clearly understood at the outset, that by 'fire insurance business' is meant the premiums paid in cash to all companies on the insurance register, licensed to transact such business, excluding, however, the strictly mutual companies, about 70 in number, whose business is carried on on the assessment plan, which have not been considered in the following tables:—

"Table No. 1 showing the distribution of Ontario business at various periods since 1905 between 'Tariff' and 'Non-Tariff' companies."

Year.	No. of companies on register	Tariff companies.		Non-tariff companies.	
		No.	Percentage.	No.	Percentage.
1905 ..	49	31	79.09	18	20.91
1910 ..	68	34	77.00	24	23.00
1912 ..	86	58	80.56	28	19.44
1913 ..	87	62	81.18	25	18.82
1914 ..	88	65	81.57	23	18.43

"Table No. 2 showing the distribution of the place of origin of the companies on the insurance register as at June 30th, 1915, classified as 'Tariff' or 'Non-Tariff' companies."

Place of origin.	No. on register.	No. of companies.	
		tariff companies.	non-tariff companies.
Dominion and provinces	20	15	5
Province of Ontario	16	2	14
British and French	29	28	1
United States	23	20	3
	88	65	23

Cohesion of Important Interests.

"It will be readily apparent from a study of these tables that the 'tariff' companies not only transact by far the largest proportion of the business, but that it has been one of almost continuous growth, some of which, it must be understood, has come through a process of absorption of the non-tariff by tariff companies. Attention may be drawn to the fact that more than one-half of the non-tariff companies are of Ontario origin. Of the total of 23 non-tariff companies, 19 are operating under provincial charters, and as far as I am able to ascertain no effort has been made to induce them to join the Canadian Fire Underwriters' Association. That so large a number of British, French and United States companies are members of the Canadian Fire Underwriters' Association demonstrates a cohesion of important interests which can and does look with equanimity upon competition offered by companies possessing limited resources and enjoying restricted confidence with the insuring public.

"Tariff Companies" Defined.

"It should be made clear that the term 'tariff companies' is applied to those which have become associated together as members of the Canadian Fire Underwriters' Association.

"In view of the large proportion of business transacted by the tariff companies, it is necessary that I should present a clear view of the organization known as the Canadian Fire Underwriters' Association, and explain the plans, powers and scope of its operations, so that its influence upon the fire insurance situation of the province may be readily determined; for the control of the business, to all intents and purposes, lies with the companies' members of that association."

Then Mr. Heaton, after outlining the history, constitution, scope of operations of the Canadian Fire Underwriters'

SIR EDWARD H. HOLDEN, Bart., Chairman.

Association, together with the rating system, tariff companies and non-tariff companies and other technical underwriting topics, evolves the following conclusions:—

"1. That the practical control of fire insurance rates within the province is in the hands of companies, members of the Canadian Fire Underwriters' Association (known as tariff companies), who transact over 80 per cent. of the entire business of the province.

"2. That the business of the tariff companies has been one of gradual growth and that of the non-tariff companies one of gradual decline.

"3. That the main purpose of the Canadian Fire Underwriters' Association was and is the maintenance of fire insurance rates.

"4. That every risk (save as noted) insured in Ontario by the tariff companies is rated by the association and below that rate no member of the Canadian Fire Underwriters' Association is permitted to insure.

"5. That the members of the Canadian Fire Underwriters' Association are rigidly bound to observe all of its rates, rules and regulations.

"6. That infractions of rates, rules or regulations involve the offenders in penalties which in some instances, include monetary fines.

Stamping System Used.

"7. That in order to ensure strict adherence to rates, rules and regulations a detective scheme known as a 'Stamping System' was organized and put in operation in certain important districts.

"8. That with the unexpressed but obvious object of restricting competition, the Canadian Fire Underwriters' Association prohibits business intercourse with non-tariff companies.

"9. That with a similar object in view the association has extended its rules to suppress or limit forms, clauses and conditions advantageous to the insuring public readily granted in other countries and acceptable to companies here if allowed to exercise their own judgment.

"10. That with a similar object in view the association has entered into an agreement with the only insurance map and plan publishers in Canada to restrict the use of maps and plans to members of the association, thus producing in actual practice a complete monopoly in favor of the tariff companies.

"11. That the attitude of the association to the insuring public has been arbitrary and autocratic.

"12. That in many instances the association has caused to be cancelled policies of insurance for many large insurers, having Dominion wide business and branches, notwithstanding the willingness of individual members to accept the same, and the effect of such action on its part has been to require large insurers to seek unlicensed insurance.

Statistics in Fault?

"13. That the Canadian Fire Underwriters' Association has admittedly failed to make any serious effort to obtain reliable statistics upon which the adequacy of rates might with some degree of confidence be predicated.

"In part No. 1, I have endeavored to limit the scope of the report to the furnishing of data on the control of rates within the province, and having established where it lies, have endeavored to show how it is made and maintained. I would also like to emphasize a remark previously made that in the absence of any authority I have had to pick up information and documents from many sources. An examination of the Canadian Fire Underwriters' Association by a commission authorized to hear witnesses under oath and to compel the production of papers would, I have every reason to believe, produce much corroborative proof of the conclusions I have stated, as also would it doubtless reveal other important ramifications which I have had no means of ascertaining or developing in this report."

What Insurance Department Does.

In part No. 2 of the report Mr. Heaton made reference to some commendable features of the work of insurance rating associations, and showed how their activities may be controlled and regulated.

Deputy superintendent Vale, in answer to the incisive questions of the commissioner, outlined the only control over the insurance companies as contained in the Ontario insurance act, and suggested that there should be more control over the companies, specifically mentioning difficulties and complaints reported to the department regarding the adjust-

ment of losses. Mr. Vale stated that the insurance department had nothing on file regarding rates in Ontario and that it had no control over the rates charged. There should be a certain uniformity in accident policies and they should be divided into two classes, personal accident and health. As regards statutory conditions in automobile, plate glass and accident policies, he thought such conditions should be placed in every policy issued in Ontario. His suggestions regarding boiler insurance were that inspectors appointed should be required to pass an examination and receive a license. Mr. Vale intimated that companies were licensed, agents were licensed, and the adjuster who settles the loss should be licensed as well.

Fire Chiefs' Resolution.

Fire chief Howard, Peterboro, on behalf of the Dominion Fire Chiefs' Association, presented the following resolution:

1. We deplore the awful fire waste of this country and believe it to be, among other things, one of the contributory causes of the prevailing high rates of insurance. 2. We also deplore the prevalent practice of what is termed by us as "over insurance." 3. The looseness with which the fire insurance business is being conducted by certain insurance agents. 4. The apparent indifference on the part of certain municipal boards having control of the fire departments of certain cities and towns. 5. The lack of legislation to govern the following, among other things: (a) To prohibit the accumulation of combustible rubbish in and about congested districts of cities and towns; (b) to create and maintain certain restrictions in connection with the erection of all classes of buildings, having regard to the prevention of fire; (c) to place the control of fire departments in cities and towns in the hands of an independent local commission, consisting of not more than three members; (d) debentures—the amendment of the present act, governing municipal institutions, R.S.O., chapter 129, section 407, to read "\$25,000," instead of "\$5,000," and also making the act applicable to cities as well as towns and villages; (e) the levying of a tax by each and every municipality having a population of 5,000 and upwards (similar to the public schools act), for the purpose of equipping and maintaining a standard and efficient fire brigade; (f) to compel every municipality having a population of 5,000 and upwards to maintain a fire brigade of certain given standard and also a system of waterworks; (g) to prohibit the laying of water mains, in cities and towns, below a given size; (h) to establish the recognized standard of 7½ threads to the inch for fire hose couplings, fire hydrant nipples and other fire fighting appliances requiring the use of screw threads; (i) the establishment of a fire prevention bureau for the province of Ontario, similar to those of New York City, Boston and other large United States centres.

The commission will resume its sittings on October 10th, and the commissioner will receive specific evidence on the matter of rates.

ORGANIZATION OF NEW INSURANCE COMPANIES

The organization of insurance companies in Canada, says Insurance Superintendent G. D. Finlayson in his report for 1915, has in the past been attended as a rule by very great expense. The present act contains a provision by which the expenses of organization must be defrayed out of premium contributed by the shareholders of the company, so that on starting business the company's capital shall be unimpaired. While this provision is a great advance on the pre-existing legislation, it is desirable, says Mr. Finlayson, that discretion should be given to the treasury board to refuse a license to a company in which the expenses of organization, even if defrayed from premium on capital, have been unduly great. The amendment, which is necessary, is a provision that all payments for commission for sale of stock and other expenses of organization other than for salaries, travelling expenses and such unavoidable expenses, shall be deferred until after the company is in a position to commence business, and that if it appears to the treasury board that the liabilities arising out of the organization of the company are excessive, the license shall not be granted.

Under the British government's insurance scheme against air-craft damage, 168,000 policies covering \$8,000,000 have been issued.

Those Unable to Look After Financial Affairs

This Corporation offers its services to those who, on account of absence from home, ill-health, or other reasons, are unable to look after their financial affairs, and desire them to be carefully and economically managed. Interview or correspondence solicited.

BRITISH COLUMBIA'S RAILWAY HISTORY

Premier Bowser Outlines Development of Transportation Facilities on the Pacific Coast

The first railway to enter British Columbia, completed in 1885, was the Canadian Pacific Railway. It, however, was the product of the Dominion government, so to speak, as a national undertaking and the result of an agreement with British Columbia, which entered Confederation on an agreement styled the "Terms of Union in 1871"—whereby the Dominion government agreed to connect by railway British Columbia with the eastern system. This was eventually accomplished by the Dominion government entering into an agreement with a syndicate of influential men, including the late Mr. J. J. Hill, whereby the syndicate built the railway in consideration of \$25,000,000 and 25,000,000 acres of land and certain completed portions of government construction, stated Hon. W. J. Bowser, premier of British Columbia, in outlining the railway history of the province, to a representative of the Wall Street Journal. There were several modifications of the contract, however, before it was completed. The government of Canada loaned the syndicate \$30,000,000 which was repaid with the exception of an amount hypothecated in connection with the land grant. As a consideration for getting the railway, British Columbia gave to the Dominion government what is known as the railway belt, 20 miles on each side of the railway for 500 miles through the province. It was originally intended that this land should be given to a railway company in the way of subsidy, but under altered terms it was retained by and is still administered by the federal government.

Canadian Pacific Branch Lines.

The Canadian Pacific Railway, after constructing the main line to Vancouver, 512.5 miles long, turned its attention to branch lines, which up to the present number 14 (in British Columbia), with a mileage of 895 miles. Some of those were aided by the Dominion government, some by the provincial government and some by both.

The Canadian Pacific Railway has just completed the Kootenay Central from Golden on the main line to Colvalli on the Columbia River near the United States boundary line, a distance 168 miles. It received aid from the Dominion government to the extent of \$1,065,856 in cash. This railway connects the two main lines of the Canadian Pacific Railway in British Columbia.

United States Road Competes.

The most serious competitor the Canadian Pacific Railway has had in southern British Columbia is the Great Northern. It has obtruded, so to speak, a number of branch lines from the south side of the line into what the Canadian Pacific Railway naturally regarded as its own territory. The Corbin lines, to which important extensions and additions have been made, made up the nucleus of the system which has its focus for the main part in Spokane. Under the title of the Victoria and Eastern Railway and Navigation Company in British Columbia, the Great Northern, west of the Columbia River, owns lines as follows: From the United States boundary to Rossland, 9 miles; Michel to Gateway, 72 miles; Nelson to Waneta (Fort Shepherd), 59 miles; Laurier to Danville, 18 miles; Midway to Molson, 31 miles; Chopaka to Brookmere, 97½ miles; Sumas Landing to Cloverdale, 38 miles (about); Abbotsford to Huntingdon, 4 miles; New Westminster to White Rock 23 miles; Guichon to Cloverdale, 17 miles; Cloverdale to Vancouver, 30 miles. The Great Northern also has a short line in Vancouver Island, from Victoria to Sidney, 17 miles in length, doing a local business.

No subsidies, provincial or federal, were given on account of these lines, with the exception of the Nelson and Fort Shepherd, which obtained a land grant of 614,000 acres, but prior to the time it became part of the Great Northern.

Canadian Northern's Building.

Three other important railway enterprises affect British Columbia. Each is independent of the others. Canada has now three trans-continental railways, all of which have their termini in British Columbia. The Canadian Northern is made up of a series of lines from ocean to ocean, some of which were acquired and others built to fit in, Messrs. Mackenzie and Mann, the builders, having a transcontinental line in view. The Canadian Pacific Railway and Grand Trunk Pacific were built on definite and continuous lines for national

purposes, whereas the Canadian Northern Railway was an evolution. The first occasion when the Canadian Northern management turned its attention to British Columbia as a field for operation was a proposal to build through British Columbia via Edmonton, the Yellow Head Pass and Bute Inlet, with a bridge across Seymour Narrows and then down the island of Vancouver to Victoria. The financial support offered by the province was not considered a sufficient inducement and the proposal fell through. In 1909 the government of the province formulated a policy of guarantee of interest on railway bonds, which, judged by the experience of the Dominion and of other provinces of Canada was deemed to be the soundest form of assistance.

Guaranteed Company's Bonds.

Under the terms of a statute passed in 1910 the province agreed to guarantee the bonds of the Canadian Northern Pacific Railway Company, especially incorporated in respect to British Columbia, and under provincial jurisdiction, at 4 per cent. at the rate of \$35,000 per mile for 500 miles on the island of Vancouver, from Victoria to Barkley Sound, the government taking a first mortgage on the entire assets of the company as security.

In 1912 provision was made for the extension of the line of Vancouver from Barkley Sound to the North end of the island, 150 miles, and on the mainland into the Okanagan Valley, an aggregate distance of 150 miles, on the same conditions as in 1910. In 1913 extensions to Vancouver from New Westminster, 11 miles, and to Steveston, 15 miles, and on the island of Vancouver, from Victoria to Union Bay, 18 miles, to connect with a ferry to Vancouver, were provided for.

In 1914, owing to greatly increased cost of construction in labor and material, the amount of guarantee was increased from \$35,000 to \$45,000 per mile, for a mileage of 500 miles.

As the result of a demoralized money market and the war it has been difficult for railway companies to negotiate their bonds and therefore not possible for the Canadian Northern Railway to carry out its entire programme in British Columbia. The main line of the mainland is completed and is in operation; the line from Union Bay to Victoria is about completed, and the contract for the ocean ferry to Vancouver has been let. The line from Victoria to Barkley Sound has been graded but until conditions improve will not be proceeded with.

(To be Concluded.)

BRITISH LOAN OVER-SUBSCRIBED

Messrs. J. P. Morgan and Company, managers of the syndicate which underwrote the \$250,000,000 2-year 5 per cent. British government loan closed the subscription books Saturday instead of Monday, the issue having been over-subscribed. As stated last week in *The Monetary Times*, this issue has been one of the most successful offerings in the United States market. Subscriptions were received from all sections of the United States. The list included all classes of the investing public and a wide distribution of the notes has been secured.

UNITED STATES TRADE IN THE WEST

Value of the Business is About \$400,000,000—United States Settlers Are Important Factor

While war orders explain in great measure the increase of United States exports, they play no part in the trade with Western Canada. This is all normal and healthful domestic trade. There came into Canada last year American commodities whose money value was almost exactly \$345,000,000. That was in excess of the trade the year before of about \$35,000,000.

Various boards of trade in Western Canada report that traffic from the United States is not only being maintained, but is increasing, so that at the end of this calendar year it may be possible to report a money value of nearly \$400,000,000 for commodities exported from the United States to Canada, comments Holland in the Wall Street Journal in discussing statistics of Mr. G. C. Porter, of Winnipeg. The movement is so great that the Canadian authorities are now taking earnest heed of it, and the government at Ottawa has perfected a policy whose purpose is to determine the character of the manufactured articles for which Canada is paying, principally to the United States, so that it can be decided whether or not these commodities may sooner or later be produced in Canada.

Justified Pioneers' Forecast.

The late Lord Strathcona and his associate in the opening up of the prairie provinces of Canada, Lord Mount Stephens, would have been amazed had they lived long enough to read the official report which tells of the trade of Western Canada with the United States and of the movement of American farmers into the prairie provinces. These great men looked forward to a wonderful development of these agricultural lands after the transcontinental railroad which they planned was completed. But they were not accustomed to think of a great trade with the United States. They looked into a future which would show vast harvests of wheat, sufficient not only for Canada, but also providing

a great surplus which could be exported to Europe in competition with the wheat of the United States. In the last two or three years Canada has justified the wheat forecast made by these men.

United States Industries in Canada.

Within a few years, some of the larger manufacturing firms of New England, Detroit, Cincinnati, St. Louis and Minneapolis have had their representatives in all parts of Western Canada where there is promise of business. Yet a few years ago there was not a representative of American industry in that part of Canada. Not in South America is there greater energy or skill revealed in getting trade for the American manufacturers than is the case in Western Canada. One of the reasons why the representatives of these companies are so well received is to be found in the fact that the United States, especially since the European war began, has been unwillingly absorbing Canadian securities. Americans have invested millions in these securities at 6 per cent., and they are willing to take millions more.

Bond Refunding Plan.

In Western Canada much interest and gratification have been expressed over a recent piece of financing perfected on the one hand by Manitoba and on the other by a syndicate of which Messrs. J. P. Morgan and Company are the head. By this transaction there may be transferred \$53,000,000, represented by provincial and municipal bonds which have been held in London, to New York. The transaction enabled England to pay a part of the charges for purchases in the United States. Full particulars of this plan have previously appeared in *The Monetary Times*.

One of the interesting features of trade development in western Canada is the large amount of American money which is in circulation there. Sooner or later, much of this goes back to the United States. St. Louis gets a considerable portion of it through her shipping of shoes and leather goods to western Canada, far surpassing Boston in this trade, and Detroit is receiving and will continue to receive a great deal of this money in payment for automobiles. The motor cars of Detroit manufacture are especially and almost exclusively favored in western Canada. The great mail order business of Minneapolis and St. Louis are also cultivating a large trade with western Canada.

Demand from Americans.

Mr. Porter says that it has been observed in western Canada that in the United States students of industrial economy appear to be greatly interested in the official figures which show that in Manitoba, Saskatchewan and Alberta provinces there is now a population of three hundred thousand, every man of whom came within the last five or six years from the United States. Almost all are farmers. It is partly due to this American population that the surprising demand for American commodities has come to the industries of the United States.

Much has been said about the vigorous trade war which will be carried on after the European struggle is ended. But already Canada has instituted a policy which is designed to increase greatly Canadian manufacturing industries, and the representatives of American industries will speedily discover that they are encountering strenuous but honorable competition in western Canada. There appears to be some change of sentiment in Canada respecting reciprocity—for instance, the Grain-Growers' Association, which has a membership of a hundred thousand, is in favor of free wheat and an open market. The influence of this association is great, and it may be that ultimately it will lead to the opening of new negotiation for reciprocity.

In Canada the situation is regarded as much more promising for trade with the United States and for the industrial progress of this country than any which is observable in remote fields, or which may be created by new markets in South America. One of the reasons is found in the fact that trade routes are well defined. No unknown element enters into the situation. Already Canada is the second best customer of the United States, and, leaving out cotton, is likely to become in a few years our best customer.

INVESTMENT SERVICE

Investors usually purchase bonds with a view to holding them to maturity, but it frequently happens that they later require the money for other purposes and wish to dispose of their investments.

It is our aim to provide a ready market for any securities purchased through us, and we shall always be pleased to facilitate our clients in this way.

This applies, of course, to the forthcoming Dominion of Canada War Loan, for which we are taking subscriptions. We have pleasure in extending to you our facilities in that connection.

WHEAT CROP OF 165,000,000 BUSHELST?

Estimates and Reports from Saskatchewan, Alberta, Manitoba and Ontario—Fruit Prospects

"I have come to the conclusion that if we have 165,000,000 bushels of wheat this year in the three Canadian north-west provinces, that is all that can be expected," said Mr. J. Caruthers in Montreal.

Hon. A. P. McNab, minister of public works for Saskatchewan, has expressed the opinion that the wheat yield in Saskatchewan would amount to from ninety to one hundred million bushels, and that there would be a heavy crop of oats.

Where the Dominion government had furnished the seed two years ago, he declared there would be magnificent crops, and the yield would be exceptionally heavy in the Goose Lake, Swift Current, Conquest, Jack Fish and Battleford districts.

Red River Valley Wheat.

Wheat cutting began first in the Red River valley, where in some places the crop is more than half cut. In the northern areas of the province wheat harvesting is just starting. Oats and barley are generally a few days later than wheat. Wheat is badly rusted except in the northern areas, which are reported more promising, states the Manitoba government report. In the worst districts some fields will not be cut. Wheat will grade from 3 Northern downward. The yield will be low. Much less damage appears to have been done by rust to oats and barley. A few places have had slight frosts, but no damage has resulted; most places escaped. Summer fallows on heavier lands where rain was abundant have not been well freed of weeds, but in most other districts they are reported as being in good condition; some extra good. An increase in acreage devoted to fall and winter rye will occur in some places; other districts have practically no rye. Potatoes are rather a variable crop, much better in some places than others, but generally good. Roots excellent everywhere. Forage corn shows less acreage than one year ago, but is everywhere in splendid condition and if untouched by frost for the next three weeks, will provide a wonderful crop of forage. Hay yields have never been better, and the crop has been well saved. Live stock generally is in excellent condition with abundance of pasturage. Some fly annoyance occurred earlier in the season, but fall feed will be abundant. Harvest wages will be high.

Bright Prospects in Southern Alberta.

Southern Alberta has a magnificent crop of all grains, especially wheat, and, given until September 15 without frost, will harvest the largest quantity of high-grade wheat in her history, not even excepting the bumper year of 1915. Up to the present time wheat has not been touched by rust, frost or smut, and has only suffered the merest touch of damage from hail or insects, writes Miss E. Cora Hind, commercial editor of the Manitoba Free Press. Given the 20 days of present warm, fine weather, and the wheat yield in the territory west from Medicine Hat to Calgary and south to the boundary will average 25 and possibly 30 bushels of wheat to the acre; while it is difficult to estimate what the oats will yield if they finish without frost damage. Wheat cutting has started in a number of districts, but will not be general over the area specified for at least ten days.

Acreages in Ontario.

The following statistics of the principal field crops of Ontario for 1916 shows the acreage as compiled from individual returns made by farmers to the Ontario Bureau of Industries and the yields as estimated by a large and experienced staff of correspondents, who give probable yields according to conditions on August 10th, 1916.

Fall wheat—704,867 acres will produce 15,684,923 bushels, or 22.2 per acre as against 811,185 acres, 24,737,011 bushels and 30.5 in 1915; 685,692 acres yielded 14,333,548 bushels and 20.9 in 1914. The annual average for 34 years 1882-1915 was 21.3.

Spring wheat—144,305 acres, 259,257 bushels, or 17.7 per acre as against 162,142 acres, 3,439,949 bushels, or 21.2 per acre in 1915; 118,607 acres, 2,169,425 bushels, or 18.3 per acre in 1914. Average, 16.1.

Barley—527,886 acres, 13,748,585 bushels, or 26.0 per acre as against 522,318 acres, 19,893,129 bushels and 36.0 in 1915; 579,473 acres, 18,096,754 bushels, or 31.2 per acre. Average, 28.1.

Oats—2,689,762 acres, 77,974,156 bushels, or 29.0 per acre as against 2,871,755 acres, 120,217,952 bushels, or 41.9 in 1915; 2,776,883 acres, 103,564,322 bushels, or 37.3 in 1914. Average, 35.9.

Rye—148,738 acres, 2,594,253 bushels, or 17.4 per acre as against 173,736 acres, 3,210,512 bushels and 18.5 in 1915; 138,913 acres, 2,315,532 bushels, or 16.7 in 1914. Average, 16.5.

Peas—95,542 acres, 1,444,406 bushels, or 15.1 per acre as against 126,943 acres, 2,043,049 bushels and 16.1 in 1915; 177,856 acres, 2,609,585 bushels, or 14.7 per acre in 1914. Average, 19.1.

Beans—53,999 acres, 740,719 bushels, or 13.7 per acre as against 62,865 acres, 882,819 bushels, or 14.0 per acre; 51,149 acres, 835,895 bushels, or 16.3 in 1914. Average, 17.0.

Hay and clover (not including alfalfa)—3,294,419 acres, 6,739,259 tons, or 2.05 per acre as against 3,066,468 acres, 3,825,026 tons and 1.25 in 1915. Average, 1.43.

Cleared Land and Fallow.

The acreages in other crops for which no estimates as to yield have been made at this date are as follows: Buckwheat, 229,205 against 193,497 in 1915; corn for husking, 258,332 and 309,773; corn for silo, 439,411 and 443,736; potatoes, 139,523 and 173,934; mangel wurzels, 42,793 and 50,799; sugar beets, 22,482 and 22,890; carrots, 2,391 and 2,439; turnips, 91,670 and 97,451; mixed grains, 485,986 and 475,738; alfalfa, 177,565 and 165,284.

There are 3,409,581 acres of cleared land devoted to pasture; 331,736 in summer fallow; 280,653 in orchard; 22,817 in small fruits; 9,807 in vineyard; 57,107 in farm gardens; 38,566 in rape; 5,880 in flax; 7,997 in tobacco (Essex 5,826, Kent 1,444).

Ontario's Fruits.

Fruit—Apples will be comparatively light in yield, more especially the winter varieties. There has been much "dropping" during the summer, and considerable scab has been complained of. Pears have done relatively better, but will be only about half a crop. Statements regarding the yield of peaches range from poor to good; the crop will probably be about a medium. Cherries were almost a failure. The sour varieties did much better than the sweeter sorts. Grapes will be a good crop where properly looked after. Strawberries started out with promise of a great yield, but fell off with the drought. Raspberries were more or less a failure, much of the fruit drying on the canes owing to the intense heat and drought of July, but currants did better.

Pastures and live stock—Pastures were of the best until the drought began to tell about the latter part of July. Later on most of the fields, especially in Western Ontario, were browned by the continued drought, and in some quarters cattle on the grass had to be helped out by hay or other extra feed. Notwithstanding this drawback, and the extremely warm temperature prevailing during the summer, live stock generally are in good condition—somewhat thin, but hearty. It is thought that there will be plenty of fodder for fall and winter supplies, notwithstanding the expected shortage of grain, straw, roots and corn ensilage, farmers counting upon splendid crop of hay to carry them through. Much, however, will depend upon the weather of the next month or two. Dairy produce has been generous in supply, and the demand for cheese, butter, cream and other lines was never stronger. There has been some shrinkage in production since the drought, but the high prices now offering are tempting dairy-men to keep up the milk supply as far as possible.

CITIES PLACING FIRE INSURANCE

The Winnipeg, Man., council has considered the matter of civic insurance this week, including \$2,250,000 on schools. The North Vancouver city council has placed the following insurances on buildings: city hall, \$2,500; No. 2 ferry, \$20,000; No. 1 firehall, \$2,200.

The following companies, with Ontario charters, have increased their capital stock: The Pembroke Electric Light Company, Limited, from \$150,000 to \$250,000; the Caswell Mining Company, Limited, from \$1,000,000 to \$2,000,000; Farrar Transportation Company, Limited, \$250,000 to \$1,000,000.

WESTERN MORTGAGES AS INVESTMENTS

Farmers and Loan Companies Discuss Mutual Interests— Renewal and Placing of Mortgages

At the recent conference of farmers and the mortgage loans associations of western Canada the following resolution was passed:—

"Resolved, that in the opinion of this conference it is desirable in the interests of both farmers and loan companies in the three prairie provinces: (a) That all legislation affecting mortgages and titles should as far as possible be made uniform; (b) that sale and foreclosure procedure be simplified in order that the present excessive costs and delays may be reduced to a minimum; (c) that the tariff costs in sale and foreclosure actions under mortgage be removed from the rules of court and made statutory; (d) that the present tariff of fees charged for registration in sale and foreclosure proceedings is needlessly high and should be reduced; (e) that all existing legislation giving priority over first mortgages to claims other than legitimate taxes should be repealed, and that no future legislation of that nature should be enacted; (f) that in order to give effect to the preceding resolutions a committee composed of representatives of both farmers and loan companies be formed in each province to study the details of the matters referred to and make recommendations to the conference; (g) and, further, we would recommend that these local committees should inquire into and discuss all causes of friction between farmers and loan companies with the object of removing all unnecessary causes of friction."

Supply of Funds.

In the discussion it was stated the rate of interest was not under the control of the managers of mortgage companies, but was very largely a matter of supply and demand. Some companies were only agents for old country investors, others were loaning insurance funds, while others still were loaning funds entrusted to their care by private clients who frequently stipulated the rate of interest to be charged. A considerable part of the mortgage money for the west came from the old country. The prevailing rate of interest on this class of money in Great Britain to-day was 5 per cent.; exchange cost, which is now very heavy, brokerage charges, British war taxation, all had to be added on; then there was the cost of administration in Canada and the agent's commission of 1 per cent. for handling it, out of which the losses must be paid. It was pointed out that the prevailing average rate of interest in Manitoba on farm mortgages was 7 per cent. and in Saskatchewan and Alberta was 8 per cent., though it was admitted that there were mortgages carrying 9 per cent. and some higher in outlying districts. The mortgage interests, however, stated that they much preferred the 7 per cent. and 8 per cent. business to anything higher as it paid them just as well, as the security was better and the percentage of losses was smaller.

Mortgage Security Impaired.

They stated that money was costing more and more year by year, and their chief contention was that legislation had been in the past enacted in all three western provinces, but particularly in Saskatchewan and Alberta, which impaired the standing of a first mortgage by allowing a number of other charges in the guise of taxes to be placed before it against the title.

As an example of the costs in the west it was pointed out that very frequently land under mortgage was abandoned and grew up to weeds. Noxious weeds inspectors destroyed the weeds and frequently put very heavy charges on the land. At times it had run as high as \$600 against a half section. This was made a prior charge to the first mortgage, and in a number of cases where foreclosure proceedings took place it was found after paying off the weed charges, seed grain liens, destruction of gopher charges and other charges, the mortgage companies might sustain a loss of several hundred dollars.

Status of Mortgage.

On the general question of legislation that would interfere with the status of a first mortgage, both the farmers and the mortgage representatives were unanimously of the opinion that such legislation should be discouraged in every possible way, because it was clearly recognized that a reasonably low rate of interest could only be secured on a first

mortgage if it were absolutely a first mortgage and not subject to a number of other prior claims, except the ordinary and legitimate taxes.

The cost of foreclosure proceedings came in for considerable discussion, as these charges are extremely high. The mortgage company representatives said it was decidedly against the borrower's interest and not in any way to the lender's advantage to have foreclosure proceedings expensive. The expenses in Alberta for foreclosures on farms are almost double that of the other two provinces, running as high as \$400 to foreclose a \$1,000 mortgage on a quarter section. The delays are also serious in that province.

Application of Laws.

Representatives of the loan companies from Alberta did not object to the principle of either the wild land tax or the unearned increment tax in that province as affecting the speculator, but wanted some slight change in their application, in order, for instance, that the wild lands' tax would not apply on an abandoned farm immediately it was vacated, and that the unearned increment tax would not apply in foreclosure sales.

Principle of Amortization.

The mortgage company representatives in discussing amortization, said they were not prepared to put all their money out on this principle, but they were prepared to recognize it and they believe would be willing to loan more on this principle than the farmers would like to borrow on that plan.

Another matter affecting the general cost of mortgage business was the very considerable number of mortgages that ran over two years in arrears of interest. In the older countries, such as Germany, where money was exceedingly cheap before the war, arrears were unheard of because the foreclosure proceedings were drastic.

Renewal and Placing of Mortgages.

The cost of renewal was also discussed informally. The practice among the best companies seems to be to make no charge whatever for renewal. But apparently there are a few of the companies still making revenue out of this method.

The cost of placing mortgages was brought up and discussed in connection with solicitors' fees. The mortgage companies expressed themselves as agreeable to have these charges reduced if it could be done, but that the solicitors should be paid a reasonable fee for their work and that the cost of placing mortgages depended considerably on the condition of the title at the time and the government charges for registration.

BRITAIN'S COMMERCIAL AND INDUSTRIAL POLICY

A committee has been appointed by the British government to consider the commercial and industrial policy to be adopted after the war, with special reference to the conclusions reached at the Economic Conference of the Allies and to the following questions:—

(a) What industries are essential to the future safety of the nation, and what steps should be taken to maintain or establish them?

(b) What steps should be taken to recover home and foreign trade lost during the war and to secure new markets?

(c) To what extent and by what means the resources of the Empire should and can be developed.

(d) To what extent and by what means the sources of supply within the Empire can be prevented from falling under foreign control.

The committee is composed as follows: The Right Hon. Lord Balfour of Burleigh K.T., G.G.M.G. (chairman), Mr. Arthur Balfour, Mr. H. Gosling, Mr. W. A. S. Hewins, M.P., Mr. A. H. Illingworth, M.P., Sir J. B. Maclay, Bt., the Right Hon. Sir A. Mond, Bt., M.P., Mr. Arthur Pease, Mr. R. E. Prothero, M.P., Sir Frederick Smith, Bt., and Mr. G. J. Wardle, M.P., together with the following gentlemen, who are presiding over the Imperial board of trade committees on the position of important industries after the war: Sir A. A. Booth, Bt., Sir H. Birchenough, K.C.M.G., Lord Faringdon, Sir C. G. Hyde, the Hon. Sir C. A. Parsons, K.C.B., F.R.S., Lord Rhondda, and Mr. G. Scoby-Smith.

Mr. Percy Ashley, of the Imperial board of trade, and Mr. G. C. Upcott, of the British treasury, have been appointed secretaries to the committee.

Is Your Estate Properly Protected?

No matter how little or how much you own, these possessions make up your estate, and should be protected by efficient and economical management.

This can best be done by an Executor or Trustee.

This Company, by acting in this capacity, will give your estate the benefit of experience gained in the management of many estates, of large and of only moderate size, and will scrupulously guard the interests of your heirs.

No charge for drawing up your will when the Sterling Trusts Corporation is appointed your Executor and Trustee.

Our officers will give you further information on request.

MUST REGISTER BIRTHS, MARRIAGES, DEATHS

Value of Proper Registration—Statement by Ontario's Registrar-General

The importance of recording vital statistics is pointed out in the Ontario Public Service Bulletin, in an article describing the work of the department of the registrar-general. It should be the aim of everyone, it states, to see that all registrations concerning him, or her, or their offspring, are made at the proper time, "as there is no telling just when these are literally worth their weight in gold."

The provincial department of the registrar-general is that department of the public service which is maintained for the benefit of Canadians to the extent of keeping track of the vital statistics of the population and their genealogies, as far as births, marriages and deaths which occur in the province of Ontario are concerned. This department is continually supplying certificates which prove certain facts in regard to such matters. It aims to have all births registered within 30 days after their occurrence.

The value of the registration of births is to be found in the demand by insurance companies and others for proofs of age. These proofs are supplied for a fee of 25 cents, but perhaps the value of registration has never been more clearly demonstrated than during the last few months of the war. It is necessary for all soldiers who draw allowances from patriotic funds to prove their marriage and the births of their children. For this latter purpose the department issues a form and, upon the application for such certificate being endorsed by any patriotic fund, it is given free of charge; something like five thousand of these free certificates have been issued. Over 67,000 births were registered in Ontario during the year 1915.

Registration of Marriages.

As for marriages it is also necessary for registration to take place. Clergymen are held responsible for the registration of such marriages as they perform. Prior to June, 1905, the marriage license was a separate document from the affidavit, which is required by all applicants for licenses. After the marriage license was obtained by an applicant, the issuer kept the affidavit. After the marriage was solemnized, the clergyman kept the license. It lay with the honor of the clergyman to register it and the department had no adequate check on a license after its leaving the department. In June, 1905, it became necessary for the clergyman to forward the license to the department; also for the issuer to forward the affidavit. These documents were duly filed. Unfortunately, owing to negligence on the part of a clergyman or an issuer, sometimes only one of these documents was received, so the idea was conceived in 1910 of printing the affidavit on the back of the license, and, instead of filing away the licenses and depending on the registration for information (which was sometimes neglected), the department bound these licenses into such a form that they became in reality the records of the marriage. Such is the procedure to-day, and in the vaults of the department are to be found 100,556 marriage certificates, so bound up and indexed that a record of any one marriage can be found in the shortest time possible. During 1915 there were 23,506 marriages solemnized in Ontario. At present, the department is able to account for every license supplied to issuers, from the time it leaves until it is again returned properly endorsed.

Registration of Deaths.

Regarding deaths, the same care is taken as in the cases of births and marriages. The doctor who was in attendance when a death occurs issues a medical certificate of death. This is taken to the Division Registrar by someone able to supply all other information regarding the deceased, such as full name, age, social condition, occupation, etc., and the Division Registrar upon receiving this issues a burial permit. During 1915 over 33,700 deaths were registered in Ontario.

Since the year 1869, registrations have been returned to this branch to the number of nearly four millions; the number of marriages means double the number of names registered as marriages, thus bringing the total number of names, records of which are available, to over four and three-quarter millions. This does not take into account some thousands of other available registration of marriages received from county registrars after Confederation. All these registrations are indexed and accessible, and in spite of it all there have been many names which have escaped registration by negligence on someone's part.

SIXTY PER CENT. INCENDIARY

Of 38 Fires Investigated by Ontario's Marshal, 28 Were Cases of Incendiarism

Since March 15th, when office space was first available for Ontario's fire marshal, Mr. E. P. Heaton, 38 special investigations have been made to determine causes of fire. Of these, 23 have been found to be of incendiary origin. Five were due to defective electric installations or "fuse jumping." Arrests have been made in three cases of incendiarism, details of the results of which will be made public in the annual report of the fire marshal. The Ontario fire marshal's office is yet in its initiatory stage; its space is limited, and its machinery correspondingly restricted. The first duty of the department is to collect adequate and reliable statistics in regard to the number of fires occurring in the province, and the amount of loss sustained thereby. To obtain the required information, over 1,000 sources have to be tapped, and the machinery to obtain reports from this wide constituency and then to properly record and analyse them must necessarily be a slow process. It is, however, essential that these necessary facts should be obtained, and the attention of the present staff of the department is being given very largely thereto.

Cause of Fire.

Once the statistical recording machinery is in operation, the determination of the "Causes of Fire" will occupy attention. So far as can now be learned, 50 per cent. of all fires reported are placed to "Cause Unknown." It is manifest that before the department can enter into any schemes of fire prevention, a much closer assignment of definite causes will have to be made.

In each of the five special investigations in which electrical installations have been found to be the cause of fire, conditions have been exceedingly bad and it is also apparent from the general reports coming into the office that this cause of fire is a most prolific one.

Regulating Electric Installation.

Advance regulations have now been adopted by the power commission, under which it is confidently expected that this cause of fire will be checked. The power commission has intimated that the new rules and regulations will be applied without fear or favor, and as they provide severe penalties for violations, it is to be hoped the result will be safer installations and a discontinuance of open and flagrant tampering with safety devices.

The lines indicated are those upon which the department will be active for the next few months, but later there will be instituted features of fire prevention which will conduce to a decrease in the unenviable and unjustifiable fire waste throughout Canada.

WILL A CANADIAN RAILWAY LOAN BE FLOATED?

With the British government loan out of the way, bankers are now pondering over the next foreign outlet for the constantly accumulating funds and credits of this country, suggests the New York Times. High in such consideration is a plan for money for the Canadian Northern and Grand Trunk Pacific Railroads. Securities of neither of those roads were included in the \$100,000,000 Canadian government and railroad securities pledged under the \$250,000,000 loan, though England has the bulk of Canadian Northern and Grand Trunks. The idea is that these securities were withheld until the formulation of a comprehensive plan of Canadian railroad financing and the offering of bonds of the new transcontinentals with provincial government guarantee.

Sir William Mackenzie, Mr. D. B. Hanna and Mr. E. R. Wood had a consultation in New York prior to the departure of Sir William and Mr. Hanna for England, and in this connection, it is stated, some new financing may be announced.

The National City Company has taken over the bond department of the National City Bank of New York and has purchased the bond business of N. W. Halsey and Company. The National City Company occupies offices in the National City Bank building, New York, and is closely affiliated with the National City Bank.

GREAT BRITAIN'S BLACKLIST

Consolidated Statutory List of Enemy Firms Now Available to Public

Announcement has been made by the British Government that a consolidated statutory list of enemy firms in foreign countries with whom trading is prohibited, complete to July 18th, has been issued by H.M. Stationery Office, London, England, and may be obtained by any person, post free, upon receipt of the price, six cents.

The official publication of this list makes unnecessary a continuance of the publication of the lists in *The Monetary Times*. The official list is the same as the lists published during the past four weeks in *The Monetary Times*, so far as the following countries are concerned: Brazil, Argentina, Uruguay United States, Bolivia, Chile, Colombia, Cuba, Ecuador, Paraguay and Peru.

It also contains lists of enemy firms in Japan, Netherland East Indies, Philippine Islands, Denmark, Norway, Sweden, Greece, Netherlands, Portugal, Spain, Portuguese East Africa, Morocco and Persia. In regard to the last three mentioned countries, some removals from the lists have been made, so that all firms in those countries are not now under the ban, as had formerly been announced.

Changes and corrections in the official lists will appear from time to time hereafter in the Board of Trade Journal, which is published weekly under the authority of H.M. Stationery Office, and can be purchased for six cents the copy from Wyman and Sons, Limited, 29 Bream's Buildings, Fetter Lane, E.C., London, England.

Following are the changes up to date in the lists that have already appeared in *The Monetary Times*:—

Additions to List.

ARGENTINA.

Bauer, P., & Company, Calle Piedras 132, Buenos Aires.

BOLIVIA.

Albrecht, C., & Company, La Paz.
Arnold & Company, Santa Cruz de la Sierre and Riveralta.

COBALT ORE SHIPMENTS

The following are the shipments of ore in pounds from Cobalt Station for the week ended August 18th:—

Right of Way Mines, 87,431; McKinley-Darragh-Savage Mine, 95,649; La Rose Mines, 87,361; Dominion Reduction Company, 152,195; Nipissing Mining Company, 329,381; Mining Corporation of Canada, 278,980; total, 1,030,997 pounds, or 515.4 tons.

The following are the shipments of ore in pounds from Cobalt Station for the week ended August 25th:—

Dominion Reduction Company, 100,000; Penn Canadian Mines, 87,469; Nipissing Mining Company, 329,860. Total, 517,329 pounds, or 258.6 tons.

From New Liskeard:—

Casey Cobalt Mine, 60,931 pounds.

The total shipments since January 1st, 1916, now amount to 19,912,709 pounds, or 9,956.3 tons.

DIVIDEND PAYMENTS AND TRADE OUTLOOK

While those engaged in turning out munitions usually secured the largest rewards, big profits have not been restricted to such concerns, but extended to many of the regular industrials; and even the railroads have shared in the general prosperity. Circumstances considered, dividends as a rule have been distributed very conservatively, and, while there have been many increases, the additional distribution as a whole has been only a fraction of the actual gain in profits. Several reasons contributed to the adoption of such a policy, suggests Mr. Henry Clews, the well-known New York banker.

Munition makers naturally led in this conservative movement, and sought to protect themselves against the future by reserving sufficient funds to wipe off cost of plant or depreciation, to offset the rise in commodities and wages, to reduce indebtedness, and to leave a good surplus for meeting reaction or any other unforeseen conditions that may develop after the war.

Other industrials, especially steel and chemical concerns, recognized that the extraordinary gains of 1915 and 1916 were ephemeral, that sound business management required taking advantage of such a situation by reducing fixed obligations, allowing for depreciation and enlarging of plant to meet new demands, and in general placing their business in a strong position against the future.

There are, however, certain classes of securities less directly affected by the war, among these being the railroads and such industrial concerns as produced strictly for the home trade or legitimate export orders. These, too, enjoyed great activity, quite sufficient to materially enlarge their profits, but not enough to warrant more than moderate increases in dividends, if any.

Many corporations have made unusual gains in gross earnings, but the rise in wages, commodities and other costs prevented profits from becoming abnormal and kept dividends from increasing.

Brazilian Traction, Light & Power Company, Limited

(Incorporated under the Laws of Canada)

THIRD ANNUAL REPORT OF THE BOARD OF DIRECTORS TO THE SHAREHOLDERS FOR THE YEAR ENDED 31st DECEMBER, 1915.

To the Shareholders:—

The Board of Directors beg to submit their Third Annual Report, together with the Balance Sheet and Profit and Loss Account of the Company for the year ended 31st December, 1915, and a report by the President, Mr. Alexander Mackenzie, on the enterprises in Brazil. The annual accounts of the Subsidiary Companies for the same period are also attached.

While the combined earnings of the Companies in Brazilian currency have fully realized the expectation of the Board, being considerably greater than those of the previous years, the result is not so satisfactory when such earnings are converted into Canadian currency.

For some years prior to the outbreak of the European war, the value of the milreis for sight bills on London was approximately 16 pence. During the latter part of 1914, however, the average value fell to approximately 13 pence, and in 1915 it showed a further depreciation to an average of approximately 12½ pence. Converting the earnings during 1915 at the average rates prevailing prior to the war, the net revenue, in Canadian currency, as shown by the attached accounts, would be increased by over \$3,000,000.

The revenue of the Company in Canadian currency resulting from the year's operation was as follows:—

Revenue from Securities owned and under contracts with Subsidiary Companies	\$5,339,192.76
Interest on Advances to Subsidiary Companies.....	273,683.41
General and legal expenses, administration charges and interest on loans.....	\$5,612,876.17
	218,074.43
Surplus available for Dividends	\$5,394,801.74
Dividends Nos. 8, 9, 10 and 11 at 1½ per cent. each on Preference Shares	\$ 600,000.00
Dividends Nos. 10 and 11 at 1½ per cent. each, and Nos. 12 and 13 at ½ of 1 per cent. each on Ordinary Shares.....	4,249,380.00
	4,849,380.00
Surplus carried forward in profit and loss	\$ 545,421.74

During the first half of 1915, dividends on the ordinary shares at the rate of 1½ per cent. each were paid on 1st March and 1st June, respectively. As, however, contrary to expectations entertained earlier in the year, the exchange value of the milreis continued to fall, the Board decided to limit the dividends payable on 1st September and 1st December to ½ of 1 per cent. each, making a total dividend of 4 per cent. for the year.

Although rigid economies have been effected, the cost of operation and maintenance has been adversely influenced by the rise in the price of materials, and by the enormous advance in ocean freights. This advance has particularly affected the earnings of the gas business, as owing to the requisition by the British Government of some of the steamers employed in the Company's service for carrying coal, it became necessary to charter other steamers at rates greatly exceeding those which would have been payable under normal conditions. It is therefore remarkable that, notwithstanding the adverse circumstances with which the Company has had to contend, the results for the year have been so satisfactory, and it is evident that with a return to normal conditions, the revenue of the Company should be not only equal to that obtained prior to the war, but should show a considerable and steady increase. Conditions generally in Brazil are showing distinct signs of improvement.

The Board are pleased to report that all the coffee purchased for exchange purposes during the year 1914 and at the beginning of the year 1915, has been disposed of, and at prices which realized a sum in excess of that which it is estimated would have been received had the usual method of making remittances been followed.

During the year further shares have been acquired in the capital of the Companhia Telefonica do Estado de Sao Paulo, and in that of the Companhia Rede Telefonica Bragantina, and with those subsequently purchased, this Company now holds 95 per cent. of the share capital of each Company. This Company has also made advances for the purpose of carrying out necessary improvements and extensions to the telephone systems, which when completed should result in material increases in the revenue.

The Board are glad to state that the relations of all the Subsidiary Companies with the Federal, State and Municipal authorities continue to be of the most cordial character.

The President of the Company, Mr. Alexander Mackenzie, has spent the last sixteen months in Brazil in connection with the affairs of the Companies. He has recently returned, and his report on the operations of these enterprises, which has been adopted by the Board, is appended.

A valuable addition to the Board has been made by the election of Mr. R. C. Brown as a Director. Mr. Brown was Manager of The Sao Paulo Tramway, Light and Power Company, Limited, during the first two years after its organization, and has had a wide experience in similar undertakings, and he has recently visited Brazil and made a thorough examination of the Company's properties.

The Board regret to have to announce the loss of one of their esteemed members by the death of Sir William Van Horne, in September, 1915. Sir William Van Horne was a director of The Rio de Janeiro Tramway, Light and Power Company, Limited, from its inception, and was elected to the Board of the Brazilian Traction, Light and Power Company, Limited, at the time of its formation. The Board of the Rio de Janeiro Tramway, Light and Power Company, Limited, have also suffered a further loss, owing to the death in September, 1915, of their valued colleague, Monsieur Jean Javal, of Paris, France. The Board desire to express their appreciation of the services rendered by these Directors.

The Board take great pleasure in recording their appreciation of the efficient services rendered by Mr. F. A. Huntress, the Vice-President of The Rio de Janeiro Tramway, Light and Power Company, Limited, The Sao Paulo Tramway, Light and Power Company, Limited, and The Sao Paulo Electric Company, Limited, and the other officials of the Companies in Brazil.

By order of the Board,

J. M. SMITH, Secretary.

Toronto, Canada, August 3rd, 1916.

BRAZILIAN TRACTION, LIGHT AND POWER COMPANY, LIMITED

Balance Sheet, 31st December, 1915.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Canada Cement Company.—The directors of the Canada Cement Company have declared a dividend of 3 per cent. on the common stock, payable September 16th to holders of record September 5th.

Dominion Iron and Steel Company, Limited.—The directors of the Dominion Iron and Steel Company, Limited, have declared a dividend of 7 per cent., payable October 1st, which will wipe out the arrears that had accumulated in the preferred dividends. Dividends were deferred after having been paid up to April 1st, 1914, the directors postponing the dividend due October, 1914, owing to the war. On April 1st, 1916, the payments were resumed, 3½ per cent. being distributed then, followed by 7 per cent. in July. The 7 per cent. now to be sent out calls for an expenditure of \$350,000.

Twin City Rapid Transit Company.—The company's returns for July and for seven months are as follows:—

	July.		Seven months.	
	1916.	1915.	1916.	1915.
Gross revenue	\$880,859	\$793,496	\$5,890,274	\$5,398,033
Operating expenses	520,156	497,120	3,662,779	3,532,136
Net revenue	360,702	296,376	2,227,494	1,865,897
Fixed charges and taxes	145,045	144,650	998,433	986,132
Net income	215,656	151,726	1,229,061	879,764

Canadian Northern Railway.—The statement of earnings and expenses is as follows:—

	1916.	1915.	Increase.
Total gross earnings	\$3,834,200	\$1,961,700	\$1,872,500
Operating expenses	2,636,800	1,475,300	1,161,500
Net earnings	1,197,400	486,400	711,000
Aggregate gross earnings from July 1st	3,834,200	1,961,700	1,872,500
Aggregate net earnings from July 1st	1,197,400	486,400	711,000

Premier Glass Company.—The Premier Glass Company has been sold at auction by the liquidator, Mr. J. W. Michaud. The plant and assets were sold for \$90,000, the purchaser being Henry Blatchford.

The Premier Glass Company was the successor of the Atlas Company. The company's plant is situated at Ville St. Pierre, Que., and it is understood that factory and plant were completed at a cost of \$200,000, exclusive of the cost of land which was a gift from the municipality. Owing to lack of working capital, the plant was never in operation. The purchaser is a holder of bonds to the extent of \$10,000.

Brazilian Traction, Light and Power Company, Limited.—The statement of combined earnings and expenses of the tramways, gas, electric lighting, power and telephone services, operated by subsidiary companies, controlled by this company, for July are as follows:—

	1916.	1915.	Increase.
	Milreis.	Milreis.	Milreis.
Total gross earnings	7,195,000	6,703,000	492,000
Operating expenses	3,145,000	2,803,000	342,000
Net earnings	4,050,000	3,900,000	150,000
Aggregate gross earnings from January 1st	47,145,000	44,387,110	2,757,890
Aggregate net earnings from January 1st	26,688,000	25,843,420	844,580

Canada Steamships Lines, Limited.—Though the voting trust agreement entered into by the majority of the common shareholders of Canada Steamships Lines, Limited, when the company was organized three years ago, does not expire until 1919, a new voting trust has been formed with the object of ensuring a continuance of the present control and management beyond that date. Both the old trust certificates and the new common stock coming into the arrangement will be turned into the new trust and scrip issued against them,

There will thus be two sets of voting certificates; the first has already been listed on the Canadian stock exchanges and steps are now being taken to list the second. The amount of the original certificates that will be left outstanding will probably be small, as it is understood that most of it will be turned in under the new agreement, which is stated to be for a similar period to the first agreement, dating from 1919.

Cuba Railroad Company.—The company's returns for three years ended June 30, compare as follows:—

	1916.	1915.	1914.
Gross	\$6,815,696	\$5,206,714	\$5,164,670
Expenditure	3,298,670	2,479,174	2,693,749
Net	\$3,517,026	\$2,727,539	\$2,470,921
Other income	6,632		
Total income	\$3,523,659	\$2,727,539	\$2,470,921
Interest	978,244	853,855	819,416
Net income	\$2,545,414	\$1,873,684	\$1,651,505
Replace			135,000
Balance	\$2,545,414	\$1,873,684	\$1,516,505
Preferred dividend	600,000	600,000	900,000
Balance	\$1,945,414	\$1,273,684	\$616,505
Common dividend	720,000	600,000	600,000
Surplus	\$1,225,414	\$673,684	\$16,505

Lake Superior Corporation.—The income account of this corporation for the year ended June 30th is as follows: Interest on bonds of subsidiary companies, \$290,000; other income, \$45,759, making a total of \$335,759. Interest on first mortgage bonds absorbed \$277,320, general expenses \$32,985, leaving net income for the year of \$25,454, the balance brought forward from previous year was \$25,072, and these sums were transferred in part to reserve for depreciation of investments—viz., \$40,000, and the balance, \$10,526, carried forward.

The net earnings from operations of all the subsidiary companies of the Lake Superior Corporation (excluding the Algoma Central and Hudson Bay Railway Company) for the year, subject to deductions as follows, were \$3,503,471, from which has been deducted a deficiency from previous year of \$331,765. Interest on bonds of subsidiary companies and bank and other advances, etc., \$1,513,539; amount written off in respect of discount and expenses of securities sold, etc., \$206,680; amount set aside for sinking fund payments, etc., \$667,173; appropriated for reserves, depreciation, renewals, etc., \$425,594; and \$358,717 was carried forward by all companies.

"The revenue of the Lake Superior Corporation is not sufficient to permit of the payment of interest other than on its first mortgage bonds. The Algoma Steel Corporation has undoubtedly strengthened its position, and in the disposition of its earnings has pursued a conservative policy, which will add value to the steel corporation as a whole, and consequently to the Lake Superior Corporation's interests therein.

"One fact in connection with the Algoma Steel Corporation must be borne in mind, and it is that further finance is necessary in order to put the steel plant on a proper footing in reference to the manufacture of a much more diversified product. As was foreshadowed in the previous report, the Lake Superior Corporation must sooner or later be called upon to consider its present interest in the steel corporation in reference to the necessary development of the latter."

As regards the Algoma Steel Corporation, Limited's finances, the annual report states: "The period of funding in connection with bond and note interest has practically expired, and it is expected that interest payments will be resumed in October. The question of liquidating the 6 per cent. three-year gold notes, due 1917, is receiving careful consideration, but much depends on future earnings, etc."

The water power which the Algoma Steel Corporation owned has been disposed of for \$1,000,000, and this amount is now available for new construction, and the holdings of common stock of the International Transit Company has been sold for \$100,000. The sale of the Trans St. Mary's Traction is also under consideration.

Penniless Old Men

You know many of them—men who in their prime made plenty of money, but who spent as freely as they earned. Old age finds them in a sorry plight.

You can escape their bitter experience if you will. A few dollars saved each year and invested in an Imperial Endowment will provide for your comfort in old age. Or it will take care of your family should death call you early.

Write for a free copy of our very interesting booklet entitled "Penniless Old Men." Address:

A Free Course In "Salesmanship"

We have thought about the young man who sees no prospects ahead. Would you like to be in a business that will give you

A Good Living Wage
A Profitable Future
A Provision For Old Age

We teach a man the Insurance Business, which offers permanent success, does not fluctuate, is a professional occupation, and has been truly named "The best paid hard work in the world."

This is done by a correspondence course and personal assistance, free of charge.

When he is fully prepared for the work, we place him in a position and help him to make good.

The first two lessons of the Company's correspondence course will be sent to anyone interested. It will pay young men who desire to get on in the world to look into this.

All correspondence strictly confidential.

CANADA LIFE ASSURANCE CO.
HEAD OFFICE, TORONTO.

Prosperous and Progressive

Up-to-date business methods, backed by an unbroken record of fair-dealing with its policyholders, have achieved for the Sun Life of Canada a phenomenal growth.

To-day, the Company operates actively in forty-two countries and upon five continents.

In the past six years its assurances in force have nearly doubled; in the past eleven years they have more than trebled.

More than 166,000 of its policies are now in force for assurances totalling over \$265,000,000—much the largest amount carried by any Canadian life company.

Coin and bullion.....	520,545	13,871,128	14,636,291	36,371,720	223,668,611	115,110,209
Total trade.....	93,799,982	99,000,038	238,860,488	1,061,365,504	1,142,911,769	1,819,706,490

*Note. It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending July, 1916, were: imports 1916, \$33,717,992; 1915, \$133,113,099, and exports 1916, \$81,392,217; 1915, \$90,555,512. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Point Grey, B.C.—A by-law to authorize a temporary loan of \$30,000 has been passed.

Bathurst, N.B.—An issue of \$10,000 patriotic fund bonds has been authorized by the council.

St. Francois Xavier Centre R.D.—The taxpayers will vote on the issuance of \$4,000 bonds on September 7th.

Arthur, Ont.—This issue of \$15,000 was awarded to Messrs. G. A. Stimson and Company, Toronto, at \$15,691. The bid of \$15,117 was that of the Imperial Bank, and not of the Imperial Bond Company as previously printed.

Winnipeg, Man.—To enable the council to effectually deal with the transference of its stock and debentures from the English market to that of New York, a by-law has been passed authorizing the issue of new debentures to the amount of \$7,500,000 to enable the old stock to be redeemed.

Lethbridge, Alta.—Mayor Hardie, of Lethbridge, is visiting eastern Canada, having attended the municipal convention at Montreal on his way home. During the past two years, Lethbridge, by its economies, has saved the ratepayers about \$130,000. The commission form of government there is generally considered successful. There is a good crop, almost equal to last year's, in the Lethbridge district.

Saskatchewan.—The following is a list of bond applications granted by the local government board:—

School Districts.—Willow Moor, \$1,000. E. N. Stebbing, Battleford; Rose Mound, \$1,600. J. E. Lambier, Cut Knife; Frontier, \$1,600; E. Dawson, Lonesome Butte; Oriole, \$1,300. Geo. Cosford, Starcit; Palisade, \$1,200. M. E. Hanson, Robsart; Cherry Valley, \$1,600. G. P. Hawkins, Treelon; Everdale, \$1,500. E. T. Anderson, Arran; Punnychy, \$1,100. Jas. Swan, Punnychy; Mathieu R.C., \$700. F. Lizee, La Fleche; Santner, \$1,900. J. E. Harnwell, Speyer.

Rural Telephone Companies.—Gideon, \$7,500. A. A. Hay, Saskatoon; Idaleen, \$11,000. J. Lawson, Rosetown; Stewart, \$22,000. N. G. Graham, Gravelbourg; Rhein, \$3,300. Jas. Bruce, Rhein; Heavylands, \$3,400. J. E. McIntyre, Port Qu'Appelle; Bredenburg South, \$2,400. W. M. Holland, Bredenburg; Brampton, \$9,400. O. W. Jukes, Lawson.

Peterboro, Ont.—For the \$196,704.60 5, 5½ and 6 per cent. straight-term bonds, Mr. F. Adams, city treasurer, received the following tenders:

	Rate.	Amount.
Canada Bond Company	97.1811	\$191,159.78
Dominion Securities Corporation....	96.71	190,233.00
Wood, Gundy and Company	96.71	190,233.00
A. E. Ames and Company	96.28	189,387.19
Mulholland, Bird and Graham.....	96.22	189,280.00
Imperial Bank	96.17	189,171.00
R. C. Matthews and Company	95.892	188,625.00
Brent, Noxon and Company	95.716	188,279.00
Emilius Jarvis and Company	95.491	187,835.19
C. H. Burgess and Company	95.26	187,380.80
Kerr, Fleming and Company	95.131	187,127.05

The tender of the Canada Bond Company, being the highest, was accepted.

Taxation of Foreign Bonds in Canada

REVIEW of the Events Leading to the Suggestion that the Dominion Government may impose an Income Tax upon Foreign Securities issued in the United States and held by Canadians—At least \$20,000,000 of Anglo-French Bonds are said to have been placed in Canada.

THE following statement was recently prepared by *The Monetary Times* for publication in *The New York Annalist*:—

The purchase in Canada of foreign government securities, issued in the United States, has caused the Dominion government to give more serious consideration to the conservation of Canadian funds for Canadian purposes. The importance of the matter is emphasized by the fact that Canada's share of the war is costing \$1,000,000 daily. There is not a tax at present upon such securities. No direct official intimation has been made that such a tax will be enforced. Under the War Measures act, however, the government has power to prohibit the offering of foreign securities in the Dominion, as has been done in Great Britain, but it has preferred as yet to rely upon the patriotism of Canadian investors rather than to adopt restrictive measures.

The only announcement made by the Dominion government in regard to this matter was that made by the finance minister in July. His statement called attention to the fact that Canadians were being circularized from the United States to purchase foreign government securities issued there for munitions credits. Canadian investors were urged to reserve their funds instead for the forthcoming Canadian war loan. It was pointed out that on account of the rapidly increasing war expenditure and the heavier demands which the future will make in this respect, it is of supreme national importance that the financial resources of Canada should be conserved for its own purposes and that as much as possible of the national debt should be held in Canada. The finance minister at the same time recalled that there is an abundance of capital in the United States to absorb all issues made there, and the allied interests would not, therefore, suffer through Canadians refraining from participation and husbanding their resources to meet their own national needs. These statements followed the bond offering in the United States and Canada of the three-year 5 per cent. gold notes for advances to France. They also constitute the only official utterance on this particular question.

When the British war loan of £600,000,000 was floated in June last year Canadians desired to subscribe but Chancellor of the Exchequer McKenna, in the Imperial House of Commons, expressed the hope that residents of the overseas dominions "will not lose sight of the fact

that they can do a greater service to the Empire by lending their resources to their own dominions, and so reduce the call made by those governments on the United Kingdom." This was really the first serious intimation of the necessity for Canadians to conserve their funds for Canadian loans. When the Anglo-French loan of \$500,000,000 was issued in the United States, there was a decided disposition in Canada to invest heavily in those bonds. Sir Edmund Walker, president of the Canadian Bank of Commerce, was reported then as saying that he would very much dislike to see British or Canadian citizens subscribe to the loan, as every dollar that was contributed to that loan was money diverted from Canada in the event of a similar loan being raised there. This statement was made a few weeks before Canada's first domestic war loan was announced in November last.

The British government also issued a statement stating that the main purpose of the Anglo-French loan was to give support to United States exchanges and added that it was "very undesirable in the public interests that persons or firms in the United Kingdom" purchase the loan. No official statement was issued by the Canadian government on the matter, but, shortly after, the first domestic war loan was announced, which had the effect at least of postponing Canadian purchases of Anglo-French bonds.

During the first week of August a press dispatch from Ottawa stated that, in view of the large purchases made in Canada of Anglo-French and other government bonds issued in the United States and "the serious effect which the continuation of such purchases will have upon the exchange situation" between the two countries, it was now regarded as certain that at the next session of parliament legislation would be introduced imposing special income taxation upon all non-Canadian securities held by Canadians. It was not an official pronouncement but the trained newspaper eye immediately recognized it as emanating from the government, thus coming into the category of semi-official statements.

The result of this intimation has been that a certain amount of the securities concerned have been sold and that very few additional blocks have been purchased. With the second Dominion war loan, probably of \$100,000,000, coming early in September, Canadian funds are being conserved for that purpose, and the market for foreign government securities in Canada is at a standstill.

With the possibility of a tax on his foreign securities, the Canadian investor's appetite for them has naturally become less keen.

The general interpretation of the Ottawa announcement as to possible taxation is that it is more of a warning to investors than a decision to enact the suggested legislation. At the same time, it cannot be said definitely that the government will not introduce the new tax. The announcement is also thought to refer more particularly to foreign government loans placed in the United States to adjust exchange and to pay for munitions and supplies manufactured in the United States.

To Create Machinery.

These views are somewhat strengthened when it is recalled that in his budget speech of February, 1915, Sir Thomas White, finance minister, stated that the question of income tax upon individuals had had the consideration of the government, and it appeared to them that such a tax was not expedient, "at all events for the present." In order to bring into force an income tax the government would be obliged to create machinery for assessment, revision, and collection. This would involve a heavy expense as compared with the amount which would be realized. Taking the income tax of the United States as a basis, Canada could hardly expect to derive more than \$2,000,000 from a similar tax, and from that would have to be deducted the expenses of its administration.

Other objections mentioned by the finance minister at that time were the facts that the several provinces of Canada were also likely to be obliged to resort to measures for raising additional revenue; that a long period must elapse before a new income tax becomes productive; that while in Britain the tax is the chief source of revenue to the government and taxable incomes are derived largely from investments, the position in Canada is different;

and, finally, that in certain Canadian provinces income is subject to taxation by municipalities and in two instances by the provinces themselves. In addition to these difficulties, if an attempt were made to tax the coupons, the securities could be placed with a bank of the United States and the interest paid into the depositor's account there and drawn as required.

On the other hand, supposing that a tax even as large as 5 per cent. were placed upon the income derivable from foreign government bonds held in Canada. Taking the Anglo-French bond, yielding approximately 6 per cent. as an example, such a tax would reduce the yield only to 5.70 per cent.

Volume of Purchases.

It is difficult to trace the volume of purchases by Canadians of these foreign securities. Undoubtedly the Anglo-French bonds have been the most popular of this class in the Dominion, appealing both on the grounds of patriotism and attractive investment. Banks, insurance companies, manufacturers, and small investors have made purchases. The high price of 96 for the Anglo-French bonds a few months ago was made in New York on the sale of a \$1,000 bond for Canadian account. Large blocks have been purchased by Canadian investors direct from New York brokers and Canadian bond houses have handled a considerable amount.

Estimates vary considerably as to the total purchased in Canada, but taking the average of the estimates of a large number of well-posted financial men of the Dominion, probably at least \$20,000,000 of Anglo-French bonds have been placed in Canada. Of the recent Russian government loan, it is estimated that about \$1,500,000 have been sold there and at least \$1,000,000 of the recent French loan. These three issues, therefore, account for at least \$22,500,000.

MOBILIZING CANADIAN SECURITIES

Scheme "B," the new plan of the British treasury for the hypothecation of Canadian and United States securities as collateral for British loans in New York, as noted in a recent issue of *The Monetary Times*, provides for the deposit of such securities for a period of five years from March 31st next, subject to the right of the treasury to return them at any time after March 31st, 1919, on three months' notice. The lender is to receive all interest and dividend payments and an extra payment at the rate of $\frac{1}{2}$ of 1 per cent. per annum, calculated on the face value of the securities. The treasury, however, has the right at any time during the currency of the loan to dispose of the securities, and in this case the interest or dividend payments are maintained, and at the end of the loan the lender will receive securities of the same description and to the same nominal amount as will pay him the deposit value of the securities with an addition of 5 per cent. on that value, plus accrued interest. Among the Canadian securities added to the list are Canadian Northern Railway Company 4 per cent. debentures, 1934; Canadian Northern Railway 4 per cent. first mortgage consolidated debentures (Manitoba), 1930; Canadian Northern Ontario $3\frac{1}{2}$ per cent. stock; Canadian Northern Pacific 4 per cent. first mortgage debenture stock (British Columbia); Canadian Pacific perpetual 4 per cent. consolidated debenture stock, and Canadian Pacific 4 per cent. preference stock.

Messrs. Breed, Elliott and Harrison have issued a prospectus regarding the \$5,000,000 7 per cent. cumulative preferred stock of the Fisher Body Corporation, which succeeds to the business of the Fisher Body Company, Fisher Closed Body Company, both of Detroit, Mich., and the Fisher Body Company of Canada, Limited, Walkerville, Ont.

SHORTAGE OF LABOR ON THE COAST

(Staff Correspondence.)

Vancouver, September 4th.

Manufacturing industries are beginning to feel the lack of labor. The need of men is felt by all, but the Empire's war is the first consideration. The manager of a lumber mill in Vancouver told *The Monetary Times* that unless more men were available they would have to consider the question of closing down of at least part of their operations. The output of logs is being curtailed, and notwithstanding the unprecedented output in June of 120,023,860, and it is expected that July's figures will approximate this, prices of logs have stiffened. Demand is better, too. Shingle manufacturers are affected to a greater degree, and one or two of the large producers have already shut down. Shingle bolts are higher in price than they ever were, and scarce. It is possible that after the salmon fishing season is over a number of Japs will be in the woods getting out bolts.

Shipbuilding plants are affected. At Ocean Falls, where a pulp and paper industry is being started, many men could be taken on, and some have been secured in Seattle. The Empire Pulp and Paper Company has taken over the idle pulp plant at Swanson Bay with the idea of resuming operations, and men will be needed there also.

An interesting booklet containing information regarding the economic and financial position of Russia and the Imperial Russian government is being distributed by the National City Bank of New York. Every effort has been made to include only authoritative information. It will be found of permanent value as a handbook of reference in the business library.

CANADIAN PACIFIC RAILWAY'S EARNINGS

From All Sources the Company Earned \$129,000,000
Exclusive of War Business Profits

With assets approximately nearly \$1,000,000,000 and gross earnings last year of \$129,000,000, the Canadian Pacific Railway takes a leading position among the world's railway and transportation interests. *The Monetary Times* has already printed the principal returns of the company's year, but in the report just issued other interesting details are found. The special income figures are as follows: Balance at June 30, 1915, \$8,216,144; less dividend paid October 1, 1915, \$1,950,000.

Interest—Proceeds land sales, \$151,170; deposits and loans, \$976,326; Minneapolis, St. Paul and Sault Ste. Marie Railway bonds, \$159,720; Mineral Range Railway bonds, \$50,160; Toronto, Hamilton and Buffalo Railway bonds, \$10,237; Montreal and Atlantic Railway bonds and other securities, \$108,136; Berlin, Waterloo, Wellesley and Lake Huron Railway bonds, \$17,040; St. John Bridge and Railway Extension Company bonds, \$6,250; Esquimalt and Nanaimo Railway bonds, \$193,280; Dominion Atlantic Railway Extension debenture stock, \$56,940; Dominion Atlantic Railway 2nd debenture stock, \$36,986; Hull Electric Railway, \$60,000.

Dividends—On St. John Bridge and Railway Extension Company stock, \$70,000; Minneapolis, St. Paul and Sault Ste. Marie Railway common stock, \$890,645; Minneapolis, St. Paul and Sault Ste. Marie Railway preferred stock, \$445,326; West Kootenay Power and Light Company common stock, \$27,500; West Kootenay Power and Light Company preferred stock, \$3,850; Consolidated Mining and Smelting Company stock, \$307,437; Berlin, Waterloo, Wellesley and Lake Huron Company stock, \$12,500; earnings from ocean steamships and hotels, \$3,583,292; revenue from company's interest in coal mine properties, \$557,842; extraneous mail earnings, \$216,305; net earnings of Pacific Coast Steamships, commercial telegraph, news department, \$1,923,288; received for space rented in office buildings, \$76,720; making a total of \$16,207,099; less payments to shareholders in dividends December 31, 1915, April 1, 1916, and June 30, 1916, of \$5,850,000, leaving \$10,357,099, from which a dividend has been declared payable October 1, 1916, of \$1,950,000.

No War Earnings Included.

Lord Shaughnessy, in dealing with the company's earnings in the report, says:—

"The profits resulting from the manufacture in your company's shops of munitions of war, undertaken at the request of the government, have not been taken into the operating revenue, but have been applied as a set-off against contributions to patriotic and relief funds, and other expenditures by your company directly due to the war and not properly chargeable to working expenses."

The earnings for the year 1916 compared with the previous year are as follow:—

	1916.	1915.
From passengers	\$24,690,652	\$24,044,282
From freight	89,654,405	60,737,737
From mails	1,384,567	1,389,333
From sleeping cars, express, telegraph and miscellaneous	13,752,260	12,603,856
	\$129,481,885	\$98,865,209

The company's expenses compare as below:—

	1916.	1915.
Transportation expenses	\$38,915,381	\$32,083,169
Maintenance	14,671,791	11,400,538
Maintenance of equipment	16,695,955	11,307,965
Traffic expenses	2,798,699	2,990,163
Parlor and sleeping car expenses ..	990,410	1,111,253
Expenses, lake and river steamers..	829,811	1,051,781
General expenses	4,014,753	3,963,202
Commercial telegraph	1,339,161	1,382,507
	\$80,255,965	\$65,290,582

Agreement re Steamships.

Regarding the agreement entered into between the Allan Line Steamship Company and the Canadian Pacific Ocean Services, Limited, the report says:—

"In consequence of the extraordinary conditions created by the present war, the directors considered it advisable to postpone the effective date of the agreement entered into between the company and the Allan Line Steamship Company and the Canadian Pacific Ocean Services, Limited, authorized by resolution passed at the last annual meeting, for the acquisition by the last named company of the capital stock of the Allan Line now held by the company and of the vessels of the company named in the resolution. The directors have, however, thought it desirable to enter into an agreement with the Canadian Pacific Ocean Services, Limited, under which the vessels of both fleets are operated by that company as managers and agents. In view of possible changes in the conditions pertaining to ocean traffic the directors consider that it may be advisable in the company's interests, that in giving effect to the proposals previously approved, a somewhat different plan should be adopted, and a resolution will be submitted granting authority to the directors to carry out the transaction with the Ocean Services or some other company created for that purpose, of which the company will have full ownership and control in such manner and on such terms as seem to them proper.

"The revenue from the steamships given in the statement of special income of \$3,583,292 is exclusive of an amount transferred to the reserve account to cover the cost of replacing ships sold or destroyed, and of a sum sufficient to meet any tax on excess profits that may be ultimately payable."

Freight Revenues.

During the year \$3,749,474 was expended on capital account. Of this amount \$1,955,000 was required for the Connaught Tunnel in the Selkirk Mountains, and the balance for miscellaneous works of improvement over the whole system.

The important falling off in the revenue per ton mile for the carriage of freight traffic from 76 cents in 1915 to 64 cents this year, was largely due to the abnormal increase in the tonnage of grain handled at the very low rates that apply to that commodity, although the reduction in many tariff rates in western Canada had considerable influence.

In November last the trustees under the mortgage securing £7,191,500 first mortgage bonds executed a discharge of mortgage and reconveyance of the property to the company, and the documents have been deposited with the secretary of state.

LONDON ADDS TO ITS INDUSTRIES

New additions to the factories of London, Ont., are as follows:—

The Middlesex Mills, Limited, incorporated by Dominion charter with an authorized capital of \$250,000, will manufacture cotton, linen, silk, woolen and other goods in a large factory building purchased in the industrial area at London, Ont. The building was previously occupied by the Dominion Office and Store Fitting Company, and has over 25,000 square feet of floor space in the main building and stands on 2½ acres on Dundas Street East. The firm are at present manufacturing from cotton almost entirely, and have turned out samples of cotton towelling and striped dress fabric, etc. The company's help are mostly women, to whom good wages are paid. Machinery is being installed for weaving. Everything connected with the manufacture of the company's product will be made except the spinning of the yarn. They have their own dye plant and will make their own chemicals for bleaching purposes.

Messrs. J. R. Shuttleworth Company, manufacturers of straw hats and caps, are preparing plans for an addition to their factory on Dundas Street. This will be of brick construction and will cost about \$10,000.

The Hunt Milling Company are contemplating the erection of an addition to their flour mill here to cost \$50,000.

The Canadian Cereal and Flour Mills Company propose to erect an addition to their premises on Talbot Street at an estimated cost of \$10,000.

Mr. Gordon Philips is the secretary of the board of trade of the progressive Ontario city.

Mr. T. H. Rieder, of the Canadian Consolidated Rubber Company, has been appointed a director of the Ames-Holden-McCready Company.

OVER THE GREAT LAKES

How the War is Helping Us to Learn More of Our Country

Most Americans—and the phrase includes the people of British North America—know the Great Lakes by a glance at their fringes, a recollection of the school geography and current talk of the wheat which goes over these inland waters every year. While Columbus of old discovered America, it has taken the great war to stir the modern Columbus sufficiently to discover the charms of cruising the Great Lakes, part of the 80,000,000 acres of water which help to make the area of Canada. For years we have discussed the Great Lakes but travelled instead the Atlantic, Pacific and Mediterranean. We have advertised abroad for tourists to cruise our inland waters without having ourselves learned the vacation value of the goods we were advertising.

Since the war commenced the ocean has become thick with belligerent terrors and Americans have been compelled to learn more of their own continent. Therein is the reason for the heavy passenger traffic over our railroads to the prairies, to the mountains, to the seaboard, to the lakes. For years, the Grand Trunk Railway, for example, has run excellent steamship specials to Sarnia, to connect with the substantial liners of the Northern Navigation Company which ply across Lakes Huron and Superior. Yet only during the past two years has the patronage of the instructive trip from Detroit or Sarnia to Duluth and back, risen to the excellence of a model Great Lakes cruise. Last year Canadians commenced in serious numbers to learn the Great Lakes at first hand. Tourists from the United States in greater numbers also came to Canada for the same reason. Now the traffic flow has begun, only each winter will temporarily stop it.

Minus and Plus.

With three Canadian-built steel liners ranging from gross tonnage of 3,329 to 6,905, the Northern Navigation Company, a Canadian corporation, is giving the business man and the pleasure seeker a trip which only this continent can give. From Sarnia to Duluth and back is 1,600 miles. The journey has all the advantages of an ocean trip, minus the salt air, but plus the notable advantage of a stop at a port every day to stretch newly acquired sea legs on land again for a few hours. So that marine monotony may not develop, the longest jaunts across Lakes Huron and Superior are made during night. Then the traveller is sleeping a sleep which only a clear mind, fresh air, sunshine and good meals will bring.

After the run across Lake Huron, a trip of about 200 miles, there is the journey through St. Mary's River, one of the most picturesque parts of the entire cruise. Then acquaintance is made with the canals of Sault Ste. Marie, where the 6,000-ton liner is lifted in 10 minutes to the level of Lake Superior, which, as we learned at school, is the world's largest lake. At Port Arthur, while the vessel is doing its important part in the movement of freight, a side trip is taken to Kakabeka Falls. Someone has termed them the Niagara of the North, unfair, because Kakabeka Falls have a style, colour and magnetism distinctly their own. From Port Arthur the Northern Navigation boats travel to Fort William and then to Duluth, the iron city, which between its duties as one of the greatest inland ports, has many picturesque spots to show the visitor.

Mountain Climbing.

The return trip to Sarnia or Detroit is varied by an excursion at Port Arthur to Mount McKay. While this eminence does not claim relationship with the Rockies or the Himalayas, it holds its head sufficiently high—1,600 feet—to give the average man a good deal of thought during the ascent, as to how well his muscles used to work in days gone by. On one mountaineering expedition of which we know, only 6 of 60 starters managed to master the 1,600 feet. One was a lady, Miss Jenkins, of Wyoming, Ontario, the social hostess of the S.S. Hamonic, of the Northern Navigation Company. Which brings us to still another innovation on these Great Lakes cruises, namely, someone to see that a shipful of companionable people do not ramble decks for three days, as on an ocean trip, before they can sufficiently overcome their natural reserve to say even "Good morning." The social hostess, we believe, is a Canadian-made idea. As befits a

trip over our lakes, in a boat Canadian made, the social hostess is also Canadian maid. The difficulties of acting as the social representative of a navigation company to a different crowd of tourists every week for a whole summer are obvious. The best testimony to the manner in which Miss Jenkins, of Wyoming, Ontario, performs the arduous task, is the universal verdict of the season's passengers that she is "just the girl for the job."

Dignity and Democracy.

Captain A. L. Campbell is the master of the S.S. Hamonic and away up on his bridge, he is not as distant to the humble traveller as are most ocean liner captains. Captain Campbell, for instance, is willing upon occasion, to consider as part of his daily duties, the act of being photographed with a nautically inclined child, so that the infant's howls to be photographed as first mate may be quieted. In short, the captain—and the same applies to those who pilot the sister ships Noronic and Huronic—is a judicious combination of inland marine dignity and American democracy. He is a good mixer without forgetting that his first job is captain and his first care, the safety of his passengers. Modest as he is, there is a story of iron nerve which clings to him, regarding the manner in which he handled his boat in the terrible lake storm of a few years ago, at a season, of course, when summer vacations have been forgotten.

The Northern Navigation Company's Great Lakes cruise is one of the few trips of its kind in which the performance is better than the advance description. Every effort is made to satisfy the exacting traveller of the twentieth century. That the company is successful in doing this is the best advertisement it can have. It ensures that an endless crowd will decide to see Canada and the Great Lakes first.

EDMONTON, DUNVEGAN RAILWAY'S BOND ISSUE

An issue of \$2,420,000 4½ first mortgage gold bonds of the Edmonton, Dunvegan and British Columbia Railway Company unconditionally guaranteed, both as to principal and interest by the province of Alberta, is being made by Messrs. Breed, Elliott and Harrison and the Provident Savings Bank and Trust Company, Cincinnati. The bonds are \$1,000 denomination and are due October, 1944. They are offered to the public at 84.56 and interest, yielding 5.60 per cent.

CANADA'S WEEKLY BANK CLEARINGS

The following are the returns of Canada's bank clearing houses for the weeks ended August 31st, 1916, and September 2nd, 1915, with changes:—

	Week ended		Changes.
	Aug. 31, '16.	Sept. 2, '15.	
Montreal	\$ 54,554,604	\$ 49,393,867	+ \$ 5,160,737
Toronto	43,438,460	32,525,308	+ 10,913,161

HARMFUL ALBERTA LEGISLATION

The Alberta government and legislature have gone to an extraordinary length in preventing the collection of mortgage loans in that province. And there is a petition now in circulation, which is being largely signed, calling upon the legislature to enact that during the war it shall be unlawful to collect interest. The war relief act of the province protects from suit a citizen who has joined the local militia. There have been several judicial decisions to this effect. Apparently a man who enlists and is subsequently rejected on medical or other grounds receives the protection of the act for one year. Covenants have been abolished in effect, and borrowers who met their payments regularly until this work of art became law now invite the loaning companies to take the property as they do not intend to make any further payments. This is the province which recently in another case registered a seed grain lien eight years after the grain was supplied against a property which had in the meantime changed hands several times.

The province of Alberta exacts payment of an increment tax on the issue of certificate of final foreclosure to a mortgage of a property against which there are probably hundreds of dollars of charges for the destruction of noxious weeds. In other provinces, there is some limitation upon the authority given to officials for the destruction of noxious weeds, but Alberta has never seen fit to place any limitation on the amount. Seed grain liens are merrily working night and day adding interest charges, and governments seem not to care whether the amount is paid or not. When the quarter section falls into the lending company's hands, the government imposes a surtax or fine because the land is out of cultivation.

Many companies naturally enough have discontinued loaning in Alberta. Some of the companies still have faith that these harmful disabilities will be remedied. The banks and lending companies have given up all hope of the efficacy of persuasion and are now cultivating the

sympathy and support of the farmer borrowers. It is found that they are quick to recognize the effect of this outrageous misapplication of legislative authority upon rates of interest and treatment of borrowers. That lending companies will meet with heavy losses is certain. Even in the event of an immediate reconstruction of this vicious legislation, it will be years before confidence in the integrity of the province is re-established. The pitiful part of it all is that there has been an outbreak in the farming community of the purchase of automobiles and threshing outfits such as has not been experienced for at least three years. If governments will not collect the seed grain indebtedness and legislation is enacted to tie the hands of lending companies and other creditors of the farmer, he sees no reason why he should not treat himself to a few comforts such as these.

LOANS THROUGH GOVERNMENT ANNUITIES

That money should and could be borrowed in large sums by the Dominion through its system of government annuities, was suggested by a correspondent in these columns recently. It was contended that were the government to raise a war loan through the medium of annuities, it could be done on a basis of $4\frac{1}{2}$ per cent. or about $1\frac{1}{6}$ per cent. less than the charge for the large war loans that are floated in these days. The saving effected by borrowing in this way instead of by war loan would therefore amount to more than \$600,000 on a flotation of \$50,000,000.

An examination of our correspondent's plan, which was printed in detail in *The Monetary Times* of August 25th, appears to show that it is quite sound. There can be no possible objection to an extension of the present government annuity system. The chief obstacle to our correspondent's proposal is the fact that when a war loan is issued the money is wanted in a comparatively short time. The pending war loan probably will be for \$100,000,000. Judging by the slow progress made with the sale of government annuities, the obtention of a war loan by this means would undoubtedly take a long while. The government annuity system was inaugurated in 1908. To date only \$3,100,000 has been taken as payments for annuities; or, in other words, that sum has been borrowed by this means from the people of Canada. If it has taken nearly eight years to obtain \$3,100,000 through the medium of annuities, how long would it take to obtain a war loan of \$100,000,000 in a similar way, even were considerable time and energy given to pushing the annuity scheme?

Again, there is considerable doubt as to whether a large loan such as \$100,000,000 could be raised on a $4\frac{1}{2}$ per cent. basis. As the market is at present, the rate would probably be not less than $4\frac{1}{2}$ and probably 5 per cent. The experience of insurance companies, we believe, has not been exceptionally favorable in regard to annuities. As a rule, they have been sold with greater difficulty than have insurance policies. The sale of annuities is easier in old countries where large amounts of capital have accumulated. In new countries such as Canada, it is unfortunately true that there is a tendency to speculate rather than to purchase annuities. While we do not think the government annuity scheme can be used to any great extent in raising funds for the conduct of the war, it is obviously advantageous for the government to borrow as much as possible through annuities and for that reason the advertising and educational campaign to that end should be continued and extended.

BRITISH WAR FINANCE

When Premier Asquith, at the end of July, asked and obtained the authority of the British house of commons to spend £450,000,000 on the war, the aggregate amount voted was up to £2,832,000,000. The July credit will probably last until October, when the war will have continued for a period of 26½ months. The cost of the struggle to Great Britain averaged £45,250,000 per month in the first eight months of the war and £118,500,000 per month in the ensuing six months. During the first seven months of the current fiscal year, the average cost will probably be £150,000,000 per month. Chancellor of the exchequer McKenna stated in the British House that the actual outgoings now exceed £6,000,000 a day. It had been thought that the total expenditure would not exceed £5,000,000. The unforeseen and unforeseeable causes which raised the rate of expenditure to the new height during recent months, were: (1) The rate at which American securities were sold to the government to regulate American exchange; (2) the rate at which advances to allies and dominions were drawn upon. The concurrence of these causes led to the exhaustion of Britain's borrowing powers under the war loan act, 1915, earlier than was anticipated.

Of the latest vote for £450,000,000, loans to the allies and dominions of the Empire represent £157,000,000. Chancellor McKenna has estimated that Great Britain's total indebtedness at the end of the present financial year will be £3,440,000,000. From that amount the nation is entitled to deduct £800,000,000 loaned to the allies and dominions, the sum left being a burden the nation can well sustain, as it is practically balanced by the national income.

UNITED STATES FIRMS HERE

During the past few months a number of United States manufacturers have established branch plants in Canada. Some of these branches are engaged largely in assembling plant. Others carry on a manufacturing business and many manufacture a portion of an article in their Canadian works, utilizing imported parts for completing the article. According to an investigation conducted by *The Monetary Times* two years ago, there are more than 400 United States branch establishments in operation in this country, of which over 300 are in Ontario. The discussion among the Allies and the Dominions regarding favorable tariffs among them after the war, has undoubtedly given an impetus to the present movement which is bringing to Canada, and particularly to Ontario, many more branch establishments of United States concerns.

It has frequently been asked why British companies do not establish branches here in a similar way. A few have done so, but the difficulties are so considerable that Mr. C. H. Wickes, the British trade commissioner in Canada and Newfoundland, thinks it is unlikely that many United Kingdom firms will endeavor to establish branch firms here. In his latest report on Canadian trade for 1915, he refers to these difficulties as follows: The expenses incidental to (1) ascertaining the probable success of the venture, (2) acquiring a suitable site for a factory, and (3) selecting machinery and equipment suitable to local power conditions and the class of labor available, are infinitely greater to a British concern, he points out, than to an American; whilst the system used, the class of manufacture, the labor to be employed, and even the

management, are all foreign to British ideas and methods. The whole subject, which is apparently so simple and easy to those who have not given close consideration to it, bristles with difficulties, says the commissioner.

The ease with which a branch of a United States works can be established, maintained and controlled from the parent works has been no doubt, as he points out, one of the reasons for so many being established in Canada, thus avoiding, by so doing, many tariff and transportation problems. In addition, these plants hope to enjoy as Canadian manufacturers the benefits of any favorable tariff legislation framed as between the allied countries and the dominions.

WHY NOT HERE?

The British government on July 18th, established what is known as a blacklist of firms in the United States with which citizens of the United Kingdom are forbidden to trade. A similar blacklist was established by Australia shortly afterwards. The Canadian government, after nearly two months for consideration, has not yet seen fit to follow the example of the Imperial and Australian governments. The blacklist of United States firms does not yet apply in Canada. In other words, while it is illegal for citizens of the United Kingdom and of Australia to trade with enemy firms, classed as such by the British government after careful investigation, it is legal for Canadians to trade with such enemy firms. And, as a matter of fact, business is being done by Canadians with such firms. Why is the Canadian government adopting such an extraordinary attitude in regard to the blacklist?

BANKERS AS INSURANCE SALESMEN

Life insurance salesmen will be glad to know that the larger Canadian banks have prohibited their branch managers from acting as insurance agents. At the recent conference of farmers and bankers at Winnipeg, there was a discussion on this subject. All the superintendents of the larger banks stated that their managers were prohibited from carrying on this kind of business, as they regarded it not only as injurious to standard banking principles and policy, but injurious to farmers as well. It will, therefore, be their policy to see that this is prohibited, although it is understood that some of the smaller banks have not entirely prohibited the practice on the part of their managers.

This subject has always been a bone of contention so far as insurance agents are concerned. At the Toronto convention of life underwriters two years ago the point was raised several times and some strong criticism was heard. "How can a bank manager truly and faithfully serve his bank if he is at the same time dickering with an insurance agency?" asked one of the agents. "He either degenerates into a second-rate banker or an indifferent insurance agent, or both, and time and again irregularities have occurred in consequence. In fact, in some parts of the United States, special laws have been passed forbidding the practice." The agents were inclined to think, as one said, that "it is a poor state of affairs when a banker is able to say to a client seeking a perfectly legitimate business accommodation, 'Yes, we can swing that thing, if you allow me to have the placing of the insurance you propose putting on.' " The banks are asked by the insurance companies to discourage that sort of thing.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Wabasso Cotton Company.—The earnings of the Wabasso Cotton Company for the year ended June 30th, amounted to \$147,695. Bond interest amounted to \$55,810, leaving a balance of \$91,885. Of this \$50,000 was placed to depreciation reserve account, leaving a remainder of \$41,885, or 2.39 per cent. on the common to be carried to the credit of profit and loss, making a total for that account of \$216,024, against \$174,140 a year ago.

Spanish River Pulp and Paper Mills, Limited.—A summary of the combined revenue statement of the Spanish River Pulp and Paper Mills, Limited, and the Lake Superior Paper Company, Limited, shows:—

	Spanish River Co.	Lake Superior Co.	Total.
Net revenue	\$879,285	\$1,019,577	\$1,342,330
Brought forward	4,763	162,040	268,330
	\$884,048	\$1,181,617	\$1,610,720
Sundry adjustments		38,519	
		\$1,143,098	
Interest and charges	\$722,013	770,639	\$ 765,927
Net for distribution	162,040	372,459	844,793
Depreciation		104,129	145,172
Net surplus	\$162,040	\$ 268,330	\$ 699,621

The accumulated surplus is \$699,621. The current assets of the two companies increased by \$2,130,810, the net surplus of current assets being \$3,448,898. Of the total for 1916, \$1,036,400, a sum of \$418,362 is due by the Spanish River Company to the Lake Superior Company, which, deducted from the total, leaves a net current liability of \$618,638, as against substantial current assets of over \$4,000,000. Bank advances amounting to \$740,000, which appeared in last year's statement, have been reduced to \$100,000. Current assets and liabilities stand as follows:—

Current Liabilities.

	1916. Spanish	1916. Lake
Total	\$ 814,333	\$ 222,068

Current Assets.

Total	\$2,023,341	\$2,416,956
-------	-------------	-------------

During 1915 the interest for two years on bond and notes was funded and made payable in 1922, and, as announced a week or so ago, ordinary bond interest payments will now be resumed. There remains as deferred interest a sum of \$1,350,429, due in 1922.

Laurentide Company, Limited.—Manufacturing profits and returns from investments totalled \$1,244,283 for the year ended June 30th, an increase of \$209,677, as compared with the previous year. The balance available for dividends, after deductions for betterments, depreciation and interest, was \$937,822, an increase of \$150,631. Earnings were at the rate of 9.78 per cent. on the \$9,600,000 common stock, against 8.20 the previous year. Surplus account for 1914-15 was credited with \$192,000, representing interest charged to construction account, and there is a similar credit of \$96,000 this year.

The return compares with last year as follows:—

	1916.	1915.
Mill	\$1,022,055	\$ 943,272
Lumber	101,400	91,333
Investments	120,818	
Total profits	\$1,244,283	\$1,034,606
Betterments	59,561	61,799
Balance	\$1,184,722	\$ 972,806
Depreciation reserve	20,000	20,000

Balance	\$1,164,722	\$ 952,806
Interest	226,899	165,614

Balance	\$ 937,822	\$ 787,191
Dividends	768,000	768,000

Balance	\$ 169,822	\$ 19,191
War tax	20,000	

Balance	\$ 149,822	\$ 19,191
Interest credit	96,000	192,000

Surplus \$ 245,822 \$ 211,191
The company's balance sheet compared with 1915 is as follows:—

Assets.

	1916.	1915.
Plant, etc.	\$11,498,589	\$11,560,902
Current assets	3,321,280	2,584,656
Forestry	87,357	71,979
Deferred charges	6,529	14,691
Total	\$14,913,761	\$14,232,235

Liabilities.

	1916.	1915.
Stock	\$ 9,600,000	\$ 9,600,000
Bonds	706,090	753,806
Current liabilities	2,921,705	2,697,199
Reserves	758,520	479,605
Surplus	927,446	701,624
Total	\$14,913,761	\$14,232,235

Early in the year the power department of the company was made a separate concern and benefits, which will be cumulative, began to appear in the statement for the past 12 months. Thus earnings are credited with a new item, "income from investments," to an amount of \$120,818, which is stated to be interest which the company received on the power subsidiary bonds, taken as part reimbursement for the parent company's original outlay on the development. This separation is also reflected in the balance sheet.

WEEKLY RAILWAY EARNINGS

The following are the earnings of Canada's transcontinental railways during August:—

Canadian Pacific Railway.

	1916.	1915.	
August 7	\$2,085,000	\$1,787,000	+ \$1,198,000
August 14	2,043,000	1,815,000	+ 1,128,000
August 21	2,800,000	1,956,000	+ 904,000
August 31	4,092,000	2,856,000	+ 1,236,000

Grand Trunk Railway.

August 7	\$1,256,376	\$ 993,773	+ \$ 262,603
August 14	1,236,980	1,004,412	+ 232,577
August 21	1,304,848	1,052,483	+ 252,365
August 31	1,952,163	1,535,213	+ 416,950

Canadian Northern Railway.

August 7	\$ 868,000	\$ 438,500	+ \$ 429,500
August 14	841,500	427,600	+ 413,900
August 21	846,300	465,400	+ 380,900
August 31	1,129,100	652,100	+ 477,000

The Canadian Pacific Railway July's return, the first of the company's current fiscal year, is as below:—

	1916.	1915.	
Gross	\$12,247,440	\$7,895,375	+ \$4,352,064
Expenditure	8,230,348	5,094,972	+ 3,135,376
Net	\$4,017,091	\$2,800,403	+ \$1,216,688

Mr. J. Grove Smith, who has been in charge of the statistical department of the Canadian Fire Underwriters' Association for several years, has resigned that position. He is engaged in the preparation of an exhaustive report on the question of fire waste in Canada. This report is being made at the request of the Commission of Conservation.

The Bank of British North America

INCORPORATED BY ROYAL CHARTER.

The Court of Directors hereby give notice that an interim dividend, for the half year ended 31st May last, of 30 shillings per share, less Income Tax, being at the rate of 6 per cent. per annum, will be paid on the 6th day of October next to the Proprietors of Shares registered in the Dominion of Canada.

The Dividend will be payable at the rate of exchange current on the 6th day of October next to be fixed by the Managers.

No transfer can be made between the 22nd inst. inclusive and the 5th prox. inclusive, as the books must be closed during that period.

By order of the Court,

JACKSON DODDS,
Secretary.

No. 5 Gracechurch Street,
London, E.C.,

5th September, 1916.

The Molsons Bank

144th DIVIDEND.

The Shareholders of The Molsons Bank are hereby notified that a Dividend of TWO AND THREE-QUARTERS PER CENT. (being at the rate of eleven per cent. per annum) upon the capital stock has been declared for the current quarter, and that the same will be payable at the office of the Bank, in Montreal, and at the Branches, on and after the SECOND DAY OF OCTOBER NEXT, to Shareholders of record on 15th September, 1916.

THE ANNUAL GENERAL MEETING

of the Shareholders of the Bank will be held at its banking house, in this City on MONDAY, the 6th of NOVEMBER NEXT, at three o'clock in the afternoon.

By order of the Board.

EDWARD C. PRATT,
General Manager.

Montreal, 18th August, 1916.

EARNINGS SHORT OF FIXED CHARGES

Canadian Northern Railway's Report of Operations for Past Year

The Canadian Northern Railway's annual report for the first time includes the operations and accounts of the system as a whole.

The results of the operations of the system for the fiscal year ended June 30th, 1915, are as follows:—

Gross Earnings.

From passenger traffic	\$ 5,411,224
From freight traffic	18,207,800
From express, mail, telegraph, interest and profits from elevators and other subsidiary companies, investments, etc.	2,293,081
	\$25,912,100

Working Expenses.

(Including taxes, etc.)	\$19,288,814
Net earnings	\$ 6,623,291
Deduct—	
Fixed charges	8,263,574
Net loss or deficit	\$ 1,640,283

"The gross earnings of the system show a decrease of \$5,544,362, or 17.63 per cent., compared with the previous year's figures," states Sir William Mackenzie, president of the company.

"The working-expenses were 76.66 per cent. of the gross earnings of the system proper and, including taxes, 74.44 per cent. of the gross earnings from all sources, compared with 76.74 per cent. and 76.60 per cent respectively last year.

Net Earnings were Insufficient.

"It is a matter for sincere regret that notwithstanding the most rigid economy exercised in the operation of the company's lines, the net earnings for the past year were insufficient to meet the fixed charges for the same period. It is perhaps unnecessary to say that this is the first occasion of its kind. Your directors feel, however, that, having regard to the abnormal conditions which prevailed, added to the fact that they exercised the closest supervision of the company's revenues, they were able to avert even greater losses than those shown in the report.

"Land sales during the year were 9,866 acres, for \$158,272, an average of \$15.53 per acre, compared with an average of \$15.23 per acre for the preceding year. Land grant bonds of the issue of 1909 amounting to £122,700, or \$597,140, were retired, leaving in respect of this issue outstanding \$2,490,273.

"Car trust obligations were created to the extent of \$2,000,000 for the purchase of cars of different kinds. During the year \$3,553,000 was repaid in respect of previous obligations, thus making a net decrease on this account for the year of \$1,533,000. The amount outstanding is now \$20,490,500, but inasmuch as the aggregate purchases of equipment amounted to \$56,761,448, it will be seen that very substantial repayments have been made on that account.

Unsold Lands Held.

"It has not been the practice in previous annual reports of the Canadian Northern Railway to incorporate in its accounts by way of an asset the value of unsold lands owned by the company. In view of the fact, however, that other subsidiary companies of the system had also unsold lands amongst their assets, your directors decided to place a valuation on such lands and to include the amount in the assets of the consolidated balance sheet. The amount therein shown is \$20,074,380, represented by the following acreage in the different provinces, as under: Manitoba and Saskatchewan, 857,720 acres; Ontario, 2,000,000 acres; Quebec, 402,860 acres. The valuation is a most conservative one, and whilst producing the amount mentioned, the sales to settlers will materially add to the traffic returns of your system in due course.

"There has in the past been a real need for the company's lines in the economic development of Canada. There will be the same need in the future. These lines have been

located with careful regard to the development of the maximum amount of traffic. With an efficient modern equipment and a roadbed of the highest physical standard it would appear that the success of the Canadian Northern Railway as a Canadian transcontinental system is assured.

"Since the close of the fiscal year business conditions have substantially improved."

The figures compared with those of the last return are as follows:—

	1914.	Per cent.	1915.	Per cent.
Gross earnings	\$31,456,469.19		\$25,912,106.30	
Operating expenses	24,095,914.52	76.60	19,288,814.42	74.44
Net earnings	7,360,554.67	23.40	6,623,291.88	25.56

COBALT ORE SHIPMENTS

The following are the shipments of ore in pounds from Cobalt Station for the week ended September 1st:—

Kerr Lake Mine, 60,483; La Rose Mines, 86,945; Dominion Reduction Company, 81,000; Nipissing Mine, 420,073; McKinley-Darragh Savage Mines, 165,310; Coniagas Mines, 159,435. Total, 973,246 pounds, or 486.6 tons.

The total shipments since January 1st, 1916, now amount to 20,885,955 pounds, or 10,442.9 tons.

INSURING THE WESTERN CROP

Most line hail insurance companies charge 6 per cent., or \$60 per \$1,000 insurance. A limit of not more than \$10 per acre under crop nor more than \$2,500 on any one section, and \$20,000 to a township, is made. The governments of Saskatchewan and Alberta only pay loss up to \$5 per acre, and government insurance is raised by districts of ten townships and upwards, going under a special hail tax of about two cents per acre. Manitoba has the inter-municipal hail insurance act, and 25 municipalities are required jointly to bring the act into force.

MARCONI WIRELESS COMPANY OF CANADA

The balance sheet of the Marconi Wireless Telegraph Company of Canada as at January 31st, 1916, is printed on another page, and shows that in addition to property, stations, patents, etc., valued at \$5,446,521, the company has cash at bank, on hand and on loan of \$101,146. The statement does not show what proportion of that amount is on loan. In addition, there is a reserve of \$118,409 for doubtful accounts. The surplus account shows that the company made a profit of \$110,226 for the year. From this had to be deducted \$30,138, being interest on advances and a reserve of \$5,000 against accounts receivable. This left a net profit of \$80,815—a very satisfactory figure. The directors reported that the company's business continues to show substantial expansion. The most gratifying feature during the year just concluded has been the steady development of the company's transatlantic traffic.

The company's plant in Montreal has been kept fully occupied in supplying the demand for additional installations on board ships and commercial stations, as well as in meeting increased government requirements. A growing sentiment is apparent amongst progressive shipowners that no vessel engaged in coastwise or ocean trade is fully equipped unless furnished with a Marconi wireless installation, and wireless stations aboard ship are now being viewed with favor, even on vessels exempt by law from compulsory equipment. A total of 2,300 mercantile vessels have up to the present been fitted with Marconi wireless stations by the various Marconi companies.

The adverse effect caused to the company's normal traffic to and from ships, owing to the stringency of censorship imposed on commercial messages, has unfortunately continued in evidence throughout the current period. The basis of remuneration from the government for the use of a number of the company's coast stations taken over by the department of naval service since the commencement of hostilities, and for other services rendered, is still under consideration, and an equitable settlement is awaited in the near future.

NEW INCORPORATIONS

Four Corporations With Capitalization of \$1,000,000—
Sixteen New Charters in Western Provinces

Canada's new companies incorporated this week number 36. The head offices of these companies are located in five provinces. The total capitalization amounts to \$5,168,500.

The largest companies are:—

The British Dominion Land Corporation, Limited	\$1,000,000
Port Hope Sanitary Manufacturing Company, Limited	1,250,000
The Sterns Tire and Tube Company of Canada, Limited	1,000,000

Grouping the new concerns, according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Ontario	12	\$4,195,000
Quebec	8	549,000
British Columbia	7	285,000
Saskatchewan	7	79,500
Manitoba	2	60,000
	36	\$5,168,500

The following is a list of charters granted during this week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

- Loverna, Sask.**—A. J. Milne and Company, \$12,000.
- Muenster, Sask.**—Woell-Mainzer Company, Limited, \$7,500.
- Wayburn, Sask.**—Fisher's Stationery Company, Limited, \$10,000.
- Moose Jaw, Sask.**—The Central Land Company, Limited, \$20,000.
- Ponteix, Sask.**—The Ponteix Trading Company, Limited, \$15,000.
- Saskatoon, Sask.**—Zaria Publishing Company, Limited, \$10,000.
- Kamloops, B.C.**—Trading and Transportation Company, Limited, \$100,000.
- New Westminster, B.C.**—Dominion Shingle and Cedar Company, Limited, \$45,000.
- Maple Creek, Sask.**—The Maple Creek Export Liquor Company, Limited, \$5,000.
- Quebec, Que.**—Le Parc des Alliés, Limitée, \$20,000. A. G. Verret, F. E. Fortin, A. Pouliot.
- Windsor, Ont.**—Martin Aeroplanes, Limited, \$100,000. C. S. King, W. L. McGregor, W. R. Bonds.
- Drummondville, Que.**—Drummondville Matches, Limited, \$100,000. J. A. Desautels, J. Marceau, A. Comte.
- Lachine, Que.**—Rapid Tool and Machine Company, Limited, \$40,000. J. MacNaughton, J. G. Cartwright, Norah Bogue.
- Port Arthur, Ont.**—Mine Centre Copper Company, Limited, \$300,000. J. F. Hewitson, A. J. McComber, G. A. McTeigue.
- Jonquiere, Que.**—The Black and Silver Fox Breeding Company, Limited, \$19,000. J. E. Bergeron, E. Villeneuve, A. Harvey.
- Hamilton, Ont.**—Canadian Poultry Journal Publishing Company, Limited, \$20,000. R. H. Dewar, J. H. Holbrook, A. E. Walker.
- Victoria, B.C.**—Nag Paint Company, Limited, \$30,000; Northern Pacific Logging Company, Limited, \$25,000; La Fleche Brothers, Limited, \$10,000.
- Vancouver, B.C.**—Robert Davie, Senior (Canada), Limited, \$50,000. W. E. Burns, R. K. Walkem, W. B. Burnside; Nootka Packing Company, Limited, \$25,000.
- Winnipeg, Man.**—The Midland Grain Company, Limited, \$50,000. W. H. Curle, F. M. Burbidge, D. L. Bastedo; J. R. C. Struthers, Limited, \$10,000. J. R. C. Struthers, S. T. Bates, Ellen Bates.

Montreal, Que.—The Canada Shirt Company, Limited, \$20,000. L. Millman, I. Getz, M. Getz; William Lee, Limited, \$200,000. W. Lee, J. F. Miller, W. S. Johnson; W. J. McAuley, Limited, \$50,000. J. McNaughton, J. G. Cartwright, Clara LeBlanc; the National Hay and Grain Company, Limited, \$100,000. G. Monette, J. Leclaire, J. L. Bigras.

Toronto, Ont.—The Veterinary Specialty Company, Limited, \$40,000. J. R. Roaf, D. W. Gordon, D. M. Gilpin; Port Hope Sanitary Manufacturing Company, Limited, \$1,250,000. W. A. Cameron, C. L. Valens, B. B. Spence; the British Land Corporation, Limited, \$1,000,000. J. C. Smith, R. H. McElroy, S. Barth; Central Canada Stone Company, Limited, \$100,000. B. B. Spence, C. L. Valens, B. Osler; the Sterns Tire and Tube Company of Canada, Limited, \$1,000,000. J. L. Ross, A. S. Macrae, J. MacLean; Barcalo Manufacturing Company of Canada, Limited, \$10,000. E. J. Barcalo, B. B. Glenney, C. Vallone; Franco-Canadian Cannery Corporation, Limited, \$100,000. H. G. Meir, G. A. Archibald, D. S. Linden; Beacon Match Company, Limited, \$75,000. R. M. Melville, F. C. W. Wagner, F. M. Geale; Twin Falls Lumber Company, Limited, \$200,000. E. R. Lynch, H. J. Stuart, R. D. Moore.

TIMISKAMING AND NORTHERN ONTARIO'S LOSSES

In connection with the Northern Ontario fire losses the Timiskaming and Northern Ontario Railway Commission had an estimated total loss of \$150,000, covered by insurance, including track and ties destroyed, telegraph and telephone poles and lines, 111 freight cars, etc.

It is of interest to know that the rebuilding of stations, freight sheds, etc., is actively under way. Despite the difficulties caused by the fire there was no interruption to the commission's train service after the first two days and the schedules were maintained throughout the period.

Included in the insurance schedule were the following losses;—

	Buildings.	Contents.
Belleek:		
Shelter station	\$ 200.00	\$ 200.00
Also, 13 cars and steam shovel; value to be ascertained.		
Matheson:		
Station	\$6,000.00	\$ 500.00
Freight shed	1,500.00	2,000.00
Section house and shed	1,200.00	
Section house and shed	1,200.00	
Tool-house	100.00	100.00
Tool-house	100.00	100.00
Also, 13 cars; value to be ascertained.		
Nushka:		
Station	\$ 200.00	\$ 200.00
Section house and shed	1,800.00	
Tool-house	100.00	100.00
Also, one car; value to be ascertained.		
Wahtaybeag:		
Girder bridge. Amount of loss to be ascertained.		
Siding at M.P. 217:		
Three cars; value to be ascertained.		
Kelso:		
Station and shed	\$2,000.00	\$ 200.00
Also, 11 steel flat cars; value to be ascertained.		
Ledgewood unloader	1,000.00	
Railway ditcher	3,000.00	
Siding at M.P. 227:		
Three cars; value to be ascertained.		
Nahma:		
Section house and shed	\$1,200.00	
Tool-house	100.00	100.00
Two cars on spur siding; value to be ascertained.		
Cochrane:		
Freight shed	\$3,500.00	\$8,000.00
Iroquois Falls:		
Tool-house	\$ 100.00	\$ 100.00
Engine house and bunk-room	1,000.00	200.00
Also, 58 cars; value to be ascertained.		
Onagan:		
Two (2) cars; value to be ascertained. Spur siding, M.P. 2 Iroquois Falls branch. Three (3) cars; value to be ascertained.		

The above is based upon reports received to date.

SHOULD NOT TAX SECURITIES HERE

Proposal to Penalize Canadian Holders of Foreign Securities is Protested

Editor, *The Monetary Times*.

Sir,—Your issue of August 11th contains the important announcement that at its next session, the Federal government may carry through legislation imposing special income taxation upon all non-Canadian securities held by Canadians. May I, through the courtesy of your columns, briefly analyse so far-reaching an innovation?

In the first place, it is necessary to bear in mind that Canada is a debtor country and for many years is likely to remain such. Great Britain, on the other hand, is still, even to-day, a creditor nation—i.e., the interest, etc., paid to Great Britain on its overseas investments, vastly exceeds the amount which that country has to remit on British investments held by investors domiciled outside Great Britain. Corresponding legislation in Great Britain cannot, consequently, be quoted as a precedent to be followed by Canada.

To Realize without Loss.

Secondly, you, sir, estimate in your issue of August 12th, that the United States within the past two years, have invested in Canada a sum exceeding \$300,000,000. Vast additional sums have, prior to 1914, as we all know, been invested by the United States in Canada. Is it then to the interest of Canada by legislation of the nature now under consideration, to lend weight to the theory that investments by the citizens of country A in the securities of country B are injurious to country A, and should be specially penalized? Were the United States to place a special tax on moneys invested by its citizens in Canada, such a tax would in practice in future have to be paid by the Canadian borrower, since practically no other foreign money market is at present open to Canada.

Thirdly, all new countries, such as Canada, are peculiarly liable to recurring periods of great depression. At times such as these, it is of the greatest assistance to Canada to be able to realize without loss—e.g., United States securities, in order forthwith to liquidate liabilities at home.

Purchase of Anglo-French Bonds.

Fourthly, the exchange question during the present war has never attained in Canada the gravity which it has in Great Britain. Last fall, the English sovereign stood at a discount in New York of approximately 5 per cent.; a sufficiently serious problem for a country which is buying many hundred million dollars' worth of munitions and other supplies from the United States.

In conclusion, may I ask is it really to the disadvantage of Canada that a security such as the Anglo-French \$500,000,000 loan should be purchased by Canadians? This loan, during the current year, has been obtainable in the open market to give a net yield of 6 to 6½ per cent. At the same time, Canadian provinces and municipalities have been securing money in the United States frequently at a rate of about 5 per cent. Let us look facts in the face. Is there any sound reason for a loan which represents a first-charge on the joint revenues of France and the United Kingdom giving a higher yield than a Canadian municipality (however excellent the latter may be) other than the United States investor's present rooted dislike to investing his money overseas?

Is it not to the benefit of Canada that farseeing investors should take advantage of so phenomenally a high rate of interest (having regard to the excellence of the security)? The effect of Canada or Canadians borrowing at 5 per cent. and investing at 6 per cent. in New York, must tend to benefit, rather than to depreciate, the value of the Canadian dollar in the United States.

French Internal Loan.

And be it remembered that the British government, only a few months ago, expressly allowed a considerable proportion of the last French internal loan to be issued in Great Britain and taken up by its citizens. In directing attention to what I venture to suggest are weighty reasons against the imposition of a special tax, such as that to which my letter refers, may I be permitted to add that I myself have no personal axe to grind in this matter, and that during the past five years every cent I have had available for invest-

ment has been invested within the land of the maple leaf. When Canada experiences difficulty in securing subscriptions to her own internal loans, then, and not before, will be the time to pass such legislation.

Yours, etc.,

P. C. E'LGEE.

Montreal, August 31st, 1916.

REPORTS ON CROP ESTIMATES

Survey of Western Harvest Field—Factors in Estimating Yield

Wheat affected by red rust, shrinks in hardening and the loss may be greater than at present anticipated, but the only really authentic information as to the crop returns will come from the thrashing machine; not the grain men, the guessers, or the so-called experts. There is no doubt the whole of southern Manitoba is badly hit with rust and blight and in a number of sections by cut worms. North of the Canadian Pacific Railway main line is only slightly affected by rust and there is a large area in the north where oats are the big crop. On the whole the returns from the wheat crop in Manitoba will be a disappointment. So generally has rust developed in a few days that those who are not actually in the fields can form no conception of the serious havoc which rust has wrought, and there is no further use winking at the facts. Early sown wheat had dried up by the effects of heat and rust and the heads affected show only a few kernels at the bottom, and these are so shrunken that their value when thrashed may not compensate for twine and labor in handling. Later fields showing a green tinge give signs of a small crop. From extensive inquiry these conditions prevail throughout southern Manitoba. The general estimate of the wheat yield for southern Manitoba, is from 10 to 12 bushels per acre. Oats appear to have generally escaped the scourge. This is the summing up of the Canadian Credit Men's Trust Association, Limited.

Very Fair Returns from Saskatchewan.

South-eastern Saskatchewan, or the district for considerable distance north and south of the Arcola line and west of the Manitoba boundary to the Soo line, is affected with rust and a number of districts will not yield better than southern Manitoba. West of the Soo line on the Weyburn-Lethbridge extension, there is very little damage reported, although red rust has been found in some districts but the country as a whole is not considered seriously affected. North of the main line of the Canadian Pacific Railway in Saskatchewan, a very fair crop will be harvested, providing continuous warm weather prevails. In the north-western portion of the province on the lines west of Saskatoon, the grade will be affected by frost but not to an alarming extent. The best uniform crop is east of the Prince Albert branch and north of the Canadian Pacific Railway. On the whole we look for very fair returns of all grains from Saskatchewan.

Thrashing General Next Week.

Summing up for Alberta, the outlook at the present time is regarded as satisfactory and especially in the southern portion of the province. There appears to be no confirmed reports of rust from any part. General hail insurance agents report heavy losses but most of the damage has been in the north. Starting from Ponoka going some distance south and running in almost a due easterly direction to the Saskatchewan boundary as far north as Lloydminster and Hardisty, one agent reports loss between 70 and 75 per cent. of the premiums; another 65 per cent. and another 60 per cent. Frost in the north has also affected the grade and the heavy rain between the 17th and 19th, which was practically general throughout the province, and very heavy in the north, has set the date of harvest back a little. Taking Alberta as a whole there should be a good yield. If the northern portion gets favorable weather, or in other words, two weeks more of Alberta sunshine, better than an average crop can be looked for. While a few points south of Canadian Pacific Railway report thrashing, still it will not be general until towards September 15th, which is very late and one should not be too optimistic about the southern Alberta crop at date.

The western acreage of the crops is as follows: Wheat, 10,536,841; oats, 6,678,256; barley, 1,732,680; flax, 657,038.

WAR LOAN NEXT WEEK?

Prospectus is Likely to be Issued Very Soon—Notes of the Loan

The terms and price of the forthcoming war loan will soon be determined at Ottawa, as the loan is expected next week. As previously stated in *The Monetary Times*, the loan will likely be for \$100,000,000 15-year 5 per cent. bonds, and issued at about 97½. No official statement, however, will be given out until shortly before the prospectus is issued. The yield to the investor will probably be between 5.25 and 5.50 per cent.

The conversion privilege attached to the war loan of November last will naturally have some bearing on the price of the new loan. This privilege was worded in the prospectus as follows:—

"In the event of future issues (other than issues made abroad) being made by the government, for the purpose of carrying on the war, bonds of this issue will be accepted at the issue price, 97½ plus accrued interest, as the equivalent of cash for the purpose of subscriptions to such issues."

Obviously, the government does not desire many of the old bonds to be turned in as subscriptions to the new. There will be no disposition on the part of holders to do this unless the price of the new is fixed so as to give a lower yield than that at which the old bonds are now selling—namely, around 97½ to 98. It is reasonable to suppose, therefore, that the price of the new loan will be fixed to avoid conversion. The conversion privilege was probably attached to the first war loan to help place beyond doubt the success of the issue.

The loan and trust companies, as a group, did not subscribe very heavily to the first war loan. They did not know to what extent at that time debenture holders would desire maturing debentures to be paid, rather than renewed. They arranged with the government and the banks for the advance of funds against approved collateral, should any emergency arise. In the meantime, they have accumulated large surpluses and reserves as indicated by their reports at the end of last year, the demand for mortgages not being heavy. With the financial skies clearer than a year ago, the loan and trust companies are now in a position to subscribe in the aggregate a substantial sum to this month's war loan.

A number of orders have already been received by bond houses from investors and corporations for blocks of the war loan, "at whatever terms the loan is offered." With the banks', insurance companies' and industrial corporations' subscriptions, the success of the loan will be assured if small investors in the first loan will duplicate their subscriptions and investors who then hesitated, will now subscribe.

Last year the life insurance companies conferred together as to the amounts they would subscribe to the war loan. On this occasion, the companies are likely to work more independently, each one subscribing according to its investment policy and to the provisions of the insurance act. The subscriptions of these companies in the aggregate will probably exceed \$10,000,000.

It is not unlikely that the loan will be oversubscribed to the extent of 50 per cent. Allotments of subscriptions up to \$25,000 will, we think, be made in full. Above that amount, subscriptions are likely to be allotted pro rata.

BELGIAN WANTS PICTURE POSTCARDS

The Monetary Times recently received a postcard from John Corthals, a Belgian soldier interned in Holland with his little daughter, ten years old. She is collecting picture postcards, and the father asks readers of *The Monetary Times* to send a card now and again. *The Monetary Times* has made inquiries of the British consul at Amsterdam, who (while accepting no responsibility in the matter) states that, according to the information given to him by the Dutch military authorities, Mr. Corthals "is a very suitable person, who belongs to an honorable family. He is employed at the post-office of the internment depot, where his employers are very well pleased with his work." The soldier's name and address are: John Corthals, Belgian soldier, Internment Camp, Amersfoort, Holland.

TO TRAIN INSURANCE SALESMEN

Give the New Recruit No Option But to Work, Says S. C. Tweed

Finding new men is an easy matter compared with the training of life insurance agents, suggested Mr. S. C. Tweed, assistant superintendent of agencies of the Mutual Life Assurance Company of Canada, at the recent life underwriters' convention. Too many new agents are left to work out their salvation alone, or almost alone. The general agent should remember that he is a new agent and knows nothing about the business, and he should not expect too much of him at first. After studying the literature published by the company, joint work with an experienced solicitor does more in two or three days to teach the company's methods and policies than weeks of experience if left alone. But much depends on the "helper." He must be patient, sympathetic, generous and wise. Many a new agent has been ruined by the general agent taking half the commission on the first applications written. The general agent himself, especially in small agencies where it is possible to do so, should work jointly with every new man appointed, as he is the one man most interested in the success and permanency of the agent, and because of the opportunity thus afforded to study the man, secure his confidence and respect and get a measure at first hand of his ability and character.

Name of One Man Daily.

In every case where it is possible to do so, furnish new agents (and old agents who are not producing as much as you think they should) with enough specific work every day to keep them busy. Give them no option but to work.

A well-known company, pursuing new and better methods of building up its agency force, is offering two things to new agents. First, to furnish him daily with the name of one man who has asked to see him; and second, to give him training in life insurance.

The first they do by a definite system of circularizing. They know that out of 100 properly written circulars sent to a fairly selected list between 20 and 25 answers will be received, which will give the agent about one man each working day of the month to call upon. This gives the new man something definite to do.

Many fail in life insurance because they not only do not know how to go about seeing a prospect, but they do not know of any prospect to see and are soon discouraged.

Daily Record of Work.

Numbers of men who have failed in the business state that their failure was due to inability to find definite work.

Many successful agencies have adopted a system under which the agent makes a daily record of his work and a report of it. These reports should be reviewed and criticized by the general agent and the agent given the help that he may need.

The experience of successful agents proves that every intelligent interview on life insurance is worth about \$2—as good pay as the average doctor gets—and by the law of average, if he is certain to see enough people he is certain of an income.

Having got the new man started, the general agent's attention is immediately challenged by the need of keeping the man enthused. Every general agent should issue, at least once a month, an agency bulletin giving the names and standing of the producing agents. An agency gathering should be held as often as possible for the purpose of educating the new agents and inspiring loyalty to the company and the local agency organization.

Special Campaigns.

Special campaigns for business have proven popular and effective in increasing the business of the individual agent by concentrating his effort along a certain fixed line of action, by giving him something definite to do, something personal to inject into his soliciting-talk, and, in many instances a new excuse for seeing an old prospect and urging immediate action.

Teach your agents how to make a practice of getting names of possible insurers from those of their policyholders, friends and acquaintances who are not willing to give cards or letters of introduction.

Your Valuables Will Be Perfectly Safe

When leaving home for a visit or for travel, do you not think it advisable to place your valuables in absolute safety? Our Safety Deposit Vaults provide a place of security for anything from a document to a packing case. Charges very moderate.

LOANS ON LIFE POLICIES

Companies Should Have Right to Defer Action Upon Request for Loan, Says Correspondent

Continuing the discussion in recent issues of *The Monetary Times*, regarding loans on life insurance policies, a correspondent sends the following observations:—

"It seems to me that the way the life companies should prepare for the time when they might be 'embarrassed to find the funds to meet the current surrenders and loans,' is to reserve the right in their policies to defer action for a certain period upon a request for a loan or a reserve value.

"In order to avoid lack of uniformity with its consequent competitive objection I have always advocated the Canadian life companies asking for legislation requiring the companies to make use of a standard clause covering this point. Such legislation is, I understand, already in force in the state of Minnesota, if not in other states, and no doubt it would be readily granted by our own legislature the next time the insurance act is up for amendment.

"This method of preparing for a possible contingency avoids the alternative suggested in a recent article in *The Monetary Times*, namely, the pursuance of an investment policy which would as far as possible insure a reasonable proportion of its assets, being in a form readily convertible into cash, such a policy being an expensive one."

Northern Life's Experience.

Mr. R. C. MacKnight, treasurer of the Northern Life Assurance Company of Canada, London, Ont., writing to *The Monetary Times*, expresses the opinion that the practice of borrowing on policies should be discouraged from the standpoint of service to policyholders. Mr. MacKnight sends copies of forms which his company uses in its efforts to get policyholders, who have borrowed on their policies, to pay off the loans. While monthly payments are suggested to the policyholder, he has the privilege of repaying the loan in full at any time. The Northern Life's experience has been payment in full as often as monthly payments. On one of these forms a strong appeal is made for the repayment of the policy loan. "The more you need money," it says, "the more this policy is worth to you. If you, living, find it hard to make both ends meet, how can you expect your family to get along when you are dead? By reducing the principal you are increasing your estate and also your cash assets. Each reduction of principal increases your effective insurance. Your duty to your family is to lift the mortgage and give them the full benefit of the protection."

Another appeal to the policyholder reads in part as follows:—

"The ability to borrow on one's life insurance is a valuable privilege, often of special benefit to the policyholder. It must not, however, be forgotten, that when one borrows on his life insurance, the protection afforded by his policy is reduced by the amount of the loan, so long as the latter remains unpaid. For this reason, one should mortgage his life insurance, only as a last resort, when all other resources have failed. The company therefore urges you to seriously consider a repayment of the loan as soon as possible.

Protection of Those Dependent.

"To this end, payments of \$10 or any other amount will be received at any time with cessation of interest on the amount paid, or, unearned interest, when it has been paid in advance, will be returned.

"This service is extended to you, requesting your hearty co-operation by saving each month, an amount to be forwarded to reduce the loan on your policy. Having said that it is your privilege to borrow on your policy, we add also, that the company is pleased to extend its efficient service in this connection.

"It is, however, to be regretted that men borrow for temporary purposes, money that was in better moments intended seriously to be set aside to protect the dependant ones. To a manly man the protection of those dependent on him is a sacred duty and to protect them from want and distress is more important than the saving of his own life. We believe that most men are true to responsibilities.

"Nevertheless, temporary loans almost invariably develop into permanent obligations and consequently when the end,

which is sure to come, intervenes, the dependent ones find that the value of the policy has been mortgaged. The result is bitter disappointment and often hardship for the widow and the orphan. The Northern has provided for a systematic service whereby you can at your option, agree to pay off your loan and have your valuable policy returned to you. Decide on the amount of your monthly payment, then complete and sign your instructions to us on the reverse side."

ENGLISH MUNICIPALS IN NEW YORK

As forecasted by *The Monetary Times* some weeks ago, high-class British municipal securities are now being introduced in the New York market. Last week \$6,400,000 one-year discount gold notes of the Metropolitan Water Board of London, England, were purchased by the Guaranty Trust Company and Bernhard, Scholle and Company. All the notes have been sold. This is the first time in the history of financing in the United States that an English municipality has placed its dollar obligations in that country, and the success which has attended this issue is pointed out by the syndicate managers as a gratifying evidence of the eagerness of institutions and investors in the United States to purchase the best foreign securities of this class.

The notes are the direct obligation of the Metropolitan Water Board, which is the official authority constituted by acts of parliament, operating the public waterworks, supplying the metropolitan district of London. This district comprises over 500 square miles, including the entire county of London and parts of five adjoining counties. The county of London comprised the city of London and 28 boroughs, and is commonly known as Greater London. The total population served is estimated at 6,700,000.

The notes are exempt from British taxation, present or future, if held by Americans or Canadians residing in the United States or Canada.

CANADA'S FIRE WASTE IS LARGE

For years in Canada we have laid stress on our "per capita" fire loss of \$3 against an average of 30 cents in European countries. The per capita loss is a feature that stands alongside of, and must be compared with the per capita wealth. The gross loss in North America is appalling and inexcusable, but, said Mr. E. P. Heaton, provincial fire marshal, in a recent address, we must cease harping upon the three dollar per capita idea and realize the evil in some other way.

The Rochester chamber of commerce has coined the phrase, "All fires are the same size at the start." Each fire is a potential conflagration.

In European countries fires start in the ratio of 1 in 1,250 of the population. In North America, fires start in the ratio of 1 in 250 of the population. This continent at the outset stands with potential conflagration five times greater than in Europe. What is there in our building construction, in the occupancies of buildings, or in our climate to account for or justify this extraordinary condition?

According to the latest available information, the city of London, with a population of seven and a half millions, received in 1914 fire alarms from all sources of about four thousand. In other words, 1 to 2,000 of population.

In New York, with a population of one-half that of London, they had in the same year four times the number of fire alarms, or 1 to 220 of the population. In Berlin, with a population of two million, they had, in 1914, 2,068 alarms, or 1 in 1,000 of the population. By way of a startling comparison, Toronto, in 1914, with a population of less than 500,000, had practically the same number of alarms to respond to as the city of Berlin, that is, 2,026, against Berlin's 2,068, or fire alarms of 1 in 230 of the population. Dresden, with a population the same as Toronto, had 356 fire alarms, of which 110 were false. Probably the exuberant spirits of the students there, as in Toronto, may account for a large number of unnecessary runs on the part of the brigade.

In the city of Ottawa, in 1913, one fire occurred for every 163 of the population. In 1914 this had been reduced to 1 in 200, and in 1915 to 1 in 250. Ottawa is more advanced than any city in Canada in the matter of municipal fire prevention. The improvement in their experience, as indicated, is attributable entirely to the practical methods adopted.

BRITISH COLUMBIA'S RAILWAY HISTORY

How the Province Has Assisted Railway Builders— Future Needs

(Concluded.)

The Grand Trunk Pacific Railway is a federal undertaking; that is, it was built under federal auspices and with federal aid; but in respect of the British Columbia end of it the provincial authorities co-operated to a considerable extent, according to Premier Bowser's statement regarding British Columbia's railway development, a portion of which was printed in last week's issue of *The Monetary Times*.

The Grand Trunk Pacific, entering through the Yellow Head Pass, traverses the central interior of the province diagonally in a northwesterly direction to Prince Rupert, where a good ocean harbor exists. The railway purchased from the province at a nominal rate 24,000 acres, in which the province retained a 25 per cent. interest. The railway and the government co-operated in developing Prince Rupert townsite on a definite plan, the province expending as its share about \$325,000 in streets, sewers, etc., \$94,500 in waterworks and \$196,250 in public wharf, sea-wall, approaches, etc. At public sales of lots the province realized on a small percentage of its interest more than \$2,000,000. This is probably an exclusive instance in America of a partnership of the kind mutually profitable.

The Grand Trunk Pacific has direct steamship connection between Prince Rupert and Vancouver, Victoria and Seattle, in each of which places it has an extensive wharf. Later on, when the Pacific Great Eastern Railway Company is completed from Vancouver to Fort George, an exchange of traffic will take place at the latter point.

Pacific Great Eastern's Plan.

The Pacific Great Eastern is the third of the great railway enterprises. Owing to the rapid filling up of the great Peace River country, a portion of which is in British Col-

umbia and a much larger portion in the middle west, it was felt in 1912 that an effort should be made to connect it with the coast cities of the province, more particularly in view of the grain available for shipment via the Panama Canal. A contract was entered into with railway contractors to build, first to Fort George, 480 miles, and later on for an extension into Peace River district, 330 miles.

The Pacific Great Eastern Railway Company was especially incorporated for the purpose and an agreement was entered into precisely similar to that with the Canadian Northern Pacific as to guarantee of bonds, etc. Financial conditions which affected the latter in selling bonds affected the Pacific Great Eastern in even a greater degree, and latterly work had to be largely suspended. However, the road is graded to Fort George and completed and in operation as far as Clinton, which is 212 miles from Vancouver; and as at the last session of the legislature authority was obtained to make the company a direct loan of \$6,000,000 until financial conditions improve, work has been resumed and the line will be completed to Fort George without further delay.

The Pacific Great Eastern traverses a fine ranching and mineral country, and the Peace River country, which it will eventually reach, is one of the richest agricultural sections of Canada. The Grand Trunk Pacific will have running rights over the Pacific Great Eastern when the latter is completed to Fort George.

Land Grants Given.

Prior to 1909, with the exception of the Kettle Valley branch of the Canadian Pacific and the townsite expenditures at Prince Rupert, any assistance of railways by the province was in the nature of land subsidies. Of these, the following were given, the railroads concerned being all parts of the Canadian Pacific system now except the Nelson and Fort Shepherd:—

	Acres.
To Dominion government for Canadian Pacific Railway	11,161,000
To Dominion government for Esquimalt and Nanaimo Railway Company	3,500,000
To the Esquimalt and Nanaimo Railway Company	2,000,000
To the Kaslo and Slocan	212,620
To the Nelson and Fort Shepherd	614,400
To the Columbia and Kootenay	188,593
To the Columbia and Western	134,783
To the British Columbia Southern	3,755,733
Total	21,567,120

Not Adequate for Province.

In the final settlement with the Canadian Pacific in 1912, the government bought back 4,058,138 acres of the remaining subsidy lands of the Columbia and Western and British Columbia Southern at 40 cents per acre. This was largely for the purpose of facilitating internal administration of the lands, out of which complications arose with divided control. The 4,300 miles of railway and tramcar mileage, representing an investment of about \$425,000,000, is not at all adequate for the requirements of the whole of the province when developed, and would not be if it were doubled, but is fairly creditable for a province with a population of 450,000.

WESTERN CONDITIONS

(Staff Correspondence.)

Winnipeg, Man.,

Sept. 2nd, 1916.

Mr. R. Creelman, general passenger agent of the Canadian Northern Railway, who has just returned from a tour of inspection as far as Vancouver, discussing western conditions with *The Monetary Times*, said that the coast cities were doing well, and that business was normal in Vancouver. "The western crop yield will be satisfying from all present appearances. It is impossible to say beforehand just what the returns of the crops will be, and some sections have been seriously affected, especially Southern Manitoba, by adverse conditions. But taking it all together, the harvest will be a good one. Men have come from the maritime provinces in good numbers, as well as from the Pacific coast, to help in the work of the prairie provinces during harvest time."

DOMINION OF CANADA WAR LOAN

The forthcoming Dominion of Canada War Loan is by far the most attractive investment that can be obtained in Canada to-day, and it will be offered at a price that we must not expect to see again.

We urge you to subscribe for as much of the Loan as you can afford, and as it is our aim to provide a ready market for any securities purchased through us, we have pleasure in offering our facilities in that connection.

BLACKLISTED FIRMS IN UNITED STATES

Text of Washington Protest—British Ambassador's Explanation

Considerable interest has been aroused by the publication in *The Monetary Times* of the official lists of firms which the British government have placed on their black lists and with which British citizens are forbidden to deal. The list of United States firms blacklisted, which was printed in *The Monetary Times* of August 4th, brought an official protest from the United States government. The text of its protest to the British government reads as follows:—

"The announcement that His Britannic Majesty's government has placed the names of certain persons, firms and corporations in the United States upon a proscriptive 'blacklist' and has forbidden all financial or commercial dealings between them and citizens of Great Britain has been received with the most painful surprise by the people and government of the United States, and seems to the government of the United States to embody a policy of arbitrary interference with neutral trade against which it is its duty to protest in the most decided terms.

"The scope and effect of the policy are extraordinary. British steamship companies will not accept cargoes from the proscribed firms or persons or transport their goods to any port, and steamship lines under neutral ownership understand that if they accept freight from them they are likely to be denied coal at British ports and excluded from other privileges which they have usually enjoyed, and may themselves be put upon the blacklist. Neutral bankers refuse loans to those on the list and neutral merchants decline to contract for their goods, fearing a like proscription. It appears that British officials regard the prohibitions of the blacklist as applicable to domestic commercial transactions in foreign countries as well as in Great Britain and her dependencies, for Americans doing business in foreign countries have been put on notice that their dealings with blacklisted firms are to be regarded as subject to veto by the British government. By the same principle Americans in the United States might be made subject to similar punitive action if they were found dealing with any of their own countrymen whose names had thus been listed.

Harsh and Disastrous Effects.

"The harsh and even disastrous effects of this policy upon the trade of the United States and upon the neutral rights upon which it will not fail to insist are obvious. Upon the list of those proscribed and in effect shut out from the general commerce of the world may be found American concerns which are engaged in large commercial operations as importers of foreign products and materials and as distributors of American products and manufactures to foreign countries and which constitute important channels through which American trade reaches the outside world. Their foreign affiliations may have been fostered for many years, and when once broken cannot easily or promptly be re-established. Other concerns may be put upon the list at any time and without notice. It is understood that additions to the proscription may be made 'whenever on account of enemy nationality or enemy association of such persons or bodies of persons it appears to His Majesty expedient to do so.' The possibilities of undeserved injury to American citizens from such measures, arbitrarily taken, and of serious and incalculable interruptions of American trade are without limit.

"It has been stated on behalf of His Majesty's government that these measures were aimed only at the enemies of Great Britain and would be adopted and enforced with strict regard to the rights of neutrals and with the least possible detriment to neutral trade, but it is evident that they are inevitably and essentially inconsistent with the rights of the citizens of all nations not involved in war. The government of the United States begs to remind the government of His Britannic Majesty that citizens of the United States are entirely within their rights in attempting to trade with the people or the governments of any of the nations now at war, subject only to well-defined international practices and understandings which the government of the United States deems the government of Great Britain to have too lightly and too frequently disregarded.

"There are well-known remedies and penalties for breaches of blockade, where the blockade is real and in fact effective, for trade in contraband, for every unneutral act by whomsoever attempted. The government of the United States cannot consent to see those remedies and penalties altered or extended at the will of a single power or group of powers to the injury of its own citizens or in derogation of its own rights. Conspicuous among the principles which the civilized nations of the world have accepted for the safeguarding of the rights of neutrals is the just and honorable principle that neutrals may not be condemned nor their goods confiscated except upon fair adjudication and after an opportunity to be heard in prize courts or elsewhere. Such safeguards the blacklist brushes aside. It condemns without hearing, without notice and in advance. It is manifestly out of the question that the government of the United States should acquiesce in such methods or applications of punishment to its citizens.

"Whatever may be said with regard to the legality, in the view of international obligation, of the act of parliament upon which the practice of the blacklist as now employed by His Majesty's government is understood to be based, the government of the United States is constrained to regard that practice as inconsistent with that true justice, sincere amity, and impartial fairness which should characterize the dealings of friendly governments with one another. The spirit of reciprocal trade between the United States and Great Britain, the privilege long accorded to the nationals of each to come and go with their ships and cargoes, to use each the other's shipping, and be served each by the other's merchants is very seriously impaired by arbitrary and sweeping practices such as this.

"In the Gravest Terms."

"There is no purpose or inclination on the part of the government of the United States to shield American citizens or business houses in any way from the legitimate consequences of unneutral acts or practices; it is quite willing that they should suffer the appropriate penalties which international law and the usage of nations have sanctioned; but His Britannic Majesty's government cannot expect the government of the United States to consent to see its citizens put upon an ex-parte blacklist without calling the attention of His Majesty's government, in the gravest terms, to the many serious consequences to neutral rights and neutral relations which such an act must necessarily involve. It hopes and believes that His Majesty's government, in its natural absorption in a single pressing object of policy, has acted without a full realization of the many undesired and undesirable results that might ensue."

Explains Scope of List.

Sir Cecil Spring Rice, the British ambassador at Washington, gave to the United States State Department, on July 20th, a memorandum in explanation of the scope of the blacklist. It reads as follows:—

"There is no idea of blacklisting a neutral firm merely because it continues to do business with a firm that is blacklisted, but if a neutral firm habitually and systematically acted as cover for a blacklisted firm, cases would be different.

"Regarding payments to blacklisted firms, our action does not affect payments by neutrals, and we habitually grant licenses to British firms to pay current debts to blacklisted firms, unless it is clear beyond doubt that such payments would be passed on to or create a credit for enemies in enemy territory. Many licenses have already been granted to British firms to receive from and pay to Knauth, Nachod and Company and Zimmermann and Forshay."

According to advices from Melbourne, Australia, via London, the Commonwealth has issued a blacklist of United States firms with which trading is prohibited.

Number of Firms.

The total number of firms in all countries blacklisted by the Imperial government, and published in recent issues of *The Monetary Times*, is in excess of 1,500, as follows: Spain, 167; Brazil, 140; Netherlands, 120; Argentina and Uruguay, 95; Morocco, 88; Portuguese East and West Africa, Guinea and Rio Muni, 87; Japan, 86; United States, 85; Norway, 83; Portugal, 79; Sweden, 72; Netherlands and East Indies, 70; Ecuador, 60; Persia, 56; Greece, 50; Philippines, 44; Peru, 41; Chile, 35; Bolivia, 22; Cuba, 10; Central America, 5; Paraguay, 3; Colombia, 1.

SELLING LIFE INSURANCE

Getting It Down to a Science—Some Interesting Charts for the Agents

Discussing salesmanship efficiency at the recent Hamilton life insurance convention, Mr. Ernest W. Owen, Detroit district manager of the Sun Life, said that too many take a green young man and put a rate book in his hand and say, "Now go to it." "This policy of pushing a man off the dock and letting him sink or swim will no longer be tolerated by companies who believe in scientific salesmanship."

In selling, skill is in knowing how to do it; the virtue is in doing it. Mr. Winslow Russell, agency manager of the Phoenix Mutual, in an address at Atlantic City, used the following charts, which show the results of ten men in 1909 by undeveloped methods and the production of same in 1912:—

Chart No. 11.—Business Written.

Salesmen.	1909.	1912.
1	\$ 46,000	\$ 244,000
2	135,000	219,000
3	37,000	180,000
4	118,500	168,000
5	37,000	153,000
6	54,000	101,000
7	40,000	95,000
8	35,000	60,700
9	42,000	60,000
10	28,000	56,000
	<u>\$574,500</u>	<u>\$1,336,700</u>

"This is an increase of 132 per cent.

"The 'standard' as shown in Chart 12 has been proven of value, and a study of the figures will convince one that it is both conservative and practical.

Chart No. 12.—The Standard.

26 working days per month.	
5 interviews per day (not calls).	
130 interviews per month (not calls).	
130 divided by 2 equals.....	65 favorables.
65 divided by 2 equals.....	33 hopefuls.
33 divided by 2 equals.....	17 probables.
17 divided by 2 equals.....	9 sure.

Average policy	\$ 2,000
\$18,000 per month—average premium	35
Twelve months' production	216,000
Premiums	7,560
Commission at 40 per cent.	3,024

"If a solicitor obtains five interviews per day for twenty-six days in a month, the average number of cases closed of the 130 interviews will be nine—and, followed, his new commission earnings, conservative figures, will equal \$3,024 for the year as a minimum.

"But few solicitors realize the fact that their time is their own, and in order to reach the 'standard' some plan should be ready that will aid him in forming habits of industry. Such a plan will require an initiative, and if the man is of the right sort he will see it to his advantage to conserve his time by making definite reports of the number of hours he spends in his canvass, the number of calls, interviews, etc. Chart No. 12 shows one form of tabulating this data, which should be properly carded and the results discussed frequently at agency meetings.

"To establish further the fact that the 'standard' shown in the last chart is conservative, we need only say that a few figures will show that if a man obtained five interviews per day for twenty-six days during a period of six months, he would have secured 780 interviews in six months, and applying this figure to the 'standard' commission earnings for the same period, we shall find the value of each interview to be \$1.93.

Chart No. 14.—Standard, 780. Value, \$1.93. Six months, 1913.

Salesmen.	Interviews.	Earnings.
No. 1	813	\$1,423
No. 2	754	1,627
No. 3	691	1,252
No. 4	670	958
No. 5	643	1,617
No. 6	457	1,009
No. 7	421	866
No. 8	388	783
No. 9	341	881
No. 10	302	1,152
	<u>5,490</u>	<u>\$11,573</u>

"The above chart gives the records of ten men who have used plans as outlined, and shows the average value of their interviews to have been \$2.10 each.

"The next chart shows results from the reports of sixty-five men for the past six months. 'Banner Men' are those who enrolled in an 'Efficiency Staff' and reported \$250 or more per month in new premiums. 'Front Line Men' are members who reported between \$150 and \$250 per month, and 'Standard Men' between \$75 and \$150 per month. Further comment upon these interesting figures is perhaps unnecessary, except as attention may be called to the average number of hours, average value of each soliciting hour and of each interview.

Chart No. 15.—Six Months' Results.

31 Banner Men reported	\$67,375
13 Front Line Men reported	13,656
21 Standard Men reported	13,297
65 Total	<u>\$94,328</u>

Salesmen.	Interviews.
31 Banner	11,788
13 Front Line	5,847
21 Standard	9,113
	<u>26,748</u>

	Hours per day.	Per hour.
Banner Men	4.5	\$1.25
Front Line Men	4.6	.63
Standard Men	4.7	.35

Interview Value.

Banner	\$2.36
Front Line	1.00
Standard	.60

"With figures like these it ought not to be difficult to demonstrate to men, new or old, in the service, that the difference between success and failure lies greatly with them.

"Briefly to sum up the whole: We believe that it is important to adopt some very definite plans for continually improving service for those who enter our ranks. Experience shows that the best men come from other lines and know practically nothing of our business. Many of them have been selling things that appeal solely to men's heads. To the selfish man. We must train them directly from that—to the straight heart appeal. To train men to interest others in investing their means in an unselfish way is no easy task.

CANADIAN NORTHERN BORROWS IN NEW YORK

A new loan on Canadian Northern Terminal securities, amounting to some \$1,850,000, has been arranged in New York by Sir William Mackenzie, president of the Canadian Northern, who is on his way to London. This provides for the completion of the Montreal terminal of the road. The same class of terminal bonds as have been used for previous financing since the war began were used as collateral. Sir William is said to have borrowed up to 75 per cent. of the par value, paying, with commissions, over 6 per cent.

Is Your Estate Properly Protected?

No matter how little or how much you own, these possessions make up your estate, and should be protected by efficient and economical management.

This can best be done by an Executor or Trustee.

This Company, by acting in this capacity, will give your estate the benefit of experience gained in the management of many estates, of large and of only moderate size, and will scrupulously guard the interests of your heirs.

No charge for drawing up your will when the Sterling Trusts Corporation is appointed your Executor and Trustee.

Our officers will give you further information on request.

IRON OUTPUT INCREASED

Production Has Risen by 40 Per Cent. This Year to Date

The production of pig iron in Canada during the first six months of 1916 was 507,750 tons, compared with 366,825 tons in the first half of 1915. This represents an increase of 40 per cent. These figures are gathered from an official compilation of the American Iron and Steel Institute. At the rate of production in the first half of the year it is possible that the output for the full twelve months will exceed the high record established in 1913. The total production of pig iron up to June 30th, this year, compares with 366,825 tons in the first half of 1915, 458,595 tons in the second half, 1,015,118 tons for the full twelve months of the record year of 1913.

Production of steel ingots and castings in Canada, according to the Institute, promises to break all records in 1916. Last year, production was very near the high record of 1,042,503 tons in 1913. The output in 1915 was 912,755 tons, compared with only 743,352 tons in 1914, an increase for the year of approximately 22 per cent. Here are the figures:—

Years.	Basic.	Bes-semer.	Foundry.	All other.	Total.
1910	365,000	221,404	143,986	9,640	740,210
1911	413,303	186,274	190,324	34,467	824,368
1912	480,709	228,742	194,208	129	912,878
1913	558,524	227,662	225,231	3,701	1,015,118
1914	331,456	184,053	174,346	16,117	705,972
1915	660,360	13,714	125,760	25,568	825,420

The following table shows steel production since 1910:—

Year.	Open-hearth.	Bessemer.	Other kinds.	Total.
1910	542,354	190,570		741,924
1911	601,074	180,797		790,871
1912	645,062	207,560	400	853,031
1913	768,663	273,391	440	1,042,503
1914	556,910	186,158	284	743,352
1915	884,736	22,521	5,498	912,755

Steel Rails Production.

The production of steel rails in 1915 was far below the production of any year since 1905. Since that year, excluding 1915, output of steel rails in the Dominion has averaged in excess of 364,000 tons a year, comparing with only 209,752 tons in 1915.

The figures are interesting as official confirmation of the results achieved by the Canadian manufacturers in their effort to overtake an insistent demand, which has promised not only a market for all that can be produced, but a market at extremely attractive prices.

The following table shows the production of pig iron in grades in 1915 and 1916:—

	First half. 1915.	Second half. 1915.	First half. 1916.
Basic	292,556	367,813	388,387
Bessemer	5,238	8,476	12,575
Foundry, etc.	59,646	66,123	95,602
All other	9,385	6,183	11,186
Total gross tons..	366,825	448,595	507,750

The output of pig iron, though larger in 1915 than in 1914, was still far below the record of 1912 and 1913. Production for 1915 amounted to 825,420 tons, compared with 705,972 tons in 1914 and the high record of 1,015,118 tons in 1913. Basic pig iron was the only grade showing larger output than in 1913 and 1912. The production of this grade of pig iron was 660,360 tons, compared with 558,524 tons in 1913 and 480,709 tons in 1912. The following table shows production of grades of pig iron from 1912 to 1915:—

Production.	1912.	1913.	1914.	1915.
Rails	423,885	506,709	382,344	209,752
Structural shapes and wire rods	64,082	68,048	59,050	114,829
Plates and sheets, nail plate, merchant bars, tie-plate bars, etc....	373,257	392,340	218,125	328,737
Total gross tons.	861,224	967,097	659,519	653,318

UNCLAIMED BANK BALANCES

They Total \$1,095,000, Which is Slightly More Than a Year Ago

Certified cheques and drafts or bills of exchange, dividends, and balances remaining unpaid in the chartered banks of Canada at the end of 1915 totalled \$1,095,048, as compared with \$1,081,628. The totals were divided as follows:—

	1914.	1915.
Unpaid dividends	\$ 1,250	\$ 1,434
Unclaimed balances	861,518	916,535
Unpaid certified cheques, drafts or bills of exchange	218,860	177,070
	<u>\$1,081,628</u>	<u>\$1,095,048</u>

The report, issued by the department of finance, and containing the returns of the banks, is one of 660 pages and is generally considered one of insufficient interest to justify the expense of publication and circulation of such a cumbersome volume.

The "remarks" column of the bank returns contains few comments of interest. In one case only, apparently, is a bank likely to locate the owner of some of this unclaimed money. J. Achurch had a deposit balance of \$2.40 in the Bank of British North America branch at Semons, Saskatchewan. The bank remarks in this instance, "We have trace of this and expect to locate party shortly."

John Patterson, of Kingston, Ont., has \$40 standing to his credit in the Kingston branch of the same bank. He is a sailor and supposed to have been drowned.

Several men who have died at the front, had small amounts on deposit and still unclaimed. D. J. Tenaile, of Maple Creek, Sask., who was killed at Ypres, and whose brother Jean is in the French army, had \$47.45 in the Maple Creek branch of the Merchants Bank, and which has not been claimed.

In the Montreal City and District Savings Bank, Quebec, there is \$70.39 at the credit of F. S. Frederick and it has been there since October, 1896. It is payable as follows: half to heirs of Catherine A. Coughlin, wife; one twentieth to Abraham A. Borden, and one-twentieth to heir of Frank B. Borden. The amount remains unclaimed.

One of the missing claimants was found early this year. A sum of \$6.49 rested in the Walkerville branch of the Canadian Bank of Commerce in the name of Jennie Ritchie, of Detroit, for Alice Ritchie. This small amount was paid out by the bank on January 5th, 1916, to the lawful claimant. The same bank received also claims which were paid last year amounting to \$5,507. The two largest were those of John Robert Young, Toronto, \$3,364.44 and Christina Kellas, Humber Bay P.O., Ont., \$1,445.28. These amounts had rested in the bank without claimants since July, 1908, and May, 1910, respectively. They were reclaimed in January last.

A number of amounts are in the various banks on deposit as trust accounts, but still unclaimed. Amounts also stand to the credit of a number of persons now deceased.

The following table shows the amounts unclaimed in the various banks:—

Name of bank.	1914.			1915.		
	Unpaid dividends.	Unclaimed balances.	Unpaid certified cheques, drafts or bills of exchange.	Unpaid dividends.	Unclaimed balances.	Unpaid certified cheques, drafts or bills of exchange.
Bank of Montreal	\$ 72.00	\$103,299.62	\$ 29,421.43	\$ 72.00	\$111,279.78	\$ 16,649.14

MUST FILE PAYMENTS ON LIEN NOTES

At the last session of the Alberta legislature an amendment was made to the ordinance respecting hire receipts and conditional sales providing that in order to preserve the rights contained therein a renewal statement of the amount still due for principal and interest and of all payments made on account of lien notes and hire receipts shall be filed within thirty days of the expiration of two years from the first filing, and thereafter renewals shall be filed within thirty days of the expiration of one year from the day of the former filing. Where the first filing was made two years or more before the passing of the amendment the renewal shall be filed within six months of the date of the amendment. The

amendment was passed on the 19th day of April, 1916, so that the time for registering renewals of lien notes and hire receipts, originally filed two years or more prior to the 19th day of April last, will expire on the 18th day of October next, so officials of the Alberta government inform *The Monetary Times*.

Renewals must have an affidavit attached setting forth that the statement is true, and that the sale or bailment writing is not kept on foot for any fraudulent purpose or to defeat, delay or prejudice creditors, and they must be filed in the registration district where the property is situated at the time of the making of the statement. Parties holding lien notes or hire receipts who do not file renewal statements as required lose their lien on the goods or chattels.

The Marconi Wireless Telegraph Company of Canada, Limited

EXTRACT FROM REPORT OF DIRECTORS

It affords your Directors much satisfaction to inform you that the Company's business continues to show substantial expansion. The most gratifying feature during the year just concluded has been the steady development of the Company's Trans-Atlantic traffic. In spite of the general dislocation of business created by war conditions, the work being done by the Glace Bay station in maintaining direct communication between Canada and Europe shows a satisfactory increase in traffic handled, and in income resulting from that source. There is every evidence of this improvement being maintained during the current year.

			\$5,808,083.63

We have examined and audited the books and accounts of the Marconi Wireless Telegraph Company of Canada, Limited, and certify that the above Balance Sheet in our opinion, is a correct statement of the position of the Company at 31st January, 1916, as disclosed by the books of the Company. No provision has been made for depreciation of the Glace Bay Station equipment, which is carried in the accounts at cost.

Montreal, August 1st, 1916.

(Signed) RIDDELL, STEAD, GRAHAM & HUTCHISON, C.A.,
Auditors.

LABOR SHORTAGE AFFECTS INDUSTRIES

Steel and Lumber Outlook—Dairy Industry is Growing— Movement of Wheat

Great difficulty is still being experienced in Canada in procuring labour, not for munition work alone but to meet the growing demands upon domestic industry. The latter have been stimulated by the prospect of another good harvest. The prices of raw materials tend upwards and in many cases they are becoming more difficult to obtain. Certain kinds of steel essential for present requirements are difficult to obtain in sufficient volume even though imports are on a larger scale than usual. Home rail mills have not been able to accept orders for domestic needs which must be satisfied before the heavy traffic movement in the autumn can be satisfactorily handled.

Logging Difficulties.

In many districts unusual difficulties will have to be faced this autumn by the operators of logging camps. Provisions are high in price and men are scarce. These indications are noted in the commercial letter of the Canadian Bank of Commerce. Under these circumstances the output of logs all over the Dominion will be less than normal and operating costs will be very much higher. An uncertain factor is the trend of values after the war ceases. Opinion on this point is divided, but the majority of practical lumbermen anticipate that after the war there will be a steady demand for lumber at good prices. In the meantime it is obvious that the cost of logging during the coming season will cause the output to be very much smaller; in addition present stocks are low and are being steadily drawn upon, and this will tend to prevent any serious collapse of prices. In British Columbia an advance of \$1 per thousand has already been reported, and the increase is likely to be maintained.

Continued progress is being made in the west in the development of the dairy industry. The first annual statement of the Kelowna Creamery, in British Columbia, indicates that the value of the butter produced by that creamery in the

course of the year was \$17,000. At present a great part of the province is supplied from New Zealand, the imports of butter from which for the fiscal year ending March last amounted to \$326,000.

Important developments are taking place in the nickel industry in Ontario. The minister of mines has officially announced that two refineries will be erected to treat ore in the province instead of exporting it as hitherto.

Fishing on the Atlantic coast is satisfactory, but in British Columbia, owing to the coldness of the weather, the salmon catch so far has been much below normal.

Grain Movement and New Crop.

At present the deliveries of grain to the railways in western Canada are at the rate of 500,000 bushels daily, and even at this rate a large quantity will still be left in the hands of the growers when the harvest of the present year is ready for shipment. This movement is the chief factor in maintaining gross earnings at a much higher level than during the corresponding period a year ago.

The volume of traffic appears likely to be maintained to the end of the war and even afterwards, so that if immigration and settlement again become normal, it will be highly desirable that the equipment of existing lines be increased, unfinished grading completed and additional lines built into territory already partially settled. Transportation facilities at this juncture are of such national importance as fully to warrant the action of the government in appointing a commission of distinguished authorities to advise as to the future relations of the government to the existing systems. A definite policy in this regard would stimulate external as well as domestic interest in the development of the newly settled portions of the Dominion.

Canada's production of wire nails in 1915 is estimated at 1,636,000 kegs of 100 pounds, as compared with 1,144,000 kegs in 1914, an increase of 492,000 kegs, or nearly 5,000,000 pounds. Output of cast-iron pipe amounted to 53,700 net tons, as compared with 93,200 tons in 1914, a decrease of 39,500 tons.

DEBENTURES FOR SALE

Tenders will be received by the undersigned up to and including Friday, the Fifteenth September, 1916, for the right to cut the Pine timber (including Jackpine) on the Townships of Beresford, Brigg and Howey, and the unlicensed portions of the Townships of Cotton and Valin in the District of Sudbury.

Tenderers shall state the amount per thousand feet Board Measure, they are prepared to pay for the Pine in addition to the Crown dues of \$2 per thousand feet Board Measure, and the rate per tie for any of the Pine timber suitable for the manufacture of railway ties in addition to the Crown dues of 5c. each.

The timber to be removed by the 30th of April, 1920.

Tenders are to be for each berth separately. Each tender to be accompanied by a marked cheque for \$10,000, to be held as deposit excepting in the case of the Township of Cotton on which the amount of deposit will be \$5,000. The cheques are to be payable to the order of the Provincial Treasurer. The party awarded the right to cut will be required to furnish a bond for the payment of the price and the due performance of all the conditions required by the Department.

The highest or any tender not necessarily accepted.

Tenders to be addressed to the Honourable, the Minister of Lands, Forests and Mines, Toronto, and marked "Tender for Timber."

G. H. FERGUSON,

Minister of Lands, Forests and Mines,
Toronto, August 31st, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; "Positions Vacant," "Agents or Agencies Wanted," 3c. per word; other condensed advertisements, 3c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

ACCOUNTANT and Bookkeeper; age 30; over 12 years' experience in bookkeeping and financial work, seeks position with Financial or Commercial Firm, having good prospects. Reply Box 497, *The Monetary Times*, Toronto.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over \$5,000.00, and he has built up a future income of over \$3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

YOUNG LADY, with seven years' experience as bookkeeper and cashier, desires responsible position, preferably with a financial firm. Box 3, *The Monetary Times*, Toronto.

YOUNG MAN, with knowledge of French, and having 14 years' experience in banking and real estate, desires responsible position with financial or commercial company. Correspondence confidential. Box 5, *The Monetary Times*, Toronto.

Tenders will be received by the undersigned up to and including Monday, the 2nd October, 1916, for the right to cut the Pine timber (including Jackpine) on the Township of Pettypiece in the District of Kenora.

Tenderers shall state the rate per thousand feet Board Measure, they are prepared to pay for the Pine in addition to the Crown dues of \$2 per thousand feet Board Measure, and the rate per tie for any of the Pine timber suitable for the manufacture of railway ties, in addition to the Crown dues of 5c. each.

The timber to be removed by the 30th of April, 1918.

Each tender to be accompanied by marked cheque for \$700, payable to the order of the Provincial Treasurer. The party awarded the right to cut will be required to furnish a bond for the payment of the price and the due performance of all the conditions required by the Department.

The highest or any tender not necessarily accepted.

Tenders to be addressed to the Honourable, the Minister of Lands, Forests and Mines, Toronto, and marked "Tender for Timber."

G. H. FERGUSON,

Minister of Lands, Forests and Mines,
Toronto, August 31st, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

TOWN OF SUTHERLAND, SASK.

TENDERS WANTED

Tenders will be received by the undersigned up to the 28th day of September, 1916 (6 o'clock p.m.), for the purchase of the Town's debentures amounting to \$36,000.00 (instalment system), interest at 7%, made up as follows:—

By-law No. 10	Waterworks	\$19,350.00	30-years	7%
By-law No. 11	Sidewalks	\$ 750.00	20 "	7%
By-law No. 12	Sewers	\$15,500.00	30 "	7%
By-law No. 13	Grading	\$ 400.00	30 "	7%

All information pertaining to these debentures can be obtained from the undersigned.

SIDNEY APPLEBY,

Town Clerk.

Sutherland, Sask., August 25th, 1916.

PAID ONE-FIFTH OF GOVERNMENT LOAN

Advances by the federal government in 1915 for seed grain and equipment in Western Canada totalled over \$11,000,000, and at date 20 per cent. has been paid back. Nearly all the advances were made in Saskatchewan.

Mr. Lorne Heeney has been appointed as branch manager for the counties of Essex and Kent of the Monarch Life Assurance Company, Winnipeg, with headquarters at Windsor. Mr. C. R. Bissell, for several years with the Northern Life Assurance Company, has received an appointment in the actuarial department of the company.

Lord Shaughnessy has been elected a trustee of the Mackay companies. The election of Lord Shaughnessy gives Canada three members on the Mackay board. Mr. H. V. Meredith, president of the Bank of Montreal, has been on the board since 1909, and Sir Edmund Osler, M.P., succeeded his partner, the late Mr. R. A. Smith, in 1912.

Manual of Canadian Banking

BRITAIN FIGHTS AND PRODUCES

"If you wish to realize a little, the internal revolution which has taken place in Great Britain, think what the withdrawal of between five and six millions of men must mean to the carrying on of the nation's ordinary work and operations, and yet, extraordinary to say, it is one which has caused hardly any interruption to our industrial life, writes Mr. F. Thoresby, managing director of the Car and General Insurance Corporation, Limited, to *The Monetary Times*. Is it not a remarkable fact that there never was less distress in Britain than at the present time, and from the export returns it is noticeable that foreign trade has increased at the rate of millions per month for some considerable time past? An unbelievable condition of things.

"The withdrawal of so many millions of men has meant, of course, the employment of women to an extent which has hitherto been regarded as impossible, and the utilization of woman labour has been carried to such an extent that even inside the foyer of a theatre, as you leave at night, you will

find smartly uniformed girls shouting out either your carriage number or offering to obtain a taxi for you.

"In the case of the Car and General Company, there are 120 officials, equal to 90 per cent. of the eligible men, consisting of clerks, inspectors and branch managers, actually serving, with the result that the number of women employed is three times what it was before the war. This proportion would have been still greater, but that for a number of years the company has employed women as clerks. The conditions now surrounding this company are no different to those of thousands of other heads of business enterprises.

"What, however, there is no doubt upon is that there never has been, and is not now, any doubt or anxiety as to the ultimate issue, and I must say I feel grateful to be allowed to live in and form part of a nation (even though only a nation of shopkeepers) which seems willing, if necessary, to sacrifice everything, even life itself, for an ideal, when only a few years ago we were regarded as effete and finished, and it was considered quite a joke to twist the lion's tail. Truly, time hath its revenge! "Where there is no vision, the people perisheth."

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Humberstone, Ont.—A by-law authorizing an issue of \$1,800 has been passed.

Port Coquitlam, B.C.—A temporary by-law to borrow \$30,000 is under consideration by the council.

Truro, N.S.—The taxpayers will vote on a by-law to borrow \$100,000 to purchase the Chambers Electric Light and Power Company, Limited.

Renfrew, Ont.—Renfrew ratepayers defeated a by-law for power development on the Bonnechere River by the Hydro-Electric Power Commission of Ontario.

Edmonton, Alta.—The city's tax rate this year is 21 mills. The assessments since 1912 are as follows:—

Year.	Mill rate.	Assessment.
1912	12.	\$109,756,330
1913	16.	187,946,720
1914	17.50	190,669,410
1915	16.75	168,973,190
1916	21.	130,916,285

Saskatchewan.—The following is a list of bond applications granted by the local government board:—

School Districts.—Burnside, \$500. M. Milliken, Glenbrae; Gondney, \$1,200. H. G. Cann, Villefranche; Clover, \$1,500. C. Wanstall, Plunkett; Lacombe, \$1,100. V. Goebriand, St. Brieux.

Rural Telephone Companies.—Cotham, \$1,500. G. Kendrick, Cotham; Valleyfield, \$3,600. F. H. Wilson, Southey; Wessels, \$1,400. J. O. Clarke, Govan; Shallow Lake, \$6,700. O. Nelson, Marchwell; Whitehall, \$7,700. J. McCallum, Success; Spring Lake, \$6,000. A. L. Brown, Broadview; Bangor, \$8,000. A. W. Shaw, Bangor; Strehlow, \$5,500. H. Ducie, Dundurn; Woodleigh, \$4,600. S. Swridge, Wapella; North Ernfold, \$4,000. J. F. Byce, Ernfold; Golden Valley, \$6,400. J. F. Wilke, Herbert.

Town.—Oxbow, \$16,000. S. R. Wallace, Oxbow.

Alberta.—For the block of \$5,150 school district bonds the tenders received by the department of education were as follows, Messrs. W. R. Alger and Company, Edmonton, receiving the award: J. G. Turgeon, account Kerr, Fleming Company, Toronto, \$102.30; Trusts and Guarantee Company, Calgary—Galarneauville, No. 3341, \$102.87, Creslow, No. 3263, \$102.87; Bond and Debenture Corporation, Winnipeg (block), \$100 (par); Brent, Noxon and Company, Toronto (block), \$102.36; Hornibrook, Whittemore and Allen (block), \$101.71; Canada Landed and National Investment Company, Winnipeg—Galarneauville, No. 3341, \$102.50, Creslow, No. 3263, \$103.31; Wood, Gundy and Company, Saskatoon, Sask.—Galarneauville, No. 3341, \$102.52, Creslow, No. 3263, \$102.52, Rexboro, No. 1851, \$101.90; W. R. Alger and Company, Edmonton, \$102.85; H. O'Hara and Company, Toronto—Rexboro, No. 1851, \$101.50; Cavell, No. 3331, \$102.25, Galarneauville, No. 3341, \$100.50, White Mountain, No. 3288, 100.50, Creslow, No. 3263, \$102.25; C. H. Burgess and Company, Toronto—Rexboro, No. 1851, \$100, Cavell, No. 3331, \$100.56, Galarneauville, No. 3341, \$100.56, White Mountain, No. 3288, \$100.56, Creslow, No. 3263, \$100.56; W. L. McKinnon and Company, Toronto—Rexboro, No. 1851, \$101.37, White Mountain, No. 3288, \$101.872, Cavell, No. 3331, \$102.981, Galarneauville, No. 3341, \$102.981, Creslow, No. 3263, \$102.981.

The Weyburn Security Bank has opened a branch at Goodwater, Sask.

Mr. J. H. Plummer, who has been abroad since he resigned from the presidency of the Dominion Steel Corporation, is shortly returning to Canada.

The Royal Bank of Canada is extending its interests in South America by opening a branch at Caracas, Venezuela, a step which, it is understood, will be followed by the opening up of branches at other centres in that country. This step should be of much service in fostering Canadian trade with Venezuela.

NEW Dominion of Canada War Loan

Prospectuses of this loan, giving full particulars, will be issued in a day or two. If you are thinking of subscribing, by communicating with us we shall be pleased to supply fullest information free of charge.

A Free Course In "Salesmanship"

We have thought about the young man who sees no prospects ahead. Would you like to be in a business that will give you

**A Good Living Wage
A Profitable Future
A Provision For Old Age**

We teach a man the Insurance Business, which offers permanent success, does not fluctuate, is a professional occupation, and has been truly named "The best paid hard work in the world."

This is done by a correspondence course and personal assistance, free of charge.

When he is fully prepared for the work, we place him in a position and help him to make good.

The first two lessons of the Company's correspondence course will be sent to anyone interested. It will pay young men who desire to get on in the world to look into this.

All correspondence strictly confidential.

CANADA LIFE ASSURANCE CO.
HEAD OFFICE, TORONTO.

Prosperous and Progressive

Up-to-date business methods, backed by an unbroken record of fair-dealing with its policyholders, have achieved for the Sun Life of Canada a phenomenal growth.

To-day, the Company operates actively in forty-two countries and upon five continents.

In the past six years its assurances in force have nearly doubled; in the past eleven years they have more than trebled.

More than 166,000 of its policies are now in force for assurances totalling over \$265,000,000—much the largest amount carried by any Canadian life company.

Coin and bullion.....	520,545	13,871,128	14,636,291	36,371,720	223,668,611	115,110,209
Total trade.....	93,799,982	99,000,038	238,860,488	1,061,365,504	1,142,911,769	1,819,706,490

*NOTE.—It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending July, 1916, were: imports 1916, \$33,717,992; 1915, \$133,118,099, and exports 1916, \$81,392,217; 1915, \$90,555,512. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

ANALYSES BUSINESS IN WARTIME

How the war has affected business in the principal belligerent and neutral countries is shown in a report prepared by the United States bureau of foreign and domestic commerce for Senator Simmons, chairman of the senate committee on finance. The countries covered are the United States, Canada, England, France, Germany, Austria-Hungary, Italy, Russia, Spain, Sweden, Argentina, Brazil, Australia, British India, British South Africa, Egypt, and Japan. The following general conclusions are drawn:—

Business activities were fairly normal in the various countries of the world during the two years preceding the outbreak of the war.

In every country, including the United States, there was a decided decline in business activity after July, 1914.

The period of business depression following the outbreak of the war lasted from four to six months in most of the neutral countries. In the belligerent countries the upward trend did not begin until the last few months in 1915.

There was a slight depression in business activity in the United States in the latter part of 1913 and early in 1914, but in the spring and summer of 1914 there were signs of recovery. The outbreak of the war, however, caused a decided decline.

The United States at the close of the period, April, 1916, had entered upon a period of business activity which has had no parallel in the history of the country.

To indicate the business activities of the various countries covered by the report, statistics are printed showing imports and exports of merchandise, imports and exports of gold, receipts of railways, bank clearings, business failures, postal, telegraph, and telephone receipts, building operations, production of pig iron, and prices of commodities. Complete figures could not be obtained for all countries, but as the report stands it contains the most complete and reliable collection of statistics and diagrams that have been issued on the subject under one cover since the war started.

Why We Should Buy War Bonds: Our Loan Requirements: The Spirit Unbroken

BUYING A WAR BOND

The new Canadian war bonds are now being offered to our citizens. They are available to the man with only \$100 for investment and to the big corporation with its million. The purchaser does not pay a commission to the bank or the bond house through which he purchases. The government is selling its bonds through these channels and direct to applicants for the loan.

There is peculiar gratification in holding Canadian war bonds. We are lending money to our own government to help finance Canada's share of the Great War. At the same time, we relieve to that extent the tremendous financial burden placed upon the Imperial government in financing its own war operations, those of some of the Allies, and of the business of certain neutrals. The first impulse to purchase is naturally a patriotic one. Money has been donated in millions of dollars for purposes connected with the conduct of this war. Now the Dominion government is asking for the loan, not the gift, of money for the continued prosecution of its share of the struggle. For that loan it is paying an attractive rate of interest.

The Canadian public is being asked to lend the Dominion government money, at a good interest rate, in order to equip and maintain Canada's army. That army is fighting for us. It is fighting to crush Kaiserism, to save the life of the British Empire, to uphold all the great ideals, traditions and practices which the life of our Empire embodies. Who can fail, therefore, to buy a Canadian war bond?

Great Britain has loaned us large sums for war purposes recently. Canada feels competent again to relieve, to a small extent, the financial burdens of the Motherland. These are the principal reasons which will induce Canadians to unite in again over-subscribing their second war loan in a manner which will tell the world once more that the Dominion is in this war with the rest of the Empire and the Allies to fight to the last drop of blood and to the last cent if necessary. Those who cannot shoulder a rifle for the cause now have an opportunity of buying a war bond.

The silver bullet has a "ping" that counts too. Lend your money for your country's fight.

THE SPIRIT UNBROKEN

(Reprinted from *The Monetary Times* of two years ago.)

Once again British diplomacy has played fairly, satisfying the most delicate conscience. Once again it has maintained the British standard of honor, this time at the expense of valuable points in warfare, now gained by the enemy. Germany having pushed war, it has challenged a nation which has strained every diplomatic nerve and sinew to preserve peace. Flouting Britain's heroic determination to strangle war, now it must face

that determination in a grim shape. It is not war upon Great Britain alone. It is a challenge to the Empire, one which has done for civilization more than other Empires have even tried to dream. That challenge the Empire has answered. Canada, Australia, South Africa, every dominion overseas join with the Motherland in this international struggle, one into which that Motherland has done everything possible to prevent the Empire having to plunge. Victory on one side may mean a new map of Europe, the flowering of autocracy and the predominance of belligerence. Victory where the British Empire may place it, will mean the preservation of individual nationalities, the progress of democracy, always arbitration and perhaps lasting peace.

Seldom has England girded its loins in such a good cause, especially as the struggle has been forced upon it. Heaven knows of the prayers which have been offered and the statesmanlike efforts made for peace. War has come to bring it. Having entered the fight, the British Empire will proceed to the end. In this struggle it has the help of some and the sympathy of all, except perhaps two, of the civilized nations of the world. May Right ride as conqueror!

The purchase of a war bond will help to bring peace and victory to the British Empire.

OUR LOAN REQUIREMENTS

From April 1st, 1916, to March 31st, 1917, the Dominion government will raise by way of loans, from \$200,000,000 to \$225,000,000. The loan negotiated in New York in March accounted for \$75,000,000. Taking the maximum possible requirements of \$225,000,000, there is still to be raised during the present fiscal year \$150,000,000. Assurances were given by the federal government in connection with the \$75,000,000 New York loan that no further offering would be made in the United States during the current calendar year.

While Sir Thomas White has made an arrangement by which he can draw upon an authorized credit of \$150,000,000 established by the Imperial government, the Dominion government will endeavor to utilize this credit as little as possible, if at all. As we have voluntarily closed the United States money markets against our federal loans for the remainder of the year 1916, and as we are unlikely to draw upon the credit which the Imperial authorities have provided, there will be left to be raised by way of loans, in Canada during 1916, and in the United States during the first quarter of 1917, the sum of \$150,000,000.

As the present loan is for \$100,000,000 this leaves a sum of \$50,000,000 still to be raised in order to make up the total loan requirements for the current fiscal year. This loan will probably be raised in New York about March next.

SMALL INVESTORS AND WAR LOAN

How Employers Can Help Their Staffs Buy Bonds— Loans on War Bonds

Every responsible citizen of the Dominion should recognize it as his duty to contribute according to his means and ability towards the success of the present war loan. That statement, with which most will agree, is made in an article in the Montreal Journal of Commerce by Mr. H. M. P. Eckardt, a well-known contributor to the columns of *The Monetary Times*, Mr. Eckardt, discussing ways and means to interest the small investor in the war loan, continues:—

The ordinary individual should not allow himself or herself to become possessed of the idea that it is for the finance minister, the banks, the bond houses, or wealthy corporations to see the loan through to a happy termination—that responsibility should be accepted by all alike, and corporations and individuals, rich and poor should feel the necessity or duty of putting forth efforts. The best results, all round, are obtained when these efforts take the form of cutting out unnecessary expenditures so as to have more funds available for purchasing war loan bonds. In case of the rich or well-to-do these curtailments of outgo would most likely be in evidence in regard to trips, etc., undertaken purely for pleasure, purchase of new automobiles, or very expensive items of furniture, jewelry and the like, and in regard to elaborately expensive entertainments or social functions. By self-denial of this kind a well-to-do family might divert an additional \$1,000, \$2,000 or more into war loan bonds—thus benefitting themselves, the Dominion and the great cause of the Entente Allies.

As To Small Savings.

In the case of people with smaller means, the savings would be measured perhaps in hundreds of dollars instead of thousands, but if the economies were generally or universally practised the cumulative effect might be even greater than in case of the savings of the wealthy. It would be within the power of employers in many instances to induce their employees to subscribe for suitable amounts of the loan and to meet their payments largely through cutting down useless or unnecessary expenses. A considerable number of the young men in offices have been accustomed to live right up to income. When the salary is raised the recipient may promptly increase his expenditure by a like amount—the extra amount being expended month by month in pleasure-seeking and on luxuries or non-essentials. By faithfully following out this process a man may attain to a fairly large salary without having accumulated any capital and unless change occurs in the habits there is no prospect of saving anything in the future. Surely the war loan ought to appeal to men of this class as an occasion for inaugurating a campaign of economy. If certain circumstances have prevented their joining the colors, or if they have not as yet felt it their duty to join, the least they can do is to deny themselves a few pleasures for the sake of lending money to their country and contributing something to the various patriotic funds.

Loans to Employees.

Where the circumstances are such as to permit it, employers can help the war loan along through a judicious system of loans to employees desirous of taking up the bonds. Of course, there is a theory that as the payments on the loan are spread over several months, there should not be any need for a salaried man to borrow—he should regulate his subscription so that his savings during the intervals between instalments would take care of each succeeding payment. There would not be much justification for loans of this nature to employees if the payments for the loan were spread over a period of a year; but in case of the last loan the interval between the announcement of the loan and the date set for the final payment was five months. Now an employee who accurately estimates that he can save \$25 per month could accumulate \$125 in five months; and if he does not borrow he is practically limited to a subscription of \$100; whereas, if he can arrange a suitable credit he could subscribe for \$300—three times as much—and at the end of the year he will own his war bond free of debt. Moreover, the existence of the loan or debt during the whole year operates to force a conscientious man to continue his economies and probably gets him in the habit of saving, which development opens the way to his becoming a capitalist eventually.

LIFE COMPANIES AND THE LOAN

They Will Subscribe Still More Heavily This Time— Over \$8,000,000 of Last Loan Taken by Them

Mr. J. F. Weston, managing director of the Imperial Life Assurance Company, Toronto, announced during the course of an address at the insurance agents' banquet at Hamilton recently, that the life insurance companies of Canada were preparing to subscribe a larger amount to the second war loan than they did to the first loan in November last. The amount subscribed last time by the life insurance companies was about \$8,000,000.

The following is a list of the subscriptions of Canadian life insurance companies and of British life insurance companies doing business in Canada, to the first war loan in November last:—

Companies.	Subscriptions.
Sun Life	\$2,000,000
Canada Life	1,500,000
Great-West Life	1,000,000
Confederation Life	500,000
Manufacturers Life	500,000
Mutual Life of Canada	500,000
North American Life	500,000
Imperial Life	350,000
London Life	250,000
Excelsior Life	150,000
National Life of Canada	150,000
Dominion Life	115,000
Northern Life	105,000
Continental Life	100,000
Crown Life	100,000
Sovereign Life	60,000
La Sauvegarde	50,000
Monarch Life	35,000
Capital Life	25,000
Ancient Order of Foresters	20,000
British Columbia Life	20,000
Royal Guardians	20,000
Travellers Life of Canada	15,000
Saskatchewan Life	5,000

The following is a list of subscriptions to the Canadian government war loan of November last by the British life offices doing business in Canada:—

Companies.	Subscriptions.
Standard Life	\$250,000
Commercial Union	150,000
London and Lancashire Life	100,000
Royal	50,000
North British and Mercantile	50,000
Gresham Life	30,000

It will be recalled that legislation was passed early this year whereby life insurance companies and associations carrying on business in Canada under Dominion license will be obliged to invest and keep invested a certain portion of their assets, during this and next year, in the currency bonds or debenture stock of the Dominion. Companies whose domicile is outside of Canada, but which are licensed to transact business in Canada are required to make the deposits which they are required to make in 1916 and 1917 as security for their policyholders in the Dominion in such securities; and Canadian companies for the same two years shall invest in such securities one-half of the increase in their net ledger assets during the years 1915 and 1916, after making provision for increase in foreign reserves and in policy loans.

Provision will be made to meet the case of foreign companies which have already made their deposits for the present year. The aggregate amount of such investments had reached a total of at least 15 million. "Having regard to the rate of interest which the Dominion is now paying upon its securities, there can be no hardship in such legislation, either to the insurance companies or their policyholders, who will obtain an investment of the highest character, yielding a most attractive interest return." The finance minister stated, when suggesting this legislation in the House at Ottawa, that he had less hesitation in proposing it because, unlike other financial companies, life insurance companies and associations have not been subjected to Dominion taxation. Their holdings of the Canadian war loan will be available pro tanto in discharge of their obligations under the act.

OUR GOVERNMENT LOANS IN NEW YORK

Since War They Have Totalled \$120,000,000 — All Canadian Loans There to Date, \$301,797,000

Since the outbreak of war, the Dominion government has borrowed \$120,000,000 in the United States by means of the following loans:—

1915.	Amount.	Securities.	Years.	Issue price.	Remarks.
July	\$ 25,000,000	5% notes	1	Par	Holders may convert into 5% 20-year bonds.
July 1916.	20,000,000	5% notes	2	99 3/4	Ditto.
March	25,000,000	5% bonds	5	99.56	Less 2 1/2% commissions.
March	25,000,000	5% bonds	10	97.13	Ditto.
March	25,000,000	5% bonds	15	94.94	Ditto.

Total \$120,000,000

The loan of \$25,000,000 maturing in August in New York was duly paid.

When the Dominion government floated its loan of \$75,000,000 in the United States in March last, it was officially announced that no further borrowing would be undertaken by the government in that market until after the end of the present calendar year. A further loan, therefore, will not be made by the Federal government in the United States until early in 1917.

Since the British money markets were closed to Canada and other countries, for all except war issues, the United States has been acting as Canada's banker in chief. During the two years of war our borrowings in that market have totalled \$301,797,000.

According to *The Monetary Times'* records, the loans are divided as follows:—

Loans by United States to Canada.

	1914. (Aug. 4 to Dec. 31.)	1915. (Jan.-Dec.)	1916. (Jan. 1 to Aug. 1.)
Dominion government ..	\$ 45,000,000	\$ 75,000,000	
Provincial governments	\$ 1,000,000	35,877,000	18,450,000
Municipal	6,900,000	32,455,000	20,763,000
Corporation	18,690,000	30,640,000	17,022,000
	\$26,590,000	\$143,972,000	\$131,235,000

Foreign governments now owe the United States considerably over \$1,250,000,000 on their own securities taken in that country. Foreign loans and credits made there amount into \$1,206,459,000. In addition United States investors have gone to foreign markets to take advantage of war prices for old government issues. Extent of this buying is unknown, but it has certainly amounted to over \$45,000,000.

COST OF WAR TO CANADA

Raising, Equipment and Maintenance of Each Soldier Costs \$1,000 Per Annum

Canada's war expenditures at home are about \$700,000 a day. In Canada and in Great Britain, they total approximately \$1,000,000 daily. The present war loan is issued to help with this heavy financing. The war expenditure of the Dominion government now exceeds \$20,000,000 a month. The largest item in this expenditure is for pay and allowances, subsistence and assigned pay and separation allowances of the troops. This item is running at the rate of about \$12,000,000 a month. This is much more than is paid to the troops at present in Canada who number less than half the total Canadian forces recruited for the war, over 200,000 having gone overseas.

Pay of Overseas Forces.

The pay of the overseas forces assigned to their families and dependants here, and their separation allowances, also paid here, constitute a large portion of the monthly war expenditure. The sterling exchange situation has had much to do with bringing about the payment in Canada of so large a portion of the pay of the overseas forces. As nearly as can be estimated, Canada's present war expenditure in Canada and in Britain, including the maintenance of troops actually at the front, is at the rate of about \$30,000,000 a month, or \$350,000,000 a year.

This averages about \$1,000,000 a day, and is equivalent to about \$1,000 per annum per head, as the total enlistment is about 350,000 men. Of these there are now in Canada about 140,000.

Out of the revenues of the government for the year it now seems probable that a large amount of the principal of the war expenditure will be paid, as the budgets of 1915 and 1916 are both working satisfactorily. The balance of Canada's war expenditure this year will be defrayed partly from the funds of the domestic war loan issued in November last and from those of the present war loan.

DOMINION GOVERNMENT BONDS AND STOCK NOW OUTSTANDING

(Compiled for *The Monetary Times* by R. D. Bell, Montreal.)

The following table shows the Dominion government bonds and stock now outstanding, when and how issued. The equivalent price for a 10-year 5 per cent. bond and for a 15-year 5 per cent. bond is also given.

Approximate amount.	Dated.	Due.	Interest rate.	Approx. yield at issue price.	Equiv. price for a 10-yr. 5% bond.	Same for a 15-yr. 5% bond.
\$25,000,000	1884	1909 to '34	3 1/2 %	4.07 %	107.5	109.71
20,000,000	1888	1938	3 %	3.20 %	115.3	121.31

CANADIAN WEALTH AND CREDIT

What is Back of Our War Loan—Bondholders Cannot Lose

There is substantial wealth and excellent credit behind the Canadian government's war loan. The value of the production in Canada last year from field crops, forests, mines and fisheries was approximately \$1,123,169,535, as compared with \$975,380,006 in 1914. The details for the two years are as follow, the figures for 1915 being an estimate of *The Monetary Times*, but well within the mark:—

	1914.	1915.
Field crops	\$638,580,300	\$ 788,919,535
Forests	176,672,000	175,000,000
Mines	128,863,075	128,000,000
Fisheries	31,264,631	31,250,000
	\$975,380,006	\$1,123,169,535

The value of production (field crops, mines, fisheries and forest products) each year since 1908, has been as follows:—

	Total.
1908	\$ 703,590,000
1909	816,274,000
1910	701,085,000
1911	901,700,000
1912	909,358,000
1913	907,311,000
1914	975,380,006
1915	1,123,169,535

Exports of Canadian produce for the twelve months ended May, 1915, were valued at \$820,000,000, compared with \$432,000,000 in the previous year. Our total exports for the same periods, exclusive of coin and bullion, were \$866,000,000 and \$484,000,000 respectively.

The Dominion war bonds, as Mr. R. D. Bell, of Montreal, has written, have behind them the entire wealth of this great Dominion, and nothing conceivable can happen to this country that could impair the government's ability to pay interest and principal. Do not make the mistake of the man who asked: What if the war should go against the allies? I would lose my money. Ten wars could go against the allies without loss to Dominion government bondholders. Austria, for instance, has been well-nigh crushed several times ere this, yet even Austria still pays bond interest. In the first three-quarters of the last century France went through revolution and crushing defeat, and yet another revolution, and still French Rentes continued to pay interest through it all, and at the worst gave little higher return than this loan offers the Canadian investor to-day. It is not believed that this war is going against the allies, but for those who prefer to look at the worst it may be said that history teaches that this does not matter.

CANADA'S WAR FINANCE POLICY

Posterity Must Bear Big Share of Burden—The Reasons Why

In discussing in his budget speech in February last, the proper financial policy of a nation in time of war, Sir Thomas White, finance minister, said:—"Some have strongly favored the policy of large borrowing; others have insisted that the cost of a war be defrayed by a nation at the time it is being waged. Obviously, in a war such as this the latter course would be impossible. The truth seems to be that it is not practicable for all nations to adopt the same policy or for any nation the same policy at all times. The circumstances and conditions of individual nations must be taken into consideration. If a country has much accumulated wealth, a policy of drastic taxation would appear to be advisable. With a country such as ours, rich in potential resources, certain of future development and great expansion of production and population, but without at present large accumulations of wealth, it would appear that the placing upon posterity the greater portion of the financial burden of this war is justifiable, waged as it is in the interests of human freedom, and for their benefit in equal if not in greater degree than for our own. Canada in future years of peace, with the prosperity

which will be her heritage from the development of unbounded resources, will be well able to meet the interest and sinking fund charges upon such debt as we shall be obliged to incur in defence of our country and its liberties.

Utilize Only Necessary Taxation.

"Assuming that Canada's indebtedness on account of this war will reach \$500,000,000, at 5 per cent. the annual interest will amount to \$25,000,000. This sum, with a substantial amount added yearly for a sinking fund, could be met, provided strict economy be practised by governments, from the future revenue of the Dominion. In national finance, if debts can be funded, the practical question is that of payment of annual interest. But while this is so, the fact must not be overlooked that debt is debt, a financial obligation and burden upon the body politic, whether owed to investors at home or abroad.

To Encourage Agriculture.

"It is Canada's clear national duty and supremely in the interest of our credit to provide what we reasonably by taxation can without impairing our economic strength. To attempt more would mean too drastic taxation upon a community whose trade and commerce have been seriously interrupted and affected by war conditions and unduly heavy burdens upon a people already contributing generously of their substance to funds and organizations whose patriotic object is the comfort and well-being of our soldiers and the dependants they have left behind. In connection with taxation, there is another feature which we must also bear in mind—namely, that Canada is a country inviting immigration, and we must be careful not to create the impression that it is likely to become a country of heavy individual taxation. In this connection, it is opportune to state on behalf of the government and as enunciating its settled policy, that, in providing Canada's war expenditure, resort will not be had to taxation upon the farms, personal effects, or income of those engaged in our great basic industry of agriculture."

WHO ARE SUBSCRIBING?

Those companies and individuals who desire their subscriptions to appear in *The Monetary Times* list of war loan subscriptions should send the particulars without delay to the editorial department, *The Monetary Times*, 62 Church Street, Toronto. The details required are name of subscriber, city or town, amount of subscription.

CANADA'S FINANCE MINISTER

Sir Thomas White, Canada's finance minister, has little doubt of the success of the present war loan. As in the case of the first loan in November last, he has not spared himself to make the loan satisfactory and successful in every way. Since he became minister of finance in 1911, he has had the handling of a more difficult financial portfolio than that of any of his predecessors. Important financial transactions have followed rapidly, and it is to the credit of Sir Thomas White that they have all been negotiated with excellent judgment and in the best interests of the nation.

Sir Thomas was born near Bronte, in Halton county, in 1866, and attended the Bronte public school and the Brampton high school before entering the University of Toronto as a student in classics and political science. He remained for two years at the university and then joined the staff of a Toronto evening newspaper as a reporter. He resumed his studies and then dropped them again to accept a position in the city assessment department. Finally, he completed his university course, winning a gold medal at graduation. He then entered the law school, and in 1899 was graduated with a second gold medal. In August of that year the directors of the National Trust Company, then in course of organization, were seeking a manager. They selected Mr. White, and he accepted the appointment. He rose first to the position of general manager and later to that of vice-president of that corporation.

Sir Thomas is one of the comparatively few ministers of the present Dominion cabinet who has risen to the tasks and responsibilities which the war has placed upon the government.

SUBSCRIPTIONS TO THE CANADIAN WAR LOAN

May be placed through our office, and we shall look after all details in connection with applications without charge. A copy of the official prospectus will be forwarded upon request.

WAR LOAN

DOMINION OF CANADA

Issue of \$100,000,000 5% Bonds Maturing 1st October, 1931

PAYABLE AT PAR AT

OTTAWA, HALIFAX, ST. JOHN, CHARLOTTETOWN, MONTREAL, TORONTO, WINNIPEG, REGINA,
CALGARY, VICTORIA.

INTEREST PAYABLE HALF-YEARLY, 1st APRIL, 1st OCTOBER.
PRINCIPAL AND INTEREST PAYABLE IN GOLD.

ISSUE PRICE 97½

A FULL HALF-YEAR'S INTEREST WILL BE PAID ON 1st APRIL, 1917.
THE PROCEEDS OF THE LOAN WILL BE USED FOR WAR PURPOSES ONLY.

THE MINISTER OF FINANCE offers herewith, on behalf of the Government, the above-named Bonds for subscription at 97½, payable as follows:—

10 per cent. on application;	
30 " " 16th October, 1916;	
30 " " 15th November, 1916;	
27½ " " 15th December, 1916.	

The total allotment of bonds of this issue will be limited to one hundred million dollars, exclusive of the amount (if any) paid for by the surrender of bonds as the equivalent of cash under the terms of the War Loan prospectus of 22nd November, 1915.

The instalments may be paid in full on the 16th day of October, 1916, or on any instalment due date thereafter, under discount at the rate of four per cent. per annum. All payments are to be made to a chartered bank for the credit of the Minister of Finance. Failure to pay any instalment when due will render previous payments liable to forfeiture and the allotment to cancellation.

Subscriptions, accompanied by a deposit of ten per cent. of the amount subscribed, must be forwarded through the medium of a chartered bank. Any branch in Canada of any chartered bank will receive subscriptions and issue provisional receipts.

This loan is authorized under Act of the Parliament of Canada, and both principal and interest will be a charge upon the Consolidated Revenue Fund.

Forms of application may be obtained from any branch in Canada of any chartered bank and at the office of any Assistant Receiver-General in Canada.

Subscriptions must be for even hundreds of dollars.

In case of partial allotments the surplus deposit will be applied towards payment of the amount due on the October instalment.

Scrip certificates, non-negotiable or payable to bearer in accordance with the choice of the applicant for registered or bearer bonds, will be issued after allotment, in exchange for the provisional receipts.

When the scrip certificates have been paid in full and payment endorsed thereon by the bank receiving the money, they may be exchanged for bonds, when prepared, with coupons attached, payable to bearer or

registered as to principal, or for fully registered bonds, when prepared, without coupons, in accordance with the application.

Delivery of scrip certificates and of bonds will be made through the chartered banks.

The issue will be exempt from taxes—including any income tax—imposed in pursuance of legislation enacted by the Parliament of Canada.

The bonds with coupons will be issued in denominations of \$100, \$500, \$1,000. Fully registered bonds without coupons will be issued in denominations of \$1,000, \$5,000 or any authorized multiple of \$5,000.

The bonds will be paid at maturity at par at the office of the Minister of Finance and Receiver General at Ottawa, or at the office of the Assistant Receiver General at Halifax, St. John, Charlottetown, Montreal, Toronto, Winnipeg, Regina, Calgary, or Victoria.

The interest on the fully registered bonds will be paid by cheque, which will be remitted by post. Interest on bonds with coupons will be paid on surrender of coupons. Both cheques and coupons will be payable free of exchange at any branch in Canada of any chartered bank.

Subject to the payment of twenty-five cents for each new bond issued, holders of fully registered bonds without coupons will have the right to convert into bonds of the denomination of \$1,000 with coupons, and holders of bonds with coupons will have the right to convert into fully registered bonds of authorized denominations without coupons at any time on application to the Minister of Finance.

The books of the loan will be kept at the Department of Finance, Ottawa.

Application will be made in due course for the listing of the issue on the Montreal and Toronto Stock Exchanges.

Recognized bond and stock brokers will be allowed a commission of one-quarter of one per cent. on allotments made in respect of applications bearing their stamp, provided, however, that no commission will be allowed in respect of the amount of any allotment paid for by the surrender of bonds issued under the War Loan prospectus of 22nd November, 1915. No commission will be allowed in respect of applications on forms which have not been printed by the King's Printer.

Subscription Lists will close on or before 23rd September, 1916.

Department of Finance, Ottawa, September 12th, 1916.

Subscriptions for

YIELDING PRACTICALLY

5.35%

WAR LOAN DOMINION OF CANADA

As with the previous Loan, we predict a great success for this issue. During this period of stress our Government needs our help and counts upon our patriotism. But a chance is given investors of placing their money in securities of the highest grade, upon terms the liberality of which will, perhaps, not be fully realized until the return of normal times.

If this Loan were issued to yield 4½%, instead of about 5.35%, the price would be 105.41, instead of 97.50. A 4% yield (the basis on which Dominion Government bonds sold so recently as 1914) would mean a price of 111 for the present issue.

We will forward your application, procure your allotment and render other services free of charge to you.

To ensure allotment application should be made at once.

PRICES OF OLD WAR BONDS

Shortly after the issue of the first war loan in November, there was an apparent decline below the issue price. The securities were offered to the public at 97½, payable in instalments and with the first half-yearly coupon payable in full. To holders who paid in full on January 3rd, under the prescribed rate of discount, the actual cost of the bonds was a little over 96½. The real cash issue price was about 96½, the issue yielding at this price a rate of interest approximating 5½ per cent.

On January 3rd, 1916, subscribers to the loan had the option of paying their subscriptions in full and taking advantage of the discount allowed. This privilege was extensively used, \$75,000,000 of the loan being paid under this option, and four months in advance of maturity.

The highest price of the old war loan to August 26th, on the Montreal stock exchange, was 99½ and the lowest 97.

WAR LOAN POSTPONES DEBENTURE STOCK ISSUES

The issue of the second war loan recalls a statement made by Sir Thomas White in February, that the government had determined to authorize a sale of 5-year debenture stock from time to time in principal sums of \$100 and multiples thereof. No issues of this stock have yet been made and in view of the present offering of war bonds it seems unlikely that the debenture stock will be in the market for some time to come.

The stock will be repayable in 5 years from date of issue, and will bear interest payable half-yearly by cheque negotiable without discount at any branch of any chartered bank in Canada. The government will reserve to itself the right to limit the amount of individual sales, and generally to deal with the issue as may be deemed advisable having regard to the national credit and requirements. The object of this innovation is "to promote saving among the public and afford a ready means of remunerative investment in Dominion securities for funds seeking investment during the intervals between public offerings."

TO HELP SELL THE BONDS

Copies of this war loan bulletin of *The Monetary Times*, in large or small quantities, can be obtained by bond houses and others. Apply for information as to price to the business department, *The Monetary Times*, 62 Church Street, Toronto.

PATRONIZE HOME SECURITIES

Money and labor continue to be expended on non-essentials in Canada. This statement was made in a recent monthly letter of the Canadian Bank of Commerce. The chancellor of the exchequer, Right Hon. R. McKenna, in a letter to the secretary of the British National Economy Exhibition, says:—

"It is often necessary in dealing with problems of war expenditure to speak in terms of money, but thinking of these problems exclusively in terms of money often leads people very much astray. For example, I have heard it said that the more money that is spent on home products the better, because the more money is circulated the greater the prosperity. This is a profound error. What the nation needs is goods, labor and services for the successful prosecution of the war. Everyone's work is wanted either directly or indirectly for this purpose, whether for supplying our fighting forces or for making goods for export with which to pay for necessary imports. Expenditure on non-essentials, whether produced at home or abroad, diverts capital and labor that can ill be spared to purposes which do not help us in winning the war."

Because of the persistent offering of foreign securities in Canada and the extent to which they are being purchased, Sir Thomas White, finance minister, has publicly asked that investors reserve their funds for the service of the nation, and he points out that by so doing, no injury is done to our Allies, as other markets are open to their securities. Under the war measures act the government has power to prohibit the offering of foreign securities in Canada, but up to the present has preferred not to resort to prohibitive measures.

Leaving to be raised for war purposes	215,000,000
	250,000,000

FIFTH DOMINION LOAN DURING WAR

Only the Two Domestic Loans Were Specifically for War Purposes

Since the outbreak of war the Dominion government has successfully floated four loans, one in London, two in New York, and one in Canada. The present is the fifth government loan since war commenced. The loans are as follow:—

London; March, 1915; \$25,000,000 4½ per cent. bonds at 99½; redeemable in five or ten years.

New York; July, 1915; \$45,000,000 5 per cent. 1 and 2-year notes with option to convert into 5 per cent. twenty-year bonds. One-year notes issued at par; two-year notes issued at 99½.

Canada; November, 1915; \$100,000,000 5 per cent. bonds at 97½, redeemable in ten years.

New York; March, 1916; \$75,000,000 5, 10 and 15-year 5 per cent. bonds, sold at 99.56, 97.13 and 94.94 respectively, less 2½ commissions.

Canada; September, 1916; \$100,000,000 5 per cent. 15-year bonds, issued at 97½.

Fifth Public Issue.

The present war loan is the fifth public issue made by the federal government since the outbreak of war in August, 1914. The two internal war loans, that of November last and the current one are the only public issues made specifically in connection with the war.

The Dominion government has not raised a loan in London since March, 1915, and is not likely to make a public offering there until some time after the close of the war. The Dominion government's public flotation in that market in recent years, have been as follow:—

Government Flotations in London.

Year.	Dominion government loans.	Securities.
1907	£1,500,000	4 % debentures
1908	3,000,000	3½ % redeemable stock
.....	5,000,000	3½ % stock
.....	5,000,000	3½ % redeemable stock
1909	6,000,000	3½ % bonds
.....	6,500,000	3½ % stock

.....	5,000,000	3½ % stock
1912	5,000,000	3½ % stock
1913	3,000,000	4 % stock
.....	4,000,000	4 % stock
1914	5,000,000	4 % debenture stock
.....	5,000,000	4 % stock
1915	5,000,000	4½ % bonds

WHAT THE LOAN YIELDS TO INVESTORS

Suppose the investor buys a Canadian war bond of \$1,000, bearing 5 per cent., payable April 1st and October 1st, and maturing October 1st, 1931. This bond is to be paid for as follows: \$100 on application, \$300 on October 16th, 1916; \$300 on November 15th, 1916; and \$275 on December 15th, 1916. The total cost of the bond to the investor is, therefore, \$975. The first coupon, due on April 1st, 1917, amounts to \$25, and includes interest from October 1st, 1916, to April 1st, 1917. The value of this bond, exclusive of accrued interest, as on October 1st, 1916, and figured on a 5.30 per cent. basis is \$974.64, as pointed out in an interesting circular of W. L. McKinnon and Company, bond house, Toronto.

The actual cost of each \$1,000 bond is \$975, which is 36 cents more than \$974.64. If the finance minister had reduced the subscription price 36 cents on each \$1,000 bond, the yield rate would have been exactly 5.30 per cent.

The investor who pays each instalment exactly on each payment date mentioned above, really reduces the price as at October 1st, 1916, to 97.04 and accrued interest to yield almost 5.30 per cent. (The exact yield rate is 5.29 per cent.)

The investor who discounts his instalments and makes all his outstanding payments on October 16th will have to pay \$872.22 balance on that date for each \$1,000 bond. The exact yield rate in this case will be 5.26 per cent.

FINANCES OF THE NATION

Canada is Paying Interest and Part of War Principal,
Out of Revenue

Canada is paying, out of its revenue, the interest on money borrowed for the war and also a part of the cost of the war. Although the situation may change before the close of the fiscal year, that fact is indicated in the statement of national revenue and expenditure for the first four months, April to July, of the current fiscal year.

During that period, there was an increase in revenue and a reduction in the expenditure on ordinary accounts, including capital outlays, of about \$1,710,000. But the war expenditure charges during the current year of \$51,424,460, more than consumed the apparent surplus of \$32,000,000. Thus arises, partly, the need of a new war loan. Put in tabular form, the position is this:

Revenue	\$67,638,935
Ordinary expenditure	\$28,212,341
Capital account expenditure	6,674,579
	34,886,920
Surplus	\$32,757,015
War expenditure	51,424,460
Deficit, on account of war	\$18,572,445

The following table compares national expenditures for the period, April July, of the present and preceding fiscal years:—

	1915.	1916.
Ordinary services	\$20,370,327	\$28,212,341
Public works, etc.	8,883,364	6,480,281
Railway subsidies	357,297	185,208

\$18,616,988 \$14,886,920

The revenue for similar periods was as follows:—

	1915.	1916.
Customs	\$27,467,544	\$43,360,485
Excise	6,612,316	7,624,215
Post office	4,700,000	5,550,000
Works and railways	4,550,546	8,126,811
Miscellaneous	2,517,944	2,718,402

Total

\$48,848,352 \$67,638,935

The increase of national revenue during the current year over the figures of 1915 was \$21,700,000. The chief gain was in customs taxes, amounting to nearly \$16,000,000, but all the items show improving results.

The following is a statement of Canada's public debt as on July 31, 1915 and 1916:—

Funded Debt:—

	Liabilities.	1915.	1916.
Payable in New York			\$ 75,000,000.00
Payable in Canada		\$ 761,260.94	97,357,489.19
Payable in London		362,703,312.40	362,703,312.40
Temporary loans		100,673,684.22	226,340,150.85
Bank circulation redemption fund		5,794,534.31	5,842,191.20
Dominion notes		152,043,872.41	174,929,282.54
Savings Banks			
	1915.	1916.	
Post office savings banks	\$18,990,909.81	\$40,117,746.16	
Dominion government savings banks	14,050,052.97	13,572,378.33	
		53,040,962.80	53,890,124.49
Trust funds		10,251,061.77	9,981,412.02
Province accounts		11,950,481.20	11,950,481.20
Miscellaneous and banking accounts		17,467,374.39	12,789,077.52
Total gross debt		\$734,650,544.35	\$1,089,754,191.41
Investments	Assets.		
Sinking funds		\$ 10,790,806.51	\$ 12,595,201.10
Other investments		100,965,400.43	120,157,506.66
Province accounts		2,296,127.90	2,296,127.90
Miscellaneous and banking accounts		150,850,607.96	271,501,062.55
Total assets		\$270,911,442.80	\$415,550,277.61
Total net debt 31st July		\$463,745,092.55	\$674,203,913.80
Total net debt to 30th June		459,287,721.39	593,916,617.80
Increase of debt		\$ 14,457,371.16	\$ 80,287,296.00

In a statement issued on September 6th, the minister of finance said that the revenue of the Dominion had so far during the present fiscal year exceeded his budget expectations. For the five months ended August 31st, 1916, the total receipts aggregated \$84,000,000, as compared with \$60,000,000 for the corresponding period last year. On the other hand, the policy of not proceeding with new works unless indispensably necessary is giving good results. Ordinary public works account shows for the period in question a reduction of \$2,000,000, while public works capital expenditure has declined \$500,000. Capital expenditure on railways and canals, which is the largest item of Dominion expenditure, shows a reduction of \$3,000,000.

The result of these and other economies is that the increase in interest charges upon the national debt due to the war and pension charges are being completely offset by reduced ordinary and capital expenditures.

If the revenues continue on the same satisfactory basis until the end of the year, it is probable that after paying all ordinary and capital expenditures the government will be able to show that from the receipts of customs, excise, special taxation and other sources of income, the principal of war expenditure has been met to the amount of \$40,000,000 or \$50,000,000. The balance of war expenditure will be provided by borrowing.

WHEN BRITAIN MADE GOOD OUR DEFICITS

The floating of the second Canadian war loan within Canada is an event of considerable historical importance. In the early days, when Canada was a Crown Colony, the Imperial government made good the deficits between revenue and expenditure. At a later date when we had begun to borrow in England, they frequently guaranteed our bonds. For a long time money cost Canada 6 per cent, even with a guarantee behind our securities. It was not until 1876 that the Dominion was able to borrow in London at 4 per cent, on its own unguaranteed credit. In 1894, during a period of depression, the rate we paid for a large loan was only 3½. Since then it has varied.

The city of Winnipeg has sold its Anglo-French war loan bonds, and will invest the money in the present Dominion war loan.

The directors of the Dominion Bridge Company have made arrangements whereby employees, and those of the Montreal Ammunition Company and Copper Products, Limited, may purchase Dominion of Canada war loan bonds issued in December, 1915. These securities are offered at the issue price of 97½, on a generous instalment plan, with interest on payments at the rate of 5 per cent.

BANKS WILL SUBSCRIBE TO LOAN

Their Short Term Financing Recently was in Anticipation of Present Issue

The chartered banks of Canada will be substantial participants in the present war loan but this fact should not prevent small investors from placing their surplus funds with the government to help finance Canada's share of the war. The Dominion government issued in August \$30,000,000 three-months bills. These were taken by the banks in anticipation of the present loan. A payment of 70 per cent. on account of these bills was made on August 1st and the balance was paid on September 1st. As this loan is repayable on November 1st, the loaning banks will not be inconvenienced through a diminution of crop moving funds.

The banks are in a good position to participate in the present loan. The standing of their principal accounts for the latest date available appears in the statistical record of *The Monetary Times* in the current issue. Demand and notice deposits in the banks at the end of July totalled \$1,221,000,000.

To First War Loan.

The following is an official list of the contributions of the various banks to the first war loan of the Dominion government issued in November last:—

Bank.	Amount of allotment.
Bank of Montreal	\$ 3,134,300
Quebec Bank	514,500
Bank of Nova Scotia	1,286,600
Bank of British North America	953,600
Bank of Toronto	979,700
The Molsons Bank	784,900
La Banque Nationale	300,000
Merchants Bank of Canada	1,372,400
La Banque Provinciale du Canada	195,900
Union Bank of Canada	986,400
Canadian Bank of Commerce	2,938,700
Royal Bank of Canada	2,273,100
Dominion Bank	1,200,900
Bank of Hamilton	587,600
Standard Bank of Canada	857,800
La Banque d'Hochelaga	350,000
Bank of Ottawa	857,800
Imperial Bank of Canada	1,372,400
Home Bank of Canada	260,000
Northern Crown Bank	300,000
Sterling Bank of Canada	165,000
Weyburn Security Bank	70,000
Total	\$21,741,600

Allotment was Cut.

The original amount subscribed by the banks was \$25,000,000, but owing to the success of the loan the amount was reduced to the above total.

The amount subscribed by each bank to the British war loan was a matter for each bank to decide, and some of the banks have not given particulars. Fifteen of the twenty-two banks in Canada reported a total amount subscribed of \$857,000. That all of the chartered banks subscribed well over £1,000,000 is regarded as a safe estimate.

The banks have also arranged with the Canadian finance minister for several advances to the Imperial authorities for the purchase of war munitions and supplies here. These advances total to date \$100,000,000.

DOMESTIC LOANS OF LONG AGO

The present is the second domestic loan made in Canada in recent times, the first having been issued in November, 1915. Several domestic loans however, were made by this country, in early years. The first was issued by the newly created Dominion of Canada after Confederation. It drew interest at 6 per cent. and attained at one time a maximum currency of over \$4,500,000. In 1872 a 5 per cent. stock was issued, of which the public took over \$9,500,000. In 1884 a 4 per cent. stock was sold to the extent of \$5,000,000, and in 1891 a 3½ per cent. stock was sold to the extent of about \$3,000,000.

SCOPE FOR APPRECIATION OF DOMINION GOVERNMENT BONDS

The accompanying chart, drawn for *The Monetary Times* by Greenshields & Company, investment brokers, Montreal,

indicates the fluctuations in the investment market for Dominion of Canada government bonds during the last thirty years. As the element of

safety in our present war loan is taken rightly for granted, the diagram is published to emphasize the other element which may help to move the shrewd investor to extend his subscription, i.e., the element of comparative cheapness and possibility of appreciation.

The chart shows the price at which a 5 per cent. Dominion government bond with ten years to run would sell to give the same yield as other issues of Dominion government bonds have yielded in the last thirty years. It shows the comparative cheapness of government issues made at present levels and the possibilities of appreciation in value when the world's investment markets become normal again.

The city of Fort William, Ont., will invest \$250,000 of its sinking fund in the war loan.

What is the Price of One of Your Arms?

Civilian: "How did you lose your arm,
my lad?"

Soldier: "Fighting for you, sir!"

Civilian: "I'm grateful to you, my lad."

Soldier: "How much are you grateful, sir?"

Civilian: "What do you mean?"

Soldier: "How much money have you lent
your country?"

Civilian: "What has that to do with it?"

Soldier: "A lot. How much is one of your
arms worth?"

Civilian: "I'd pay anything rather than lose
an arm."

Soldier: "Very well. Put the price of your
arm, or as much as you can afford, into Canadian
War Loan Bonds and lend your money to your
country."

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Edmonton, Alta.—The finance committee is recommending the council to call for tenders on \$600,000. An offer of 85½ and interest has been made for the bonds.

Edmonton, Alta.—The city's net assessment for municipal purposes has been reduced over \$39,000,000 from that of 1915, and that this together with the increase in debenture charges, and the suspension of the penalty clause on arrears of taxes, are responsible for the higher mill rate of .21 as against .16½ in 1915. Reductions have been effected in the estimates of the gross general expenditures, which compare with those of 1914 and 1915 as follows: 1914, \$1,412,464; 1915, \$1,073,338; 1916, \$813,704. Mr. A. N. Mouat, city comptroller, has presented the tax levy schedule as follows:—

Purpose.	Amount to be levied.	Net assessment.	Mill rate.
Municipal:			
Administration	\$ 60,031		.47
Assessment & collection of taxes ..	21,407		.17
Charity, grants and donations ..	60,053		.47
Health and sanitation	156,389		1.13
Protection of life and property..	315,291		2.42
Recreation (parks)	8,000		.07
Works and other properties	44,565		.35
Extraordinary and miscellaneous (including \$404,808 for bank interest and discount on taxes)	474,792		3.63
	\$1,140,530	\$130,916,285	8.71
Deduct, miscellaneous revenue, refund street railway paving charge, freight and duty claims recovered, surplus from 1915 and sundry rents, etc.	171,750		1.31
Net levy, exclusive of general debt liquidation	\$ 968,780		7.40
Add, liquidation of city's general debenture debt, interest, sinking fund and redemption (including discount on taxes)	988,417	\$130,916,285	7.55
Net levy, including liquidation of general debt	\$1,957,198		14.95
Add education (including discount on taxes)			
Libraries	39,274	\$130,916,285	.30
Edmonton public school district No. 7	680,440	118,337,425	5.75
Edmonton separate school district No. 7	82,210	14,297,560	
Total levy	\$2,759,124		21.00

British Columbia.—The following certificates have been issued by the municipal department of the province of British Columbia: Oak Bay, by-law No. 223, local improvement paving, \$2,929.47, 10-years, 5½ per cent. payable half-yearly, and debentures thereunder. Certified, August 23rd, 1916.

Edmonton, Alta.—The city is inviting tenders for bonds. (See advertisement on another page of this issue of *The Monetary Times*.)

An indication of the unequalled prosperity of Canadian industrial corporations is the fact that many of them are using surplus funds, created by record earnings, for the purchase in the market of large amounts of their outstanding bonds in advance of their sinking fund requirements and for their own investment. A continuation of existing high earnings—which would appear likely—will mean that the repurchasing of their own bonds by corporations will reach even larger proportions, thereby creating higher market prices for corporation bonds, and further strengthening the security behind bonds remaining outstanding.—Circular of Royal Securities Corporation, Montreal.

FIGURES FOR THE INVESTOR

Capital Outstanding and Interest Earned on Any Interest Date of the War Bonds

The accompanying schedule, prepared by W. L. McKinnon & Co., bondhouse, Toronto, shows: (within 36 cents on each \$1,000 war bond) the exact yield rate on the investment, also the amount of capital outstanding at any interest date, also the interest earned on any interest date, and exactly how his capital and income are paid to him:—

The cost of the bond paid for by instalments is \$975. The first coupon due April 1st, 1917, amounts to \$25 and includes interest from October 1st, 1916, to April 1st, 1917. Value (exclusive of accrued interest) as at October 1st, 1916, figured on a 5.30 per cent. basis is \$974.64.

Figures as at the 1st day of Oct. and Apr. in the year	Total amount actually paid by all the bonds & the coupons	Total am't of interest earned @ 5.30 p.c. on outstanding Capital as at date set forth	Amount of principal money repaid on date set forth	Amount of interest earned but not paid on date set forth. This is added to Capital outstanding	Capital outstanding on date set forth
Oct. 1916					*\$974.64
Apr. 1917	\$25.00	**\$20.27	\$4.73		969.91
Oct. 1917	25.00	25.70		\$.70	970.61
Apr. 1918	25.00	25.72		.72	971.33
Oct. 1918	25.00	25.74		.74	972.07
Apr. 1919	25.00	25.76		.76	972.83
Oct. 1919	25.00	25.78		.78	973.61
Apr. 1920	25.00	25.80		.80	974.41
Oct. 1920	25.00	25.82		.82	975.23
Apr. 1921	25.00	25.85		.85	976.08
Oct. 1921	25.00	25.86		.86	976.94
Apr. 1922	25.00	25.89		.89	977.83
Oct. 1922	25.00	25.92		.92	978.75

Apr. 1931	25.00	26.43		1.43	998.54
Oct. 1931	1,025.00	26.46	\$998.54		
	\$1,750	\$780.78			

NOTES.

*The actual cost of each \$1,000 bond is \$975, which is 36 cents more than \$974.64. If the finance minister had reduced the subscription price 36 cents on each \$1,000 bond, the yield rate would have been exactly 5.30 per cent. as will be seen from an examination of the schedule above.

**This \$20.27 represents interest at 5.30 per cent. on \$100, from September 23rd to April 1st (190 days), on \$300, for 167 days, on \$300 for 137 days, and on \$275 for 107 days. The \$4.73 represents a bonus in interest which really reduces the price by that much.

Stop buying luxuries and help win the war.

Mr. Robert Lynch Stailing has been appointed assistant manager for the Sun Insurance office for Canada, and also vice-president and assistant managing director of the Imperial Underwriters' Corporation of Canada. Mr. Stailing is a young underwriter, well versed in the insurance business. He has been with the London and Lancashire Fire Insurance Company at the head office for about six years. Recently he was in control of the office of the insurance brokers, Toronto, Messrs. Reed, Shaw and McNaught.

FIRE HAZARDS IN MUNITION PLANTS

Report Made by Underwriters—Heavy Risks Are Carried

An interesting report has been issued by the fire underwriters in New England in regard to the risks which are being carried by the companies in munition plants. The report details the additional risks in such plants in the United States and these apply also to plants in Canada.

While there are heavy risks carried, this business has been fairly profitable to the insurance companies both in Canada and in the United States. The amount of this class of insurance carried in Canada naturally cannot be disclosed, as publication would disclose also the volume of munitions in course of manufacture here, and that would not be in the public interest. The growth of the munitions business has resulted in greater precautions for safety being taken in many factories that were not operated with success prior to the war. They have since become successful, thus minimizing the moral hazard. Overtime also has a tendency to minimize the risk, inasmuch as when work-people are on the premises all the time any incipient fire is more likely to be arrested before actual damage is done.

New England Report.

The following is a summary of the New England underwriters' report:—

(1) Prolonged hours of labor, night work, etc., have increased the period of action of the active special or manufacturing hazards.

(2) A tendency towards uncleanness has been created or enhanced by long hours of labor, the difficulty of obtaining satisfactory help, the increased congestion of equipment and material, and, above all, by the failure of superintendents through pressure of other business to give proper and routine attention to matters of housekeeping.

New Manufacturing Processes

(3) The introduction into established risks of new manufacturing or special hazards and processes. In some cases there has been failure to protect these in a satisfactory and permanent manner on the assumption that they were of a temporary character. In other cases there has been failure to realize the true nature of the hazard involved and an ignorance of established methods of protection.

(4) The introduction of the hazards of construction in the building of extensions to existing structures. This feature assumes a prominent place in a consideration of a sprinklered risk, where the protection of the whole plant may be virtually set at naught by reason of failure to equip new portions promptly. The time required to equip new portions has been greatly increased by reason of the pressure put upon sprinkler companies and the general delay in obtaining materials.

(5) Strikes and other evidences of unsettled labor conditions have had a bearing upon the fire risk.

As to the Moral Hazard.

(6) Failure to produce, under war orders, goods acceptable to inspectors of the foreign governments has resulted in accumulations of rejected products which represent heavy losses to the manufacturers. This condition suggests the question of moral hazard.

(7) Incendiarism springing from a desire to cripple plants producing goods is a subject given much attention in newspapers. While there have been incendiary fires in "war order" plants in New England, it would seem that they have resulted from the individual efforts of misguided men. There is certainly little evidence to show that any well studied, intelligent or organized effort has been made to cripple factories by violence, in this section of the country at least, but there are indications that financial means have been tried to limit or embarrass the efforts of certain munitions plants.

An Important Moral Hazard.

(8) Another question of moral hazard has been raised by the visualization of conditions which may exist, when the war demand ceases, in those plants equipped particularly for "war business." This point raises a most interesting economic problem. There are a number of concerns which have built and partially equipped large plants for the production of munitions, but which have not yet produced appreciable quantities of acceptable goods. If the war should cease within a year these concerns might find themselves in a critical

condition. Established plants manufacturing munitions as a side line may feel a period of depression during the readjustment which must follow the war, but in most cases this should not affect them seriously.

The value, in times of peace, of equipment installed for the manufacture of munitions varies with each individual case. In a general way it may be said that machinery, that is, lathes, presses, etc., are of permanent value, while large quantities of dies, tools, patterns and gauges will be of slight value when the war demand ceases. The cost of the latter may be considered as an expense of manufacture rather than as a capital charge against a business. In certain instances, however, the value lost in investing in such dies, patterns and gauges will be very large, and these cases will be found in those newly-established munition plants which were late in getting into the field, and the net volume of whose total product is small.

Effect of Rejections.

(9) The manufacture of shell parts has been attended by heavy losses on account of large quantities of product being rejected by purchasers' inspectors. Manufacturers failed to realize early the degree of precision required. The steady rise in the cost of labor and material and the loss in rejected product has robbed the war business of much of its seeming profit. The sentiment amongst most of the smaller manufacturers is that the "game has not been worth the candle," though as the demand continues early losses are being forgotten.

AUGUST BANK CLEARINGS

The monthly returns of Canada's bank clearing houses showed an increase of over 53 per cent. last month. The figures compared with the similar period last year are as follows:—

	August, '16.	August, '15.	Changes.
Montreal	\$296,013,018	\$224,452,501	+ \$ 71,560,517
Toronto	187,511,224	140,624,050	+ 46,887,174
Winnipeg	194,133,827	66,444,845	+ 127,688,982

Mr. E. J. Langlois has been appointed general agent of the Hamilton Fire Insurance Company, Montreal, with offices at 10 St. John Street.

Mr. B. Hal Brown, president and manager of the Provincial Trust Company, Montreal, is in a Quebec hospital seriously injured as a result of a motor accident this week. Mr. Kelly, vice-president of the Grand Trunk Railway, has sent his private car to Quebec to bring Mr. Brown back to Montreal.

Mr. J. Burt Morgan, manager at Victoria of the Great-West Life Insurance Company, of Winnipeg, and president of the Life Underwriters' Association of Canada, with members of the Victoria Life Underwriters' Association, have already set their hearts upon Victoria as the meeting-place for the annual convention of the Dominion Association in 1919.

WAR LOAN GOING WELL

Small Subscriptions Are Still Wanted, Though— Market Notes

The list of subscriptions to the war loan, which *The Monetary Times* is compiling and which will be printed in these columns next week, shows that the success of the loan is assured. At the same time, it is very desirable that all investors with from \$100 to \$25,000 to invest should subscribe to the issue. The loan could be subscribed by the banks, insurance companies and other large corporations, but it is desired that every small investor in the country take a bond even if it is only one for \$100.

This week's reports indicate that a number of subscribers to the first loan are taking heavier amounts in the second loan. This is the case both with small investors, individual investors of substantial amounts and corporations. As ten months have elapsed since the first war loan, small investors have had an opportunity to save sufficient, as a rule, to duplicate their first investment and in some instances, to increase it. There are also many small investors subscribing for the first time. Their hesitancy for various reasons, in respect to the first loan, having disappeared. The small subscriptions, therefore, are likely to be more numerous than in November last.

Small Subscriptions Needed First.

Comparatively few large corporations' subscriptions have as yet been announced. This will help to encourage small subscriptions. Undoubtedly, on the last occasion, a large number of subscriptions ranging from \$500 to \$3,000 were withheld because of the impression during the first few days of the loan, that the issue had already been oversubscribed. The small investments are needed first. The more important investors will then see that the loan is fully or oversubscribed towards the end of next week.

Advices received by *The Monetary Times* indicate that in the aggregate the investments of industrial corporations in the loan will be heavier than previously. A great number are receiving war orders. Most of the companies have been able to put their dividend shareholders upon a fair dividend basis and to pay dividends which had accumulated. In addition, they have built up substantial reserves and part of these is being invested in war bonds.

Life Insurance Companies.

Last year, the life insurance companies conferred together as to the amounts they would subscribe to the war loan. Their aggregate subscription was about \$8,000,000. On this occasion, the companies are working more independently, each one subscribing according to its investment policy at this time and according to the provisions of the insurance act. Those life insurance subscriptions already reported to *The Monetary Times*, show larger amounts than in the case of the first loan. One company subscribing \$500,000 to the first loan, for instance, is putting \$1,500,000 in to the present loan. It would not be surprising if the life insurance companies' subscriptions aggregate \$15,000,000, or nearly double the amount subscribed to the November loan. A small part will probably be accounted for by conversion.

The loan and trust companies, as a group, did not subscribe very heavily to the first war loan. They did not know to what extent at that time debenture holders would desire maturing debentures to be paid, rather than renewed. They arranged with the government and the banks for the advance of funds against approved collateral, should any emergency arise. In the meantime, they have accumulated large surpluses and reserves as indicated by their reports at the end of last year, the demand for mortgages not being heavy. The loan and trust companies are still pursuing a cautious policy and while the financial skies are clearer, opinions differ as to whether their war loan subscriptions in the aggregate will be larger this time than last.

Little information is available as to how much of the old war loan is being turned in at 97½ as the equivalent of cash for subscription to the new loan. One municipality in Quebec province has subscribed \$121,000 to the loan, \$100,000 of which is new money and \$21,000 of which is in November war bonds turned in for the conversion privilege. Many of the corporation subscriptions are likely to be partly represented by the conversion privilege. The final returns, however, will probably show that comparatively little of the old loan has been converted.

The bond houses have been very active in connection with the present offering. They have waged an excellent advertising campaign in connection with the sale of war bonds, and which must have done much to attract investors to the loan. Not a little of the success of the offering will be attributable to their efforts. The banks have also received a large number of subscriptions direct.

United States Investors.

The fact that the bonds are payable in gold makes the issue more attractive to United States investors who ultimately will play an important role in the absorption of the loan.

Subscriptions from the United States may not be as numerous as anticipated, although there have been many inquiries, and the aggregate subscriptions should prove substantial. United States investors are keen on interest being paid in New York, which is not the case in the present loan. Some of the Canadian brokers are disappointed in this regard. Even though the interest is not payable in New York, however, both principal and interest are payable in gold and the investment is a very profitable one for people of the United States.

Participation by United States investors in the loan, according to investment houses with international connections, will probably be large, although the Mackay companies' \$2,000,000 is the only important subscription in that class announced this week. However, it is known that different houses are carrying inquiries for substantial amounts for New York, and the loan offering is only in its first week.

The Canadian Pacific Railway has applied for \$2,500,000 of the loan. The exact amount applied for by the company at the time of the last loan was not made public. Presumably it was large, as the balance sheet of June 30 last showed a total of \$5,272,690 described as "temporarily invested in war loans."

List of Subscriptions.

The four months' limit for total payments is regarded by some as an inconvenience to those who take up the loan for savings. At the same time small investors have probably saved in advance for this loan and will be ready in many cases to pay in full on October 16th.

Those companies and individuals who desire their subscriptions to appear in *The Monetary Times* list of war loan subscriptions should send the particulars without delay to the editorial department, 62 Church Street, Toronto. The details required are name of subscriber, city or town, amount of subscription.

PAYABLE IN NEW YORK

One Toronto bond house, Messrs. Wood, Gundy and Company, have studied the interests of their clients to the extent of arranging for a fixed rate of exchange at which the principal sum and all interest coupons as they mature will be paid in New York City. It was recognized that large numbers of the firm's clients in the United States would wish to participate in the war loan and in sending out prospectuses Messrs. Wood, Gundy and Company advised their clients as follows: "For the convenience of clients purchasing these bonds through us we have arranged with the Royal Bank of Canada to pay principal and interest at their office, corner William and Cedar Streets, New York, for a charge of ⅓ per cent."

The advantage of this provision is obvious. Exchange between Canada and the United States has fluctuated between ⅓ per cent. to ½ per cent. during the last six to 12 months, costing those cashing coupons payable only in Canada the rate of the day then prevailing. By this arrangement subscribers through Wood, Gundy and Company may cash their coupons and eventually their bonds at a maximum charge of ⅓ per cent.—a very nominal fee. Such an arrangement is regarded not only of advantage to United States investors, but also to Canadian investors, buying bonds carrying this privilege. The payment of ⅓ per cent. for cashing each coupon as it falls due and the principal at maturity is equivalent to paying ⅓ per cent. at the time of purchase, so it is possible for an investor by paying 97½ instead of 97¼ to secure a bond payable at par in New York. It is, however, an advantage to Canadian investors to pay the ⅓ per cent. only in case their bonds are to be cashed in New York, as otherwise they would be paying for a privilege which they would not be exercising.

ONTARIO FIRE INSURANCE INQUIRY

While there is no public discussion among the fire insurance companies as to the charge of Mr. E. P. Heaton, Ontario's fire marshal, that a combine in fire insurance exists in that province, the companies undoubtedly will present an interesting reply when the government inquiry resumes. Among other things, Mr. Heaton's report states:—

"That the association (Canadian Fire Underwriters) has entered into an agreement with the only insurance map and plan publishers in Canada to restrict the use of maps and plans to members of the association, thus producing an actually practical complete monopoly in favor of the tariff companies.

"That in many instances the association has caused to be cancelled policies of insurance from many large insurers, having Dominion-wide business and branches, notwithstanding the willingness of individual members to accept the same, and that the effect of such action on its part has been to require large insurers to seek unlicensed insurance.

"That the Canadian Fire Underwriters' Association has admittedly failed to make any serious effort to obtain reliable statistics upon which the adequacy of rates might with some degree of confidence be predicted."

The resumption of the inquiry will serve either to prove or disprove these statements. The fire marshal's is an ex parte statement and the arguments of the insurance companies have yet to be heard. Mr. Heaton has painted his picture of an alleged combine in the most glaring colors and the man in the street will conclude that the government and their fire marshal have the artistic temperament well developed. *The Monetary Times* believes that the fire insurance companies will prove amenable to any reasonable suggestions for the regulation of rates. Undoubtedly they have had sufficient experience to know at what rates business on various classes of risks can be done without loss to insurance companies.

EVERY \$100 COUNT

A large number of small subscriptions to the war loan will be more appreciated by the government than a small number of large subscriptions. The allotment of the loan to large subscribers will be cut down by the government so that all the small subscribers may have their full share of bonds. That applies to subscriptions sent in this week and next week up to Saturday, September 23rd, when the lists will close.

The small subscriptions to the loan are not coming in fast enough. There are many thousands of people who have from \$100 to \$1,000 for investment. Their duty is to lend this money to their country. The security of the war bond is excellent, the income yield is high and the bonds are readily saleable at any time, should the holder desire to sell. Back the boys in the trenches and buy a war bond.

FRATERNAL INSURANCE FAILURES

The Ancient Order of United Workmen of Ontario in March applied to the provincial legislature for a special act "to cancel the present beneficiary certificate of every member including all paid-up or option beneficiary certificates," and to issue certificates at a revaluation. *The Monetary Times* then advised that in the case of so drastic a procedure, "every statement made and every step taken should be carefully examined by members of the legislature as well as by independent members of the Order." It was suggested in these columns that the proposal might work great hardship on members of long standing in the Order, if mere theoretical rules were applied in a mere mechanical way. The Ontario legislature, however, acceded to the application of the Order and the readjustment proceeded.

The provincial insurance department has now received a number of complaints from members of the Order. It is stated that the amounts of insurance in a number of cases have been reduced, and in some instances, for example, where men have been members for 30 or 35 years, the claim is made that the insurance is of no value to-day.

Professor M. A. McKenzie, the actuary engaged by the Order to plan the readjustment, said, in a recent statement, that the Order had paid \$21,000,000 in death claims to members who have paid only \$5,000,000 into the fund. "The Order has no other sources of income except its members," he added. "Since 11,000 men who have died have received \$21,000,000 in return for assessments amounting to \$5,000,000, the shortage must be made up from among the members who have survived. Had all the members, both those who have survived and those who have died, paid adequate rates from the beginning, there would have been no shortage. It is impossible to collect from the dead."

The entire incident again points to the fact that fraternal societies have failed to give their members proper life insurance protection. Their rates have invariably been too low and their insurance schemes have been unsound. The fraternal societies have constantly been in trouble so far as their insurance plans are concerned. Life insurance companies sell their insurance on a proper basis and they therefore give protection. The fraternal insurance rates are not up to the standard for which actuarial science calls. Fraternal insurance, therefore, is not good.

THE QUEBEC BRIDGE

What caused the Quebec bridge disaster this week? The experts differ. All the careful mathematical calculations of many well-trained bridge engineers of Canada and of the United States failed to provide against the accident. The most modern engineering skill and knowledge failed to prevent the trouble. Everything possible was done, so far as is known, to avoid an accident. Yet the centre span of the bridge, weighing 5,200 tons, measuring 640 feet lies in the bottom of the St. Lawrence River, the locker of many other tragedies the causes of which will never be revealed, just as the exact cause of this bridge disaster may never be known.

The layman naturally asks if the construction of the Quebec bridge, as proposed, is a desirable experiment. Is it not possible to build a bridge, less pretentious so far as record-breaking span lengths go, but with a greater factor of safety in construction and a well-determined knowledge that when finally built, the bridge will stand? Is it not desirable to reconsider the plans with less emphasis on the phrase, "the greatest of its kind in the world"?

WHY NOT A BLACKLIST?

Two months ago, the British government established a blacklist of United States firms with which citizens of the United Kingdom were forbidden to trade. Canada has failed as yet to follow the example. Action should have been taken by the Dominion government immediately upon receipt of the official blacklist from the Imperial government. If it is illegal and undesirable for citizens of Great Britain to trade with these enemy firms, surely it is equally undesirable for Canadians to trade with them. Yet, trading is being done with some of the firms. There is no blacklist in Canada.

BANK DEPOSITS AND LOAN

Between October, 1915, and July, 1916, the date of the latest bank statement published, savings deposits in the banks had made a gain of \$88,000,000. That sum would provide almost for the present war loan. The increase in these deposits was recorded despite the fact that the first war loan of \$100,000,000 was subscribed during the period mentioned.

MACKAY COMPANIES' BIG SUBSCRIPTION TO LOAN

The first corporation subscription to the war loan from the United States was an application received by Messrs. Osler and Hammond, Toronto, on Monday from the Mackay Companies, of New York, for \$2,000,000 of the issue.

The election of Lord Shaughnessy to the board of trustees of the Mackay Companies a short time ago was then partially explained as a measure of recognition of the increase in the Canadian holdings of the corporation. With this subscription the Mackay Companies will have invested \$10,000,000 in loans to the allies. At 5 per cent., which is probably well below the yield of its investment of this class, the company has one-quarter of its preferred dividend represented by income from war security investments. The other Canadian trustees in the Mackay Companies are Sir Edmund Osler and Mr H. V. Meredith, president of the Bank of Montreal.

They are fighting for us; finance them.

The contention that a blacklist applicable here would hurt Canada's interests in the United States, where we are borrowing most of our money these days, is not sound. True it is that the United States government has protested against the institution of the blacklist by the British government but our friends at Washington are protest experts and an election is due in the United States in November. Great Britain was able to borrow \$250,000,000 in the United States without the slightest difficulty and after the blacklist had been established. Canada will be able to borrow in the United States all the money necessary for its legitimate requirements despite the institution of the blacklist, a list which should be made law here immediately.

THE BEST BOND.

Aside from the patriotic phase, the Canadian war bond is an excellent investment. Dominion government bonds, in point of merit, rank ahead of all other Canadian issues. No one in Canada or, for that matter, anywhere else, doubts the stability of the borrower. Canada will be able to meet the interest on its war loans, past, present and future, without any difficulty. Our shores are free from the invader and are likely to be. While the Dominion is prosecuting its share of the war vigorously, those who are staying at home are seeing that greater production is achieved from the soil and from natural resources. Last year the production in Canada of field crops, forest, mines and fisheries, exceeded \$1,123,000,000. Also, an adverse trade balance of \$300,000,000 has been converted within a few years to a favorable balance of \$271,000,000, after allowing for our interest charges of \$187,000,000 in Great Britain and the United States. However pessimistic the passing phases of the Great War may be inclined occasionally to make us, no one who analyzes the available facts, can fail to have well-seasoned optimism in the future of this Dominion and of the British Empire.

NOT PAYABLE IN NEW YORK

The war loan is not made payable in New York as well as in Canadian centres. One reason is a desire not to make the domestic loan conflict with Canadian borrowing in the United States.

WEEKLY RAILWAY EARNINGS

The following are the earnings of Canada's transcontinental railways during the week ended September 1st:—

Canadian Pacific Railway			
	1916.	1915.	Increase.
September 7	\$2,679,000	\$2,002,000	+ \$677,000
Grand Trunk Railway			
September 7	\$1,276,061	\$1,091,711	+ \$184,350
Canadian Northern Railway			
September 7	\$ 708,900	\$ 456,500	+ \$252,000

The Canadian Northern Railway July's return, the first of the company's current fiscal year, is as below:—

	1916.	1915.	Increase.
Gross	\$8,228,000	\$4,401,800	+ \$3,826,200

The British navy is back of our war bond.

ASSOCIATION OF LENDING COMPANIES

Dominion Mortgage and Investment Association is Formed—Will Help Borrowers

The formation this week of the Dominion Mortgage and Investments Association is a matter of great importance to, not only the lending, but also borrowing interests. The association comprises the loan, trust and life insurance companies engaged in business in Canada. They have several objects in common and in particular the loaning or investment of moneys in securities forming a charge upon real estate and in government, municipal, school and other bonds and debentures. It is in their interest, as well as in the interest of the borrowing public that the present association has been formed.

Officers of Association.

The president of the association is Mr. A. D. Langmuir, general manager of the Toronto General Trusts Corporation, Toronto, first vice-president, Mr. Hume Cronyn, general manager, Huron and Erie Mortgage Corporation, London, Ont., and second vice-president, Mr. E. M. Saunders, treasurer, Canada Life Assurance Company, Toronto. The new organization has been established and will work in co-operation with the present provincial loan associations, and it is hoped that the full membership of all these smaller bodies will be represented in the new federal association.

For some time past, the need of such an organization has been felt. When it has been desirable to present the views of the lending companies to the federal or provincial authorities, there has been no Dominion-wide organized representation to do this. Concessions desired in legislation affecting borrower and lender may now be sought by the new association.

Interest Rates not Affected.

Discussing with *The Monetary Times* the objects of the association, one of its officers said: "It is scarcely necessary to say that this is not a combination which will have anything to do with the raising of interest rates to borrowers. Nor will the association interfere in any way in the present competition between the various companies for business. Our association will seek to make still more substantial the mutual confidence existing between lending corporations and the borrowing public, a confidence of which we had such a pleasing demonstration at the recent conference of mortgage companies and western borrowers. The association hopes to consolidate the interests of the lending companies which have been represented for many years past in provincial bodies."

Objects of the Association.

These points are clearly set forth in the objects of the association as noted in its by-laws and constitution which were adopted this week. Some of the principal objects are described as follows:—

The securing of united action of the members of the association in connection with proposed or existing legislation so as to obtain the best possible results in the interest of both borrower and lender, and in this connection to work in conjunction with other associations having similar objects.

The co-operating with Dominion and provincial governments in connection with legislation affecting loans and investments.

The discussion of subjects of business importance and of common interest which may arise from time to time.

In addition to the above-recited objects, the following questions may be discussed and action taken thereon: Any proposed or existing legislation in any way affecting: (a) Mortgages or charges and liens on real or personal estate; (b) municipal bonds, debentures and securities; (c) the taxation of incorporated companies engaged in the loaning of money and purchasing securities by way of investment; (d) the taxation of real estate and buildings in connection therewith, also of capital or income assets of incorporated companies; (e) the inviolability of private contracts.

Will Help Borrowers.

The following clause in the recital of the objects of the new association is of especial interest to borrowers:—

"Provided always and it is hereby declared that this association is not formed for the purpose of affecting legislation regarding rates of interest nor to enable the members thereof

to form or effect combines opposed to the best interest of the borrowing public, nor shall the association at any time discuss or take action upon questions which would in any way interfere with free and untrammelled competition among its members in the business of lending money or purchasing securities by way of investment and the terms and rates of interest in connection therewith."

A delegation of the association will visit Ottawa next week to place a copy of the by-laws and constitution in the hands of the federal authorities and to offer the government the services of the association's executive and organization in every possible way. In the matter of future immigration policy, for instance, the association could be of distinct service to the government.

There is every good wish for the success of the new association which already has before it many problems in connection with federal and provincial legislation harmful to Canadian lenders and borrowers both.

WOULD CANCEL HIS LIFE INSURANCE

If Companies Asked for Legislation to Defer Policy Loan Payments, Says Merchant

The following letter has been received by *The Monetary Times* from a prominent Canadian merchant. His views of the policy loan question will prove of interest to the insurance companies, of which he is a substantial patron:—

Editor, *Monetary Times*:

Sir,—I notice in the recent issues of *The Monetary Times* the discussions regarding loans on life insurance policies, and the suggestion that the companies ask for legislation to defer loans that are requested on policies. I think it would be just about on a par with the banks asking for legislation which would enable them to refuse payment of deposits that were entrusted to them under the condition that they would be subject to cheque.

Policy Loan Inducement.

One of the inducements held out to me when I took out my policies was that these policies each year had a cash surrender value and a borrowing power, and this is part and parcel of the bargain I made with the companies. Would not an attempt to get any legislation to alter this be a breach of faith with the insured? Do you think I would have any confidence in a company that would break its written bargain with me, or that would apply to the legislature to enable them to do so? I have insured for a very considerable amount, and it has been a very great satisfaction to me for years to know that I have in my life insurance policies a borrowing power of over \$100,000 which I can tap at any time should the necessity arise.

If there was any attempt made by the insurance companies through the legislature to get out of this bargain I would have absolutely no confidence in the companies, and I would make a demand at once for the full amount that they would be compelled to loan me, or I would take a cash surrender of the whole of them and throw them up, because I would believe the next thing they were going to do was to go to the legislature for power to enable them to refuse payment on the face of the policy on my death. I think this is the way it would affect everyone.

Should Issue New Policies.

If the insurance companies do not like their policyholders borrowing, let them commence by issuing new policies which are not subject to this condition. But to attempt to get legislation to enable them to go back on a bargain already made would be nothing less than an outrage, and I cannot believe that any body of law-makers would give them any such privilege.

Yours, etc.,

Merchant.

Toronto, September 13th, 1916.

Economy is necessary to win the war.

Buy a war bond and bring peace nearer.

The Bank of British North America

INCORPORATED BY ROYAL CHARTER.

The Court of Directors hereby give notice that an interim dividend, for the half year ended 31st May last, of 30 shillings per share, less Income Tax, being at the rate of 6 per cent. per annum, will be paid on the 6th day of October next to the Proprietors of Shares registered in the Dominion of Canada.

The Dividend will be payable at the rate of exchange current on the 6th day of October next to be fixed by the Managers.

No transfer can be made between the 22nd inst. inclusive and the 5th prox. inclusive, as the books must be closed during that period.

By order of the Court,

JACKSON DODDS,
Secretary.

No. 5 Gracechurch Street,
London, E.C.,
5th September, 1916.

The Molsons Bank

144th DIVIDEND.

The Shareholders of The Molsons Bank are hereby notified that a Dividend of TWO AND THREE-QUARTERS PER CENT. (being at the rate of eleven per cent. per annum) upon the capital stock has been declared for the current quarter, and that the same will be payable at the office of the Bank, in Montreal, and at the Branches, on and after the SECOND DAY OF OCTOBER NEXT, to Shareholders of record on 15th September, 1916.

THE ANNUAL GENERAL MEETING

of the Shareholders of the Bank will be held at its banking house, in this City on MONDAY, the 6th of NOVEMBER NEXT, at three o'clock in the afternoon.

By order of the Board.

EDWARD C. PRATT,
General Manager.

Montreal, 18th August, 1916.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Price Brothers, Limited.—An initial dividend of 1½ per cent. on Price Brothers' common stock has been declared by the directors. Payment will be made September 30 to shareholders of record September 12.

Lake of the Woods Milling Company.—The company has paid off \$750,000 6 per cent. bonds of the Keewatin Flour Mills Company, which it guaranteed under the terms of the agreement by which the Keewatin Company was absorbed by the Lake of the Woods organization. The bonds matured September 1st, and were paid off at par and interest.

Canadian Pacific Railway.—Messrs. Hallgarten and Company, and Kean, Taylor and Company, New York City, are offering \$2,500,000 Canadian Pacific Railway 10-year 6 per cent. notes at 101½ and interest, to yield about 5.73 per cent. Notes are direct obligations of maker, and constitute company's only funded debt, except \$11,280,000 equipment notes and \$3,650,000 in bonds of Algoma branch.

Western Canada Power Company.—The company's plan of financial reorganization is now an assured success as substantially none of the 6 per cent. three-year notes withdrawn from deposit with the reorganization committee. As a result the plan became effective September 1st. Under the plan the security of the holders of the bonds is unchanged, while the holders of the notes paid \$800,000 new capital into the company.

Nipissing Mines Company.—The company last month mined ore of an estimated value of \$203,898, and shipped bullion from Nipissing and Customs ore of an estimated net value of \$226,341, which compares as follows:—

	Production.	Shipments.
January	\$169,802	\$148,730
February	171,850	309,320
March	169,999	322,176
April	167,446	447,546
May	291,898	420,892
June	294,669	193,403
July	288,577	280,188
August	203,898	226,341

Consolidated Mining and Smelting Company of Canada, Limited.—The following is a statement of ore receipts at Trail Smelter from August 22nd, 1916, to August 31st, 1916, and from October 1st, 1915, to date, in tons:—
Company's Mines—

Centre Star	5,016	167,205
Le Roi	3,808	126,904
Sullivan	3,603	66,670
St. Eugene	96	702
No. One		3,787
Silver King		15
Emma	314	1,341
Other Mines	2,297	77,433
Total	15,134	444,057

Canadian Vickers, Limited.—The profits of Canadian Vickers, Limited (after deducting £227,097 for interest and sinking funds on its debenture stocks, of which in the year 1914 only £106,911 was applied in payment of interest and the balance in repayment of principal) and the dividends paid on its ordinary shares during the four years preceding the outbreak of war were as follows:—

	Profit.	Dividend.
1911	£ 641,686	10 p.c.
1912	872,033	10 p.c.
1913	911,996	12½ p.c.
1914	1,019,035	12½ p.c.

The accounts for 1915 have not yet been made up, but a dividend of 12½ per cent. has been paid.

The lists of the recent bond issue closed on August 21st and the loan of \$1,000,000 was oversubscribed, applicants for £300 or less being allotted in full, others getting 80 per cent.

Quebec Railway, Light and Power Company.—The gross earnings of the company for the year ended June 30th last, according to the annual report just issued, totalled \$1,967,710, compared with \$1,784,074 for the previous year, an increase of \$183,636. Operating and maintenance expenses were \$1,029,750, compared with \$924,817, an increase of \$104,933, or 11.34 per cent., leaving net earnings of \$701,981, against \$623,279 a year ago, an increase of \$78,702 or 12.62 per cent. The net surplus for the year after deducting fixed charges and taxes of all kinds amounted to \$215,043, compared with \$119,775, an increase of \$95,268 or 79.83 per cent. The total surplus is now standing at \$560,000, which is equal to about five per cent. of the common stock.

In the annual report President Sir Rodolphe Forget states that the company during the year paid off all interest due on Quebec Railway bonds to date calling for a distribution of \$230,000. Recent strength in the stock is attributed more to the fact that the white elephant in the shape of the Saguenay branch has been taken off the hands of the company, which henceforth will be operated as a public utility and tramway concern.

Hollinger Consolidated Gold Mines, Limited.—The company's report for the four weeks ended August 11th, 1916, shows gross profits for the period of \$220,357. The following is a statement of assets, liabilities and expenses for the period under review:—

Assets.

Capital assets	\$23,592,270.98
Current assets	687,153.94
Gold assets (estimated)	399,919.98

Deficit

Dividends paid up to August 11th. \$1,200,000.00	
Amount due shareholders of Acme,	
Millerton and C.M. & F. Co..	720,000.00

\$1,920,000.00

Profit from operations, January	
1st, 1916, to August 11th....	1,697,423.01
	222,576.99

\$24,901,921.89

Liabilities.

Capital stock issued	\$24,000,000.00
Current liabilities	177,921.89
Unpaid patriotic contribution	4,000.00
Amount due shareholders of Acme, Millerton	
& C.M. & F. Company.....	720,000.00

\$24,901,921.89

Expenditures for plant during the four weeks ending August 11th, 1916, were:—Mill extension, \$15,340.04; central shaft plant, \$14,230.32; transformer station, \$10,083.45; machine shop, \$2,108.32; mine equipment, \$1,536.28; administration building, \$654.22; miscellaneous, \$736.61; total, \$44,689.24.

Saving is accomplished only by an effort.

The small investor in Canada properly has the greatest possible faith in his country's strength in citizenship and resources and in his country's credit.

Messrs. Lavigne and Donohue have been elected directors of the Quebec Railway Light and Power Company in place of Messrs. Berthiaume, Bastien, and Ecrement. The third director will be named by the board. Sir Rodolph Lemieux was re-elected president and Mr. Lorne C. Webster vice-president.

Mr. D. W. Alexander, manager of the London Guarantee and Accident Company, Limited, Toronto, died this week. Mr. Alexander had been known in Toronto as a leather merchant for a number of years. After retiring a few years ago, he became head of the London Guarantee and Accident Company, which he had managed very successfully. He was born in Thurso, Caithness, Scotland, and came to Canada 18 years ago, and settled in Toronto, and has lived in Toronto since. Mr. Alexander was associated with many other business interests throughout the Dominion.

EXACT YIELD TO INVESTOR

On Instalment Plan Bonds Pay 5.2966 Per Cent.;
Bought Outright, 5.2883 Per Cent.

According to carefully figured schedules of Mulholland, Bird and Graham, government and municipal bond dealers, Toronto, the exact yield to the investor of the war loan bond, if purchased on the instalment plan, is 5.2966 per cent. If the bond is paid for outright on October 16th, the exact yield is 5.2883 per cent.

In making the calculations, interest on the investor's 10 per cent. deposit has been allowed for the eight days between September 23rd, the date the subscription lists close, and October 1st. The question of 3 per cent. bank interest has not been considered. Here are the figures in detail, \$10,000 of the bonds being taken as a basis of calculation.

Schedule of Capital and Income for \$10,000 of the New Dominion War Loan If Purchased on Instalment Plan.
Exact Yield, 5.2966 per Cent.

ATTRACTIVE WAR BOND OFFERING

**Full Payment May Be Made October 16th: in that Event
\$1,000 Bond Will Cost \$972**

The prospectus of the Dominion's second war loan has been carefully prepared and leaves no loophole for misunderstanding. The issue is one of \$100,000,000 of 5 per cent. bonds, maturing on October 1st, 1931. The interest of 5 per cent. per annum will be paid half-yearly, on April 1st and October 1st. Both principal and interest are payable in gold, an innovation in the present offering as compared with the first war loan, which was payable in currency. Payment of principal and interest in gold makes the loan more attractive from the viewpoint of the United States investor, who is likely to play an important role in the ultimate absorption of the loan.

Ten per cent. of the subscription is payable on application; 30 per cent. on October 16th; 30 per cent. on November 15th, and 27½ per cent. on December 15th. The instalments are therefore spread over approximately three months. In the previous loan the instalments were spread over a little more than five months, being payable 10 per cent. on application; 7½ per cent. on January 3rd, 1916; 20 per cent. on February 1st; 20 per cent. on March 1st; 20 per cent. on April 1st; and 20 per cent. on May 1st.

A full half-year's interest will be paid on April 1st, 1917. The proceeds of the loan will be used for war purposes only. The subscription lists will close on or before September 23rd.

Yield to Investor.

At the issue price 97½ the actual cost of each \$1,000 bond is \$975. The investor who pays each instalment exactly on each payment date mentioned above, really reduces the price as at October 1st, 1916, to 97.04 and accrued interest to yield almost 5.30 per cent. (The exact yield rate is 5.29 per cent.)

The investor who discounts his instalments and makes all his outstanding payments on October 16th, a privilege he has, will have to pay \$872.22 balance on that date for each \$1,000 bond. The exact yield rate in this case will be 5.26 per cent.

There will be always a good market for these bonds. They are a first-class security, backed by large annual production and vast natural resources in the course of development.

Application will be made for the listing of the issue on the Montreal and Toronto stock exchanges. This doubly insures a ready re-sale of the bonds if at any time desired.

The prospectus states that the issue will be exempt from taxes—including any income tax—imposed in pursuance of Dominion legislation.

Coupon and Registered.

Bonds with coupons are being issued in denominations of \$100, \$500 and \$1,000. All the investor has to do is to detach each half-year, one of the interest coupons, cashing it at his bank. Fully registered bonds without coupons are being issued in denominations of \$1,000, \$5,000, or any authorized multiple of \$5,000. These bonds are registered in the government records as being held in the name of a certain investor. Cheques for the interest on these bonds are sent to the holder by mail. Holders of either of the two classes of bonds may convert into the other class of bonds, at any time, on application in writing to the minister of finance at Ottawa. The nominal fee for this service for each new bond issued is 25 cents.

WILL SHOW THE HUNS WHAT WE MEAN

Discussing the war loan in its monthly commercial letter, the Canadian Bank of Commerce says: "Apart from their attractiveness as an investment, these bonds offer to the public the privilege of sharing the burden of Empire in a practical manner. It is only by sacrifice and thrift that we can place at home the loans which from time to time will be made by our government. To share in subscribing for them is as great a privilege as it is an opportunity for sound investment. No more effective warning can be given to our enemy than the ready absorption of the loans made in the outer parts of the Empire, for this is clear evidence that our people are prepared to make the necessary sacrifices to carry on the war for any length of time or on any scale necessary to ensure a decisive victory."

CANADIAN WEST INDIES CUSTOMS UNION

**Mr. T. B. Macaulay Outlines a Scheme for Closer Trade
Relations**

Mr. T. B. Macaulay, F.I.A., F.A.S., president of the Sun Life Assurance Company of Canada, and president of the Canadian West Indian League, had an interesting article in a recent issue of The Canada West India Magazine, on the unification of the Empire. Therein he suggests the establishment of a Canadian West Indian customs union, which would give to the Islands every trade advantage which they would obtain by actual confederation with the Dominion, and which yet would not introduce elements of political danger.

"I mean," continues Mr. Macaulay, "a customs arrangement by which tariff barriers would be completely abolished between Canada and the Islands, and a tariff on a basis to be mutually agreed on applied to all imports from outside countries, with of course full Imperial preferences as already allowed. Would not that give every commercial advantage which would arise from confederation? Would it not avoid the political difficulties of confederating peoples whose interests are not identical? Would it not be simpler, arouse less opposition, and be easier of accomplishment than actual confederation?"

Problem Not Insoluble.

"It is true that under such a customs union the problem would arise of raising sufficient revenue to provide for the local requirements of the Island legislatures, but this problem is by no means insoluble. It had to be faced when Canada became a Dominion, for by confederating the various provinces relinquished their power to impose import duties. The solution adopted was that the Dominion should take over all expenditures connected with defence, navigation, collection of customs revenues, the post office, and certain other departments thus greatly reducing the amounts for which the provinces were formerly responsible, and that in addition the Dominion should pay to each province from the customs duties collected, an annual subsidy, the amount thereof being definitely settled as part of the basis of confederation. With a mere customs union different arrangements would be necessary. There would be no central or federal government to assume any part of the present expenses of the Islands. The problem would be that of readjusting taxes, or finding some new source of revenue, to offset the reduction in income which would result from the agreement to admit free of duty goods from Canada which at present are subject to duty. This is clearly a mere matter of negotiation.

Collect Customs Dues.

"I would suggest for consideration, however, whether the simplest plan would not be to allow the Islands (unlike the Canadian provinces) to continue to collect for their own use the customs dues (according to the tariff agreed on) on imports from the United States and other outside countries, and if further adjustments were needed, they could take the form of reimbursements for loss of revenue by the Canadian government. The Islands would of course retain their revenues from excise, post office and all other forms of taxation except customs.

"The commercial benefits would be shared by both countries, but the loss of revenue to the Dominion from admitting West Indian products free would probably not be as serious as the corresponding loss to the Islands from admitting Canadian goods free. If this be so, it would be but reasonable for the Canadian government to make such financial adjustments as might be agreed on as fair, and it could certainly afford to do this in order to make these valuable Island markets part of the Dominion commercially, though not politically. Not merely must the probable losses of revenue be considered and equalized, but the benefits to be derived must in fairness also be made as nearly proportionate as possible. Subsidies for the necessary steamship service should naturally be borne chiefly by the party which would share most largely in the advantages. Other points should also in equity to be taken into account. I am far from dogmatizing on the details of such a scheme. The idea, however, appeals to me very strongly; for I feel certain that it can be worked out in such a way as to bring enormous advantages and corresponding prosperity to both Canada and the West Indies."

Mr. Macaulay's article has been reprinted in pamphlet form and is well worthy of perusal.

The Ontario Loan and Debenture Co.

Dividend No. 117

Notice is hereby given that a QUARTERLY DIVIDEND of 2½ PER CENT. for the three months ending 30th September, 1916, (BEING AT THE RATE OF 9 PER CENT. PER ANNUM) has been declared on the paid up capital stock of this Company, and will be payable at the Company's Office, London, Ontario, on and after the 2nd October next, to Shareholders of record of 15th September.

By order of the Board.

A. M. SMART,
Manager

London, Canada, August 28th, 1916.

BUYING BONDS BY INSTALMENTS

Loan is Payable During Next Three Months—Last Payment Due December 15th

One of the notable differences in comparing the present with the previous war loan, is the matter of instalment dates. These are shown in the following table:—

Present loan.		Previous loan.	
Per cent. of loan.	Payable on	Per cent. of loan.	Payable on
10	Application	10	Application
30	Oct. 16, 1916	7½	Jan. 3, 1916
30	Nov. 15, 1916	20	Feb. 1, 1916
27½	Dec. 15, 1916	20	Mar. 1, 1916
		20	Apr. 1, 1916
		20	May 1, 1916
97½		97½	

Question of Crop Finance.

In the former loan, the instalments, it will be noticed, were payable over a period of exceeding five months. The present loan is payable during a period of only a few days more than three months. The privilege of paying instalments in full under discount at the rate of 4 per cent. per annum on the last occasion, was not available until about six weeks after the subscription list had been opened. In this case, that privilege is available within practically a month of the opening of the subscription lists.

As a result of conferences of the government and the bankers last year, it was thought necessary to defer the calls on the war loan until the financing of the crop movement had been completed. The initial payment on the loan, therefore, became due at the end of November, the larger instalments not beginning until February 1st. In the present loan the large instalments fall due in October, November and December, the most important part of the crop movement period.

Reasons for the Difference.

The difference in this matter in the two loans has probably been governed by the fact that financial conditions are easier than a year ago, that the smaller western crop entails less financing than in 1915, and that the monthly expenditure for war purposes is considerably heavier.

As nearly as can be estimated, our present war expenditure in Canada and in Britain, including the maintenance

of troops actually at the front, is at the rate of about \$30,000,000 a month, or \$350,000,000 a year. This averages about \$1,000,000 a day, and is equivalent to about \$1,000 per annum per head, as the total enlistment is about 350,000 men. Of these there are now in Canada about 140,000.

HOW THE FIRST LOAN WAS SUBSCRIBED

The number of subscribers to the first war loan of \$100,000,000 issued in November last was 24,862.

LAURENTIDE BOND OFFERING

An offering of Laurentide Power Company first mortgage 5 per cent. sinking gold bonds is being made in the United States by Messrs. Stone and Webster. This issue was forecasted in *The Monetary Times* some weeks ago. Over two-thirds of the issue of \$7,500,000 having been sold or withdrawn, the balance is offered at 90 and accrued interest to yield about 5.70 per cent.

The capitalization of the company is as follows:—

	Authorized.	Outstanding.
First mortgage 5 per cent. bonds	\$ 7,500,000	\$ 7,500,000
Capital stock	10,500,000	10,500,000

In making this issue Messrs. Stone and Webster call particular attention to the following points, described in their circular respecting these bonds. 1. Bonded debt of \$60 per horse-power is unusually low. The mortgage is closed. 2. Bond interest charges are assured by sale of power now being delivered on long-term contracts. 3. Earnings will be largely increased by the sale of additional power. 4. Highly diversified and increasing market for power, including Montreal and Quebec.

The company is being operated under the experienced management of the Shawinigan Water and Power Company.

Help finance the Empire's fight for right.

The bond houses, by means of their advertising campaign, have done a great deal to help make the war loan a success.

HOW THE FIRST AND SECOND WAR LOANS COMPARE

	PRESENT LOAN	PREVIOUS LOAN
Amount of loan.....	\$100,000,000	\$50,000,000 (later increased to \$100,000,000)
Five per cent. bonds maturing in.....	15 years	10

DOMINION'S FINANCIAL RETURNS

Revenue and Expenditure Statement for the Past Fiscal Year

The revenue of the Dominion for the fiscal year ended March 31st last, provided for the government's expenditures, including capital outlay on public works, railways, canals and railway subsidies; provided interest due on account of war loans; and gave \$1,830,000 further to apply on account of war purposes. This is shown in the revised statement of revenue just issued. The total revenue for the fiscal year was \$172,147,838, of which \$121,077,000 was collected through the customs and excise duties, the balance being payments for services rendered in connection with the post office, public works and railways, and miscellaneous.

The expenditures are as follow:—

Ordinary account	\$130,350,726
War	166,197,755
Public works and railways	38,566,950
Railway subsidies	1,400,171
	\$336,515,602

The total expenditure for the twelve months exceeded the revenue by \$164,367,000. The outlay on war services was \$166,197,755.

Comparing the figures for the five months ended August 31st, of the current fiscal year, with those of the previous fiscal year, the results are as follow:—

	1915-16.	1916-17.
Customs	\$35,520,184	\$53,029,771
Excise	8,417,074	9,770,129
Post office	6,599,779	6,950,000
Public works, etc.	6,063,863	10,442,916
Miscellaneous	3,488,293	3,992,990
	\$60,089,196	\$84,185,807

The revenue for the current year to date was \$24,096,000 greater than in the similar five months of 1915-16. The items representing payments for services rendered, such as those representing taxation, show such substantial gains that they may be regarded as evidence that, despite the adverse effects of the war, the volume of business being done is much greater than that transacted twelve months ago.

The expenditures for the same two periods of five months were as follow:—

	1915-16.	1916-17.
Ordinary services	\$38,870,712	\$38,906,257
Public works, etc.	13,330,670	8,015,701
Railway subsidies	567,989	363,478
	\$52,769,371	\$47,285,436

The outlay on the services noted during the current year was \$5,484,000 less than in the same period of 1915, and was \$36,900,000 less than the revenue. The outlay on the war was \$76,310,719, so that the deficit between regular income and total outlay was about \$40,000,000.

During the current fiscal year, therefore, the revenue is providing for all expenditures and about \$7,000,000 a month to meet war outlays that are now in excess of \$15,000,000 a month.

EXPECTS LOYAL AND GENEROUS RESPONSE

Sir Thomas White, minister of finance, has issued the following statement in regard to the war loan:—

"The second Canadian war loan is now being offered for public subscription. While the government is aware that Canadian patriotic sentiment alone could be depended upon to ensure success, strict regard has been had, in fixing the terms of the issue, to prevailing financial conditions with the object of making the offering attractive from the purely investment standpoint. The government is confident that this, the second loan for the purpose of raising funds for Canada's war expenditures will meet with the same loyal and generous response which made the first war loan so strikingly successful."

COST OF LIVING MUCH HIGHER

Rises in Prices During the War—Interesting Report of Labor Department

The great rise in prices during the war, which became very steep after the middle of 1915, is shown in the report just issued by the department of labor, entitled "Wholesale Prices in Canada, 1915," which also contains information regarding retail prices and prices in other countries.

In Canada the wholesale prices of 272 commodities averaged over 8 per cent. higher than in 1914 and 9 per cent. higher than in 1913, while the retail prices of some 30 foods were 2 per cent. higher than in 1914 and 7 per cent. higher than in 1913, allowing for the importance of each article in family consumption. By December, 1915, however, the steep rise had brought the index number of wholesale prices to a point 20 per cent. higher than in July, 1914, while retail food prices had risen 10 per cent. during the same period.

Weekly Family Budget.

The index number of wholesale prices stood at 148.0 for the year as compared with 136.1 for 1914, and 135.5 for 1913, but by December, 1915, had reached 161.1 as compared with 134.6 for July, 1914. A weekly family budget of food averaged \$7.86 for 1915, \$7.73 for 1914 and \$7.33 for 1913, but for December, 1915, stood at \$8.13 as compared with \$7.42 in July, 1914.

It may be noted that the rise in prices has continued during the current year as shown from month to month in the Labor Gazette. The index number of wholesale prices reached 180.9 for May but declined slightly thereafter, metals, chemicals and certain materials being lower. In retail food prices the weekly budget reached \$8.63 for August, there being a decline only in July when midsummer conditions lowered prices very slightly.

In Other Countries.

In other countries retail food prices also rose steeply, the rise from the beginning of the war to the end of 1915 being calculated as high as 113 per cent. for Austria, 83 per cent. for Germany, over 30 per cent. in the Netherlands, Norway and Italy, and 44 per cent. in Great Britain. In Australia the rise was nearly 30 per cent. as a result of drought, while in New Zealand it was only 16 per cent. In Japan prices were lower than in 1914 and 1913.

The results of the great rises were considerable increases in the cost of living, particularly in the expenditure on foods. In clothing, house furnishings, etc., stocks in the hands of manufacturers and dealers were often sufficient to prevent great rises for some time even a year or more, but in food increases were immediately felt. At the beginning of 1915 staple foods were substantially higher than before the war though in many cases somewhat lower than the high levels reached during the few weeks of uncertainty and speculation which followed its outbreak."

Increased Industry and Trade.

The report shows that the rising prices were accompanied by increased activity in industry and trade. "Not only did the needs for the prosecution of the war make necessary increased production in many lines and new production in goods never before attempted or thought of, but production was renewed in many lines and in many districts, abandoned previously owing to the poor returns normally obtainable. These changes again had great influence in stimulating other branches of industry and trade, causing higher prices. This reaction was soon experienced in many lines, at first depressed by war conditions. In Canada, wheat, oats, flour, cheese, butter, packed meats, pulp and paper first felt the stimulation of increased demand due to war conditions, but these were soon followed by wool, fish, leather, zinc, copper, chemicals. New Brunswick lumber, linseed oil, and later iron and steel as well as most metals and metal products. In the latter part of 1915 the upward movement was particularly strong in metals, chemicals and wool, while in jute, silk, rubber, etc., among imported materials the rise was marked."

The banks will regard the Dominion war bonds as excellent collateral for loans to 80 or 90 per cent. of their market value.

CONVERSION PRIVILEGE IN OLD LOAN

Very Few of the 1915 Bonds are Likely to be Converted

There is no conversion privilege in the present war loan. It will be recalled that in the case of the issue of November, 1915, the following privilege was given:—

"In the event of future issues (other than issues made abroad) being made by the government, for the purpose of carrying on the war, bonds of this issue will be accepted at the issue price, 97½ plus accrued interest, as the equivalent of cash for the purpose of subscriptions to such issues."

To Help Success of Loan.

That privilege is not contained in the current prospectus. Its omission has been construed by some as an indication of the government's belief that further war loans will not be issued. This conclusion, *The Monetary Times* believes, is incorrect. Even in the event of early peace, it is highly probable that another Canadian war loan will be necessary next year. The conversion privilege was probably attached to the first war loan to help place beyond doubt the success of the issue. Had the Dominion government foreseen the possibility of the remarkable over-subscription of the first loan—something which no one could foresee—the conversion privilege would not likely have been attached to the loan.

The total allotments of bonds of the present issue will be limited to \$100,000,000, exclusive of the amount, if any, paid for by the surrender of bonds as the equivalent of cash under the terms of the war loan prospectus of November 22nd, 1915. The Dominion government, therefore, will obtain \$100,000,000 of new money by the full subscription of the present loan.

Heavy Conversion Unlikely.

It is not likely that the conversion of old bonds will attain a very large volume. At the issue price of the new loan the conversion privilege is not particularly attractive. According to the ruling of the finance department, it is understood that a subscriber to the present loan who tenders bonds representing the previous loan will be credited with \$97.50 for a \$100 bond, and \$1.41 for interest accrued from the date of the last interest payment to September 12th. The balance of \$1.09 will be payable in cash.

The price the government will allow for the old bonds in subscribing to the new bonds, namely, 97.50 and interest, figures at the yield basis of 5.34 per cent. (as at June 1st, 1916). As the yield rate on the present issue is 5.26 per cent. (if all instalments are paid on October 16th), or 5.29 per cent. (if instalments are paid on respective due dates), unless the investor is particularly desirous of obtaining the longer term bonds, it will not pay him to convert his old bonds, at least not from the standpoint of income return.

No Commission Paid.

No commission to bankers or brokers is being allowed in respect of the amount of any allotment of the new bonds paid for by the surrender of the old bonds.

The bonds of the first war loan will still be accepted by the government at 97½ as equivalent of cash for future war loan issues, but, as stated above, the present bonds are not convertible in that way.

BUSINESS IN THE PEACE RIVER COUNTRY

The Edmonton board of trade is now on its fourth annual business men's excursion to the Peace River country. The itinerary calls for a train mileage of 911 miles and approximately 200 miles by automobile. The party consists of the heads of Edmonton's important business concerns, and are going with serious business purpose in view. The purpose of the expedition is to afford the men controlling business interests in Edmonton an opportunity to observe at first hand the resources and development of Edmonton's great northern hinterland, the prospects and opportunities for expansion of business there, and the trip is largely under the direction of Mr. F. T. Fisher, secretary of Edmonton's board of trade.

BONDHOLDERS PAY NO TAX

War Loan is Exempt from Dominion Taxes, Present and Future

As in the case of the previous war loan, the present issue will be exempt from taxes, including any income tax imposed in pursuance of legislation enacted by the Dominion government. There is no immediate likelihood of an income tax in Canada. The impression prevails in many quarters, however, that at the expiration of the business profits war tax act in three years legislation may be introduced with a view to instituting a general tax on incomes. In that event, the income derived from holders of Canada's war bonds will not be taxable by the Dominion.

Government Has Considered Tax.

It is known that the government has considered the question of an income tax upon individuals. In February, 1915, Sir Thomas White, finance minister, stated that it appeared to the government that such a tax was not expedient, "at all events for the present." In order to bring into force an income tax the government would be obliged to create machinery for assessment, revision, and collection. This would involve a heavy expense as compared with the amount which would be realized. Taking the income tax of the United States as a basis, Canada could hardly expect to derive more than \$2,000,000 from a similar tax, and from that would have to be deducted the expenses of its administration.

Some Objections to Tax.

Other objections mentioned by the finance minister at that time were the facts that the several provinces of Canada were also likely to be obliged to resort to measures for raising additional revenue; that a long period must elapse before a new income tax becomes productive; that while in Britain the tax is the chief source of revenue to the government and taxable incomes are derived largely from investments the position in Canada is different; and, finally, that in certain Canadian provinces income is subject to taxation by municipalities, and in two instances by the provinces themselves.

The exemption feature in the present loan, however, may prove to be a somewhat substantial attraction in the future.

CANADA AND EXPORT TRADE

For several reasons, the general export trade of Canadian manufacturers is much restricted at present. There is a large and increasing list of articles, the importation of which into the United Kingdom is prohibited. Then, too, it must be remembered that several hundreds of the largest Canadian firms are working day and night exclusively on munition orders. Other factories are experiencing great difficulty in purchasing essential raw materials. Others are booked up for months to come. These conditions are abnormal, and no inference as to Canada's ability to do a large export trade can be drawn from them. In the present circumstances it is most gratifying to learn that in spite of adverse conditions a considerable and varied export trade is being carried on, especially to Australia and New Zealand. Since the formation of the Export Association Canada's trade with these Dominions has grown considerably. The Export Association's Montreal office recently prepared a list of no fewer than 150 lines of goods which Canada had supplied to Australia and New Zealand. These included steel goods, machinery, agricultural implements, hosiery, codfish, canned goods, and hardware of all kinds. The association has every reason to be pleased with such a result of its work in these times of difficulty.

Messrs. Dale and Company, Limited, of Montreal, fire and marine underwriters, have opened a branch office in Winnipeg at 905 Union Trust Building.

The new war loan will probably be listed on the Montreal and Toronto stock exchanges without a charge being made by the exchanges for listing the loan.

WAR BONDS AND HIGHER PRICES

Possibility of Appreciation When Normal Times Return

The possibility of appreciation in the price of the present war bonds is one of the attractions of the issue. The chart printed in the war loan bulletin of *The Monetary Times*, issued this week, shows clearly the comparative cheapness of Canadian government issues made at present levels and the possibilities of appreciation in value when the world's investment markets become normal again.

Reduces Cost of Loan.

The present loan is offered at 97.50, but as the government will pay a full six months' interest on April 1st, 1917, and as payment can be made in instalments, there is a profit in interest of 0.60 per cent. to be considered, making the actual cost of the bond 96.90 per cent., and yielding 5.30 per cent.

As the present bonds are for a period of 15-years, the price could rise several points higher than would be possible in case of a 10-year maturity in the event of a season of cheap money rates being experienced within two or three years.

If Yield Were $4\frac{1}{2}$ Per Cent.

If the current loan had been issued to yield $4\frac{1}{2}$ per cent., the price would be 105.41, instead of 97.50. A 4 per cent. yield (the basis on which Dominion government bonds sold as recently as 1914) would mean a price of 111 for the present issue.

Assuming that within two years the rate at which the Dominion government can borrow falls to as low a level as a 4 per cent. basis, the 10-year bonds might rise to 106 or thereabouts, but under the same conditions the 15-year bonds could go to 109 or 110. There is also the possibility, often discussed, of a season of easy money being encountered after the war, in which case a still higher quotation for the bonds now being issued would be recorded.

While the investor will readily recognize the high-class security, the excellent interest return and the saleability of the present war bonds, the liberality of the issue price will probably not be fully realized until the return of normal times.

FARM MORTGAGES

An instructive volume, devoted entirely to farm finance as it applies to the farms and farmers of Canada and the United States, has just been issued. The extent and importance of the facilities supplied by institutions for financing farmers' long-term requirements are shown, as well as the peculiar conditions met in furnishing loans. Mr. Kingman Nott Robins, the author, is well known in Canada, and has placed heavy investments in the western provinces. He writes with a complete knowledge of his subject.

In his introduction, Mr. Robins states that there are estimated to be \$3,500,000,000 of outstanding investments in long-term farm credits at the present time in the United States and proportionately as much in Canada. Among the chapters are those which deal with rural credits; the negotiation and marketing of farm mortgages; record of farm mortgages as an investment; qualities of the farm mortgage; and farm mortgage fields and their qualifications. The appendix of 28 pages gives much valuable data, as well as forms used in the mortgage transactions.

The book should find a place in all financial libraries.

The Farm Mortgage Handbook. By Kingman Nott Robins. Price, \$1.25 net. Published by Doubleday, Page and Company, Garden City, New York, U.S.A.

The response to this war loan will be another object lesson to the world of Canada's financial strength and determination in the war.

"The government confidently appeals to the Canadian people to support this loan, and thus further demonstrate the strength, unity and solidarity of the Empire, and our invincible determination to prosecute the war to a victorious conclusion."—Hon. W. T. White, finance minister.

EXCELLENT BONDS AT LOW FIGURES

How the Investor May Obtain High Income and Help His Country

The investor who buys a \$1,000 war bond and takes advantage of the instalment payments outlined in the prospectus, gets his bond for \$975. His income will be 5.30 per cent. per annum. During the lifetime of the bond—namely, 15 years, he receives 5 per cent. per annum on the face value of the bond. The balance of interest, namely 0.30 per cent. is made up by payment to the bondholder, at maturity of the bond on October 1st, 1931, of \$1,000, the par value of the bond, for which the investor now pays only \$975.

Discounting Instalments.

The investor who pays his instalments in full on October 16th, 1916, under a discount of 4 per cent. per annum, as provided by the prospectus, gets a \$1,000 war bond for \$972.22. His income will be 5.26 per cent. per annum.

The yield to investors in the present loan is 5.30 per cent. as compared with 5.42 per cent. in the previous loan. The difference in yield is in keeping with the trend of the investment markets. At the same time, the fractional difference in the matter of income to the investor is counterbalanced by the speculative possibilities attaching to the longer term of the new bonds.

Compared with New York Loan.

The course of the Dominion loan of \$75,000,000 offered in New York this spring illustrates the change in the money markets. That issue was made in three maturities of \$25,000,000 each, the 5-year bonds being offered at 99.56, the 10-year bonds at 97.13, and the 15-year bonds at 94.94. The 15-year bonds not only proved the most popular in the original offering, but overtook the price of the other maturities in the market. For a considerable time they held well above par, touching a high record price of 102 $\frac{3}{4}$ on the New York Stock Exchange, against 101 $\frac{1}{4}$ for the 10-year bond, and 100 $\frac{1}{4}$ for the 5-year. Recently they have appeared to be affected by the probability that the Canadian issue now announced would be a 15-year maturity and have relapsed to about 99 $\frac{3}{4}$.

The Canadian investor is now offered virtually the same bond at the equivalent of a little less than 97, obviously, an attractive investment. In other words, the government is giving the Canadian investor the opportunity of purchasing each \$1,000 bond at \$26 less than the market value of a similar issue in the United States.

CANNED GOODS ORDER FOR CANADA

A special despatch to the Montreal Star states that \$3,000,000 worth of cured meats, hams and pork for the French army, to be delivered from November to March next, is the order just obtained by the Canadian packers, Pat Burns and Company, of Calgary, in competition with the largest Chicago firms. There is also a large chilled beef order for the same firm.

Although particulars cannot be disclosed yet, it is estimated that it will take 250,000 hogs to fill the first contract. According to a representative of the packers, there has been no difficulty about getting freight room.

There is keen competition at present in France between Canadian and United States firms in other lines, and they note the warning sounded that Americans are hard after French orders, an influential commission from the States having just arrived in France.

On its recent visit the Canadian Trade Commission did immense good; Americans found a fine display of various Dominion commodities when they arrived at the 'Trade Exhibition' now being held at Bordeaux.

Back our boys in the trenches.

Canada's war loan of \$100,000,000 will enable the Dominion to finance its share of the war for about 3 $\frac{1}{4}$ months.

SMALL INVESTORS AND WAR LOAN

Bonds as Collateral for Loan—Wall Street a Favorable Factor

In a recent article on the war loan, Mr. H. M. P. Eckardt, discusses the role of the small investor. Part of this article was reprinted in the war loan bulletin of *The Monetary Times*, mailed on Monday night. The article concludes with the following interesting observations:—

As it would not suit the needs of the government to have the loan proceeds come in too slowly, it is not perhaps to be expected that the instalments of the new loan will be spread over a period of more than five or six months; so the matter of providing suitable machinery for loans enabling subscribers to meet the various payments may well be discussed. With reference to the banks, insurance companies and several other classes of corporations, their circumstances are such as to enable them without inconvenience to provide loan facilities to employees. The banks have been generous to their staffs in the matter of making loans to enable employees to take full advantage of the opportunities connected with the educational courses recently inaugurated by Queen's University and the Shaw Correspondence School under the auspices of the Bankers' Association; and the same machinery would doubtless suffice for loans on war bonds.

Loans are Good Business.

It would militate in favor of the new loan if definite arrangements were made with the banks to make loans not only to their employees but to other subscribers large and small, on the security of the bonds. Large subscribers would probably have recourse to bank loans for the purpose of meeting their payments—the banks always stand ready to accommodate customers in good credit. But many people not accustomed to borrowing at banks are not aware that loans running a reasonable time on Dominion war bonds are esteemed good and desirable business. For this reason it might be well for the finance minister to make definite arrangements with the banks as to the percentage that would be loaned and rate of interest charged on loans secured by war bonds, and then announce the arrangement in the prospectus. According to the press reports the German government, in floating its successive loans, has made a strong point of the availability of the war bonds as collateral for loans; and the British government in case of its first war loan had an arrangement with the Bank of England whereby that institution stood ready to lend on the bonds at a fixed rate.

Loans Would be Safe.

The Germans are understood to have carried this feature of their loans to a dangerous extreme—they are said to have pyramided their credits to an outrageous extent; but there does not seem to be any good reason why we should not have recourse, within reasonable and well regulated proportions, to this method of inducing large subscriptions. So far as the banks are concerned, it would perhaps involve them in the trouble of making numerous petty loans, some of which would be inclined to drag along without material reductions, but no doubt the bankers would be willing to undertake the extra work and trouble for the sake of doing another public service. Their loans so secured would be quite safe, and if proper emphasis is laid on the necessity of paying off the individual loans through curtailment of unnecessary expenses, there should not be any serious or prolonged lock-up of bank funds.

It is to be noted that the recent revival of speculative activity in Wall Street is calculated to help our new war loan in several ways. The rise will enable a number of Canadian holders of American stocks to liquidate; and presumably a considerable part of the proceeds of sales will go into the war bonds. And if the improvement in value continues further, additional holdings of Americans can be liquidated without loss. There is reason to believe that a considerable amount of American stock owned by Canadians, has been awaiting sale—the holders being willing to let them off as soon as a respectable bulge in prices occurred.

It is much to be preferred that these foreign investments owned by our people be converted into Dominion bonds in this way without legislative compulsion. Various objections have been urged against a recent Ottawa proposal of forcing sales of these holdings by means of special taxation. To be effective such taxation would have to be very oppressive; and

an oppressive tax bearing principally on American stocks and bonds would have a tendency to introduce an element of discord into our financial relations with the United States. The growing financial intimacy with that country has been and is of incalculable benefit to the Dominion. If we took such action as that proposed, it is within the possibilities that the American politicians would be moved to retaliate in some way; and it is not in our interest that this question should come up at all. Then, comparatively speaking, our holdings of outside securities are not large; and probably the benefit derived through forcing liquidation in this way would not compensate for the injury and confusion caused. As mentioned above, the desired results may be obtained in large measure, through Wall Street rise.

TO HELP SELL THE BONDS

Copies of the war loan bulletin of *The Monetary Times*, issued on Monday night, can be obtained by bond houses and others in large or small quantities. Apply for information as to price to the business department, *The Monetary Times*, 62 Church Street, Toronto.

QUEBEC'S EXPENDITURES AND RECEIPTS

The receipts and expenditures of the province of Quebec for the fiscal year ended June 30th are as follow:—

Receipts.—Dominion of Canada, \$2,027,903; lands and forests, \$1,807,259; mines, fisheries and game, \$161,207; administration of justice, \$646,183; licenses, \$1,047,768; taxes on commercial corporations, \$1,034,564; duties on successions, \$1,375,803; tax on transfers of shares, \$75,185; motor vehicle law, \$247,081; maintenance of insane, \$229,945; reformatory and industrial schools, \$60,990; Quebec Official Gazette, \$51,311; legislation, \$31,470; registration stamps, \$190,507; interest on sinking fund, \$28,015; interest on loans and deposits, \$107,843; interest from municipalities under good roads act, \$137,402; railway subsidies tax, \$40,321; minor revenues, \$347,217, making ordinary receipts a total of \$9,647,982, to which are added refund of indemnities to hotel keepers, \$44,278; sales of property, \$1,427; trust funds and deposits, \$185,873; loan, \$3,968,000, making total receipts of \$13,847,561.

The expenditures are: public debt, \$1,708,379; legislation, \$494,832; civil government, \$649,155; administration of justice, \$1,097,736; judges of court of sessions, \$44,200; inspection of public offices, \$15,970; public instruction, \$1,520,641; literary and scientific institutions, \$534; arts and manufactures, \$16,000; Quebec bureau of statistics, \$7,903; health, \$38,500; public works: ordinary \$740,789, extraordinary, \$158,000; labor, \$37,061; agriculture, \$470,861; roads, \$349,000; lands and forests, \$370,500; mines, fisheries, game and registration service, \$99,032; colonization, \$209,000; immigration, \$17,500; charities, \$69,885; lunatic asylums, \$633,625; reformatory and industrial schools, \$145,000; charges on revenue, \$308,895; miscellaneous services, \$233,682, making a total on expenditure of \$9,436,688. Other expenditures were: new gaol, district of Montreal, \$23,546; the good roads act, 1912, \$3,635,124; the St. Maurice River water storage, \$22,618; the St. Francis River waters storage, \$126,384; indemnities to hotel-keepers, \$147,000; trust funds and deposits, \$315,965; railway construction, \$750. The total expenditure was \$13,708,077.

The statement of the public debt and temporary deposits of the province at June 30th, 1916, is as follows: July 1st, 1880, \$470,314; January 1st, 1888, \$3,182,800; March 1st, 1894, \$2,530,666; December 30th, 1894, \$5,332,976; May 1st, 1896, \$292,000; April 1st, 1897, \$1,360,000; April 1st, 1897, \$9,236,061; January 1st, 1912, \$1,049,586; July 1st, 1914, \$3,991,722; April 1st, 1915, \$6,000,000; June 1st, 1916, \$4,000,000; total, \$18,246,128. The sinking fund invested was \$1,487,347, making the net funded debt, \$36,858,780.

The temporary deposits are: teachers' pension fund, \$206,400; Protestant council of public instruction, \$40,217; security and trust deposits, \$265,607; total, \$512,224.

DOMINION'S RECENT LOANS

London Was Our Banker Until War Broke Out— Some of the Recent Issues

In the war loan bulletin sent to all subscribers of *The Monetary Times* on Monday night, it was pointed out that the present war loan was the fifth to be made since the outbreak of war. Only one of these was made in London, two being made in the United States and two in Canada.

The following notes respecting the Dominion's borrowings in London since 1907 will be of interest and of reference value:—

In December, 1907, a loan of £1,500,000 4 per cent. bonds, due 1st October, 1912, was floated at par in London, with option to holders, up to 30th September, 1910, of conversion into 3 per cent. inscribed stock, 1938, on the basis of £105 stock for each £100 in bonds. This loan was raised for the purpose of providing for obligations arising out of construction of public works and for the redemption of maturing liabilities.

National Transcontinental Railway.

In February, 1908, a loan of £3,000,000 3½ per cent. stock, due 1st July, 1950, with option to the government to redeem at par on or after 1st July, 1930, on giving six months' notice, was floated in London. The loan was issued at par and was raised for the purpose of providing for maturing liabilities, for obligations in connection with the construction of the National Transcontinental Railway, and for other purposes. Holders of the £1,500,000 4 per cent. guaranteed Intercolonial Railway bonds, which would mature on 1st April, 1908, were offered an equivalent nominal amount of this stock in exchange for the bonds held by them.

In June, 1908, a 3½ per cent. loan of £5,000,000, due 1st May, 1912, was floated in London. The loan was issued at par and was raised for the purpose of providing for maturing obligations and construction of public works. Holders of 4 per cent. bonds and stock, due 1st November, 1908, were offered in exchange an equivalent nominal amount of this issue.

An option, up to 30th September, 1910, was allowed to holders of this 3½ per cent. stock and bonds, of conversion into 3 per cent. inscribed stock, 1938, on the basis of £106 of that stock for each £100 of 3½ per cent. stock or bonds.

For Railway Purposes.

In October, 1908, a loan of £5,000,000, 3½ per cent. stock, due 1st July, 1950, with option to the government to redeem at par on or after 1st July, 1930, on giving six months' notice, was placed on the London market. The loan was issued at par and was raised for the purpose of providing for obligations in connection with the construction of the National Transcontinental Railway and for other purposes. Holders of 4 per cent. bonds and stock which matured 1st November, 1908, were offered an exchange for an equivalent nominal amount of this stock.

In January, 1909, a loan of £6,000,000 3½ per cent. bonds, due 1st July, 1919, with option to the government to redeem the whole or any portion by drawings at par on or after 1st July, 1914, on giving three months' notice, was issued at 99½ per cent. in London for the purpose of meeting maturing obligations to provide funds for the construction of public works, and for general purposes. Holders of these bonds had the option, up to 30th November, 1913, of conversion into the existing 3 per cent. inscribed stock, 1938, on the basis of £110 of that stock for every £100 bond.

In July, 1909, a further loan of £6,500,000 3½ per cent. stock, due 1st July, 1950, with option to the government to redeem at par on or after 1st July, 1930, on giving six months' notice, was issued at 98½ per cent. in London, for the purpose of providing for the outstanding balance of the loan maturing 1st January, 1910, and to provide for the advance of \$10,000,000 (say, £2,054,794 10s. 5d.) to the Grand Trunk Pacific Railway Company to assist in the construction of the National Transcontinental Railway.

Redeeming Treasury Bills.

In January, 1910, a loan of £4,000,000 3½ per cent. stock, due July 1st, 1950, with option to the government to redeem at par on or after July 1st, 1930, on giving six months' notice, was issued in London at 99 per cent., for the purpose of providing for the redemption on July 1st, 1910, of the 4 per cent. 1910-35 loan.

In May, 1910, a further loan of £5,000,000 3½ per cent. stock, due 1st July, 1950, with option to the government to redeem at par on or after July 1st, 1930, on giving six months' notice, was issued in London at 99½ per cent. for the purpose of providing for the redemption of £3,500,000 treasury bills, due July 1st, 1910, and £1,500,000 4 per cent. guaranteed bonds, due October 1st, 1910.

In 1912, one issue was made, the security offered being £5,000,000 3½ per cent. stock at 98. The following year, 1913, two issues were made, one of £3,000,000 4 per cent. stock, placed on the market at 99, and one of £4,000,000 4 per cent. stock, at 97. During 1914 two Canadian government loans were made in London, £5,000,000 4 per cent. debenture stock being offered at 99 in February, and £5,000,000 4 per cent. stock at 98 in June. The last issue was that of £5,000,000 4½ per cent. 5 or 10-year bonds at 99½ in March, 1915.

WHO ARE SUBSCRIBING?

Those companies and individuals who desire their subscriptions to appear in *The Monetary Times* list of war loan subscriptions should send the particulars without delay to the editorial department, *The Monetary Times*, 62 Church Street, Toronto. The details required are name of subscriber, city or town, amount of subscription.

BANKS, BOND HOUSES AND WAR LOANS

The following statement was made in a recent issue of *The Monetary Times*: "Of the former war loan, Canadian bond houses handled, probably, 40 per cent. of the business, despite the fact that the banks and the life insurance companies, whose subscriptions were very large, placed none of their business through the brokers."

In the same article it was stated: "The banks, therefore, had practically the whole of the first day of the loan offering, which is invariably the best day, all to themselves."

Discussing these statements, the following comments have been handed to *The Monetary Times* as probably representing the bankers' viewpoint:—

"Why should the banks and life insurance companies, whose subscriptions were arranged with the minister of finance beforehand, place their business through the brokers? Why should the country, which is in need of money at the present time, pay for commissions on these large subscriptions when there has been no effort made on the part of the brokers to obtain them?"

"Any unpleasant situation that might have resulted in connection with the last loan could only result from misunderstanding, as there was no real conflict between banker and broker, the commission agreed upon being paid to the former upon all subscriptions received, whether bearing the stamp or signature of brokers' firms or not."

"A statement also appears in *The Monetary Times* that some branch managers appeared to have an erroneous idea that if the bond houses obtained a commission for subscriptions to the loan, the banks would not obtain their remuneration. This is also answered in the preceding paragraph."

The argument put forth on behalf of the bond brokers, it will be recalled, was that the life insurance companies are their customers throughout the year, and that it is unfair to the bond houses to make an exception when a war loan is issued. They do not, however, contend that the banks are on a similar basis. They regard the arrangement which makes the banks the medium of the loan as an admirable one.

The bond houses also complained that most, if not all, the banks had in their possession full information respecting the loan a week or more before the prospectus was issued. The bond houses think that was unfair to them. As to misunderstanding between banks and brokers, in a number of cases the stamp of the bond houses on subscription forms was scratched out, obliterated by pencil marks or cut off altogether. This was apparently done by branch bank managers as a result of their misunderstanding.

However, *The Monetary Times* understands that these matters have all been adjusted to the mutual satisfaction of the government, the banks and the bond houses, and involving a reasonable expense only in regard to the marketing of the present war loan.

Is Your Estate Properly Protected?

No matter how little or how much you own, these possessions make up your estate, and should be protected by efficient and economical management.

This can best be done by an Executor or Trustee.

This Company, by acting in this capacity, will give your estate the benefit of experience gained in the management of many estates, of large and of only moderate size, and will scrupulously guard the interests of your heirs.

No charge for drawing up your will when the Sterling Trusts Corporation is appointed your Executor and Trustee.

Our officers will give you further information on request.

HOW BONDS ARE SOLD

Methods in Merchandising Investment Securities to Those Who Buy Millions and to Those Who Take but a Single Bond

There is much more than volume to the business of a successful bond house. The bond business is not unlike any other big merchandising proposition in its broader aspects. It is more important to buy right than to sell right, and the difference between one house that waxes fat and another with apparently as good an organization and opportunities, which dies of malnutrition may be entirely in their respective ability to judge the attractiveness of issues which they buy for distribution.

In an interesting article on the bond middleman in a recent issue of the New York Annalist, the writer classifies bond dealers into three general classes. There is first the wholesaler, who buys an entire new issue alone or with the help of underwriters, but who does not attend to its re-sale. Then there is a middleman, who is big enough to take a goodly sized issue direct, or in conjunction with other large houses, and who has his own distributing organization for re-tailing it. The third class is composed of the hundreds of firms who take bonds from the wholesalers and market them among investors. Sometimes these smaller houses bid for all of the bonds of a small issue, or for part of a large issue, but as a rule they work in close association with one or more of the wholesalers.

Only Good Man Can Do It.

Any one with a little capital can start in the bond business. An individual can rent desk room and become a dealer, for there is hardly another business which requires less in the way of organization and equipment, but it is a good man who can develop a business from such a start. A successful bond business is built on a foundation of confidence, and individuals without the help of a well-known firm or bank name find it very difficult to widen the circle of clients beyond their list of friends.

The profit which a dealer makes on his bonds varies with the class of securities handled and the state of the market. Some issues are bought to be sold at an advance of an eighth; others at an appreciation of from 5 to 10 points. There is no rule that is applicable to the whole field, but it is customary to consider 1 per cent. as the cost of handling a year's business, so that many of the bonds sold must return more than that margin of profit to enable the house to show a balance on the right side. The more highly a security is regarded the smaller the profit in handling it.

Small Commission on Government Bonds.

A specialist in government bonds is glad to turn them over at an eighth, while his next-door neighbor may be taking five points on every public utility issue he handles. The government specialist buys his bonds by telephone, and a moment later has sold them over another wire, without having said a thing in favor of their purchase. He is handling a standard article, and price is the only factor entering into its sale. The dealer in public utility issues, on the other hand, must first create a standing for his bonds by education and publicity, and sell them by personal solicitation and argument. The same holds true in even larger measure of some other classes of bonds.

The amount of bonds which the average salesman can dispose of depends principally upon the kind he is handling, and the class of buyers on his list. An experienced man with entree into the biggest savings banks and insurance companies may place \$25,000,000 a year, and yet not work as hard as another salesman who sells \$250,000 worth. In one case the buyer knows pretty well what he wants and buys in large quantities, while in the other he may be amenable only to the hardest kind of solicitation, and then invest \$1,000 at a time.

Over the Telephone.

The distributing organization has a few high-salaried men who make rare visits, carrying on most of their work through the mails or over the telephone. These are the salesmen who have particular institutions on their list, together with wealthy investors who buy from \$25,000 to \$1,000,000 worth of securities at a time. Then there are the men who circulate through the city, calling upon banks and insurance companies, whose business is not assured. They are often working on a commission basis, so that they are keenly alive to every new

possibility. After them come the salesmen who are willing to work hard for the chance to sell a single bond. They have the hardest task, for in most cases they not only have to convince a client that he should invest his surplus in bonds, but that the particular securities he is carrying are the best to be found. Many of these men are kept on the road all of the time, covering even the smallest villages, for every cross roads has at least one person with means who may become a buyer.

Methods Have Changed.

Methods of the bond salesmen have changed in late years, just as the travelling men for commercial houses are changing. It used to be considered essential that a man carry a generous expense account and make himself known as a good fellow. The most successful salesman to-day is the man who knows not only his own bonds, but the approximate situation of a great many other securities, so that he can intelligently advise a customer.

That he may answer questions intelligently, some of the distributing houses pay the tuition of the man who attends courses on finance, and provide lectures for him when they have a large issue of new securities to be marketed. Dealers in public utilities have provided moving pictures and brought engineers to New York to give salesmen a visualized idea of the property back of the securities. When the Anglo-French bonds were brought out, offering the greatest distributing problem ever undertaken by dealers, J. P. Morgan and other bankers addressed several hundred salesmen to prepare them to sell the goods they were about to handle. If a salesman does not know and believe in his bonds he cannot sell them.

Insurance Companies as Buyers.

The richest field for the bond houses is furnished by the big insurance companies, and the competition for their business is naturally keen. In most cases the insurance men know as much or more about conditions in the investment market than the dealers, and they buy closely, but in large enough blocks to make it well worth the dealer's while to get their business.

Hartford is visited by more investment dealers probably than any other city in the United States, owing to its being the domicile of so many insurance companies. Some of the larger houses maintain men in Hartford all the time, but others prefer to send salesmen from New York each week. A good bond man carries in his mind the principal securities held by his clients, and he is often able to turn this knowledge to advantage in creating business.

Selling to Sell Another.

Knowing, for instance, that a company has \$2,000,000 of bonds of an issue which has appreciated materially in price, he will suggest a switch into a lower price bond paying the same rate of interest, and will take the original bonds off the company's hands. Sometimes he even sells the latter at a slight loss in the open market. A salesman's strongest asset is his carefully collected information as to the particular class of securities that interest his client, and the periods when he has funds coming due.

The real test of a bond house comes when it "takes a position," as the dealers say. The market may be inactive and the house losing money on its overhead charges, when the partners, after a conference, decide that prices will go higher. They accordingly decide to buy certain bonds in the open market, or at a sale, with the idea of carrying them till higher prices obtain. The syndicates which take issues of city bonds often do that. They are able to carry the bonds at less cost than the interest yield, and when municipals are in demand are able to sell them at a profit.

If a house uses poor judgment it may find itself loaded with securities which are falling in price, and it is then necessary to take a big loss or use more capital to buy other bonds for the men to handle. A correct forecast of conditions has made large sums for some of the bond departments in the past year.

CONFIDENCE IN SITUATION

As an indication of the confidence existing in the general Canadian situation, it is understood that the banks were willing to underwrite the whole \$100,000,000 of the war loan and undertake its distribution. However, the same plan is being followed as in the last loan, the banks undertaking to subscribe half the loan concurrently with the public appeal.

8% NET FARM MORTGAGES

We want \$1,000 on each of thirty-two quarter sections of first-class land. Principal re-payable in five years; interest payable the First of January and the First of July. All expenses paid by the Mortgagors. Titles examined by MacDonald, Craig, Tarr & Ross.

BRIDGE DISASTER AND STOCK FLURRY

Rapid Movement in Dominion Bridge Shares at Montreal —Over 3,500 Shares Handled on Monday

The drop into the St. Lawrence River of the centre span of the Quebec Bridge while being raised into position on Monday, caused a sensational movement on the Montreal stock market. Early buying on Monday morning indicated the belief that the enterprise was being successfully completed by the Dominion Bridge Company's subsidiary, the St. Lawrence Bridge Company, and Dominion Bridge shares went up three points to 231 $\frac{3}{4}$, a new high for the movement. The shock of the disaster turned the market into all sellers and no buyers, and the stock was offered down abruptly from 230 $\frac{3}{4}$ to 205, without intervening transactions. Twenty-five shares were taken at 205, the next sale was marked at 211, and the next at 212. The market was nervous during the rest of the morning, the early low of 205 being equalled a couple of times before the stock settled at around 211. The afternoon trading was less excited, and was marked by a further rally to 216, with the close at 215, leaving the extreme loss of 26 $\frac{3}{4}$ points in the morning a net loss of 13 $\frac{3}{4}$ for the day. Business for the stock was in excess of 3,500 shares.

The trading in the shares on Tuesday totalled 900. The stock opened at 217 and closed at 215.

Expected Completion of Bridge.

The Dominion Bridge Company, Limited, Montreal, and the Canadian Bridge Company, Limited, Walkerville, jointly own the St. Lawrence Bridge Company, Limited, which was formed for the purpose of manufacturing and erecting the Quebec bridge. In the report of the directors of the Dominion Bridge Company for the year ended October 31st, 1915, the following paragraph appeared:—

"Construction on the Quebec bridge, in which contract your company has a half interest, has progressed favorably during the year. The north cantilever arm is now completely erected and the traveller is being taken down to be used for the erection of the centre span. The south anchor arm is also completely erected and is further advanced than was the north anchor arm at a corresponding period last year. Unless the present shortage of steel delays the manufacture of the centre span or the government should curtail appropriations for progress estimates, it is anticipated the steel work will be fully erected next season."

The *Monetary Times* telegraphed inquiries to the Dominion Bridge Company for information as to possible insurance carried by the company, reserve account in connection with the bridge and estimate of loss caused by the disaster, but could not get in touch with the officials at time of going to press.

Estimate of Loss.

The material loss is roughly estimated at \$600,000. The actual investment of Dominion Bridge in the St. Lawrence Bridge subsidiary, which was interested in the construction, is said to be \$600,000, of which 50 per cent. is understood to be protected by insurance. The profit that was expected to accrue to Dominion Bridge, if the work was successfully completed, was estimated at from \$1,500,000 to \$2,000,000. Contingencies which will have to be figured out as the situation becomes clearer, block any attempt to estimate what portion of the original investment or prospective profit has been impaired by the accident.

The *Montreal Gazette*, discussing the trading in Dominion Bridge stock on the Montreal exchange on Monday, said: "Emphasis was laid in the late trading on the fact that while the profits to be realized from the Quebec venture were viewed as a potential asset of value behind the stock, the stock market boom had been premised on earnings from other sources—the company's ordinary structural business and its munition orders. Quebec Bridge profits have at no time been a factor in the 20 per cent. distribution which the company is now making annually to its shareholders. They were untouched in any way, to be segregated, if realized, for the future benefit of the stockholders. Whatever part of these profits disappeared on Monday, the loss will probably work out as relatively small to the current rate of profit from the company's other activities."

The two companies owning the St. Lawrence Bridge Company have intimate relations. They took over recently the bridge building and structural iron department of the Locomotive and Machine Company, of Montreal, which is now

operated under the name of Structural Steel Company, Limited. The Dominion Bridge Company, besides owning half the St. Lawrence Bridge Company, controls the following companies through stock ownership: The National Bridge Company of Canada, Limited, the Montreal Ammunition Company, Limited and the Dominion Copper Products Company, Limited. The capital stock of the Dominion Bridge Company, Limited, is \$10,000,000, of which \$6,500,000 are subscribed and paid up.

The St. Lawrence Bridge Company, Limited, was incorporated on August 5th, 1910, to construct the Quebec bridge. The company has only this contract and its books, it was expected, would be closed when the work was completed in 1917. The accident will delay the completion of the bridge until probably sometime in 1918. The company had authorized capital stock of \$3,000,000, one-half of which is owned each by the Dominion Bridge Company and the Canadian Bridge Company. Up to December 31st, 1914, \$2,750,000 of the authorized capital had been paid in. The par value of the shares is \$100.

Dominion Bridge Company's Reserve.

According to the financial statement of the Dominion Bridge Company for the year ended October 31st, 1915, provision was made to the extent of \$181,358 "for accidents in erection," and to the extent of \$50,900 for accident insurance to employees. The sum of \$204,282 was also transferred to reserve. The reserve account at the end of 1914 totalled \$721,606.

GOODWILL AND INTANGIBLE ASSETS

An unusually instructive address on the question of watered stock and goodwill was recently given at Regina at the annual convention of the Dominion Association of Chartered Accountants by Mr. David S. Kerr, C.A., Montreal. He discusses the issue of stock and defines goodwill and watered stock. Other matters dealt with were capitalization upon basis of estimated future earnings; test of fair value; bonus stock; intangible assets; the writing down of goodwill accounts and revaluations; and many other points.

Discussing suggested legislation, Mr. Kerr said:—

"The Dominion companies' act and most of the provincial companies' acts do not require the disclosure in the statements of incorporated companies of the values of goodwill or other intangible assets.

"So far as legislation is concerned, the only solution which would satisfactorily meet the situation and not act to the detriment of those concerned, would appear to be legislation providing that the accounts of all limited liability companies should disclose separately and distinctly the total values placed upon the intangible assets discussed. If the reports and accounts disclosed these values of intangibles, then the present as well as the prospective stockholders and the public would find themselves in the position of being better able to form some judgment of the affairs of the companies and the purposes of the laws of incorporation would be more effectively carried out.

"Bearing in mind the large book values which pertain to such intangibles there would appear to be no reasonable grounds upon which such proposed legislation could be opposed. The government itself would then be better able to supply statistics, showing the investment in the trades of businesses throughout the Dominion, and also the return or earnings made upon the investment, exclusive of any value which may be placed upon the intangible assets just described.

"It is not, of course, for one minute contended that this proposed legislation would disclose all increases placed upon the value of assets. In fact, in the discussion it has been pretty clearly admitted that it would be impossible to regulate a uniform basis of valuation for assets. But the suggested legislation would give the public generally most valuable, and, indeed, necessary, information, and it would be a decided improvement upon the present unsatisfactory situation."

If you doubt our war bonds' safety, give up business.

An interim certificate No. E48007, Dominion of Canada 5 per cent. war loan, due September, 1925, for \$1,000, has been reported by Messrs. A. E. Ames and Company, Toronto, to be lost or stolen.

WAR LOAN

DOMINION OF CANADA

Issue of \$100,000,000 5% Bonds Maturing 1st October, 1931

PAYABLE AT PAR AT

OTTAWA, HALIFAX, ST. JOHN, CHARLOTTETOWN, MONTREAL, TORONTO, WINNIPEG, REGINA,
CALGARY, VICTORIA.

INTEREST PAYABLE HALF-YEARLY, 1st APRIL, 1st OCTOBER.

PRINCIPAL AND INTEREST PAYABLE IN GOLD.

ISSUE PRICE 97½

A FULL HALF-YEAR'S INTEREST WILL BE PAID ON 1st APRIL, 1917.
THE PROCEEDS OF THE LOAN WILL BE USED FOR WAR PURPOSES ONLY.

THE MINISTER OF FINANCE offers herewith, on behalf of the Government, the above-named Bonds for subscription at 97½, payable as follows:—

10 per cent.	on application;
30 “	“ 16th October, 1916;
30 “	“ 15th November, 1916;
27½ “	“ 15th December, 1916.

The total allotment of bonds of this issue will be limited to one hundred million dollars, exclusive of the amount (if any) paid for by the surrender of bonds as the equivalent of cash under the terms of the War Loan prospectus of 22nd November, 1915.

The instalments may be paid in full on the 16th day of October, 1916, or on any instalment due date thereafter, under discount at the rate of four per cent. per annum. All payments are to be made to a chartered bank for the credit of the Minister of Finance. Failure to pay any instalment when due will render previous payments liable to forfeiture and the allotment to cancellation.

Subscriptions, accompanied by a deposit of ten per cent. of the amount subscribed, must be forwarded through the medium of a chartered bank. Any branch in Canada of any chartered bank will receive subscriptions and issue provisional receipts.

This loan is authorized under Act of the Parliament of Canada, and both principal and interest will be a charge upon the Consolidated Revenue Fund.

Forms of application may be obtained from any branch in Canada of any chartered bank and at the office of any Assistant Receiver-General in Canada.

Subscriptions must be for even hundreds of dollars.

In case of partial allotments the surplus deposit will be applied towards payment of the amount due on the October instalment.

Scrip certificates, non-negotiable or payable to bearer in accordance with the choice of the applicant for registered or bearer bonds, will be issued after allotment, in exchange for the provisional receipts.

When the scrip certificates have been paid in full and payment endorsed thereon by the bank receiving the money, they may be exchanged for bonds, when prepared, with coupons attached, payable to bearer or

registered as to principal, or for fully registered bonds, when prepared, without coupons, in accordance with the application.

Delivery of scrip certificates and of bonds will be made through the chartered banks.

The issue will be exempt from taxes—including any income tax—imposed in pursuance of legislation enacted by the Parliament of Canada.

The bonds with coupons will be issued in denominations of \$100, \$500, \$1,000. Fully registered bonds without coupons will be issued in denominations of \$1,000, \$5,000 or any authorized multiple of \$5,000.

The bonds will be paid at maturity at par at the office of the Minister of Finance and Receiver General at Ottawa, or at the office of the Assistant Receiver General at Halifax, St. John, Charlottetown, Montreal, Toronto, Winnipeg, Regina, Calgary, or Victoria.

The interest on the fully registered bonds will be paid by cheque, which will be remitted by post. Interest on bonds with coupons will be paid on surrender of coupons. Both cheques and coupons will be payable free of exchange at any branch in Canada of any chartered bank.

Subject to the payment of twenty-five cents for each new bond issued, holders of fully registered bonds without coupons will have the right to convert into bonds of the denomination of \$1,000 with coupons, and holders of bonds with coupons will have the right to convert into fully registered bonds of authorized denominations without coupons at any time on application to the Minister of Finance.

The books of the loan will be kept at the Department of Finance, Ottawa.

Application will be made in due course for the listing of the issue on the Montreal and Toronto Stock Exchanges.

Recognized bond and stock brokers will be allowed a commission of one-quarter of one per cent. on allotments made in respect of applications bearing their stamp, provided, however, that no commission will be allowed in respect of the amount of any allotment paid for by the surrender of bonds issued under the War Loan prospectus of 22nd November, 1915. No commission will be allowed in respect of applications on forms which have not been printed by the King's Printer.

Subscription Lists will close on or before 23rd September, 1916.

Department of Finance, Ottawa, September 12th, 1916.

DIVIDENDS AND NOTICES

Tenders will be received by the undersigned up to and including Friday, the Fifteenth September, 1916, for the right to cut the Pine timber (including Jackpine) on the Townships of Beresford, Grigg and Howey, and the unlicensed portions of the Townships of Cotton and Valin in the District of Sudbury.

Tenderers shall state the amount per thousand feet Board Measure, they are prepared to pay for the Pine in addition to the Crown dues of \$2 per thousand feet Board Measure, and the rate per tie for any of the Pine timber suitable for the manufacture of railway ties in addition to the Crown dues of 5c. each.

The timber to be removed by the 30th of April, 1920.

Tenders are to be for each berth separately. Each tender to be accompanied by a marked cheque for \$10,000, to be held as deposit excepting in the case of the Township of Cotton on which the amount of deposit will be \$5,000. The cheques are to be payable to the order of the Provincial Treasurer. The party awarded the right to cut will be required to furnish a bond for the payment of the price and the due performance of all the conditions required by the Department.

The highest or any tender not necessarily accepted.

Tenders to be addressed to the Honourable, the Minister of Lands, Forests and Mines, Toronto, and marked "Tender for Timber."

G. H. FERGUSON,

Minister of Lands, Forests and Mines,
Toronto, August 31st, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

ILLINOIS TRACTION COMPANY

DIVIDEND NOTICE

The regular dividend of one and one-half per cent. (1½%) on the preferred stock of the Illinois Traction Company will be paid October 1st, 1916, for the quarter ending September 30th, 1916, to shareholders of record, September 15th, 1916.

By Order of the Board,

GEO. M. MATTIS,
Treasurer.

Champaign, Ill.

CANADIAN SECURITIES FOR COLLATERAL

The Canadian securities forming part of the collateral which is being deposited by the British government as security for the repayment of \$250,000,000 borrowed recently in the United States are noted below. Under the agreement \$300,000,000 in securities were to be provided, divided equally among American stocks and bonds, Canadian stocks and bonds, and bonds of Argentina, Chile, Norway, Sweden, Switzerland, Denmark and Holland:—

Dominion of Canada 3 per cent sterling bonds or stock, 1938.

Dominion of Canada 3½ per cent. sterling bonds or stock, 1909-34.

Dominion of Canada 3½ per cent. registered stock, 1930-50.

Dominion of Canada (Canadian Pacific Railway) 3½ per cent. land grant bond or stock, 1938.

Dominion of Canada 3½ per cent bonds, 1925-28.

Dominion of Canada 3½ per cent bonds, 1914-19.

Dominion of Canada 4 per cent. stock, 1940-60.

Dominion of Canada 4½ per cent. bonds, 1920-25.

Tenders will be received by the undersigned up to and including Monday, the 2nd October, 1916, for the right to cut the Pine timber (including Jackpine) on the Township of Pettypiece in the District of Kenora.

Tenderers shall state the rate per thousand feet Board Measure, they are prepared to pay for the Pine in addition to the Crown dues of \$2 per thousand feet Board Measure, and the rate per tie for any of the Pine timber suitable for the manufacture of railway ties, in addition to the Crown dues of 5c. each.

The timber to be removed by the 30th of April, 1918.

Each tender to be accompanied by marked cheque for \$700, payable to the order of the Provincial Treasurer. The party awarded the right to cut will be required to furnish a bond for the payment of the price and the due performance of all the conditions required by the Department.

The highest or any tender not necessarily accepted.

Tenders to be addressed to the Honourable, the Minister of Lands, Forests and Mines, Toronto, and marked "Tender for Timber."

G. H. FERGUSON,

Minister of Lands, Forests and Mines,
Toronto, August 31st, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

THE CANADIAN CROCKER-WHEELER CO., LIMITED

DIVIDEND NOTICE

The Directors of The Canadian Crocker-Wheeler Company, Limited, have declared a One and Three-Quarters per Cent. (1¾%) dividend on the Preferred stock of the Company for the three months ending September 30th, 1916, to Shareholders of record September 15, 1916. Also a dividend of One and Three-Quarters per Cent. (1¾%) on the Common Stock of the Company for the three months ending September 30th, 1916.

The Stock Books will be closed from the 15th to the 30th of September, both days inclusive.

Cheques will be mailed to Shareholders on September 30th, 1916.

By Order of the Board,

L. R. GRIMSHAW,
Secretary-Treasurer.

St. Catharines, Ontario, September 13th, 1916.

Dominion of Canada 4½ per cent. bonds, 1925-45.
Canadian Northern Alberta Railway Company 3½ per cent debenture stock, guaranteed by Canadian government, 1960.

Canadian Northern Ontario Railway Company 3½ per cent stock, guaranteed by Canadian government, 1901

Canadian Northern Railway Company first mortgage 3 per cent. debenture stock, guaranteed by Canadian government, 1953.

Canadian Northern Railway Company 3½ per cent. debenture stock, guaranteed by Canadian government, 1958.

Canadian Northern Railway Company 4 per cent. debenture stock, guaranteed by Canadian government, 1934.

Canadian Pacific Railway Company 4 per cent. perpetual consolidated debenture stock.

Canadian Pacific Railway Company 4 per cent. non-cumulative preference stock.

Canadian Pacific Railway Company 6 per cent. note certificates, 1924.

Canadian Pacific Railway Company common stock.

Grand Trunk Pacific Railway Company 3 per cent. first mortgage sterling bonds, guaranteed by Canadian government, 1962.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; "Positions Vacant," "Agents or Agencies Wanted," 3c. per word; other condensed advertisements, 3c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over \$5,000.00, and he has built up a future income of over \$3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

ACCOUNTANT and Bookkeeper; age 30; over 12 years' experience in bookkeeping and financial work, seeks position with Financial or Commercial Firm, having good prospects. Reply Box 497, *The Monetary Times*, Toronto.

YOUNG MAN, with knowledge of French, and having 14 years' experience in banking and real estate, desires responsible position with financial or commercial company. Correspondence confidential. Box 5, *The Monetary Times*, Toronto.

MOOSE JAW RENTAL AGENTS.—The Ralph Manley Agency, Limited, Walter Scott Block, Moose Jaw, handle the renting of Moose Jaw Improved City Property. Their facilities permit them to rent and re-rent property as well as looking after collections and any necessary repairs. Established 1908. Correspondence solicited.

CORA HIND'S CROP REPORTS

After a month of inspection, Miss Cora Hind, commercial editor of the Manitoba Free Press, places the estimate of the wheat crop of the three prairie provinces at from 170,000,000 to 200,000,000 bushels. This is, roughly, 100,000,000 bushels for Saskatchewan, 36,000,000 bushels for Manitoba, and 35,000,000 bushels upward for Alberta, thus making the yield twelve bushels to the acre for Manitoba and fifteen bushels to the acre for Saskatchewan. In Alberta there is no doubt that the bulk of the 1,500,000 acres in wheat is south of the main line of the Canadian Pacific Railway, and twenty-five bushels to the acre is a fairly conservative estimate for that territory; it will probably run much higher, and may reach a thirty-bushel average, adds the Free Press. No definite estimate of the yield could be made in the north, owing to the very spotted conditions, but it is safe to assume that there will be sufficient out of the north to bring the yield of the province up to thirty-five, or possibly forty million bushels.

Continuing, the report says: "The grade of the crop will be unsatisfactory. The percentage of No. 1 Northern in any of the provinces will be small, with the exception of Southern Alberta, where it should be heavy. There will be a considerable quantity of No. 2, but a great deal of the wheat, which should, by right of color, go No. 2, will hardly make that grade on account of lack of weight. Taking the yield at the smaller figure—170,000,000 bushels—and putting the price of the lower grades against the high, it will be worth not less than ninety cents a bushel, or \$153,000,000."

The Canadian Pacific Railway had invested up to June 30th, 1916, the sum of \$5,272,690 in war loans, including the first Dominion war loan.

DEBENTURES FOR SALE

CITY OF EDMONTON, ALBERTA

TENDERS WANTED

Sealed tenders will be received by the undersigned up to the 20th day of September, 1916, for the purchase of the following debentures:—

By-law No. 682	Debenture sale discount	\$178,000.00
By-law No. 686	Parks improvements	72,000.00

The debentures are each for \$1,000.00, payable as to principal and interest, in gold coin at Edmonton, Toronto, Montreal or New York.

By-law No. 549	Street railway extension	\$ 75,000.00
By-law No. 558	City's share of paving	163,000.00
By-law No. 574	City's share of paving	75,000.00

The above debentures are each for £100 or equivalent in dollars and payable as to principal and interest at Toronto, Montreal or London.

All the debentures noted above mature on July 1, 1934, and bear interest at the rate of 5 per cent. per annum payable half-yearly on January 1st and July 1st.

Debentures under by-laws Nos. 549, 558 and 574 will, if necessary, in order to suit the desire of purchaser, be endorsed or reprinted, payable in currency in New York. All debentures are the liability of the city at large. Tenders are required for net Edmonton delivery and payment to include accrued interest to date of delivery.

The highest or any tender will not necessarily be accepted. Any further information pertaining to these debentures can be obtained from the undersigned.

F. BARNHOUSE,
City Treasurer.

Edmonton, Alta., September 11, 1916.

TOWN OF SUTHERLAND, SASK.

TENDERS WANTED

Tenders will be received by the undersigned up to the 28th day of September, 1916 (6 o'clock p.m.), for the purchase of the Town's debentures amounting to \$36,000.00 (instalment system), interest at 7%, made up as follows:—

By-law No. 10	Waterworks	\$19,350.00	30-years	7%
By-law No. 11	Sidewalks	\$ 750.00	20 "	7%
By-law No. 12	Sewers	\$15,500.00	30 "	7%
By-law No. 13	Grading	\$ 400.00	30 "	7%

All information pertaining to these debentures can be obtained from the undersigned.

SIDNEY APPLEBY,
Town Clerk.

Sutherland, Sask., August 25th, 1916.

A Free Course In "Salesmanship"

We have thought about the young man who sees no prospects ahead. Would you like to be in a business that will give you

**A Good Living Wage
A Profitable Future
A Provision For Old Age**

We teach a man the Insurance Business, which offers permanent success, does not fluctuate, is a professional occupation, and has been truly named "The best paid hard work in the world."

This is done by a correspondence course and personal assistance, free of charge.

When he is fully prepared for the work, we place him in a position and help him to make good.

The first two lessons of the Company's correspondence course will be sent to anyone interested. It will pay young men who desire to get on in the world to look into this.

All correspondence strictly confidential.

CANADA LIFE ASSURANCE CO.
HEAD OFFICE, TORONTO.

Prosperous and Progressive

Up-to-date business methods, backed by an unbroken record of fair-dealing with its policyholders, have achieved for the Sun Life of Canada a phenomenal growth.

To-day, the Company operates actively in forty-two countries and upon five continents.

In the past six years its assurances in force have nearly doubled; in the past eleven years they have more than trebled.

More than 166,000 of its policies are now in force for assurances totalling over \$265,000,000—much the largest amount carried by any Canadian life company.

Coin and bullion.....	520,545	13,871,128	14,636,291	36,371,720	223,668,611	115,110,209
Total trade.....	93,799,982	99,000,038	238,860,488	1,061,365,504	1,142,911,769	1,819,706,490

*Note.—It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending July, 1916, were: imports 1916, \$33,717,992; 1915, \$133,113,099, and exports 1916, \$81,392,217; 1915, \$90,555,512. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

The New War Loan On Easy Payments

¶ You can secure through us the New War Loan for an initial payment of \$10 per \$100 bond and regular monthly payments of \$5, or more, per \$100 bond.

¶ We helped hundreds to secure the first loan in this way who otherwise might not have been able to participate. We would like to assist thousands to secure the new issue.

¶ The services of this organization are also at the disposal of all other investors who desire to secure the safety and high return offered by the Dominion Government Bonds.

¶ Telegraph or telephone at our expense: we will provide you with full official particulars and look after all the details for you without charge.

Canada's War Loan

THE second Canadian war loan of \$100,000,000 has been enthusiastically oversubscribed in eleven days, the subscription lists, which will close to-morrow, September 23rd, indicating a loyal and generous response from Canadians of all classes.—(*The Monetary Times*, September 22nd.)

Britain's War Loan

THE syndicate books for the underwriting of the British loan of \$250,000,000 in the United States were closed on August 18th, with applications for an amount considerably in excess of the total available.—(*The Monetary Times*, August 25th.)

Germany's War Loan

REUTER'S AGENCY learns that information received in authoritative British quarters from various financial sources in Germany indicates an undercurrent of suspicion in certain classes in that country with regard to the new German war loan that was issued a couple of days ago.

The statements which have appeared in the German press, the origin of which may be traced to the Deutsche Bank or to some similar authoritative quarter, indicate the existence of a strong feeling of apprehension that has resulted in certain subterranean propaganda as to the security of the loan, which is equivalent to casting doubt on the finances of the German Empire.—(*London Financier*, September 7th.)

LIFE COMPANIES' SUBSCRIPTIONS LARGE

How Their Purchases in the Two Loans Compare—
Sun Life Subscribes \$5,000,000

The following is a list of the subscriptions of Canadian life insurance companies, and of British life insurance companies doing business in Canada, to the first war loan in November last and to the present loan:—

Companies.	Subscription to first loan.	Subscription to present loan.
Sun Life	\$ 2,000,000	\$ 5,000,000
Canada Life	1,500,000	1,000,000
Great-West Life	1,000,000	1,000,000
Confederation Life	500,000	600,000
Manufacturers Life	500,000	1,500,000
Mutual Life of Canada	500,000	1,500,000
North American Life	500,000	500,000
Imperial Life	350,000	750,000
London Life	250,000	300,000
Excelsior Life	150,000	100,000
National Life of Canada	150,000	150,000
Dominion Life	115,000	115,000
Northern Life	105,000	50,000
Continental Life	100,000	100,000
Crown Life	100,000	150,000
Sovereign Life	60,000	60,000
La Sauvegarde	50,000	
Monarch Life	35,000	
Capital Life	25,000	
British Columbia Life	20,000	
Travellers Life of Canada	15,000	25,000
Saskatchewan Life	5,000	
Western Life		10,000
Totals	\$ 8,030,000	\$12,910,000

Fraternal Societies.

Independent Order of Foresters	\$ 260,000	\$ 250,000
Canadian Order of Foresters	300,000	600,000
Ancient Order of Foresters	20,000	15,000
Royal Guardians	20,000	100,000
Canadian Home Circles	20,000	40,000
Totals	\$ 620,000	\$ 1,005,000

Where a blank appears, the subscription to the present loan has not been reported to *The Monetary Times*.

Part of the subscriptions to the present loan noted above are represented by conversion of the old loan but to what extent is not known in every case. An article dealing with this phase of the loan appears on another page.

British Companies' Subscriptions.

The following is a list of subscriptions to the Canadian government war loan of November last and to the present loan by the British life offices doing business in Canada:—

Companies.	Subscription to first loan.	Subscription to present loan.
Standard Life	\$ 250,000	\$ 650,000
Commercial Union	150,000	
London and Lancashire Life ..	100,000	100,000
Royal	50,000	100,000
North British and Mercantile ..	50,000	200,000
Gresham Life	30,000	25,000
Totals	\$ 630,000	\$ 1,075,000

The British insurance companies subscribed fairly freely to the loan. They took about \$730,000 of the November loan and their subscriptions to the current offering was more than that. Naturally the calls upon their funds on account of the British war loans during the past two years have been heavy. The Law Union and Rock Insurance Company, Limited, of London, England, for example, has a Canadian organization. At the end of the year the company had about \$4,500,000 invested in British government securities, and as this was an increase of about \$4,000,000 in those securities during 1915 the company is doubtless using its surplus funds to help along the cause in the Old Country.

The North American Life Assurance Company, Toronto, subscribed \$500,000 to the present loan. Mr. L. Goldman, the managing director, informed *The Monetary Times* that the company does not intend to exchange any of its holdings in the first loan in payment for the second. "We have not invested in any foreign securities," said Mr. Goldman, "notwithstanding the very inviting yields."

The Sun Life Assurance Company of Canada has applied for an allotment of \$5,000,000 in the new issue. This is the largest life insurance company subscription announced. The company took \$2,000,000 in the first loan.

The Northern Life Assurance Company, London, Ont., subscribed \$50,000 to the new loan. "Our subscription," said Mr. R. C. Macknight, the company's treasurer, to *The Monetary Times*, "was not as large as the last one, owing to the fact that we have retained all the first loan on our books, as it is in my mind, the better issue of the two, owing to the higher yield rate, and the fact that it is convertible into any of the further government issues which of course may be at a higher rate. A further point is that, according to the life insurance investment act, this company should have on its books at the end of this year approximately \$87,000 invested in Dominion government securities payable in Canada. We have over and above the amount required by the act, balance of our original subscription of \$105,000, and by the end of the year, we will have an additional \$50,000."

Not Much Converted.

Mr. Charles Ruby, secretary of the Mutual Life Assurance Company of Canada, Waterloo, tells *The Monetary Times* that none of the company's subscription is represented by conversion of any part of the former loan. "We hold \$825,000 of the latter which," he said, "with our subscription of \$1,500,000 to the new loan, will make our total holdings of the Dominion war loans \$2,325,000."

No part of the subscription of the London Life Insurance Company, London, of \$300,000 to the war loan now being placed is represented by conversion of the company's subscription of \$250,000 a year ago. If the amount now being subscribed by the company for is allotted to them, they will hold a total of \$550,000 of the two war loans placed thus far, Mr. J. G. Richter, the company's manager, tells *The Monetary Times*.

The Standard Life Assurance Company, with Canadian head office at Montreal, has subscribed for \$650,000 clear in the new war loan. The company subscribed for \$250,000 in the former loan, and, in addition, purchased \$365,000 of the former loan. If their subscription to the new loan is allocated to them they will hold in all \$1,265,000 of the Canadian war loans. No part of the new subscription is represented by conversion of the former loan. Further, the Standard Life have invested \$14,000,000 in British securities in the United Kingdom, so Mr. D. M. McGoun, the company's manager for Canada, informs *The Monetary Times*.

Investments in Government Securities.

It will be recalled that legislation was passed early this year whereby life insurance companies and associations carrying on business in Canada under Dominion license will be obliged to invest and keep invested a certain portion of their assets, during this and next year, in the currency bonds or debenture stock of the Dominion. Companies whose domicile is outside of Canada, but which are licensed to transact business in Canada are required to make the deposits which they are required to make in 1916 and 1917 as security for their policyholders in the Dominion in such securities; and Canadian companies for the same two years shall invest in such securities one-half of the increase in their net ledger assets during the years 1915 and 1916, after making provision for increase in foreign reserves and in policy loans.

Mr. H. W. Lightbourn, president of the Bank of Nassau, Bahamas, was a visitor to the head office of *The Monetary Times* last week.

Mr. J. C. Gage has been elected president of the Winnipeg Grain Exchange and Mr. W. L. Bawlf vice-president. The following members were elected as the council for 1916-17: Capel Tilt, C. B. Piper, Geo. Fisher, David Horne, W. E. Milner, W. A. Matheson, John E. Botterell, Sidney T. Smith, S. J. Alexander, W. A. Anderson and James Stuart. During the year 26 memberships in the exchange have been sold through the secretary's office. The price of a seat on the exchange is \$5,000.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Edmonton, Alta.—The sinking fund board has invested about \$1,800 in school debentures of the municipalities of Boyle and Bruderheim.

Quebec City.—The board of Roman Catholic school commissioners are inviting tenders for \$200,000 bonds. (See official advertisement on another page of this issue.)

Assinibola, Sask.—An award has been made to the Bond and Debenture Corporation, Winnipeg, of \$68,000 waterworks bonds and \$17,000 electric bonds, 6½ per cent., 30 and 15-year instalments.

Quebec, Que.—The finance committee has deferred the proposed floating of the \$200,000 bond issue asked for by the Catholic School Commission. Chairman Verret said that the city's financial agents had advised against a loan at the present time.

Sarnia, Ont.—Three by-laws have been passed, one to repeal the by-law setting aside \$60,000 for school purposes, and another to provide the sum in a legal manner. A by-law to authorize the construction of the city's lighting system was also passed.

Ottawa, Ont.—In addition to making a subscription of \$750,000 to the new loan, the \$500,000 invested in the first loan will be transferred to the second. As there is no great necessity for the city to get its money back at the end of a decade it is figured that the longer period bonds would be more advantageous. It was also thought that if the money were repaid at the end of ten years the city might not be able to re-invest it at such a high rate of interest as the 15-year war bonds would pay.

Montreal, Que.—The city will be recommended to raise \$125,000 per annum by the following taxation methods: Ten cents a square foot on bill-posters, other than wall advertisements, which must pay 15 cents; increase in junk store licenses from \$50 to \$100; increase in electric light sign tax from 10 to 20 cents a foot; \$10 fines for false fire alarm calls from private alarms; dog tax increased by \$1. A special committee was appointed by the city council to find out new sources of revenue and decided upon the above.

Montreal, Que.—The city council is being asked by the board of control to sanction three loans. The first amounts to \$126,913.56 for 40 years at 4 per cent., interest payable semi-annually, and a sinking fund to redeem the loan. The second is one of \$63,520, balance of the borrowing power of \$13,252,520, for a similar term of 40 years and at the same interest. The third is the balance of \$2,480, all that is left of a borrowing power of \$5,802,480, for 40 years and at 5 per cent. The council is also being asked to vote \$147,965 for paving work.

Winnipeg, Man.—In addition to the application for \$250,000 war loan by the sinking fund trustees, the board of control has instructed city treasurer Thompson to purchase \$100,000 worth of the new war loan bonds out of the depreciation and reserve funds. Up to date the city has \$610,000 out of the depreciation and reserve fund invested as follows: City of Winnipeg bonds, \$385,000; Anglo-French bonds, \$125,000; Dominion war loan, \$100,000; total, \$610,000. If they regard it as advisable, the board has been given power to sell the Anglo-French bonds.

Saskatchewan.—The following is a list of debentures reported sold from September 5th to 8th, 1916:—

School Districts.—Sheho, \$5,000; Brushwood, \$1,200; Steep Creek, \$1,100; Zorn, \$1,600; Lilyholme, \$1,500; Husiatyn, \$1,000; Robsart, \$1,900; Burnside, \$500; Punichy, \$1,100; Oxford, \$1,200; Lacombe, \$1,100; Evadale, \$1,500; Willow Moor, \$1,000; Pontoville, \$1,000.

Rural Telephone Companies.—Brampton, \$9,400; Gideon, \$7,000; Spring Lake, \$4,000; St. Leonards, \$12,500; Glenford, \$1,900; Woodleigh, \$4,600; Kansas, \$3,900; Heavyland, \$3,000; Valleyfield, \$3,600; Lampman, \$5,000.

Saskatchewan and Alberta.—Approximately \$100,000 more will be available annually for school purposes in Saskatchewan and Alberta, as a result of land sales recently held under the direction of Frank A. Collins, inspector of school lands for Western Canada. In discussing these sales he says almost without exception the purchasers were farmers, speculators being noticeable by their absence. The terms on which these lands are sold is one-tenth cash with the balance in ten annual instalments and interest at 5 per cent. They are sold

by public auction and in no other way. In addition town lots were sold at Wymark, Sask., and brought \$6,155, making the total for all sales held under the jurisdiction for these sales, \$1,923,615.

Saskatchewan.—The following is a list of debenture applications granted by the local government board from September 5th to 8th, 1916:—

School Districts.—Cherry Grove, \$350. Paul Meinig, Rosemae; Buchanan, \$1,000. H. P. A. Hermanson, Buchanan; Leamington, \$800. W. A. Durie, Pasqua; Turtleford, \$1,600. C. A. Ayre, Turtleford.

Rural Telephone Companies.—Riverbank, \$12,000. S. H. Oughtred, Cabri; Candiac, \$6,500. J. Harrison, Candiac; Hubbard, \$10,600. R. H. Longmore, Hubbard; Wawota, \$6,000. John Birnie, Wawota; Velva, \$14,500. Lewis James, Cantuar; Kerrobert Southern, \$8,400. F. W. Ball, Kerrobert; Leslie, \$7,000. P. A. Howe, Kristner; Viewfield, \$8,500. J. A. Bouly, Viewfield; Bigford, \$5,400. F. A. McMillan, Bigford.

Villages.—Readlyn, \$500. P. O. Slater, Readlyn; Readlyn, \$1,000. P. O. Slater, Readlyn.

Ottawa, Ont.—The city has \$1,200,000 to its credit in the sinking fund account. At a meeting of the board of control Controller Fisher thought that it would be advisable to invest \$1,000,000 from this account in the new war loan. Mayor Porter advised that since it was possible the city would find it advantageous to take up the debentures of the Ottawa South sewers should the provincial government not see fit to change the rate of interest on these debentures from 5½ per cent. to 5 per cent, \$750,000 would be enough to invest in the new government loan. This was done and it will leave \$450,000 still in the fund. Half a million of the old loan will also be converted. The situation with regard to the Ottawa South sewer debentures is that they were first to bear 4½ per cent. interest. Then the condition of the money market was such that 5½ per cent. interest was considered advisable. Now the easing of money makes about 5 per cent. the most popular rate for investors. Whether the provincial government will agree to a further charge is a matter of conjecture, and if it does not, then it is considered that the city should itself buy them out of money in the sinking fund.

VANCOUVER'S FIRE LOSSES

Vancouver's fire loss for the month of August was \$1,784, according to Fire Chief Carlisle's report. The insurance loss was \$682, leaving the property loss above insurance \$1,102. The total value of property involved was \$96,770. The fire department responded to 29 alarms during the month as follows: Fires where damage occurred, 9; chimney fires, 2; false alarms, 3; smoke scares, 2; fires outside city limits, 1; small fires where no damage resulted, 12.

The following gives the causes of fires: Children playing with matches, 4; flying sparks, 3; match dropped in gas-line on floor, 2; unknown, 5; stump fires, 2; gas stove too close to wall, 1; spontaneous combustion, 1; electrical origin, 1; sparks from stove, 1; carelessness with cigarette, 1. Total number of alarms, 29; total property loss, \$1,784; insurance paid, \$682; loss above insurance, \$1,102; hose laid at fires, 7,950 feet; and chemical used, 483 gallons.

ELECTRICAL DEVELOPMENT COMPANY'S WRIT SET ASIDE

Upholding the clause in the Hydro-Electric Power Commission Act, which states that no action can be brought against the commission or any member thereof without a fiat first being obtained from the Attorney-General, Master-in-Chambers J. A. C. Cameron, K.C., last week at Toronto, set aside the writ issued by the Electrical Development Company against the Hydro-Electric Commission seeking for an injunction to restrain the commission from proceeding with the development of the Chippewa. In setting aside the writ and service thereof, the Master-in-Chambers said he saw no object in reserving judgment, as suggested by Mr. D. L. McCarthy, K.C., representing the Electrical Development Company. The former said he simply had to decide whether an action could be brought against the Hydro-Electric Commission without a fiat first having been secured from the Attorney-General. He decided that it could not.

SOME OF THE LOAN SUBSCRIPTIONS

List of Large and Small Purchases, Compiled by The Monetary Times

The war loan has been well oversubscribed. In the list of subscriptions printed below there is a total of \$94,503,900, including \$50,000,000 bank subscriptions. Without the banks, the total below exceeds \$44,000,000. Even if *The Monetary Times'* list of subscriptions represented as much as half of the total subscriptions to the loan aside from those of the banks—we are inclined to believe it represents less than half the total subscriptions—the general public subscriptions would be \$88,000,000. Adding the banks' \$50,000,000 would give a total subscription of \$138,000,000, representing an over-subscription of \$38,000,000. Such an oversubscription, judging by reports received by *The Monetary Times*, is quite possible, and will probably be found under the exact figures when they are made known by the finance department at Ottawa.

The list below includes very few subscriptions under \$50,000. The small subscriber, who is, as usual, the unknown factor in the loan, has taken in the aggregate a very substantial block. Many of the small subscribers to the first loan duplicated or increased their subscription and a number of new investors participated. A much larger percentage of the present loan will be in amounts of \$20,000 and less.

Not a great number of subscriptions by industrial companies have been announced. Nevertheless, these have been heavy, although many companies which subscribed considerable amounts to the first issue have not taken any of the present bonds, not being in a position to do so just now.

A large number of bond and investment houses have acquired substantial blocks of the loan, which they anticipate turning over at a profit during the next few months. Several of these appear in *The Monetary Times'* list below, but a number of the houses do not desire publication of the amounts they are taking. Municipalities, pension and benefit societies and similar organizations, and a number of small companies have subscribed a large sum in the aggregate, helping to bring about a marked oversubscription of the loan.

From figures compiled by *The Monetary Times* and printed on page 16, it is estimated that only about \$8,500,000 of the old bonds have been converted.

The following is a partial list of subscriptions to the war loan, compiled from reports direct to *The Monetary Times* and from other reliable sources.

Sir Thomas White last week expressed the hope that public bodies, financial, commercial and industrial, and other subscribers of large amounts will, on account of the great public interest in the war loan, notify the press of their subscriptions which, in the ordinary course of the mail do not reach Ottawa for some time after they are made.

Bank of Montreal	\$7,091,800
Bank of Commerce	6,647,000
Royal Bank	5,229,700
Sun Life Assurance Company, Montreal	5,000,000
Imperial Bank	3,401,900
Merchants Bank	3,101,800
Bank of Nova Scotia	2,880,500
Dominion Bank	2,658,800
Canadian Pacific Railway, Montreal	2,500,000
Union Bank	2,215,000
Bank of Toronto	2,215,000
Bank of British North America	2,156,500
Mackay Companies, New York	2,000,000
Montreal City and District Savings Bank	2,000,000
Bank of Ottawa	1,772,400
Banque d'Hochelega	1,772,400
The Molsons Bank	1,772,400
Manufacturers' Life Insurance Company	1,500,000
Mutual Life Assurance Company, Waterloo	1,500,000
Standard Bank	1,320,300
Bank of Hamilton	1,320,300
Quebec Bank	1,211,900

Massey-Harris Company, Limited, Toronto	\$1,200,000
Edward Brown & Company, Winnipeg; Wood, Gundy & Company, Toronto, joint account	1,000,000
Imperial Oil Company, Toronto	1,000,000

The Monetary Times was established in 1867, the year of Confederation. It absorbed in 1869 The Intercolonial Journal of Commerce, of Montreal; in 1870, The Trade Review, of Montreal; and the Toronto Journal of Commerce.

The Monetary Times does not necessarily endorse the statements and opinions of its correspondents, nor does it hold itself responsible therefor.

The Monetary Times invites information from its readers to aid in excluding from its columns fraudulent and objectionable advertisements. All information will be treated confidentially.

SUBSCRIBERS PLEASE NOTE:

When changing your mailing instructions, be sure to state fully both your old and your new address.

All mailed papers are sent direct to Friday evening trains. Any subscriber who receives his paper late will confer a favor by complaining to the circulation department.

THE WAR LOAN

Canada's second war loan of \$100,000,000 has been well oversubscribed. The subscriptions range from \$100 to \$5,000,000, representing investors large and small who have decided that by lending their money to their country, they are helping to bring peace nearer. As an investment, the Canadian war bond is the best in Canada. It is one of the best bonds to be bought anywhere. Behind it is a fertile country of great natural resources and possibilities of expansion. Behind it is the British navy, still mistress of the seas, considerate to neutrals, firm with enemies. Behind it are the men, the money and the determination to bring the war to a successful conclusion, for right and civilization.

The oversubscription of the first war loan issued in Canada in November last was, as we then said, a well-made silver bullet in the hide of Prussian militarism, autocracy and barbarism. The oversubscription of the present loan is another such bullet. Canada is willing to manufacture these bullets until peace is brought to the Empire and its Allies. The success of the loan is a further indication of our resolve to fight the war to a conclusive finish. It is one of a hundred similar incidents occurring every day in the Motherland and in the outposts of the Empire.

While Germany is making frantic efforts to have its fifth war loan subscribed, with the future dark and foreboding, defeat looming in the distance, the British Empire is raising, with comparative ease, hundreds of millions for the conduct of the war. The silver bullet is scoring heavily. The material at hand for its making is still sufficient to give the Hun an additional shiver.

Every home should have a war bond.

The oversubscription of the Canadian war loan is another notch nearer peace.

BRITISH COLUMBIA POLITICS

The defeat of the British Columbia government is a further lesson to those who compose our governments. The people are disgusted with politics which are machine-made and run. The party system in this country has acquired too many undesirable trimmings. Outside the circle of favored political friends is growing an independent vote. It will help to smash one government after another, whether federal or provincial, liberal or conservative, unless those governments cease winking at crooked business in high places and low, cease to ride roughshod over the national mood, and cease to put partisanship first and last. An increasing vote spurns the political feast and the crumbs from the table. That vote wants clean government by men of courage, action and foresight.

OUR LOAN REQUIREMENTS

The fact that the Dominion may issue a loan in New York next spring should not operate unfavorably against the market in New York for the war loan just subscribed. Canadian borrowing has been kept well in hand under the supervision of an astute finance minister, Sir Thomas White, who combines the admirable qualities of caution and courage so necessary for a finance minister in these strenuous days. The figures respecting our loan requirements, and printed in *The Monetary Times* recently, have been discussed in New York and apparently resulted in an incorrect story being issued in that market to the effect that the Dominion would shortly make application there for a large loan. Naturally, this elicited a statement from Sir Thomas White to the effect that the government had not considered such a loan. At the same time, an analysis of the position is of interest.

From April 1st, 1916, to March 31st, 1917, the Dominion government will raise by way of loans, from \$200,000,000 to \$225,000,000. The loan negotiated in New York in March accounted for \$75,000,000. Taking the maximum possible requirements of \$225,000,000, there is still to be raised during the present fiscal year \$150,000,000. Assurances were given by the federal government in connection with the \$75,000,000 New York loan that no further offering would be made in the United States during the current calendar year.

While Sir Thomas White has made an arrangement by which he can draw upon an authorized credit of \$150,000,000 established by the Imperial government, the Dominion government will endeavor to utilize this credit as little as possible, if at all. As we have voluntarily closed the United States money markets against our federal loans for the remainder of the year 1916, and as we are unlikely to draw upon the credit which the Imperial authorities have provided, there will be left to be raised by way of loans, in Canada during 1916, and in the United States during the first quarter of 1917, the sum of \$150,000,000.

As the present loan is for \$100,000,000 this leaves a sum of \$50,000,000 still to be raised in order to make up the total loan requirements for the current fiscal year. As our loans since the outbreak of war have alternated between Canada and the United States, with the exception of one loan made in London, it is quite probable that our next loan will be raised in New York and about March next.

IS A BLACKLIST COMING HERE?

Attention has been called in these columns to the fact that a blacklist of enemy firms has not been established in Canada. It will be recollected that more than two months ago the British government established a blacklist of United States firms with which citizens of the United Kingdom were forbidden to trade. Much unfavorable comment has been heard because Canada, as yet, has failed to follow the example. As it is illegal and undesirable for citizens of Great Britain to trade with these enemy firms, it is equally undesirable for Canadians to trade with them. The attention of the authorities at Ottawa has been called to this matter and it is pleasing to know that they are giving it consideration. It is scarcely too much to hope and anticipate that the Dominion, as a unit of the British Empire, will fall into line in this important matter as it has done in others.

NEED FOR ECONOMY

Economy is not being practised extensively in Canada. We are sharing the prosperity which war has brought to the American Continent. Prosperity is infectious. It does not always conduce to thrift. Men frequently save more when money is tight and the outlook is uncertain than they do when money is plentiful and the future assured. To-day the position here is the existence of temporary good times, dependent largely upon war orders. Peace will bring a jolt. How serious it will be, none can tell. Nor can we say what favorable factors will relieve the depression which must come with the strain of economic readjustment. These facts make economy imperative. Yet, as pointed out in the monthly commercial letter of the Canadian Bank of Commerce, even although their patriotism be undoubted, nevertheless many Canadians are aiding the enemy by thoughtlessly frittering away the profits and earnings due to a prosperity which may be suddenly arrested by the advent of peace. The trade returns continue to furnish evidence of the importation of many unnecessary articles and, to the extent that this is the case, our financial ability to resist the enemy is lessened. The words of Sir Charles Addis, in his address on "The Means of War Finance," apply to Canada as much as to the United Kingdom, when he says that people "do not understand that by the manner of their personal expenditure they may be determining whether the horrors of the conflict are to be prolonged or the blessings of peace anticipated. There does

not appear to be as yet any general or adequate recognition of the special responsibility for the right use of war earnings attaching to those whose prosperity depends upon the continued sacrifice of life and limb by their fellow-countrymen in the field. It is surely a small thing to ask of those who are restrained from joining the fighting line by the disabilities of age, or infirmity, or sex to make some sacrifice for those who are fighting their battles for them. Sacrifice! let us call it what it is—a privilege, perhaps the only privilege left to us."

SEED GRAIN LIENS

The Dominion government last year advanced relief to those in western Canada who lost their crops through drought, etc., in 1914. This relief was for furnishing food for settlers, feed for stock, and seed grain for land thoroughly cultivated. There had been advanced up to July 31, 1915, for seed grain \$8,534,018.37, and for other goods by way of relief and fodder for animals \$4,075,420.89, making a total of \$12,609,439.21. These loans were to be repaid not later than January 1st, 1916. The western crop was excellent and the prices for it high. The lending companies were hopeful that the government's advances would be repaid in order that the famous seed grain lien should live no more. This lien has worked great harm to Canadian credit.

In September last, the government decided to ask for payment of only one-half of the seed grain and fodder advances together with interest. As for the advances for other relief (in cases where both relief and seed grain and fodder had been provided) these were not insisted on last year. Where, however, no seed grain or fodder had been provided, but relief only, one-half of the amount advanced for relief was expected to be returned.

The seed grain liens given to the government by the western farmers apparently have still further adventures. At a conference last week, under the auspices of the Calgary board of trade, a unanimous vote was passed to the effect that those farmers who had not discharged their indebtedness shall be given until June 30, 1917, to pay up. After that date the holder of a mortgage on their property may pay off the lien and add the amount to the mortgage at the named rate of interest. It is good to know that President Wood of the United Farmers of Alberta emphatically declared at this meeting that with two good harvests, the borrowers of seed grain money should discharge their obligations.

The seed grain lien has such an erratic temperament and elastic conscience that we await with interest the arrival of June 30, 1917.

WEEKLY RAILWAY EARNINGS

The following are the earnings of Canada's transcontinental railways during the two weeks ended September 7th and 14th:—

Canadian Pacific Railway.

	1916.	1915.	Increase.
September 7	\$2,670,000	\$2,002,000	+ \$677,000
September 14	2,214,000	2,728,000	+ 514,000

Grand Trunk Railway.

September 7	\$1,276,061	\$1,091,711	+ \$184,350
September 14	1,054,808	1,263,620	+ 208,812

Canadian Northern Railway.

September 7	\$ 708,000	\$ 456,500	+ \$252,000
September 14	590,900	668,000	+ 77,100

The following are the Grand Trunk Railway reports for July:—

	1916.	1915.
Gross receipts	\$ 4,312,000	\$ 3,711,500
Expenses	3,001,000	2,576,000
Net receipts	\$ 1,311,000	\$ 1,135,500
From January 1st to July 31st:		
Gross receipts	\$25,935,750	\$22,712,000
Expenses	18,806,500	16,417,750
Net receipts	\$ 7,129,250	\$ 6,294,250

MUNICIPALITIES SUBSCRIBE TO LOAN

Sinking Funds are Invested in the New War Bonds—
Ottawa Heads List of Those Reported

A number of municipal bodies have invested in the war loan. Announcements of such subscriptions have been made in only a few cases. The following subscriptions of this nature have been reported to *The Monetary Times*: Ottawa, \$750,000; Brandon, \$400,000; Edmonton, \$250,000; Fort William, \$250,000; Montreal, \$192,000; Lethbridge, \$180,000; Calgary, \$125,000; Winnipeg, \$200,000; Hamilton, \$100,000; Westmount, \$100,000; Saskatoon, \$100,000; South Saanich, \$17,300; Brantford Township, \$5,000; and Brantford city, \$5,000.

Paid for in Cash.

Mr. Arthur F. Bell, secretary-treasurer of the city of Westmount, Quebec, states that the city has subscribed for \$100,000 of the new issue, which will be paid for in cash. It has also subscribed for \$21,000 and the sinking fund commission of the city is subscribing for \$39,000, or \$60,000 in all, of the new loan, for which old loan bonds will be exchanged.

"No part of the subscription of our city to the former war loan has been used for the present subscription to the new loan, which is to be paid out of the accumulated sinking fund of the city to the extent of \$100,000, and out of the Protestant board of school commissioners' fund, administered by our city, for \$92,000, in all, \$192,000." This statement was made to *The Monetary Times* by Mr. Charles Arnoldi, city treasurer of Montreal.

The subscription for war loan bonds as investments for Winnipeg city's sinking fund and the light and power department's depreciation funds were placed directly with the Bank of Montreal.

In Favor of Conversion.

Certain arguments in favor of conversion were heard at the civic board of control meeting at Ottawa when the board considered the amount of war loan for which it would apply. Having decided to take \$750,000 of the new loan, it was figured that in addition by converting the city's \$500,000 holding of the old loan the municipality would make \$2,600. For the casual investor this would be counteracted by the fact that while the new bonds take 15 years to mature, the old bonds mature in 10 years, and consequently the earlier bonds would probably sell at a higher price should the holder desire to convert them into cash during the period for which they run. This would not apply to the city, which has no intention of selling them. Then again it was thought that the longer the investment in 5 per cent. government bonds, the better. If the money were paid in 10 years, in all probability the city would not be able to reinvest the money at so good a rate. This was the chief reason for the city's decision to change to the long-period bonds.

LOAN AND MORTGAGE COMPANIES' SUBSCRIPTIONS

"It has not yet been decided what amount of old bonds will be turned in on payment of new bonds," said Mr. M. Aylesworth, secretary of the Huron and Erie Loan and Savings Company, London, to *The Monetary Times*, this week, "but in any event the amount of old bonds turned in will not exceed \$75,000. It is not improbable that we may put in our application for the whole \$350,000 of new bonds in view of the likelihood of the loan being greatly oversubscribed."

With their \$100,000 subscription to the present loan, the Guelph and Ontario Investment and Savings Society, of Guelph, are now holders of \$250,000 Canadian war loans, Mr. J. E. McElderry, the managing director, tells *The Monetary Times*.

Mr. Edwin Gissing, who for the past year has been agency supervisor of the London and Lancashire Indemnity Company, has been appointed assistant secretary of the company and will assist Secretary Howie in the underwriting and promotion of the company. Mr. Gissing is well known in casualty insurance circles in the United States and Canada. His many friends will be glad to hear of his promotion.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses
and Insurance

Aylmer, Ont.—September 7—Sanford Caverley's barn and horses. Loss, \$3,000. Cause, lightning.

Barrie, Ont.—September 8—Mrs. James Byrnes' stables and two barns. Cause, lightning.

August 29—James M. O'Toole's store and living-rooms. Loss, building, \$70; contents, \$50. Cause, gasplate too near wall. Insurance, building, \$3,000.

The principals in the Empire Paper and Pulp Company, which has taken over the pulp manufacturing plant at Swanson Bay which has been idle for some years, are interested in the British Columbia Sulphite Fibre Company. This company has a pulp plant at Mill Creek, at the head of Howe Sound, near Newport, which has been operating day and night for some time past. Those concerned are also interested in the Colonial Pulp and Paper Company which is under agreement to erect a pulp mill at Quatsino, west coast of Vancouver Island. Work is now proceeding.

The Bank of British North America

INCORPORATED BY ROYAL CHARTER.

The Court of Directors hereby give notice that an interim dividend, for the half year ended 31st May last, of 30 shillings per share, less Income Tax, being at the rate of 6 per cent. per annum, will be paid on the 6th day of October next to the Proprietors of Shares registered in the Dominion of Canada.

The Dividend will be payable at the rate of exchange current on the 6th day of October next to be fixed by the Managers.

No transfer can be made between the 22nd inst. inclusive and the 5th prox. inclusive, as the books must be closed during that period.

By order of the Court,

JACKSON DODDS,
Secretary.

No. 5 Gracechurch Street,
London, E.C.,
5th September, 1916.

The Molsons Bank

144th DIVIDEND.

NEW INCORPORATIONS

Seventy New Charters—Total Capitalization of Over
\$14,000,000

Canada's new companies incorporated this week number 70. The head offices of these companies are located in seven provinces. The total capitalization amounts to \$14,366,200.

The largest companies are:—

Canada Light, Heat and Welding Company, Limited	\$1,000,000
Gold King Mines, Limited	1,500,000
Gold Pan Mines, Limited	3,000,000
Porcupine-Nighthawk Mines, Limited	1,000,000
The Russo-Canadian Mining Corporation, Limited	1,000,000
Porcupine North Star Gold Mines, Limited	2,500,000
United Zinc and Feldspar, Limited	1,000,000

Grouping the new concerns, according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Ontario	23	\$ 6,881,800
Quebec	17	2,009,400
British Columbia	4	285,000
Manitoba	10	4,800,000
Alberta	13	311,000
New Brunswick	2	69,000
Prince Edward Island	1	10,000
	70	\$14,366,200

The following is a list of charters granted during this week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Vegreville, Alta.—Worth and Holden, Limited, \$20,000.

Oyen, Alta.—Quinn Grain Company, Limited, \$20,000.

Killam, Alta.—The Eagle Lumber Company, Limited, \$20,000.

Ponoka, Alta.—The Bird Drug Company, Limited, \$10,000.

Calgary, Alta.—Alberta Farm Operators, Limited, \$20,000.

Victoria, B.C.—Main and Eastern Land Company, Limited, \$200,000.

Medicine Hat, Alta.—The Rosery Flower Company, Limited, \$10,000.

High River, Alta.—The High River Hardware Company, Limited, \$35,000.

Irma, Alta.—The Farmers' Mutual Lumber Company, Limited, \$20,000.

Gold Lake, Alta.—The Cold Lake Development Company, Limited, \$25,000.

Chinook, Alta.—The Ontario and Western Canada Cattle Company, Limited, \$100,000.

Port Arthur, Ont.—Waupaca Company, Limited, \$100,000. H. Keefer, G. A. McTeigue, J. A. Duffy.

Elora, Ont.—Canadian K. K. Company, Limited, \$40,000. K. W. Goetz, C. L. Dunbar, J. Sutherland.

Quebec, Que.—Les Obligations Canadiennes, Limitee, \$20,000. O. Hamel, L. P. Morin, J. A. Morin.

Camden East, Ont.—Haupt Paper Mills, Limited, \$100,000. L. F. Haupt, W. E. Haupt, E. A. Crippen.

Kitchener, Ont.—Kitchener Buttons, Limited, \$50,000. E. H. Schlee, E. W. Clement, Rubie M. Fisher.

Brandon, Man.—Brandon Grain Company, Limited, \$40,000. D. D. Robinson, T. C. Scott, J. G. Gibson.

Saint George, N.B.—Meating Epps Company, Limited, \$20,000. H. Meating, C. A. Epps, G. F. Meating.

Batiscan, Que.—Jackson Construction Company, Limited, \$30,000. A. Dufresne, B. Melançon, A. Dufort.

Brockville, Ont.—International Metal Works, Limited, \$30,000. W. G. Jarman, E. L. Wright, A. G. Green.

Dauphin, Man.—Cameron and Heap Company, Limited, \$100,000. W. G. Cameron, M. K. Heap, F. V. Witts.

Farm Point, Que.—Toy Products of Canada, Limited, \$50,000. J. S. Dingman, Lottie White, E. Honeywell.

Nestorville, Ont.—Bishop Lumber Company, Limited, \$300,000. H. H. Bishop, H. W. Bishop, J. A. Bishop.

Simcoe, Ont.—The Ardrea Telephone Company, Limited, \$1,800. T. Swindle, R. W. Holmes, G. R. Hewitt.

Prince Edward Island.—P.E.I. Memorial Stone Company, Limited, \$10,000. L. Sharp, D. F. McNeill, C. Gallant.

Kingston, Ont.—The McCallum Granite Company, Limited, \$40,000. T. E. Burns, A. B. Cunningham, Emma M. Argue.

Woodstock, N.B.—The New Brunswick Potato Exchange, Limited, \$49,000. G. G. Porter, G. H. Hatfield, A. D. McGain.

Shawinigan Falls, Que.—La Compagnie des Terrains et Constructions de Shawinigan Falls, \$24,500. N. Farley, J. A. Frigon, R. Frigon.

Edmonton, Alta.—Kenway, Limited, \$10,000; United Coal Company, Limited, \$1,000; the Standard Furnishing Company, Limited, \$20,000.

Vancouver, B.C.—H. M. Ellis, Limited, \$50,000; Samac Securities, Limited, \$10,000; the Princess May Hydraulic Mining Company, Limited, \$25,000.

OLD LOAN CONVERSIONS

About \$9,000,000 May Have Been Converted, Plus the New \$100,000,000

Information as to the amount of the old war loan which has been converted into the new loan, is not easily ascertained. In the case of 55 of the many subscriptions to the current loan reported to *The Monetary Times*, the actual new cash subscribed was \$22,267,000 plus \$1,735,000 of old bonds converted. Roughly, that is equal to \$2,000,000 of converted bonds for every \$22,000,000 of new money, if these 55 subscriptions are a fair reflection of the general results. In that event, the full subscription of \$100,000,000 of the new loan would have brought with it approximately \$8,500,000 of converted bonds in addition. The conversion privilege in the old loan has not been freely exercised. The finance department at Ottawa knows exactly the amount so converted and will probably announce the figures later.

The following table, compiled by *The Monetary Times*, gives details of certain subscriptions to the present loan with a note as to how much of the old loan was converted in addition:—

Purchaser.	New subscription to pre-sent loan.	In addition, the amount noted below, was converted.
Canadian Home Circles'	\$ 40,000	None
Canadian Order of Foresters	300,000	\$ 300,000

Globe and Rutgers Insurance Company	50,000	None

Purchaser.	New subscription to pre-sent loan.	In addition, the amount noted below, was converted.
Prudential Insurance Company, Newark	\$ 700,000	None
Ogilvie Flour Mills Company	250,000	None
Sun Life Insurance Company	5,000,000	None
Canada Permanent	250,000	None
Totals	\$22,267,000	\$1,735,000

While there is no conversion privilege in the present war loan, it will be recalled that in the case of the issue of November, 1915, the following privilege was given:—

"In the event of future issues (other than issues made abroad) being made by the government, for the purpose of carrying on the war, bonds of this issue will be accepted at the issue price, 97½ plus accrued interest, as the equivalent of cash for the purpose of subscriptions to such issues."

As stated in *The Monetary Times* last week, the conversion privilege was probably attached to the first war loan to help place beyond doubt the success of the issue. Had the Dominion government foreseen the possibility of the remarkable over-subscription of the first loan—something which no one could foresee—the conversion privilege would not likely have been attached to the loan.

The total allotments of bonds of the present issue will be limited to \$100,000,000, exclusive of the amount, if any, paid for by the surrender of bonds as the equivalent of cash under the terms of the war loan prospectus of November 22nd, 1915. The Dominion government, therefore, will obtain \$100,000,000 of new money by the full subscription of the present loan.

Thought Former Loan Better.

In many cases, holders were not desirous of converting the previous loan because the first loan was deemed the more desirable of the two, as it is convertible, not only into the present loan, but also into any future loan and there is a possibility (opinions differ as to how remote) of future loans being issued to yield a higher rate. This view apparently caused many to retain intact on their books their subscriptions to the first loan.

No commission to bankers or brokers is being allowed in respect of the amount of any allotment of the new bonds paid for by the surrender of the old bonds. The bonds of the first war loan are accepted by the government at 97½ as equivalent of cash for future war loan issues.

CANADA'S WEEKLY BANK CLEARINGS

The following are the returns of Canada's bank clearing houses for the weeks ended September 14th, 1916, and September 16th, 1915, with changes:—

TORONTO HYDRO-ELECTRIC REPORT

Commission Awaits Working Capital from City— Financial Position as at 31st December, 1915

The cost of getting and promoting new business has been met out of the year's income, according to the fifth annual report of the Toronto Hydro-Electric Commissioners. The financial position of the commission as at December 31st, 1915, was as follows:—

The gross income amounted to the sum of....	\$1,620,187.60
The cost of electric current and the expenses of operation and management, including repairs and maintenance, absorbed the sum of.....	979,208.75
Leaving a surplus of income on operating account for 1915 of	\$ 640,978.85
Charges and allowance not strictly attributable to the operating expenses for the year 1915, and reserves for contingencies and grants for patriotic purposes, absorbed the sum of	13,773.28
Leaving surplus income available for fixed charges of	\$ 627,205.57
Interest, depreciation and sinking funds for the year absorbed the sum of	624,067.78
Leaving a surplus of net income of	\$ 3,137.79

Net Surplus on Operations.

When the charges for interest, depreciation and sinking funds for the year, amounting to \$624,067.78, are deducted from the surplus income on the year's operating account of \$640,978.85, a net surplus on the year's operations of \$16,911.07 appears. Of this surplus, the sum of \$13,773.28 was absorbed by charges and allowances as above stated, not strictly attributable to the operating account for the year, thereby leaving a final net surplus after providing for all charges of every kind of \$3,137.79.

Nothing has been charged to capital expenditure that should have been charged to revenue, say the commissioners. The enterprise has, therefore, again fully paid its way and earned a small surplus after making full provision for contingencies, and after dealing in the most conservative manner with the accounts.

The net income available for fixed charges represents approximately 9½ per cent. upon the average amount of capital invested in the fixed plant during the year.

Not Paid Yet.

The interest due and accrued in favor of the corporation of the city of Toronto, while fully earned, has not yet been paid owing to the fact that no provision has yet been made by the city for the necessary working capital of the system as distinct from construction capital, and to the fact that the net proceeds of the debenture issues, so far received from the city, do not cover the net expenditure on construction account.

Of the sinking fund instalments which accrued during the purely construction period ended December 31st, 1911, a balance amounting to the sum of \$93,733.96 is still carried forward as a charge upon future surplus earnings. But for the reduction in rates this amount would have been covered ere this.

The net cash expenditure on construction account amounted at the end of the year to the sum of \$5,897,627.82, while the net cash proceeds of the debenture issues received from the city to the same date amounted to the sum of \$5,287,589.44. The sum required from the city, therefore, at the end of the year to meet the construction expenditure to that date amounted to \$610,038.38. This amount will be received from the city in due course out of the proceeds of the balance of \$350,000 of debentures authorized by certain city by-laws.

Temporary Use of Reserve.

Pending provision by the city for the necessary working capital of the system, the commissioners have been compelled to employ the depreciation reserve funds for working capital purposes. These funds were established for the purpose of replacing the existing plant and equipment as they wear out, and as the need for replacement arises, they will be required for that purpose.

The finance commissioner of the city of Toronto has advised that whenever in the future debentures require to be issued by the city for the purpose of purchasing physical plant or equipment, such debentures shall be limited as to their term to the estimated wearing lifetime of the structures for the purchase or construction of which they are required; and that while market conditions make it profitable to do so they shall be issued in serial form, that is, providing for the payment yearly of stipulated parts of the whole. An impression seems to have been formed here and there in the public mind, says the Toronto Hydro commissioners' report, that as a result of this new policy, if it should be adopted, the Toronto Hydro-Electric system will no longer require to maintain depreciation or replacement funds for the purpose of renewing the existing plant as it wears out. "As this impression is wholly erroneous," continues the report, "it may be well to add a word of explanation as to the need for maintaining depreciation funds as heretofore.

Set Aside from Earnings.

The commissioners set aside out of earnings from year to year the following sums, viz.:—

"(1) The amount necessary to meet all interest on the debentures issued for the purpose of the hydro-electric enterprise;

"(2) The amount necessary to constitute a sinking fund which, accumulating at a given rate of interest, shall be sufficient to pay off the debentures at maturity; and

"(3) The amount necessary to accumulate by the end of the wearing lifetime of the plant a fund sufficient to replace the same without making any further demand upon the city for new issues of debentures for replacement purposes.

Effect of Policy.

"The effect of this policy is, in short, to meet out of earnings the accruing annual interest charges, the accruing annual sinking fund requirements, and to entirely replace all plant at the expiration of its wearing lifetime without any further call upon the city. These are standing obligations which cannot be avoided. The first two are lawful obligations which can be enforced upon the commissioners. The last is an obligation of sound policy and sound finance, designed inter-alia to prevent the accumulation of city indebtedness for hydro-electric construction to such a level as might in time affect injuriously the credit of the city. It is obvious that if the policy of establishing and maintaining depreciation funds of the character described were abandoned, the commissioners would require to make application to the city from time to time, not merely for the issue of debentures to cover the extension of the plant, but also for the issue of debentures to cover the replacement of existing and future plant as such wears out. Hence the new policy with regard to future issues of debentures which the city has been advised by its finance commissioner to adopt has no bearing upon the duty of the hydro commissioners to maintain depreciation funds on such a scale as will prevent, in the interest of the city's credit, a perpetually increasing debt for hydro-electric purposes."

NEW CANADIAN PACIFIC DOCK AT VANCOUVER

Construction of a new pier is to be undertaken at Vancouver by the Canadian Pacific Railway. It has now Pier A, at which transpacific boats dock, and Pier D, at the end of Granville Street on Burrard Inlet, which is used by the Victoria and Seattle boats, in addition to its main docks. The new pier will be known as Pier B. It will run 800 feet out into the water at the end of Burrard Street, and will be used for both local and transpacific freight. This wharf will be larger and better than any other here, with the most modern apparatus and improved devices to expedite and facilitate the loading and discharging of vessels. It was proposed a short time ago to proceed with the construction of Pier C, and soundings were made, but the plans have been changed in view of what is believed to be the greater demands of the future. The company evidently sees considerable business in sight, and as Mr. F. W. Peters, the company's general superintendent in this province, remarked, "The Canadian Pacific Railway wants to be able to provide facilities for any vessel coming into this port, and to be a little ahead, if anything, of the actual needs."

CANADA'S TRADE WITH BRITAIN

Tariffs and Transportation Are Discussed in London by Our Trade Commission

(Staff Correspondence.)

London, England, September 5th.

The members of the Canadian trade commission, Messrs. J. W. Woods (president), Theo. H. Wardleworth (vice-president), Frank W. Hathaway, H. Edmond Dupre, Frank Pauze, George W. Allan, and Roy Campbell (secretary), recently attended a meeting of the London Chamber of Commerce, England.

Mr. J. W. Woods, president of the commission, said the objects of the commission were, first of all, to see that Canada increased her exports, and that Canada sold just as much as she possibly could of her products to Great Britain, France and Italy. Their instructions were also to see that every dollar's worth of goods formerly obtained from Germany and Austria should be got, first within the empire, and secondly from our Allies.

Canada had problems such as no other country ever had. When reciprocity was before them some years ago, he thought it a good thing, but when Mr. Taft's letter to Mr. Roosevelt came out in which he announced that reciprocity would have made Canada an adjunct to the United States, he thought a second time. The longer he thought about it, the more convinced he was that reciprocity would have had the tendency of driving Canada towards the United States.

The United States was being made rich by the war, and when the war was over there would be an abundance of cheap money in America; her labor market would not be upset; she would not have a national debt or a burden of taxation to bear, and there was no doubt at all that the United States would be able to compete far better after than before the war. The United States and Japan would be able to manufacture so cheaply that it appeared to him that Great Britain would be compelled, in self-defence, to take those circumstances into consideration. In France and Italy, they had found a desire for graduated tariffs, a general high tariff for enemy countries, a low tariff for the Allies, with an intermediary tariff for neutrals. They had been repeatedly asked in France and Italy, "What is Britain going to do?" He believed it would be wise for the British policy to be decided upon and announced.

Take Tariffs out of Politics.

The Toronto board of trade had for some years urged for the appointment of a permanent tariff commission, as it did seem to be the height of folly that tariffs and other questions of such vital importance to the welfare and future of a State should not be lifted right out of politics and treated in a sane, sensible and scientific way. After the war, when hostilities ceased, there would be a period of armistice, while peace terms were being arranged, which would be dangerous and full of difficult problems, and they ought to know just what policy was intended to be followed.

Germany had revealed herself in such a light that they in Canada were going to cut her out entirely. There were raw materials that came from Germany which were essential to their industries, and they felt that such industries should not be allowed to suffer. If Germany made better dyestuffs than could be got from Great Britain or any other quarter, and Great Britain refused to use German dyestuffs, while the United States used them, then in the open markets of the world undoubtedly goods dyed with the German article would sell best. That and similar problems would arise and would tax the minds of the wisest of their statesmen, and they thought that passion and prejudice should be kept entirely on one side and that whatever was done should be done in the light of reason and commonsense.

Difficulties of Transportation.

Mr. T. H. Wardleworth, after outlining some of Canada's potentialities and the effect of the surtax in past years on Germany's trade with Canada, suggested that the question of transportation might merit more than the attention of the transportation and shipping companies. In connection with shipping goods to Canada from London, or Liverpool, or Bristol, there was some means or other by which that traffic was made to carry all that it would bear, and sometimes more. A trade or a manufacturing proposition depended largely upon its power to move its product to the point of consumption. If they imposed between the wheat and the consumer, and

between their textiles, cutlery or other products and the consumer in Canada, a rate of transportation which was prohibitive, they were shutting down the channels of life between the different parts of the Empire. He therefore asked them to give the question of transportation their most earnest consideration. Canadian manufacturers had frequently found that it had been possible to buy things from Germany to better advantage, not because they were better in quality, not because they were cheaper in price, but because the rate of freight was more advantageous. A country which boasted of its mercantile marine, which boasted that its flag flies on every sea, should not be a country which strangled trade between different parts of the empire. He believed that an easy and reasonable method of transportation was one of the important factors which would bind the empire together in all parts for all time.

What Britons Think.

Mr. Faithful Begg, in his remarks after the addresses of the Canadian Commission, said: "We had a wobbling government to begin with, and a strong undercurrent of copper-bottomed free trade, which was going to prevent in a large measure, and altogether, if possible, the realization of such a tariff as Mr. Woods had indicated. But so far as the London chamber of commerce was concerned, the position was thoroughly sound. They had an influential committee sitting for some time, and their recent report laid down the basis of a triple tariff which was to be most favorable inside the empire, less favorable between Britain and the allies, and what he hoped was a penal tariff as against Germany. He did not believe in the possibility of taking tariffs out of politics. The chance of debate and creating discussion were so great that he thought few of them would live to see it done."

Ad Valorem Duty.

Mr. H. L. Symonds drew attention to the question of packing. It was obvious that goods sent from the United Kingdom to Canada had to be more carefully and more expensively packed than goods going from the United States to Canada. There was a large duty on packages entering Canada, and he ventured to suggest that the Canadian tariff should be modified with a view to a fair and more equitable arrangement as between the United Kingdom and the United States. Another point raised by Mr. H. L. Symonds was that in spite of the preference to manufacturers of the United Kingdom, the trade statistics showed that while the average ad valorem duty on goods sent from the United Kingdom to Canada had risen during the past fifteen years from 24 to 25 per cent., that on United States goods had fallen from 25 to 24 per cent. That showed that the Americans had had the commonsense to pick out and concentrate their efforts upon those lines of trade with Canada which paid the lowest rates of duty. He hoped that the Canadian authorities would bear that point in mind when dealing with any revision of their tariff.

Mr. J. W. Woods, replying to the points raised in the discussion, said, with regard to the duty on packing, that there were certain lines of low-priced goods which must be fairly substantially packed, and it was found that the packing came to as much as 5 per cent. of the amount of the bill. The only way to overcome that was to charge the duty, but he would say that the Toronto board of trade had tried without success to get the government to waive that import duty. The increase in the average duty on British goods, compared with the decrease in the case of the United States, was explained by the fact that Canadian industry was growing very rapidly and they were using more raw materials, while the prosperity in Canada made a market for tropical fruits and vegetables from the south. The British preference was a flat one of 33 1/3 on everything, and no matter what the figures showed he had personal knowledge that the preference did help to admit British goods, while, at the same time, the surtax was shutting out the German.

SHIPBUILDING ON PACIFIC COAST

At the Wallace Shipyards, North Vancouver, work is going ahead on several wooden boats, while at the main yards of the company construction is proceeding on a steel steamer. At the newly-established yards of the Cameron Genoa Mills Shipbuilders, Limited, Victoria, the keel of the third auxiliary schooner was laid recently. These wooden boats are destined as lumber carriers. If satisfactory arrangements can be made with the city, the Vancouver Shipyards, an old-established firm on Coal Harbor, proposes to extend its plant and construct steel steamers.

ONTARIO POWER SITUATION

London Financier Says Action of Dominion Parliament is Awaited

The following article on the Ontario power situation appeared in a recent issue of the London Financier:—

British capital has been so freely subscribed towards the development of Canada's industries that investors on this side have every reason to expect that their interests are properly safeguarded by the Dominion and provincial legislatures. Hitherto it has been taken for granted that this would be done, but, unfortunately, there is now reason to fear that there is one of the provincial governments whose good faith can no longer be relied upon. We refer to the government of Ontario, whose treatment of British capital invested in the electrical power industry can only be described as arbitrary and unjust. The dispute between the government and the power companies is of many years' standing, but it has now reached a point when it has ceased to possess merely local significance. The reputation, not only of Ontario, but of the Dominion government for fair dealing towards British investors is at stake. We may go further and say that this is a test case, involving the right of individuals to protest against the repudiation of agreements solemnly entered into by the State. While the empire is fighting for the principle that treaties between nations are sacred and cannot be torn up as mere scraps of paper, we cannot afford to shut our eyes to acts of injustice perpetrated by a petty provincial legislature which happens to have been captured by demagogues.

In such a case the group of citizens who consider themselves to have been wronged should surely have the right of appeal to a higher authority. That has so far been denied them, though there is reason to hope that when the facts become fully known and appreciated such a storm of indignation will be aroused as to compel the repeal of the unjust legislation which has been the cause of the trouble. Already we have reason to believe that the Ontario power scandal has created grave concern in Canadian financial circles, and this will no doubt be shared by British investors in Canadian undertakings when the position is fully appreciated.

Recital of Facts.

Briefly, the facts are as follows: In 1903 the executive government, through the Niagara Falls Park Commissioners, entered into agreements with certain companies, among them the Ontario Power Company and the syndicate which afterwards became the Electrical Development Company of Ontario. In general terms these agreements permitted the respective companies to take specified quantities of water from the Niagara and Welland rivers for specified rentals payable to the commissioners. The latter bound themselves not to lease similar powers to any other "company or person" at less rentals than those payable under the agreements by the companies in question. The commissioners also undertook that they would not themselves make use of the water to generate electric or other power, except for the purposes of the park or in the event of failure on the part of the licensees to carry on the work. On the faith of these agreements, duly ratified by the government and the provincial legislature, the funds necessary for the prosecution of the enterprise were procured, mainly from British investors, and the construction of the plant was effected. In 1905 two companies were actually engaged in the production and distribution of power, and a third, the Electrical Development Company, was in course of installing its plant for the production and distribution of 125,000 horsepower. The latter company encountered great engineering difficulties in the construction of its plant, and had not yet begun to distribute, when an agitation arose for the production of cheap electrical power by the municipalities of Ontario. The Hydro-Electric Commission, which was appointed by the Government, embarked upon the distribution of power in competition with its own licensees. This action aroused much uneasiness among investors, but worse was to follow.

Virtually Confiscatory Acts.

In the session of the legislature of 1916 the government passed what are virtually confiscatory acts. The principal objectionable features in this legislation are the explicit abrogation of a contractual undertaking between the government and the power companies in respect to the taking of water and the production of power and the inquisitorial

functions which are for the first time entrusted to the Hydro-Electric Commission. Notwithstanding the provision in the original contract, the act of 1916 expressly empowers the government commission to use the waters of the Niagara or Welland rivers, and to construct the necessary works for the generation of electrical energy. These measures were forced upon the legislature at the very close of the session, at a time when the war was distracting public attention, and were not adequately discussed. Their effect is to prepare for the elimination of private enterprise in electrical distribution, to establish a monopoly in favor of the Hydro-Electric Commission, and to increase enormously both provincial and municipal indebtedness. The commission is proposing to expend between 20 and 30 million dollars for a power plant on the Chippawa River, where it joins with the Niagara River above the Falls, and ten million dollars for a further transmission line, besides contemplating the construction of hydro-radial railways through the province. While light-heartedly entering into these huge financial commitments they adopt a course towards the existing companies which is calculated to make capital give the province of Ontario a very wide berth for many years to come.

Above the Law.

It may be said that the companies threatened have their remedy in the law courts, but the Hydro-Electric Commission claims to be above the law. The act by which it was constituted provides that the commission is immune from process of law excepting through a fiat of the provincial attorney-general. This fiat has been thrice refused, but the matter will not rest here. The Dominion parliament will be asked to intervene, and to disallow the arbitrary legislation of Ontario. But it is difficult, as Professor Mavor points out in an article in the Financial Post of Canada, to call into question the acts of an executive government, owing to the legal fiction of the irresponsibility of the Crown, which on this occasion is transferred with extremely doubtful propriety to a small and not very stable group of party politicians.

Is a Grave Affair.

It is a really grave affair, says the Professor, to call their proceedings in question, no matter how injuriously these proceedings may affect either private interests or the public interests of the state. The more arbitrary its actions the more tenaciously will the authority which commits them refuse to have its proceedings called in question. But there is, fortunately, a higher power in the land than the government of Ontario, and we await with confidence such action on the part of the Dominion parliament as will compel the suspension of the confiscatory legislation pending a reference of the whole case to the Privy Council of the empire, which is the one legal authority competent to decide upon the grave issues involved.

IDEAL CIVIC GOVERNMENT

That the Dominion government be urged to appoint a commission of municipal experts or to establish a national bureau of municipal research, whose duty it will be to advise upon an efficient form of civic government, and after taking the necessary steps for its adoption throughout Canada to systematize, investigate and advise upon all municipal matters, was the plea of a resolution proposed by Mr. C. J. Yorath, city commissioner of Saskatoon, at the recent annual convention of Canadian municipalities, Montreal. The resolution also drew attention to the necessity of urging the provincial governments throughout Canada to establish commissions or local government boards, similar to the local government board of Great Britain, whose duty it will be to supervise civic development and the expenditure of capital moneys by local authorities within their respective provinces.

Mr. Yorath read at this convention an instructive paper on the ideal form of civic government. He suggested that the principles which should be recognized in order to obtain successful civic government and development are: 1. Popular control by proper representation. 2. Division of government authority into (a) legislative and financial; (b) administrative; and 3. Experienced control of administration and development.

Mr. Yorath's paper has been printed in pamphlet form and will prove of considerable interest to municipal authorities.

BANK SUBSCRIPTIONS TO LOAN

They Agreed to Subscribe \$50,000,000—How Allotments Were Cut Last Time

Before the subscription list for the war loan was opened on September 12th, the chartered banks had agreed to subscribe \$50,000,000 to the loan. Each bank is subscribing approximately 46 per cent. of its paid-up capital.

The Dominion government issued in August \$30,000,000 three-months bills. These were taken by the banks in anticipation of the present loan. A payment of 70 per cent. on account of these bills was made on August 1st and the balance was paid on September 1st. As this loan is repayable on November 1st, the loaning banks will not be inconvenienced through a diminution of crop moving funds.

Allotments and Subscriptions.

The following table shows the final allotments of the first war loan in November last to the various banks, together with their subscriptions to the present loan:—

Bank.	Allotment in former loan.	Subscription to present loan.
Bank of Montreal	\$ 3,134,300	\$ 7,091,800
Quebec Bank	514,500	1,211,900
Bank of Nova Scotia	1,286,600	2,880,500
Bank of British North America ..	953,600	2,156,500
Bank of Toronto	979,700	2,215,600
The Molsons Bank	784,900	1,772,400
La Banque Nationale	300,000	886,200
Merchants Bank of Canada	1,372,400	3,101,800
La Banque Provinciale du Canada ..	195,900	443,000
Union Bank of Canada	986,400	2,215,600
Canadian Bank of Commerce ..	2,938,700	6,647,000
Royal Bank of Canada	2,273,100	5,229,700
Dominion Bank	1,200,900	2,658,800
Bank of Hamilton	587,600	1,329,300
Standard Bank of Canada	857,800	1,329,300
La Banque d'Hochelaga	350,000	1,772,400
Bank of Ottawa	857,800	1,772,400
Imperial Bank of Canada	1,372,400	3,101,900
Home Bank of Canada	260,000	862,400
Northern Crown Bank	300,000	632,800
Sterling Bank of Canada	165,000	534,800
Weyburn Security Bank	70,000	154,000
Totals	\$21,741,600	\$50,000,100

Thanks to the Banks.

Following the completion of his arrangements with the banks as to the services to be rendered by them in connection with the loan, Sir Thomas White on September 8 wrote to Mr. E. L. Pease, senior vice-president of the Bankers' Association, as follows:—

"I desire to express through you to the association my deep appreciation of their action in connection with this loan. Since the outbreak of the war I have met with nothing on the part of the banks but a cheerful and patriotic willingness to assist and co-operate with the Dominion government in every way possible, and I need not say of how great assistance and encouragement this has been to myself, confronted as I have been with financial problems of, to us, unprecedented magnitude and responsibility. The conduct of the banks during this trying period has been deserving of all praise, and I cheerfully pay the association my tribute of appreciation and gratitude."

Allotment to be Cut.

The minister of finance will probably follow the same course in respect to the banks' subscriptions as was adopted in the case of the first loan—namely, that subscriptions from the general public will be given priority of allotment over those of the banks. In other words, the banks will be allotted only as much as is not taken by the general public. The original amount subscribed by the banks to the first issue was \$25,000,000, but owing to the success of the loan the amount was reduced to the total noted above.

The banks have also arranged with the Canadian finance minister for several advances to the Imperial authorities for the purchase of war munitions and supplies here. These advances total to date \$100,000,000.

LOAN PURCHASED IN UNITED STATES

Our Bonds are Favored—Mortgage Companies' Subscriptions

Considerable blocks of the loan were purchased by United States bond dealers. They have subscribed with the idea of turning it over at a profit. This will, in due course, make the loan a fair trading issue in the United States.

Discussing the favor in which the loan is held in the United States, a New York dispatch says: "First, in the opinion of many investors, a loan made to the Dominion is not strictly a loan to a belligerent government; second, some feel that Canada is not likely to be invaded by the enemy; third, the geographical proximity of Canada to the United States takes the Dominion out of the class of 'foreign' nations in the conception of many investors, and, fourth, sentiment in this country is such that the average United States investor is more friendly disposed towards Canadians than to the people of the European belligerent countries."

Manitoba's Subscription.

In connection with the Manitoba subscription of \$500,000 to the loan, Hon. Edward Brown, provincial treasurer, made the following announcement: "Believing that the people of the province would heartily endorse our action, the government has, after due consideration, decided to invest a half million of trust funds of the province in the Dominion war loan. These moneys are, at the present time, on deposit with the banks, earning at the rate of 3½ per cent. on daily balances. The investment will mean that the earnings will be materially increased. Two hundred thousand dollars of the sum in question will be taken from the sinking funds of the drainage districts, and three hundred thousand from the telephone replacement moneys."

The following telegram, notifying the Dominion minister of finance of Manitoba's decision, was sent to Ottawa: "The response to your announcement here has been very gratifying. Kindly accept my best wishes for the success of the issue. Desiring to have a share in the matter, and as an evidence of our goodwill, the government of Manitoba has subscribed for \$500,000 as an investment for trust funds. (Signed) Edward Brown, provincial treasurer." Manitoba was the first province in the Dominion to subscribe to the loan.

Mortgage Companies' Subscriptions.

The Toronto Mortgage Company have subscribed \$125,000 to the various government war loans, this being equal to one-sixth of the capital of the company.

The Guelph and Ontario Investment and Savings Society subscribed for \$100,000 of the present loan. This together with their former purchase makes a holding of \$250,000 of the Canadian war loans held by the company.

Mr. J. Massey, joint general manager of the Canada Permanent Mortgage Corporation, which is subscribing \$250,000 to the loan, tells *The Monetary Times* that a good many of their depositors are also investing in the loan. "We expect to have," he said, "at least \$150,000 to \$200,000 drawn from our savings accounts for the loan."

CROPS ARE WORTH MORE THIS YEAR

On the basis of current prices the value of the chief cereal products, wheat, oats and barley, will be 37.6 per cent. above the average of the years 1910 to 1915 inclusive. The estimated production of these grains is 567,411,100 bushels, the value of which is \$455,034,403 as compared with an average for the same products in the last six years of \$330,647,633. At present thrashing operations are proceeding under favorable weather conditions and the returns are slightly better than anticipated. In the southern sections of the western provinces, excepting Alberta, rust during August materially damaged the wheat crop, reducing both grade and yield much below the estimate made at the close of July. In the case of other grains the yield is below the average, but values are much higher. Fruit growth in Nova Scotia and British Columbia is normal, but lack of rain elsewhere is having serious effects in reducing the yield as well as the quality. The hay crop all over Canada is extraordinarily heavy, and has given a stimulus to dairying at a time when its products are bringing unprecedentedly high prices.—Canadian Bank of Commerce.

1867-1917

1917 - Monetary Times Annual - 1917

FOUNDED in 1867—the year of Confederation—The Monetary Times has been published continuously and successfully ever since, and thus has rounded out fifty years of constructive financial and commercial journalism.

During the past half century it has been more intimately linked with the commercial and financial development of Canada than any other one paper.

Through its regular issues, and more particularly through the medium of the Annual it has played no small part in placing before those, all over the world, who have potential interest in Canada, either from a manufacturing or investment point of view, reliable facts concerning the opportunities which Canada holds out to capital and enterprise.

Read what a few of Canada's leading financiers and manufacturers have to say about The Monetary Times Annual.

PERSONAL OPINIONS.

"I can find much to commend and nothing to criticize in 'The Monetary Times Annual.' The general appearance, subject matter and letterpress seem admirable."—Sir F. Williams-Taylor, General Manager, Bank of Montreal.

"I am omitting statistics almost entirely. 'The Annual Review of The Monetary Times,' just published, gives such an exhaustive and interesting summary of Canadian conditions that my dealing with the same questions would be mere repetition."—From presidential address of J. W. Woods, Esq., President of Toronto Board of Trade.

"I must congratulate you most heartily upon the number just issued, excelling in every way all former numbers. It is certainly a bird's eye view of Dominion wide commercial affairs."—S. R. Parsons, Vice-President, Canadian Manufacturers' Association.

"We will add that the completeness of the 'Annual' in our opinion reflects the highest credit upon the editor and the publishers."—Wood, Struthers & Company, 37 Wall Street, New York.

"I have looked over the Review and I do not think of any suggestions that I can make towards an improvement in the issue. Your correspondents cover very thoroughly the condition of affairs in Canada, and altogether your statistics combination are deserving of very great credit."—Sir Edmund B. Osler.

"I congratulate you upon the splendid number which you have issued. It is not only a work of the printer's art, but it also indicates splendid research and statistical work in all its departments."—E. W. West, Vice-President, Glens Falls Insurance Company, Glens Falls, N.Y.

"It makes an invaluable reference book on Canadian business and general progress. In arrangement and typographically, too, the number is remarkably creditable."—Hon. Walter Scott, Premier of Saskatchewan.

"I also wish to congratulate you on the splendid New Year issue of your paper. To my mind there is really more information between the covers of that issue for the benefit of Canada generally, than I have ever seen in any magazine published in Canada or elsewhere and I am sure you really deserve our congratulations in this respect."—E. F. Hutchings, President, Great West Saddlery Company, Winnipeg.

"I find 'The Monetary Times Annual' filled with a wealth of valuable and varied information. I am satisfied I should find myself wholly at a loss if I should attempt to offer suggestions looking toward a possible improvement in your Annual."—George J. Clarke, Premier of New Brunswick.

"It is a magnificent issue."—Mr. T. Bradshaw, City Treasurer and Finance Commissioner, Toronto

PERSIAN LAMB FUR

Karakul Sheep Are Being Bred in Ontario by G. W. Johnston

An experiment is being conducted on the farm of Mr. G. W. Johnston, near Wyoming, Ont., in the breeding and rearing of Karakul sheep, the pelt of which is commercially known as Persian lamb fur. A year ago Mr. Johnston purchased a number of half-bred ewes and one pure bred male. This spring his fourteen Karakul ewes gave birth to fifteen lambs, all of which were covered with the glossy curl so essential from a commercial standpoint.

In order to secure the highest market price for the pelts, for which there is a ready demand, the lambs are slaughtered at from three to ten days old, as after that age the curl, for which the pelt is so prized, becomes looser, also lighter in color, and consequently a falling off in value is the result.

Will Increase Stock.

Desiring rather to increase his stock, none of these lambs have been sacrificed, and in addition another imported yearling male has recently been purchased. These sheep are natives of Bokhara, Central Asia, and further importations at present are almost impossible.

In appearance the Karakul differs from our native sheep in their greater length of body, broad tails and long, drooping ears. The wool is long and coarse in texture, the first shearing being generally brownish in color, but afterwards very similar in color to our native sheep.

Karakul and Native Sheep.

It has been found that by crossing the Karakul with some of our long-wool sheep that Persian lamb pelts equal to the pure-bred Karakul can be produced. It has also been found that in crossing with our native sheep the offspring is invariably heavier than the pure-bred native (generally from 20 to 30 per cent.). They are also extremely hardy. The mutton is of a very superior quality, and is absolutely void of the musk flavor which gives common sheep, especially the Merino family, the characteristic, and, to many, disagreeable sheepy taste, and it is the most delicious mutton known. In breeding the Karakul a good deal of the ordinary loss in sheep-raising is eliminated, as the pelts of still-born and early-dying lambs have a market value, and if from any cause the ewe dies after four months' pregnancy the unborn baby lambskins often bring the price of an ordinary full-grown lamb. It will thus be seen that the Karakul, although comparatively unknown in Canada, deserves a front place in the sheep-raising industry.

EDMONTON'S AUDIT SYSTEM

An Edmonton reader of *The Monetary Times* writes as follows:—

"In several recent issues of your paper you have given a good deal of notice to some changes made during last year in the audit of the accounts of the city of Edmonton. It was stated that there were three or more systems of audit in use, the first being audit prior to purchase or liabilities being incurred. A great deal of merit has been claimed for these so-called improved methods. It is, therefore, interesting to notice that after one year of use one of these systems has been recently discarded, that is, the first, and what was supposed to be the most important, the audit prior to purchase or liabilities being incurred. This has now been handed back where it belonged originally, that is, with the city commissioners, according to local press report. In other words, what was taken over by the comptroller from the commissioners has now been returned. It is also interesting to notice with what noise and advertisement these so-called innovations are announced, and the extreme quiet with which their subsequent and generally speedy obsequies are carried out."

The Stuyvesant Insurance Company, of New York, has been licensed by the Dominion superintendent of insurance to transact fire insurance in Canada. Mr. Godfrey C. White, of Montreal, is the chief agent.

GRAIN DEALERS' CROP ESTIMATE

The following is the crop estimate, dated September 1st, for Manitoba, Saskatchewan and Alberta, as compiled by the North West Grain Dealers' Association, Winnipeg:—

	Acres.	At bushels per acre.	Bushels.
Wheat	10,597,000	15.8	167,432,600
Oats	6,919,000	40.5	280,220,000
Barley	1,787,000	25	44,675,000
Flax	643,000	10.5	6,751,000

Final Summary 1915 Crop.

	Cars.	In August, 1915.	
Wheat inspected	330	year.	
Wheat inspected	282,021		
	282,351		
Less new wheat inspected in August.....	294		
	282,057		
		At bushels per car.	Bushels.
		1,200	338,468,400
Less allowance for dual inspection.....	3,000,000	bus.	
Less 1914 crop in farmers' hands..	320,000	"	
			3,320,000

Wheat.....	335,148,400
Stored at country points	1,600,000
Transit, not inspected	1,200,000
Marketed in Winnipeg, not inspected	250,000
In farmers' hands to market	8,250,000
Used for seed, feed and country mills	30,000,000

Total wheat crop	376,448,400
Inspected 1915 crop.....	Bushels. 1914.
Oats	115,120,000 35,839,700
Barley	13,246,200 4,953,000
Flax	5,852,000 4,001,600

Frank O. Fowler, secretary.

PLAN FOR EMPLOYEES' WAR LOAN SUBSCRIPTIONS

The Dominion Bridge Company's plan to encourage subscription by its employees to the war loan is described in the company's circular as follows:—

(1) Any bona-fide employee whose application is endorsed by his foreman may subscribe for a \$100 bond and pay for it in instalments of not less than \$10 cash in each payment, except the last, which may be of an amount necessary to complete the purchase price of \$97.50.

(2) A receipt will be given to the employee with his first instalment, and will have endorsed thereon each subsequent instalment until the amount is paid in full, when the receipt will be exchangeable for a government bond. Books of record will also be kept showing the state of each employee's subscription, so that in the event of the receipt being lost reference may be made to the book of record.

(3) Interest will be allowed by the Bridge Company on all deposits at the rate of 5 per cent. per annum from the date such deposits are made, except in the event of the employee leaving the company's service.

(4) Instalments will only be received from bona-fide employees while they continue in the employ of the company in good standing. If a man leaves or is discharged, his subscription for the bond is cancelled by his ceasing to be an employee of the company, and he will at once be handed back in cash the actual amount that he has already paid in on account of his subscription, without any allowance for interest.

(5) When the subscription for any bond is completed and the bond is handed to the employee it will have attached to it current coupons entitling the holder to collect \$2.50 at the next and succeeding interest periods; but the holder will be charged the proportion of the current coupon due at the time the bond is transferred.

In a subsequent paragraph recommending the investment the company says: "It is the duty of everyone who has the privilege of belonging to the British Empire to advance such funds as he is able for the use of the government in carrying the war to a successful conclusion. If such an arrangement as above outlined were generally carried out and responded to, a very large amount of money would thus accrue, to the benefit of the Empire, as well as to the benefit of those lending it."

New War Loan

The privilege of subscribing is still open! Don't delay participation. Though complete success is assured, there is still the best of reasons for your subscribing. Sound business judgment commends it. It is an investment opportunity you cannot afford to miss.

All Canada is Your Security.
Free from any Dominion Taxes.
Payable at any Bank in Canada.

Yielding 5.30% per cent. per annum.

Telephone or Wire your subscription at our expense.

Subscribe through us and your application receives all necessary attention free of expense to you.

PREPARING FOR PEACE

National Business Conference to be Held In Canada Soon

1. Looking into the future, what problems confront us—what demands for re-adjustment of land and labor, for expansion of production and trade?

2. Are we to anticipate a flood of immigrants seeking homes in the last great West, or will that westward flow be checked by the need of rebuilding devastated Europe, by emigration restrictions and by the sheer scarcity of men resulting from losses in war?

3. Are we to face a period of diminished purchasing power combined with higher cost of production owing to dearer raw materials, higher taxes and higher wages? If such conditions develop, how long will they prevail? How can they best be relieved?

National Business Conference.

These questions are asked in circulars issued by the department of trade, Ottawa, in regard to the forthcoming national business conference at Ottawa. At this convention the business men of Canada will be asked to give their views as to methods of increasing the country's commerce and industry. It requires, however, some serious thinking and preparation on the part of our business men before the meeting of this national commercial convention. What can they add to the information, the interest, the effectiveness of the coming gathering?

War Orders Every Day.

For the six years preceding the war, capital was flowing into Canada at the rate of over \$700,000 every working day. According to an estimate by Sir George Paish, Canada received something like \$1,500,000,000 from Britain alone between 1907 and 1913. In the same period the aggregate of imports over exports exceeded \$1,000,000,000. In other words, our prosperity has for some time past been handed to us.

At present we are finding on our doorsteps every morning a million dollars in unsought war orders. Yesterday and to-day our prosperity has been prepaid. To-morrow, what will be the position?

Must Look Ahead.

On this point Sir George Foster, minister of trade and commerce, in an address in the House of Commons, Ottawa, in April last, said:—

"Are we thinking about that which faces us when the war stops? The moment the war stops the doors of every munition factory will be closed and the help that was gathered and which worked therein will have to find some other employment. When the munition factories stop the thousand and one subsidiary operations, which spread themselves throughout the length and breadth of the country, connected by more or less subtle connections with the dominant work of forming munitions of war will also come to a standstill, and these two working together will bring about a period during which reversion and adaptation to normal circumstances will eat up time, will confuse and disturb energy, and will have its effect upon the economic condition and development of the country. These are the things that face us. Whilst we are glad to see the munition works doing their part in supplying the Empire with that which is necessary, whilst we are glad to have the money which comes as a sequence to the employment, yet all this is not beneficent and productive work, and when it stops—long before it stops—the people of this country should be putting on their thinking caps, sizing up the situation and getting ready for the inevitable and wonderful change that is to come. The first duty of the people of the country is simply to face that situation, to get right down before it, face it, think it out and be prepared with plans and organizations as to what shall be done when the time arrives. This is the first duty of us all!"

In order to encourage small investors to participate in the war loan, the Royal Bank was willing to consider the application of any depositor in its savings department for a loan up to \$900 to enable the depositor to purchase a \$1,000 bond. Such loans will bear interest at 6 per cent., and will be repayable in monthly instalments.

COBALT ORE SHIPMENTS

The following are the shipments of ore in pounds from Cobalt Station for the week ended September 15th:—

Mining Corporation of Canada (Townsite City Mine), 76,154; Trethewey City Mine, 46,804; La Rose Mines, Limited, 94,812; Nipissing Mining Company, 329,777; total, 547,547 pounds, or 273.7 tons.

From New Liskeard—Casey Cobalt Mine, 54,654 pounds.

The total shipments since January 1st, 1916, now amount to 21,993,112 pounds, or 10,996.5 tons.

ACTION AGAINST FOREIGN INTER-INSURERS

The British Columbia legislature has passed legislation forbidding foreign inter-insurers to maintain an office or agency in the province or advertise their business by newspaper, circular or other publication. Furthermore, the plea of ultra vires as a good defence where this insurance is in question is squashed. This action follows disclosure of the treatment of the Forest Mills of British Columbia by an inter-insurance concern known as the Lumbermen's Indemnity Exchange of Seattle. The Forest Mills Company, on suing another subscribing member to this concern to recover a part of a loss, was met by a plea of ultra vires.

WINNIPEG EXCHANGE AND WESTERN CROPS

In his address as retiring president of the Winnipeg Grain Exchange, Mr. W. E. Milner pointed out that the exchange is the largest market of all the cash wheat markets on the American continent. "When we consider," he said, "that there has been on an average more than 1,000 cars of wheat passed through Winnipeg each working day of the crop year of 1915-16, we have something of which to be justly proud."

"I have heard in my travels, some comments which are unwarranted and unjustified, as to the value of the Winnipeg Grain Exchange to the community. I know of no commercial organization in Canada whose business ethics have reached a higher standard than that of our own organization. Nearly \$500,000,000 dollars were distributed throughout the three prairie provinces last year, and nearly all of this business was verbal or telegraphic contract; and I have yet to hear of an agriculturist not receiving full money for his grain."

Discussing the incoming crop, Mr. Milner said that up to July 20th, "we had prospects of reaping a harvest equal to that of last year, but between July 20th and 28th, the weather was very injurious to the growing crop, rust developed in the southern portion of the province of Manitoba and the south-eastern part of the province of Saskatchewan, which very materially reduced the yield and quality of the grain. But we have no reason to be pessimistic. We are the most bountifully blessed country on earth. In the crop year of 1914-15, we produced 140,031,250 bushels of wheat, in 1915-16 we produced 373,448,400 bushels of wheat."

"While it is dangerous to prophesy, I venture the statement that we shall produce in the crop year of 1916-17 190,000,000 bushels of wheat, making a grand total for the three years of 706,479,650 bushels of wheat on an average yearly acreage of 10,000,000 acres, or an average for the three years of 22 bushels to the acre. With these figures before us, we have every reason to be optimistic as to the future of our country from an agricultural standpoint, and as a matter of fact, we shall produce this year the largest crop but one in our history. It is a fact that we have some nervously constituted individuals in the province of Manitoba who are continually predicting blue ruin, and I am sorry to say that among this class are to be found some of our very best men; and now that the crop has been harvested and thrashing well in progress, we find that these remarks were unnecessary, and looking at it from any standpoint, these statements were ill-timed and might have affected our provinces very materially."

The keel has been laid for the 2,000-ton steel steamship which the Nova Scotia Steel and Coal Company is building at New Glasgow. The boat will be floated and ready for sea by April. The steamer is to be fitted with turbine engines.

Is Your Estate Properly Protected?

No matter how little or how much you own, these possessions make up your estate, and should be protected by efficient and economical management.

This can best be done by an Executor or Trustee.

This Company, by acting in this capacity, will give your estate the benefit of experience gained in the management of many estates, of large and of only moderate size, and will scrupulously guard the interests of your heirs.

No charge for drawing up your will when the Sterling Trusts Corporation is appointed your Executor and Trustee.

Our officers will give you further information on request.

LOANS ON LIFE POLICIES

Experience of British Companies Indicates No Special Demand for Loans

Following the interesting discussion in *The Monetary Times* regarding policy loans, an article on the subject appears in the *London Economist*. It says:—

One of the sources of anxiety to life insurance offices at the outbreak of the war was the possibility that policyholders, feeling the financial pinch, might resort to such an extent to the borrowing capacity of their policies as to put the companies to some inconvenience and to mortgage more than was desirable their own protective measures for the future. Many offices discounted this expected rush by announcing higher rates of interest for new loans, and in a few cases borrowers were also asked to pay an increased rate on accommodation already granted. As a matter of fact, the danger never assumed serious proportions, and, though there were plenty of instances in which policyholders found this means of relieving the situation a welcome and relatively cheap one, there was practically no increase to speak of in advances last year. It has never been the practice of British offices unduly to encourage borrowing on policies, and the ratio of such loans to life and annuity funds is moderate as compared with that to be found in colonial and American companies.

Warned the Policyholders.

In the last report of the Mutual Life, of New York, an increase in loans of £242,700, or 1.3 per cent., was shown, and the company took occasion to warn policyholders against too indiscriminate a use of the privilege. "Policy loans are popularly supposed to be especially desirable assets," said the general manager, "since the interest rate is satisfactory, while loss of principal is virtually impossible. On the other hand, inasmuch as such loans are rarely repaid, except by surrender of the insurance or by deduction from the proceeds of the policy at death, thereby sacrificing much or all of the protection originally designed for the beneficiary, the rapid increase in this item of assets is looked upon with unmixed regret by all insurance officials. We would, therefore, urge upon policyholders that they borrow on their policies, if at all, only as a last resort, and that they make every effort to repay any existing loans as rapidly as possible. . . . As the policy loan in case of death must be deducted from the proceeds of the insurance, the beneficiary receiving only the balance instead of the face amount of the policy, the man who borrows on his life assurance, as has often been pointed out is virtually borrowing from his widow. That consideration should alone impel every borrower to repay or reduce the loan on his policy as rapidly as possible."

Some Interesting Ratios.

Similarly the Australian Mutual Provident Society, whose loans went up £156,000, or 2.7 per cent., last year, states that the privilege is freely used, and in time of general financial stress has proved often an inestimable advantage. "We do not, however," the society hastens to add, "wish it to be understood that policy loans on any mere pretext are advisable, for borrowing may sometimes lead to a policy being relinquished owing to inability to repay the debt, or else to a serious reduction in the amount of assurance payable on death occurring." These warnings convey a moral which should not be forgotten here, though they do not apply with such force in the case of British companies. The Mutual Life, of New York's, ratio of loans to life and annuity funds is 15.5 per cent. and the Australian Mutual Provident's is 17 per cent., or very nearly the mean of colonial and American offices doing business in Great Britain, which is nearly 18 per cent.

The position of British offices, both generally and in relation to the effects of the war, is much stronger than that of the colonial and foreign offices. Last year there was so far from an increase in policy loans a decrease in the case of the principal companies. This was no doubt due partly to the accelerated falling in of policies through the heavier death roll, but obviously such increased discharge of obligations through policies maturing was not offset by new borrowing. In the following table we show the amount of policy loans appearing in the last balance-sheets of those offices whose volume of new business in 1915 exceeded half a million pounds sterling, together with the ratio to life and annuity funds, the ratio for 1914 and also for 1910 being also given:—

Office.	Policy loans.	Ratio to life and annuity funds.		
		1910.	1914.	1915.

Two Definite Conclusions.

Two definite conclusions are established by the above figures. The first is that policy loans generally do not constitute an excessive ratio to life and annuity funds, and the second is that the war has not brought about any all-round demand for extra financial accommodation from policyholders. The fear felt, therefore, by colonial and United States offices has no justification in the case of British companies. So far as the group in the table is concerned, the combined loans not only do not exhibit any advance, but show a decrease of nearly 1 per cent. The average ratio of policy loans to the life and annuity funds of British offices is about 8 per cent. The last year for which full returns are available is 1914-15, and the proportion then was 7.7 per cent., as against 7.2 per cent. in 1910-11. If we go back to 1880-81 the figure was 5.7 per cent., so that the rise in the intervening period has been virtually negligible. The amount of loans then was £7,157,500, and in 1914-15 it was £30,015,700. Thus it cannot be said that British offices have unduly encouraged borrowing by holders on the security of their policies, and this is an element of strength in the general position of the companies, and not the least important proof of the sound methods which guide the administration of their funds. The funds and policy loans of the industrial departments have been left out of account in these calculations, as the loans are relatively small in volume—altogether less than half a million pounds sterling—and have a ratio of barely $\frac{1}{2}$ per cent. to funds.

KING GEORGE HONORS CANADIAN BANKER

Sir Vincent Meredith, president of the Bank of Montreal, has been created a baronet. This high honor has been granted by King George, in connection with the approaching departure from Canada of the governor-general, the Duke of Connaught.

Sir Vincent was born in London, Ontario. He has been in the service of the Bank of Montreal for a number of years, having become associated with the Hamilton branch in 1867. In 1879, he became assistant inspector, and in 1889, manager of the Montreal branch. For some years, he held the assistant general managership of the bank, and in 1910 became a director of the institution. When he became president of the bank a few years ago Sir Frederick Williams-Taylor succeeded him as general manager. Sir Vincent is one of the outstanding figures in the banking world and a citizen of the very best type.

LEGAL NOTICE

FESS OIL BURNERS OF CANADA, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 14th day of September, 1916, incorporating William Symon Morlock and Reginald Holland Parmenter, solicitors; Samuel Davidson Fowler, solicitor's clerk; Anna Latimer, office clerk, and Winnifred Elizabeth Skelcher, stenographer, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:-

(a) To carry on the business of manufacturers of engines and machinery of all kinds and of all articles and things used in the manufacture, maintenance and working thereof;

(b) To manufacture, buy, sell, lease, repair, alter and deal in crude oil and other burners, appliances, apparatus, implements, machinery, goods, materials, articles, and supplies of all kinds which shall be capable of being used in connection with the business of the company, or likely to be required by customers thereof, or in any way connected with or incidental to the use of any of the products of the company;

(c) To adopt on behalf of the company and to carry into effect (either with or without modification) a certain agreement between A. L. Ellsworth (therein called the Vendor) and Strachan Johnston, of Toronto (therein called the Trustee), dated the eighth day of September, 1916, whereby the said A. L. Ellsworth agrees to sell to the company the undertaking of The Fess System Company of Canada, Limited, a company heretofore incorporated under The Companies Act, 1910-1913 (British Columbia) by Memorandum of Association dated 26th January, 1914, whereby the said A. L. Ellsworth will make profit in shares of the company as shown by said agreement a copy whereof has been filed in the office of the Honorable the Secretary of State of Canada.

(d) To acquire, purchase, take on lease or license, hire, hold, use, sell, grant leases of, grant licenses of, exchange, alienate, dispose of and otherwise deal in or contract with reference to lands or interests in land, personal property of all kinds or interests therein, rights, privileges, licenses and concessions; to manufacture or trade in property and goods of all kinds; to operate construction or building plants and to take and carry out contracts for building or for construction work of any kind, and to undertake, carry on and execute transactions as financial or commercial brokers or agents;

(e) Notwithstanding the provisions of section 44 of The Companies Act, to subscribe for, purchase, assume liability under, acquire, hold, sell, exchange, dispose of or otherwise deal in or contract with reference to bonds, debentures, stocks or other securities or obligations or any estate or interest therein; and to apply or to accept, in whole or in part, as consideration for, satisfaction of or security for any contract, indebtedness or obligation, to or of the company, property, obligations, shares and securities of any kind at such valuation and upon such terms as may be agreed upon;

(f) To acquire, dispose of or otherwise deal in properties, businesses or undertakings of all kinds;

(g) To furnish aid to any business or undertaking similar in whole or in part to that of the company with which the company may have business relations, by way of loan, bonus, endorsement, agreement, guarantee, management or other service, and to manage, supervise and control the same in whole or in part and to act as agent or attorney for the same;

(h) To carry on any other business which may seem capable of being conveniently or advantageously carried on in connection with the business of the company or calculated directly or indirectly to enhance the value of, to facilitate the realization of or to render more profitable any of the company's businesses, properties or rights;

(i) To invest the moneys of the company not immediately required in such investments as may from time to time be determined;

(j) To co-operate in, aid in, subscribe towards or subsidize any proceeding or undertaking which may seem calculated directly or indirectly to benefit the company;

(k) To acquire or undertake the whole or any part of the business, property and liabilities of any person, partnership, association or company having objects altogether or in part similar to the company or carrying on any business which the company is authorized to carry on or possessed of property which may seem suitable or desirable for the purposes of the company;

(l) To apply for, purchase or otherwise acquire and to protect, prolong and renew patents, patent rights, trade-marks, formulae, licenses, protections, concessions and the like, conferring or relating to any exclusive or non-exclusive or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, improve, develop or grant licenses in respect of or otherwise turn to account the property, rights or information so acquired;

(m) To enter into partnership or into any arrangement for sharing of profits or expense, union of interests, co-operation, joint adventure, reciprocal concessions or otherwise, with any person, partnership, association or company carrying on or engaged in, or about to carry on or engage in, any business or transaction which the company is authorized to carry on or engage in, or any business or transaction which may seem capable of being conducted so as directly or indirectly to benefit the company, and to lend money to, guarantee the contracts of, or otherwise assist any such person, partnership, association or company, and to take or otherwise acquire shares and securities of any such partnership, association or company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same;

(n) To take or otherwise acquire and hold shares in any partnership or stock or shares in any association or company having objects altogether or in part similar to those of the company or carrying on any business which may seem capable of being conducted so as directly or indirectly to benefit the company;

(o) To apply for, promote and obtain from the Dominion of Canada or any other authority, whether Dominion, Provincial, Imperial, Colonial or foreign, and including subordinate and municipal authorities, any statute, ordinance, order, regulation or other authorization or enactment which may seem desirable to the company or calculated directly or indirectly to benefit the company;

(p) To enter into any arrangements with any governments or authorities, supreme, provincial, civic, municipal, local or otherwise, that may seem conducive to the company's objects or any of them, and to obtain from any such government or authority any statutes, ordinances, licenses, contracts, orders, regulations, decrees, rights, powers, franchises, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with the terms of the same;

(q) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company or of its predecessors in business or of any person, partnership, association or company allied with the company in business or subsidiary to the company or in which the company holds shares or securities, or to benefit the dependants or connections of such persons, and to grant pensions and allowances, and to make payments towards insurance and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object;

(r) To promote, form, organize, manage, develop, take interests or stock or shares in and assist financially or otherwise, any partnership, association or company for the purpose of acquiring or taking over all or any of the property and liabilities of the company, or for any other purpose which may seem calculated directly or indirectly to benefit the company;

(s) To acquire, purchase, take on lease, hire, construct, improve, own, maintain, operate, manage, carry out and control, plant, equipment, machinery, supplies, buildings, works, shops, warehouses, manufactories, pumps, tanks, tank cars, pipe lines, smelters, refineries, roads, ways, canals, bridges, electric works, electric plant, hydraulic works, hydraulic plant, boats, ships, docks, wharves, piers, gas works, cables, waterworks, reservoirs, aqueducts, flumes, ditches, and all such other structures, works, conveniences and appliances as may seem calculated directly or indirectly to advance the company's interests, and to contribute to, subsidize or otherwise assist or take part in the acquisition, purchase, leasing, hiring, construction, improvement, ownership, use, maintenance, operation, management, carrying out or control thereof;

(t) Where such course is required for the purposes of the company or may seem calculated directly or indirectly to advance the company's interests, to acquire, purchase, take on lease, hire, construct, improve, own, use, maintain, operate, manage, carry out and control, but only upon lands owned or controlled by the company, or over which the company may have a right of license to that effect, such roads, ways, bridges, lines of rail, spurs, sidings, tracks, rolling stock, cables, wires, motors, locomotives, electrical plant and all such other structures, works, conveniences and appliances as may be required for the purpose of maintaining communication by telegraph or telephone, or of effecting the transport of goods or passengers, and to contribute to, subsidize or otherwise assist or take part in the acquisition, purchase, leasing, hiring, construction, improvement, ownership, use, maintenance, operation, management, carrying out or control thereof;

(u) To draw make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments;

(v) To sell or dispose of the property or undertaking of the company, or any part thereof, for such consideration as the company may think fit, and in particular, and notwithstanding the provisions of section 44 of The Companies Act, for shares, debentures or securities of any other partnership, association or company;

(w) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations;

(x) To sell, exchange, lease, dispose of, turn to account or otherwise deal with or contract with reference to all or any part of the property and rights of the company;

(y) To consolidate or amalgamate with any other company having objects similar in whole or in part to those of the company;

(z) To procure the company to be registered, licensed or otherwise recognized in any foreign country, and to designate and appoint persons therein as attorneys or representatives of the company with full power to represent the company in all matters according to the law of such foreign country, and to accept service for and on behalf of the company of any process or suit;

(aa) To pay out of the funds of the company all or any of the expenses of or incidental to the formation and organization thereof; to employ, contract with and with the approval of the shareholders provide for the remuneration of brokers, commission agents and underwriters upon any issue of shares, bonds, debentures, debenture stock or other securities of the company;

(bb) To distribute or divide assets of the company in specie amongst the shareholders;

(cc) To do all or any of the above things as principals, agents, contractors or otherwise, and either alone or in conjunction with others;

(dd) To do all such other things as may seem directly or indirectly to be incidental or conducive to or convenient or proper for the accomplishment of the purposes or the attainment of the objects of the company, or any of them, or expedient for the protection or benefit of the company;

(ee) No power granted in any paragraph hereof shall be limited or restricted by reference to or inference from the terms of any other paragraph hereof.

The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Fess Oil Burners of Canada, Limited," with a capital stock of one hundred thousand dollars, divided into 1,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 14th day of September, 1916.

THOMAS MULVEY,

Under-Secretary of State.

LEGAL NOTICE

BARCALO MANUFACTURING COMPANY OF CANADA, LIMITED.

Public Notice is hereby given that under the First Part of Chapter 79 of the Revised Statutes of Canada, 1906, known as "The Company Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 30th day of August, 1906, (1916), incorporating Edward Joel Barcalo, Bryant Burwell Glenny, Jr., Alban Wilkinson Kirton, Charles Vallone and Frank Anderson, manufacturers, all of the City of Buffalo, in the State of New York, one of the United States of America, for the following purposes, viz.:-

(a) To manufacture, purchase, import or otherwise acquire and to sell, export, exchange and otherwise dispose of and generally deal in all kinds of materials, goods, wares and merchandise;

(b) To do all and everything necessary, suitable and proper for the accomplishment of any of the purposes or the attainment of any of the objects or the furtherance of any of the powers hereinbefore set forth, either alone or associated with other corporations, firms or individuals, and to do any other act or acts, thing or things incidental or pertaining to, or growing out of, or connected with the aforesaid business, or powers, or any part or parts thereof, provided the same be not inconsistent with the law under which this corporation is organized.

The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Barcalo Manufacturing Company of Canada, Limited," with a capital stock of ten thousand dollars, divided into 100 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 31st day of August, 1916.

THOMAS MULVEY,
Under-Secretary of State.

EXHIBITION OF ENEMY SAMPLES

While in England recently Sir George E. Foster, minister of trade and commerce, Ottawa, made arrangements with the British government's board of trade for the loan to Canada of more than 8,000 samples of goods of German and Austrian manufacture which had been collected by British consuls and trade commissioners in 70 markets in all parts of the world, for the purpose of showing British manufacturers what Germany had exported, in the hope than an examination of these samples would materially aid in capturing enemy trade.

The samples are expected to arrive in Canada in time to place them on exhibition in Montreal early in October. Afterwards they will be exhibited in Toronto. As the collection was made for the special benefit of British manufacturers it will be readily understood that it can only remain in Canada for a short time. It will take a week or more to unpack and set up the samples and about as long to pack them up again so that if a number of cities were visited a great deal of time would be lost in packing and unpacking. As, however, the cities of Montreal and Toronto can be conveniently reached by the manufacturers and wholesale men who are interested in visiting and inspecting these samples, it is felt that an exhibit in each of the above cities will serve the purpose intended.

Mr. H. Kershaw, who accompanies the samples as representative of the Imperial board of trade, will be able to furnish valuable information regarding the demand for the articles exhibited in different countries. Wherever possible details of wholesale buying price, packing, etc., are affixed to the samples. The articles shown are of great variety.

In the United Kingdom the manufacturers attending the exhibition were asked to make a detailed list of goods manufactured by them that might replace the enemy goods exhibited. A similar plan will be adopted in Canada. Manufacturers visiting the exhibition will be asked to make note of any articles which they are prepared to manufacture. Details should afterward be furnished to the commercial intelligence branch of the department of trade and commerce, Ottawa. Any information thus secured will be utilized by the department of trade and commerce to help Canadian manufacturers to do their share in securing for Canada a portion, both at home and abroad, of the trade which enemy countries formerly enjoyed.

Manufacturers and wholesale merchants who attend will be asked to prepare lists of articles formerly imported that they would like hereafter to secure in Canada and the department of trade and commerce, Ottawa, will endeavor to give them the addresses of Canadian manufacturers who are prepared to supply similar articles.

BRITISH EMPIRE TRUST

Capital Intact and Strong Position Maintained

The fifteenth ordinary general meeting of the British Empire Trust Company, Limited, was held on Monday, September 4th, at Liverpool-street Hotel, London, England, Mr. J. Davidson (managing director) presiding.

The Secretary (Mr. R. W. Bartlett, A.C.A.) read the notice convening the meeting and the auditors' report.

The Chairman stated that owing to ill-health Mr. R. M. Horne-Payne, the Chairman of the company, was unable to be present, but he had prepared a very interesting statement, which Mr. N. Scott-Russell would read to the shareholders. In the course of his statement, Mr. Horne-Payne dealt at some length with the position and prospects of the Canadian Northern Railway system, the British Columbia Electric Railway, the Toronto Power Company, and other enterprises with which the trust is closely associated. He stated, in the first place, that owing to conditions arising from the war the efforts of the directors had been necessarily concentrated on protecting the company from loss rather than on seeking to secure profits. If they had been successful, as he thought they had been, in keeping the capital intact and in maintaining the company in a strong position, with large liquid resources ready to recommence business vigorously after the war, they felt that they had satisfactorily discharged their duties to the shareholders. Again this year they had sustained heavy loss from depreciation in the market value of securities, but in spite of the investments having been valued at the lowest figure of the nominal quotations named for them on the Stock Exchange the capital of the company was shown to be intact after payment of the full dividend on the Cumulative Preference shares. Referring to the Canadian Northern Railway system, he said that the gross earnings and net earnings for the year ended June, 1916, showed increases of 36 per cent. and 49 per cent. respectively, compared with the preceding year, and the net earnings of the first month of the new financial year—namely, July, 1916—showed the phenomenal increase of 146 per cent. over July, 1915. Nevertheless, the development of its business, and especially the development of traffic on the new transcontinental line, had been seriously retarded by the war. Of last season's harvest the Canadian Northern system would handle about one-third of the whole crop of the Western Provinces, carrying altogether about 135 million bushels of grain. Three events stood out in the year's history of the system. Firstly, the transcontinental line was completed and opened for traffic. This event was marked by two special trips across the Continent. The first trip was one of inspection by the President and officials of the company, during which the entire journey from Toronto to Vancouver was made in 91 hours, after deducting long stops, which was a remarkable feat. The other trip was made by a large party, including 78 Senators and members of the House of Commons of Canada and other distinguished people. The train which carried the party consisted of fifteen of the largest and heaviest railway cars, and this was hauled over the Mountain section, as well as the Prairie section, with one engine, establishing a record never excelled by any railway in the United States or Canada. He thought the evidence furnished by these two trips was indisputable testimony to the excellence of the road, and sufficiently answered any rumors that had been spread about that the construction of the line was inferior to that of its competitors. It was, in fact, built to as high a standard, and had some advantages in the matter of grade, over any transcontinental railway in North America.

CANADIAN GOVERNMENT LOAN.

The second event of the year was the granting by the Parliament of Canada of a loan of \$15,000,000 to the Canadian Northern system. This money was borrowed to meet deficits and liabilities incurred during construction and the first year of operation, as a transcontinental system, and which it had been intended to meet by the sale of securities which were available. The war rendered this sale impossible on any reasonable terms, and the Government loyally accepted the responsibility of protecting investors in this great enterprise organized for the benefit of Canada, and in which Canada owned 40 per cent. of the share capital. The third event of the year was the conclusion of an alliance with the famous Cunard Steamship Company, whereby the Canadian Northern system would secure the most complete shipping facilities to and from all parts of the world. Alluding to the British Columbia Electric Railway, Mr. Horne-Payne stated that the results of its operations were still very seriously affected by the depression prevailing in British Columbia, which was mainly the result of the war. During the first seven months of its financial year—namely, from July, 1915, to January, 1916—it showed a decrease in net earnings of \$598,790 compared with the same period of the previous year. Since the early part of the present year, however, the financial returns showed a decided improvement both as regarded an increase in gross revenue and a decrease in expenditure. Since the 1st February of this year the net revenue had shown the following monthly increases over the corresponding months of the previous year: February, \$7,197; March, \$18,728; April, \$22,559; May, \$39,116; June, \$52,621; July, \$36,358. With regard to the future of the Canadian Western Lumber Company, he was confident that for ten years after the end of the war there would be a tremendous demand for lumber at profitable prices, and he was equally confident that, given normal conditions and a demand for lumber enabling the enterprise to work at anything like its capacity, satisfactory profits would again be earned. The earnings of the Canadian Western Natural Gas, Light, Heat and Power Company were well maintained, being only about a per cent. less than for the corresponding period of the previous year. In conclusion, he believed that the British Empire Trust had a future of usefulness and success before it. It had been largely instrumental in finding the money for the construction of railways in Canada, and he now regarded it as absolutely certain that very little of that capital would be lost.

The report and accounts were unanimously adopted; the retiring directors and auditors were re-elected, and a vote of thanks to the Chairman and directors concluded the proceedings.—[Advertisement].

DIVIDENDS AND NOTICES

TENDERS FOR PULPWOOD AND PINE LIMIT

Tenders will be received by the undersigned up to and including the 1st day of December next for the right to cut pulpwood and pine timber on a certain area situated on the Pic River and other territory adjacent thereto, in the District of Thunder Bay.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet, board measure, on pine, that they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, and \$2.00 per thousand feet, board measure for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario—the paper mill to be erected when directed by the Minister of Lands, Forests and Mines.

Parties making tender will be required to deposit with their tender a marked cheque, payable to the Honorable the Treasurer of the Province of Ontario, for twenty-five thousand dollars (\$25,000), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said \$25,000 will be applied on account of bonus dues as they accrue, but the regulation dues, as mentioned above, will require to be paid in the usual manner as returns of cutting of wood and timber are received.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned,

G. H. FERGUSON,
Minister of Lands, Forests and Mines.

Toronto, August 28th, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

Tenders will be received by the undersigned up to and including Monday, the 2nd October, 1916, for the right to cut the Pine timber (including Jackpine) on the Township of Pettypiece in the District of Kenora.

Tenderers shall state the rate per thousand feet Board Measure, they are prepared to pay for the Pine in addition to the Crown dues of \$2 per thousand feet Board Measure, and the rate per tie for any of the Pine timber suitable for the manufacture of railway ties, in addition to the Crown dues of 5c. each.

The timber to be removed by the 30th of April, 1918.

Each tender to be accompanied by marked cheque for \$700, payable to the order of the Provincial Treasurer. The party awarded the right to cut will be required to furnish a bond for the payment of the price and the due performance of all the conditions required by the Department.

The highest or any tender not necessarily accepted.

Tenders to be addressed to the Honourable, the Minister of Lands, Forests and Mines, Toronto, and marked "Tender for Timber."

G. H. FERGUSON,
Minister of Lands, Forests and Mines,
Toronto, August 31st, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

THE CANADIAN CROCKER-WHEELER CO., LIMITED

DIVIDEND NOTICE

The Directors of The Canadian Crocker-Wheeler Company, Limited, have declared a One and Three-Quarters per Cent. ($1\frac{3}{4}\%$) dividend on the Preferred stock of the Company for the three months ending September 30th, 1916, to Shareholders of record September 15, 1916. Also a dividend of One and Three-Quarters per Cent. ($1\frac{3}{4}\%$) on the Common Stock of the Company for the three months ending September 30th, 1916.

The Stock Books will be closed from the 15th to the 30th of September, both days inclusive.

Cheques will be mailed to Shareholders on September 30th, 1916.

By Order of the Board,
L. R. GRIMSHAW,
Secretary-Treasurer.

St. Catharines, Ontario, September 13th, 1916.

CANADIAN PACIFIC RAILWAY COMPANY

NOTICE TO SHAREHOLDERS

The Thirty-fifth Annual General Meeting of the Shareholders of this Company, for the election of Directors to take the places of the retiring Directors and for the transaction of business generally, will be held on Wednesday, the fourth day of October next, at the principal office of the Company, at Montreal, at Twelve o'clock noon.

The Common Stock Transfer Books will be closed in Montreal, New York and London at 3 p.m. on Friday, the first day of September. The Preference Stock Books will be closed in London at the same time.

All books will be re-opened on Thursday, the fifth day of October.

By order of the Board,
W. R. BAKER,
Secretary.

Montreal, August 14th, 1916.

SMART-WOODS, LIMITED

NOTICE OF DIVIDEND

A dividend of One and three-quarters per cent. ($1\frac{3}{4}\%$) on the Preferred Stock of Smart-Woods, Limited, has been declared for the Quarter ending September 30th, 1916, payable October 2nd, 1916, to Shareholders of record September 27th.

Notice is also given that a dividend of One and three-quarters per cent. ($1\frac{3}{4}\%$) has been declared against deferred dividends on the Preferred Stock of Smart-Woods, Limited, payable October 2nd, 1916, to Shareholders of record September 27th.

By order of the Board,
JOHN T. F. KEENE,
Secretary-Treasurer.

Montreal, September 15th, 1916.

PENMANS, LIMITED

DIVIDEND NOTICE

Notice is hereby given that a Dividend of one and one-half ($1\frac{1}{2}\%$) per cent. has been declared on the Preferred Shares of the capital stock of this Company for the quarter ending October 31st, 1916, payable November 1st, 1916, to shareholders of record of October 21st 1916; also a Dividend of one (1%) per cent. on the Common Shares for the quarter ending October 31st, 1916, payable November 15th, 1916, to shareholders of record of November 6th, 1916.

By order of the Board,
C. B. ROBINSON,
Secretary-Treasurer.

Montreal, September 18th, 1916.

OTTAWA LIGHT, HEAT AND POWER COMPANY, LIMITED

DIVIDEND No. 41

Notice is hereby given that a quarterly dividend of 1½% (one and one-half per cent.), being at the rate of 6% per annum on the Capital stock of this Company, has been declared for the period ending September 30th, 1916, payable on October 1st, 1916, to Shareholders of record at the close of business on the 20th day of September, 1916.

The transfer books of the Company will not be closed.
By order of the Board,

D. R. STREET,
Secretary-Treasurer.

Ottawa, September 13th, 1916.

CENTRAL CANADA LOAN AND SAVINGS COMPANY

QUARTERLY DIVIDEND

Notice is hereby given that a Dividend of Two and one-half per cent. (2½%) for the three months ending September 30th, 1916, at the rate of Ten per cent. per annum, has been declared upon the Capital Stock of this Institution, and the same will be payable at the offices of the Company, Toronto, on and after Monday, the 2nd of October, 1916. The Transfer Books will be closed from the 18th to 30th September, both days inclusive.

By order of the Board,

E. R. WOOD,
President.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; "Positions Vacant," "Agents or Agencies Wanted," 3c. per word; other condensed advertisements, 3c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over \$5,000.00, and he has built up a future income of over \$3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

Mr. F. M. Gibson, an inspector at Winnipeg, has been appointed assistant manager at Montreal of the Canadian Bank of Commerce.

The gold output of the Yukon will this year be about the same as that of last year, which amounted to \$4,376,393. About 250 miles from Dawson, in the Mayo Creek district, a silver claim is being developed, from which 1,700 tons of ore have been shipped by water to San Francisco, a distance of 4,600 miles. The returns, even after shipping the ore such a great distance, are expected by the owners to warrant the extensive development work now being carried on. At the beginning of last month the first shipment of Granby copper to go east from Prince Rupert filled 28 cars and was valued at \$400,000.

CORRESPONDENCE INVITED

DEBENTURES FOR SALE

TOWN OF SUTHERLAND, SASK.

TENDERS WANTED

Tenders will be received by the undersigned up to the 28th day of September, 1916 (6 o'clock p.m.), for the purchase of the Town's debentures amounting to \$36,000.00 (instalment system), interest at 7%, made up as follows:—

By-law No. 10	Waterworks	\$19,350.00	30-years	7%
By-law No. 11	Sidewalks	\$ 750.00	20 "	7%
By-law No. 12	Sewers	\$15,500.00	30 "	7%
By-law No. 13	Grading	\$ 400.00	30 "	7%

All information pertaining to these debentures can be obtained from the undersigned.

SIDNEY APPLEBY,
Town Clerk.

Sutherland, Sask., August 25th, 1916.

TOWN OF AYLMER, QUEBEC

DEBENTURES

Tenders will be received up to Monday, October the 2nd, 1916, by the undersigned for the purchase of \$45,000 30-year Debentures, bearing 5% interest, and payable at the office of the Secretary-Treasurer at Aylmer, Quebec; the interest payable semi-annually, that is to say, May the 1st and November the 1st.

The money to be used for the purpose of installing a Rapid Sand Gravity Filtration Plant.

Lowest or any tender not necessarily accepted.

G. W. WHITE,
Secretary-Treasurer.

CITY OF QUEBEC

CALL FOR TENDERS FOR DEBENTURES

Public notice is hereby given that the Board of Roman Catholic School Commissioners of the City of Quebec calls for tenders for the sale of \$200,000.00 of its debentures bearing interest at five per cent., redeemable in five or ten years (a separate price to be given in each case), the principal and interest being payable at Quebec, Toronto, or New York.

The City of Quebec will guarantee such debentures and every tender must be addressed to the undersigned Secretary-Treasurer before 8 o'clock p.m., the second of October, 1916.

An accepted cheque for \$3,000.00 by a Canadian bank must accompany each tender.

A. C. TASCHEREAU,
Secretary-Treasurer of the Board of Roman Catholic
School Commissioners of the City of Quebec,
Quebec, Canada.

FIRE PREVENTION AND BOND SALES

Municipal Securities Sell at Better Price if Fire Record is Good

The business portion of a town in Ontario was burned recently owing to lack of preparedness. The fire broke out in a small building and could have been extinguished without difficulty, but there was not a team available to haul the fire engine to the fire. When a team was eventually secured it was found that they could not cross a river owing to the bridge being under repair, no proper provision having been made in the interim. The firemen then had to bring their hose across the river as well as they could with considerable difficulty and delay. When they were able to put water upon the fire it had got completely out of hand and burned everything in its path. The insurance carried was less than half the value of the property destroyed.

This incident was related by Mr. J. B. Laidlaw, manager for Canada of the Norwich Union Fire Insurance Society, in his instructive address at the annual meeting of the Ontario Municipal Association.

Heavy Losses Every Year.

He first cited some striking facts and figures as to the annual fire waste in Canada of \$22,500,000. These figures do not include any indirect losses, such as the loss of profits by a business man or manufacturer, the loss of earnings by those whose place of employment was destroyed, nor the loss to property owners through vacancy of houses caused by removal of men forced to seek employment in some other place, nor the loss to the municipalities from destruction of taxable property. The figures given are the bare amount of the value of buildings, machinery, merchandise and household furniture destroyed by fire each year in this country. Mr. Laidlaw also quoted *The Monetary Times'* fire record figures regarding loss of life, which show that in the past four and a half years to date 1,149 lives have been lost in that way. Canada's annual average direct fire loss is about \$3 per head.

Curse of the Shingle.

Discussing poor building construction in the Dominion, Mr. Laidlaw stated that wooden shingles are now recognized by all who have studied the matter to be the most dangerous building material we use. They have caused more fires and assisted more fires to develop into conflagrations, wiping out villages, towns and cities than any other of our ordinary building materials.

He asked his hearers "to cease regarding fires as principally caused by incendiaries, for those who have given that phase of the subject the closest study now estimate the fires caused in that way to be under 10 per cent. of the total. On the contrary, if you will recognize frankly that we have dangerous conditions which invite the origin of fires and assist them to spread after they break out, we can hope that real progress can be made toward fire prevention."

Fire Prevention and Bond Sales.

After giving some valuable hints as to fire prevention methods which should be adopted by municipalities, Mr. Laidlaw stated that the ability of a municipality to sell its bonds at a good price depends on how effective are the municipality's fire preventative measures. "No bond broker," he said, "cares to offer to his clients the debentures of a town or city, a good part of whose assets are frequently disappearing in smoke. They prefer to sell the bonds of the well-managed place, which does not allow its citizens recklessly to endanger their own and their fellow-citizen's property, and which maintains a thoroughly efficient waterworks system and good fire brigade. They know that the assets of such a place are a much better security than those of the other, and the careless town pays a heavy tax every year through higher interest on its debentures."

Hon. H. C. Brewster, the new premier of British Columbia, was born in Harvey, New Brunswick, 45 years ago. He established himself in the fishery industry some years ago on the Pacific Coast. He removed Oriental labor from his fishing and canning works. He has an excellent business reputation and has been interested in politics for many years.

A Free Course In "Salesmanship"

We have thought about the young man who sees no prospects ahead. Would you like to be in a business that will give you

**A Good Living Wage
A Profitable Future
A Provision For Old Age**

We teach a man the Insurance Business, which offers permanent success, does not fluctuate, is a professional occupation, and has been truly named "The best paid hard work in the world."

This is done by a correspondence course and personal assistance, free of charge.

When he is fully prepared for the work, we place him in a position and help him to make good.

The first two lessons of the Company's correspondence course will be sent to anyone interested. It will pay young men who desire to get on in the world to look into this.

All correspondence strictly confidential.

CANADA LIFE ASSURANCE CO.
HEAD OFFICE, TORONTO.

Prosperous and Progressive

Up-to-date business methods, backed by an unbroken record of fair-dealing with its policyholders, have achieved for the Sun Life of Canada a phenomenal growth.

To-day, the Company operates actively in forty-two countries and upon five continents.

In the past six years its assurances in force have nearly doubled; in the past eleven years they have more than trebled.

More than 166,000 of its policies are now in force for assurances totalling over \$265,000,000—much the largest amount carried by any Canadian life company.

Losses paid since organization over \$39,000,000.00

SIMPLICITY FIRST

is about as important in your life assurance as "Safety First," because a contract that is not simple to understand may not be safe for your particular purpose.

The life assurance policy of the future must be an attractive and exactly worded contract, but above all CLEAR and SIMPLE — the new policy standard as set by

Coin and bullion.....	520,545	13,871,128	14,636,291	36,371,720	123,668,611	115,110,209
Total trade.....	93,799,982	99,000,038	238,860,488	1,061,365,504	1,142,911,769	1,819,706,490

*Note.—It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending July, 1916, were: imports 1916, \$33,717,992; 1915, \$133,113,099, and exports 1916, \$81,392,217; 1915, \$90,555,512. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

GREAT BRITAIN'S BLACK LIST

Principle Behind the Document—Respect for Neutral's Rights

The principle behind the black list is quite simple, says the London Times. The list is based upon the incontestable right of governments to tell their subjects with whom they may or may not trade. It is a right which exists and is sometimes invoked in times of peace. The United States and Great Britain and other countries used it to suppress the opium traffic. In times of war its invocation is a matter of course. In the American civil war the North forbade by proclamation trade with the seceding states. During the pacification of the Philippines—and this parallel is now to the point—the United States rigidly enforced it against neutral traders in the Philippines who were suspected of dealing with the insurrectionary Aguinaldo.

Justice of Action.

In this war one of the first acts of Great Britain was to place an embargo upon the export of various imperial products to countries which were not allies, and nobody seriously questioned the justice of its action. In the same way we can now hardly be denied the right to warn our traders that they must not have dealings with residents in neutral countries who are even suspected of aiding or abetting in any way the affairs of the enemy, and to tell them who these people are.

The United States black list was, in fact, promulgated after the most careful consideration, after similar black lists had been for some time in force regarding other neutral countries on both sides of the Atlantic. Possibly there may be some mistakes in it. If so they can be easily rectified, and no doubt will be. The more closely it is studied the more clearly does our war trade policy appear to have been formulated with all possible regard not only for the rights but also for the convenience of neutrals. As the cotton operatives of Lancashire discovered during the Civil War, innocent neutrals trade policies of belligerents, and it may be that the plight of neutrals who thus suffer is sometimes aggravated by the spectacle of the prosperity of neighbors whom the accident of commerce has rendered the gainers from war trades.

Bringing Peace Nearer.

But, as further official discussion will surely show, continues The Times, we can in all sincerity affirm that in telling our merchants with whom they may trade and in indicating to our shipowners whose goods they may or may not carry, we are simply trying to contribute to the cause of civilization by bringing the war to its foregone conclusion as quickly as possible, and are doing so with a clear conscience, whether we look at the business from the legal or from the ethical point of view.

BANK BRANCHES OPENED AND CLOSED

During August, 1916, there were 10 branches of chartered banks opened and 5 closed, according to Houston's Bank Directory:—

Branches Opened—10.

Catalina, Nfld. (Sept. 1st) ..	Bank of Nova Scotia
Chaplin, Sask.	Bank of Toronto
Fraserville, Que.	Banque Provinciale du Canada
Goodwater, Sask.	Weyburn Security Bank
Ottawa, Ont.	Banque d'Hochelaga
Riverhurst, Sask.	Canadian Bank of Commerce
*Speers, Sask.	Canadian Bank of Commerce
Tingwick, Que.	Banque d'Hochelaga
Three Rivers, Que.	The Molsons Bank
Verner, Ont.	Banque d'Hochelaga

Branches Closed—5.

Blairmore, Alta.	Royal Bank of Canada
*Botha, Alta.	Merchants Bank of Canada
Gilroy, Sask.	Canadian Bank of Commerce
Montreal, Que., Mount Royal	
and Papineau Avenue ..	Home Bank of Canada
West Side, Alta.	Royal Bank of Canada

*Sub branches.

Discussion of Tariffs After the War

DEPARTMENT of London Chamber of Commerce suggests that
*Friendly Neutrals will be Expected to Pay Twice as Much as
Allies — Enemy Countries would be Assessed Maximum Duties
Running as High as 30 Per Cent.—Canada's Preferential Tariff.*

DIVISION of the countries of the world into economic strata separated by tariff walls and classified as Allies of the British Empire, friendly neutrals, unfriendly neutrals and enemy countries is urged by the London Chamber of Commerce in its programme for British post-war trade domination. To clear the ground for this world reconstruction, the Chamber concludes in its special report that abrogation of all "most favored nation" treaties, including that with the United States, is inevitable.

Free trade, England's historic policy, would be abandoned under the Chamber's plan and a series of graded tariffs proposed in line with the present war groupings of the nations. All imports, for instance, would be divided into the following classes: Wholly manufactured goods, semi-manufactured goods and articles solely used as raw materials in industries, manufactured foodstuffs and raw foodstuffs.

All parts of the British Empire and its Allies would pay the minimum duties. Friendly neutrals, which allow the United Kingdom the most favored treatment, would pay twice as much. Other neutrals, giving preferences to other Powers and including neutrals which might be swung into the Teutonic commercial system, would pay a still greater surtax; and all "enemy" countries would pay the maximum duties, running up as high as 30 per cent.

Roughly, it is estimated in the report that this change from free trade to protection would net a yearly revenue of about \$375,000,000.

Every precaution is urged in the report to assuage neutral nations to prevent them from making commercial alliances with enemy countries after the war to the detriment of the British Empire and the Allies. The difficulties are spoken of as follows:—

"It must also be remembered that our Allies have tariff arrangements still in force with other foreign countries which it is assumed must be abrogated before any preferential trade arrangements can be made with the British Empire as a whole. In addition, the United Kingdom has 'most favored nation' clauses with certain foreign countries, including the United States. These, it is assumed, would have to be terminated, with or without compensatory advantages."

British trade domination also would be furthered under the Chamber's plan by a reorganization of the

consular service, anti-dumping laws, the formation of a ministry of commerce, with a seat in the cabinet, and the founding of a large central credit bank. The Allies would be asked to give British shipping preferential treatment after the war and to impose special taxes on enemy shipping using their harbors.

In addition to the discriminatory tariffs, subjects of countries now at war with Great Britain would not be allowed to live or trade in England except under license.

An interesting discussion on tariffs occurred at a meeting of the London Chamber of Commerce last month, when the Canadian trade commission visiting Europe, were in attendance. This meeting was referred to in *The Monetary Times* last week. Mr. T. H. Wardleworth, vice-president of the commission, said that he believed Canada was the first to invent what was known as the now famous "dumping clause" in connection with their tariff. When Canada granted a preference to Great Britain some years ago, Germany replied by putting a heavy surtax upon Canadian exports to Germany. Canada was equal to the occasion, and immediately imposed a substantial surtax on German goods, the result being that in one year the importation of German goods into Canada shrank by 60 per cent. and remained at that diminished point until an alteration in the tariff through the treaty with France enabled them to come back to the old standard. German trade, curiously enough, was then immediately increased to what it was before the surtax was imposed. He mentioned that point to show that with the wise application of a surtax upon the products of a hostile nation they had the remedy in their own hands. He realized that after the war labor problems would be very serious indeed, and would, to a certain extent, affect Great Britain's power to supply Canada with goods, but he ventured to hope that the solution would be much more simple than it appeared to be to-day.

Mr. W. R. Lawson, a well-known financier and writer in London, spoke particularly of the Canadian preferential tariff. He pointed out that, although a very specific preference might be given on certain articles, even 33⅓ per cent. or even 50 per cent., those articles might be of very small value, and there might be a preference to the United States on articles of a much higher value. Time had shown that on the whole of Canadian imports from the United Kingdom the average

ad valorem duty was very much higher than that levied on United States exports to Canada. There should be a national commission for examining the whole of the industrial and national resources of each of the dominions and allies, each country to say what it considered it was best able to produce and exchange with other countries, and to endeavor to arrange for mutual exchange in that way. At the present moment the worst effect of free trade in Great Britain was that it had led to industrial disorganization. Any man could come and start anything he liked and there was no check upon him. Canadian

bankers had spoken to him on the subject, especially in regard to British investors who had lost money in Canada, and the bankers had asked why did not those investors go to the banks before, instead of after, they had lost their money. It seemed to him that the very beginning of all should be a better arrangement for financing British and Canadian industries. The Canadian banking system was far in advance of the British, and one of the first things Great Britain must do was to get its banking connections with Canada put into proper order.

SOME INTERESTING LOAN SUBSCRIPTIONS

Charlie Chaplin Bought \$10,000 of the Bonds—Dominion Bridge Group

One of the most interesting personal subscriptions to the war loan was that of Charlie Chaplin, the famous moving picture actor. He subscribed \$10,000 through the Canada Bond Corporation, Toronto.

Mr. E. F. Hutchings, president of the Great-West Saddlery Company, Winnipeg, bought \$50,000 of the old war loan and \$550,000 of the present loan. The current subscription is an entirely new one and will be paid for in cash, making Mr. Hutchings a holder of a total of \$600,000 Canadian war bonds.

Deposit at Ottawa.

Mr. Wilbur S. Johnson, vice-president and comptroller of the Prudential Insurance Company of America, Newark, tells *The Monetary Times* that the company have subscribed for \$700,000 of the new war loan bonds. The bonds, when received, will be placed by the company with the insurance department at Ottawa as additional deposit for the protection of the company's Canadian policyholders.

The \$250,000 subscription of the Ogilvie Flour Mills Company, Montreal, to the new loan will stand in its entirety, as no portion will be paid by conversion of the old loan. Not only does the company still hold the bonds originally subscribed for on the first issue, viz., \$100,000, but the company has increased its holdings since, and the \$250,000 subscribed to the new loan will be a new investment and taken up in entirety if that amount is allotted on the company's application.

Manitoba's Subscription.

Hon. Edward Brown, provincial treasurer of Manitoba, tells *The Monetary Times* that in regard to the investment by that province of \$500,000 in the new war loan, no portion of this was used by way of conversion of the former loan, as this was the first investment of the kind the province had made. Of the amount, \$300,000 is represented by telephone replacement moneys and \$200,000 by the sinking fund moneys of the drainage districts.

The Dominion Bridge group took \$1,550,000 of the loan, made up as follows: Dominion Bridge Company, \$1,000,000; St. Lawrence Bridge Company, \$500,000; and Structural Steel Company, \$50,000.

WHEAT IN FARMERS' HANDS

The results of an inquiry made by the census and statistics office, Ottawa, by means of schedules addressed to its crop reporting correspondents and the postmasters in Manitoba, Saskatchewan and Alberta, show that the following surpluses of wheat, barley and oats remained in farmers' hands on August 31st, 1916, out of the crops of 1915: Wheat, 11,997,500 bushels; barley, 1,779,430 bushels; oats, 39,584,300 bushels. Adding these quantities to the totals in the elevators on September 1st, the following quantities represent the total estimated carry-over from the crops of 1915 into the crop year of 1916-17, beginning on September 1st: Wheat, 27,033,000 bushels; barley, 2,999,500 bushels; oats, 50,605,000 bushels.

UNITED STATES SUBSCRIPTIONS

They Have Been Substantial—Comments on Price of Loan

A substantial part of the war loan just subscribed will ultimately be placed in the United States. There have been a number of direct subscriptions from bond houses and others in that country. During the next few months, considerable buying of the present war bonds is anticipated in the neighboring republic.

Discussing this phase, *The Wall Street Journal* says: "Interest in the United States in the new \$100,000,000 Canadian war loan is greater than has been shown in any previous foreign government internal issue. It shows a continued broadening of our financial viewpoint. The loan being payable in gold and free from all present or future Canadian taxes, offers a suitable investment for United States investors, and is comparable with the Dominion issues brought out in this market. The yield basis of over 5.25 per cent. on which the new loan is offered compares with a present one of 5 per cent. on the 15-year 5s placed here earlier in the year, which also mature in 1931. This higher return is considered by many as more than sufficient to compensate for the fact that the internal loan will not be listed here.

Lower Yield Basis.

"It is an interesting comment on Canada's financial position that this new loan is offered on a lower yield basis than the \$100,000,000 issue of last November—about 5.26 per cent. as compared with 5.33 per cent.—while practically all the other governments involved in the war are paying more for money on each successive loan. Of course Canada is far removed from the war zone and it is enjoying a prosperity somewhat similar to that of the United States."

On the subject of price, the *Montreal Gazette* says: "With the 15-year maturity of the recent Canadian loan at New York selling fractionally above par—and not long ago as high as 102³/₄—obviously the present issue at a net price of about 97 must look attractive in investment circles in the United States. To all intents and purposes the two bonds are the same, carrying the same interest rate, running for the same period and both payable in gold. The gold feature neutralizes the fact that the Canadian issue is payable in Canada instead of at New York.

Bargain, by Comparison.

"The relatively high price which the 15-year bond of the United States issue commands is, of course, a part result of the distribution that has taken place. It will take some time for the larger Canadian issue to be placed as well, but the Canadian investor, considering the investment features of this issue to the exclusion of everything else, cannot afford to overlook the fact that the financial market at New York has been appraising the 15-year 5 per cent. Canadian bond at 3 to 5 points higher than the issue price of the new domestic war bond."

Mr. Morgan Jellett has been elected a member of the Toronto Stock Exchange. Mr. Jellett obtained his early training in the service of a bank. Some years ago he left the Traders Bank and afterwards became a member of the stock exchange firm of Messrs. Æmilius Jarvis and Company, Toronto.

GOVERNMENT LOANS BY ANNUITIES

Correspondent Further Urges This Medium to Raise National Funds

Mr. Ed. Ruthven, upon whose scheme to replace Dominion domestic loans as far as possible with government annuities comment was made in a recent issue of *The Monetary Times*, writes:—

Your editorial shows that you are in general accord with the policy I propose, but you do not indicate a very enthusiastic belief in the practical working of the scheme as a means of raising domestic loans. Of course it is impossible to say in advance that the plan would certainly succeed. But, when you consider that, with less real salesmanship than is exercised by the city agency staff of a life insurance company, the government has already raised in cash \$3,000,000 by sales of annuities, is there not great reason for hope that, with a real publicity and selling campaign, the borrowings in this way could be run up into hundreds of millions?

What Thrift can Accomplish.

Sir George Foster has reminded us of the fact—so obvious and elementary that we should not need reminding—that a saving of an average of ten cents a day per head of the people of Canada would give us \$250,000,000 in a year. With so perfect and workable a system as that of the government annuities system to give point and purpose to saving, surely it should not be difficult to make practically effective in the case of thousands of persons the appeal for thrift that is made by almost every minister of the Crown who addresses the public in these days.

In Britain special efforts are made to win the support of the small investor for the big war loans that are floated. The child who can save a penny has his card for stamps, and his pennies go into the war loan along with the millions subscribed by the great life insurance companies. And, penny for penny, his contribution is immensely more valuable for reasons of public policy than that of the millionaire. In the current flotation in Canada success will be judged not merely by the amount of subscriptions but also by the extent to which the person of small savings has participated in the work. But nothing like the same effort to collect pennies is made here.

Should Develop with Energy.

The annuities could be used to this end. The scheme is already set up and working. It is a good scheme in itself. On the money borrowed by its means the government saves at least 1 per cent. in interest. And every man, woman and child in Canada is eligible in the annuities system and can be appealed to in his or her own interest as well as in the interest of the country to entrust his savings to the government for this purpose, and to make his savings as large as possible. It seems to me this is an opportunity for fiscal development which should be developed and used immediately and with the greatest energy.

ESTIMATES OF WORLD'S CROPS

A cablegram received at Ottawa on Monday from the International Institute of Agriculture gives the following estimates of this year's crop production:—

The total production of wheat in Spain, England, and also Ireland, Italy, Switzerland, Canada, United States, India, Japan and Tunis, is estimated as 1,526,041,000 bushels, or 69.8 per cent. of the production in the same countries last year, and 92.6 per cent. of their average production in the five years, 1909-13. The production of rye in Spain, Italy, Switzerland, Canada and the United States amounts to 83,202,000 bushels, being 98.7 per cent. of last year's crop, and 115.4 per cent. of the five years' average.

The production of barley in the same countries as for wheat, less Tunis, is 476,583,000 bushels, 88 per cent. of last year's crop, and 100.6 per cent. of the five years' average.

The production of oats in the same countries as for wheat, less India and Japan, is 1,723,566,000 bushels, 78.2 per cent. of last year's production, and 106.8 per cent. of the five years' average.

WAR LOAN REFLECTS SOUND FINANCE

Statement of Finance Minister White—Further Munitions Credits

Speaking of the result of the war loan, Sir Thomas White, finance minister, to whom great credit is due for its success, said in an interview:—

"The result can only be regarded as one more notable achievement on the part of the Canadian people. It is the more extraordinary when it is recalled that before the war Canada depended for her borrowings upon the London market.

"The overwhelming success of the issue is a striking testimony not only to the loyalty but to the financial strength and soundness of Canada to-day. No special appeal was made to the public to support the loan, because we believed that the patriotism of the Canadian people required no stimulation. The terms of the issue were made to accord with the prevailing financial conditions and success was never for a moment in doubt.

Help of the Bond Houses.

"To the Canadian public belongs the credit, but I feel I should be less than just if I failed to specially acknowledge the services of the brokers and dealers who from the beginning spent lavishly of their money and employed their utmost endeavors to make the issue a success. I feel particularly grateful also to the press of the Dominion which, without exception, accorded the loan most generous and invaluable support. The handsome subscriptions of financial, commercial and industrial organizations sufficiently attest their share in bringing about the great result. A further most gratifying feature has been the participation of provincial governments and municipalities subscribing on behalf of their trust and sinking funds.

"In Great Britain and elsewhere abroad the notable success of the issue cannot fail to be regarded as a further and infallible evidence of the spirit of Canada respecting the war and her invincible determination to persevere to the utmost of her power until final and conclusive victory is achieved."

Sound Financial Situation.

The minister of finance added that he is so impressed with the result of the loan, as showing the essential strength and soundness of the Canadian financial situation, that he will at once take under consideration the question of establishing a further large dollar credit in Canada to be availed of by the Imperial government, for the purchase of munitions and supplies here. Speaking of this question, the minister said it was of the utmost importance both from the standpoint of the successful prosecution of the war and of Canadian business as well, that Canada should lend to the Imperial government as much as possible towards meeting the huge expenditure which it is making here, amounting to over a million dollars a day, for shells, explosives and other munitions. All this outlay has to be made in dollars from credits established on this side of the Atlantic. It cannot be paid in pounds sterling.

For Further Credits.

"The Canadian people are now deriving the full benefit of this enormous expenditure and it is our bounden duty, in the opinion of the minister, to save as much as possible of the profits to be available for the creation of further credits from which further purchases may be made. In exercising rigid economy and making the national savings thus available the Canadian people will be serving the two-fold purpose of high patriotism and good business. The amount of orders which Canada will receive must depend upon the amount of dollar credits Canada can establish for the Imperial government. To increase these credits will be the chief concern of the minister for the immediate future."

There is no reason why the trade between Vancouver and Vladivostok should not continue and increase after the war. At present Canada has two trade commissioners in Russia, and, though he did not say that it was the present intention to appoint others, the remarks of Sir George E. Foster, minister of trade and commerce, at Vancouver, indicated that something would be done in that connection, states a despatch from that city.

HELP OF BANKS AND BOND HOUSES

Sir Thomas White Pays a Tribute to Their Splendid Assistance

"I should be less than just if I failed to specially acknowledge the services of brokers and bond dealers, who from the beginning spent lavishly of their money and employed their utmost endeavors to make the issue a success."

This statement was made by Sir Thomas White, finance minister, in regard to the assistance of the investment houses in the marketing of the war loan.

The bond houses particularly were active and spent a considerable sum in advertising the war loan throughout the country. Many subscriptions were doubled and many firms and individuals who had not purposed subscribing, decided to do so as a result of the work of the bond houses. These firms, besides handling large blocks of the loan for clients, were purchasers on their own account of many millions of the bonds which they will sell in the ordinary way during the next few months.

Large Bond House Subscriptions.

Messrs. Wood, Gundy and Company, Toronto, for instance, received subscriptions aggregating \$22,000,000, of which five were for \$1,000,000 and over, 23 for \$100,000 and over, and 154 for \$10,000 and over, the balance being made up of 1,225 smaller subscriptions received from all parts of Canada and the United States.

The Dominion Securities Corporation, Toronto, turned in applications of \$11,500,000, including \$1,500,000 for its own account.

Messrs. R. C. Matthews and Company, Toronto, received a country wide application for the loan, subscriptions coming to them from every province and also from as far east as Boston. The applications from individual investors were also very gratifying. Taking the aggregate results, for every bond of the previous loan sold by this house ten bonds of the present loan were sold.

Messrs. Osler and Hammond, Toronto, had applications of \$7,000,000, including \$950,000 for its own account.

Handled 40 Per Cent. Last Time.

Another Toronto bond house, Messrs. A. E. Ames and Company, turned in subscriptions exceeding \$6,000,000, the number of subscriptions being 936, including amounts from all over Canada and many of the States. There were 773 subscriptions under \$5,000, 132 subscriptions from \$5,000 to \$49,000, and 31 subscriptions of \$50,000 and upwards.

Mr. Ralph Stephenson, resident partner of the firm of Harris, Forbes and Company, incorporated, Montreal, the Canadian firm allied with the prominent United States bond house of Harris, Forbes and Company, states that his firm has subscribed \$1,200,000 on its own account, apart from subscriptions entered in behalf of clients.

A number of other investment houses secured blocks of the loan. Some of these are noted in the list of subscriptions reported to *The Monetary Times* and printed on another page.

Of the November, 1915, war loan, the bond houses handled about 40 per cent. of the subscriptions. The amount will be quite as large, if not larger, in the present instance.

Banks' Useful Services.

As Sir Thomas White said last week, there was no conflict of interest between the brokers and bankers. The latter, at their 3,000 offices throughout the Dominion, received subscriptions from the public and payment therefor. They keep accounts in connection with their transactions, issue provisional receipts and interim certificates, in exchange for which they finally deliver the definitive bonds when prepared. These duties in this connection extend over months, and are of an exceedingly responsible character. In addition, they pay for the government at all their branches in Canada, free of exchange, all coupons maturing during the entire term of the bonds.

Applications for loans under the Ontario settlers' loan legislation of last session, already amount to \$92,790 for the district of Timiskaming alone, and others are still coming in, is the statement of Loan Commissioner Dane.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Sandwich, Ont.—\$5,507.6 per cent. 10-instalments, to Messrs. G. A. Stimson and Company, Toronto.

Lethbridge, Alta.—The taxpayers vote October 17th on the issuance of \$17,075 bonds for electrical work.

Dunnville, Ont.—The by-laws for the provision of hydro-electric power and to issue \$53,000 bonds have been carried and also that to extend the franchise of the Dominion Natural Gas Company for ten years.

British Columbia.—The following certificate has been issued by the municipal department of the province of British Columbia: Nanaimo, by-law No. 292, local improvements, street regrading, \$8,037.46, 20-years, 5½ per cent., payable half-yearly.

Victoria, B.C.—The city council has decided against purchasing any of the new Dominion war loan issue. Instead, the municipality will invest \$250,000 in debentures and stock offered on the London market at a rate of not less than 5½ per cent. yield. The Dominion Securities Corporation, Limited, will be paid a commission of ¼ of 1 per cent. on this business, and will be authorized to draw on the city through the Bank of British North America for this sum.

Edmonton, Alta.—The city council voted in favor of wiping out utility deficits by using the surpluses from other civic departments as follows: The statement as supplied by the utility commissioners, showed the deficits and surpluses to be used in liquidating them, up to June 30, 1916, as follows: Deficits—The following are the deficits up to June 30th, 1916: Street railway, \$632,312; telephone, \$41,839; waterworks, \$50,566; total deficits, \$724,718. Surpluses—The surpluses up to the same date are as follows: Electric light and power, \$202,564; power house, \$483,035; sale of lands, \$48,497; total surpluses, \$734,097; surplus balance, \$9,379.

BANKS' AUGUST STATEMENT

The August statement of Canadian chartered banks shows that the following changes have occurred since the previous return was issued:—

	August.	Changes since July statement.
Demand deposits \$	443,317,275	+ \$11,359,087
Notice deposits	806,774,687	+ 17,410,768
Total deposits in Canada	1,250,091,962	+ 30,769,855
Deposits outside Canada	140,789,100	— 30,378,515
Current coin	65,962,079	+ 267,274
Dominion notes	137,913,307	— 2,661,176
Deposits, gold reserve	20,880,000	+ 1,850,000
Call loans in Canada	86,351,216	— 1,004,432
Call loans outside ...	171,380,353	— 5,741,380
Current loans in Canada	739,938,513	— 102,228
Current loans outside..	66,556,371	+ 4,200,112
Reserve fund	113,022,933	
Note circulation	122,606,083	— 924,368
Total liabilities	1,596,526,413	— 2,593,226
Total assets	1,840,895,799	— 309,790

The *Monetary Times* analysis of the August bank statement will appear in next week's issue.

Touching Canada's loan triumph the Financial News says: "Canada fights as splendidly in the financial area as in the stricken field, and no acknowledgment could be higher than that." The Morning Post says that Canada's ability to assist with the trans-Atlantic credits, although she, before the war, was such a heavy borrower from the United States, is "a tribute of the soundness of Canadian banking, also the adaptability of Canadian people, and a proof that British money lent to Canada has been spent in ways contributing to the strength of the Empire and not to its weakness."

LESSONS OF THE LOAN

The oversubscription of the war loan indicates determination to bring the war to a successful conclusion. It is not a mandate to the government to become reckless spenders. One or two of the federal cabinet ministers at Ottawa appreciate the necessity of thrift and economy on the part of governments and people. Other ministers, who in various ways are doing considerable harm to the prestige and length of life of the present Dominion government, may regard the oversubscription of the loan as additional fuel for the fire of patronage and polite corruption. Canadians will subscribe war loans freely only so long as their governments practise the economy and clean politics they preach.

The result of the loan not only enhances Canadian credit in the international money markets but it also gives the people of Canada a greater measure of financial self-reliance. The country knows now that it is capable of doing a little lending, besides a lot of borrowing. An achievement which means the subscription of two dollars for every one of the \$100,000,000 asked by the government, is notable. Whether the citizens at large realize this, it is difficult to gather. The fact that \$200,000,000 have been subscribed was given less space and a poorer position in our daily press than a murder or a divorce story would get at any time.

With the \$300,000,000 subscribed through the two war loans, the per capita subscription is approximately \$43. While a number of small investors subscribed to the loan, the rank and file have yet to be reached. If \$86 per capita instead of \$43, were subscribed to war loans—and that should not be a difficult task—that would be equal to a further \$300,000,000 of war loans. Considering in addition our facilities for raising funds in the United States, the hope is reasonable that the war will have ceased before we have to raise \$300,000,000 more of war loans.

THE WAR LOAN

Last week, a day before the closing of the subscription lists of the Canadian war loan, *The Monetary Times* predicted an oversubscription of the loan by at least \$38,000,000. That amount, it was then said, was "quite possible and will probably be found under the exact figures when they are made known by the finance department at Ottawa." While certain analysts of this estimate were inclined to regard it as high, the subscriptions received up to midnight on September 23rd had reached \$169,000,000. With the mail still coming in from distant points this week, the finance department has stated that the subscription to the \$100,000,000 loan will be at least \$200,000,000, which more than bears out the estimate made by *The Monetary Times* on September 8th, that the loan would probably be oversubscribed by 50 per cent., and an amount which the most optimistic prophet would not have dared to predict.

This result in a country which has been such a heavy borrower in the past is an achievement which will give satisfaction not only to Canadians but also to the people of the United Kingdom and of the allied countries. As Sir Thomas White, the finance minister, has pointed out, the success of the issue is a striking testimony to the loyalty, the financial strength and soundness of Canada, despite the test of war. The result of the loan indicates that, with greater thrift on the part of the people during these days when war orders are bringing exceptional prosperity to the country, Canada will be able to finance its share of the war and provide further credits for Great Britain to purchase supplies here. The fact that the banks will not be called upon for their offered subscription of \$50,000,000 to the war loan, points the way to a further credit for the Imperial government as soon as it is needed. Already the banks have advanced \$101,000,000 in that way. Adding the \$50,000,000 which was set aside from the oversubscription of the first war loan, the Canadian advances for the purpose noted have totalled \$151,000,000.

A BRITISH EMPIRE WAR LOAN?

That when the many war loans in all the overseas dominions come to be liquidated, it may raise a condition without parallel, was a suggestion made recently to Mr. John Aird, general manager of the Canadian Bank of Commerce. Mr. Aird said he believed that the British method would be to issue one great Imperial loan covering all the loans that Great Britain and Canada, Australia and the other dominions had floated. This could, he thought, be raised at about 4 per cent. Necessarily it would have to be a long-term loan, say, for 50 or even for 100 years, but in that way, he thought, this problem could be settled to the satisfaction of all parties. It would have the effect of relieving the immediate pressure when some of these loans would have to be met in the usual way.

This appears to be an admirable idea. A loan issued by the British Empire would be considered the world's best investment. Behind it would be the natural resources, the sound financial methods, the wealth, the credit, and the citizens of an Empire which has proved itself to have the material and moral assets which give safety to the securities issued by a people.

FIRE INSURANCE RATES

The record of failures of fire insurance companies in Canada and of the results of the companies which have survived, indicate that the fire insurance business does not bring large profits. The Ontario fire marshal, Mr. E. P. Heaton, in his report on fire insurance rates and their control, refers to the "unreasonably autocratic attitude" of the Canadian Fire Underwriters' Association in its relation to the insuring public. He cites a number of conclusions and among them the fact that the practical control of fire insurance rates within Ontario is in the hands of companies, members of the Canadian Fire Underwriters' Association, known as tariff companies, who transact over 80 per cent. of the entire business of the province. He again describes the attitude of the association as "arbitrary and autocratic," and states that it has failed to make any serious effort to obtain reliable statistics upon which the adequacy of rates might be predicated. Mr. Heaton should know something of this subject, as he managed the fire insurance company organized for the benefit of Canadian manufacturers, a company which was disbanded after a short career because of its heavy losses, despite the fact that it charged tariff rates.

Presumably the principal object of the Royal Commission now investigating this subject in Ontario, will be to prevent discrimination in the matter of fire insurance rates. *The Monetary Times* believes that the companies

should not object to placing their rate schedules on file with the government. When an insurer feels that his rate is too high, he would then have the right to consult the schedules and to be informed as to how his rate is made up. In addition, it would be desirable for the government to appoint an inspector who would make independent inspections of waterworks—an important factor in fire insurance—or joint examination with the inspectors of the Canadian Fire Underwriters' Association. This work of inspection has heretofore been in the hands of the association. It has cost considerable money and because these reports are placed before municipal bodies without any outlay on their part, they almost invariably receive scant attention.

If the government have the rates on file and insurers can learn how these rates are made up, discrimination would be prevented. That seems to be about as far as the government can properly go. They can scarcely regulate the price of insurance any more than they can the price of other commodities.

In his supplementary report, Mr. Heaton, the fire marshal, points out that "oppressive legislation, that is, legislation forbidding the association of companies for rate-making purposes, has always failed and has resulted in demoralized commercial conditions." He cites the case of the state of Missouri. When such a law was passed there, all fire insurance companies, except those of domestic origin, retired from business and completely demoralized commercial credit. A similar condition is now operating in South Carolina, from which 67 insurance companies have withdrawn.

SEPTEMBER FIRE LOSSES

Waste was Below Average for Ninth Month—Twelve Large Fires

The Monetary Times' estimate of Canada's fire loss during September amounted to \$981,703, as compared with August loss of \$803,109 and \$1,116,109 for the corresponding period of last year. The following is the estimate for the September losses:—

Fires exceeding \$10,000	\$795,500
Small fires	50,850
Estimates for unreported fires	129,353
	\$981,703

The Monetary Times' record for the past four years shows the following monthly losses:—

	1913.	1914.	1915.	1916.
January . . .	\$3,913,385	\$2,796,312	\$1,249,886	\$1,649,217
February . . .	2,037,386	2,920,749	1,019,556	3,275,600
March . . .	1,710,756	2,660,666	1,631,696	1,406,501
April . . .	1,470,622	1,916,235	1,463,747	1,400,437
May . . .	2,123,868	1,935,516	881,855	1,850,205
June . . .	3,069,446	1,267,416	1,157,156	494,557
July . . .	2,579,698	2,033,139	773,269	1,159,285
August . . .	3,034,775	2,921,379	403,693	803,109
September . .	1,468,324	1,356,281	1,116,109	981,703

The fires reported in September at which the losses amounted to \$10,000 and over were:—

Maisonneuve, Que., Sept. 5....	Tenements	\$ 10,000
St. Thomas, Ont., Sept. 5....	Construction plant . . .	20,000
Westboro', Ont.	Stores, etc.	57,000
Toronto, Ont., Sept. 10.....	Factory	86,500
Vancouver, B.C., Sept. 11....	Factory	100,000
Sarnia, Ont., Sept. 14.....	Factory, etc.	300,000
St. Thomas, Ont., Sept. 17....	Factories	40,000

Cavan Twp., Ont., Sept. 21...	Barns	\$ 10,000
Oil Springs, Ont., Sept. 21....	Barn and contents..	10,000
Sydney, N.S., Sept. 23.....	Carriage works	10,000
Winnipeg, Man., Sept. 25.....	Stables, etc.	12,000
Quebec, Que., Sept. 27	Institution.....	50,000

Among the causes were: Lightning 6, sparks 3, incendiary 2, overheated furnace 2, dropped matches 2.

The structures damaged and destroyed were: 30 barns and stables, 12 residences, 7 factories, 4 sawmills, 4 stores, 2 stations, 1 garage, 1 roundhouse, 1 hotel.

The following table compiled by *The Monetary Times*, shows deaths caused by fire during the first eight months of 1916 compared with previous returns:—

	1909.	1910.	1911.	1912.	1913.	1914.	1915.	1916.
January . . .	16	27	27	27	14	26	3	10
February . .	8	15	12	11	21	18	11	20
March . . .	16	20	18	24	22	27	23	23
April . . .	18	37	20	15	11	22	14	6
May . . .	21	15	28	18	33	8	14	14
June . . .	16	52	13	6	18	12	2	6
July . . .	4	15	110	9	9	8	13	268
August . . .	17	11	22	16	29	3	14	30
September . .	10	10	13	6	27	9	27	2

The fires at which fatalities occurred were:—

Halifax, N.S., Sept. 11.....	Burning store.....	1
Kingston, Ont., Sept. 20.....	Playing with matches ...	1

SUBSCRIPTIONS TO THE TWO LOANS

The \$50,000,000 war loan of November, 1915, was subscribed to the extent of \$104,000,000 by 24,803 subscribers. The present \$100,000,000 loan has been subscribed by over \$200,000,000, representing about 30,000 subscribers, or 5,000 more than a year ago.

The government are considering the issue of bonds of small denomination to attract small savings.

TORONTO CITY MUST RETRENCH

Finance Commissioner Bradshaw Presents Important Report

That a stern policy of retrenchment must be pursued in its financing, is the counsel given to the city of Toronto by its finance commissioner, Mr. Thomas Bradshaw, in a striking report presented to the board of control yesterday. Mr. Bradshaw, who enjoys a notable reputation throughout the continent as a financier and actuary, points out the vital necessity for economy on the part of the city authorities. He supports his advice with indisputable facts and figures, and states that the rapidity with which the debt has increased in recent years, together with the prospect of what it will attain when the present undertakings are completed, are such as to justify serious apprehension. The report is the topic of considerable comment in various quarters, for it is recognized that Mr. Bradshaw's conclusions and recommendations have been arrived at only after the most careful analysis of the facts. In short, it is felt that the city of Toronto must listen to and act upon what amounts to a serious warning in regard to the heavy increase in the city's debt, especially in the past decade, and the tendency to a further heavy increase.

Growth of Debt.

Mr. Bradshaw points out that at the close of 1915 the permanent debt of the city was \$86,146,524. When the works now under way are completed, and bonds issued, the permanent debt of the city will not be less than \$109,000,000, or over four-and-a-half times what it was in 1905, when it totalled \$24,066,916. In 1910 it had increased to \$37,967,039. Mr. Bradshaw points out that his estimate of a debt of \$109,000,000 does not include the contemplated works that have not been commenced, estimated at \$21,000,000, and the war liability which is not at present determinable.

Figures are cited showing the position of the affairs in regard to the municipality's undertakings. The following is a summary:—

Civic undertakings, recently completed but not permanently financed, funds having been provided through temporary loans	\$ 9,991,461
Works proceeding, but financed by temporary borrowings, \$3,266,154 having been already paid out, leaving yet to be provided	9,504,737
Works being actively proceeded with and permanently financed, \$15,884,496 having been paid out, leaving yet to be expended	6,997,738
Works in contemplation but not yet commenced..	21,059,642

Will be Big Overdraft.

Mr. Bradshaw points out that so far as can be ascertained now, there will have to be provided by way of overdraft or loan by December 31, on account of current expenditures, the sum of \$5,225,000. This large amount, he says, will practically represent arrears of revenues, taxes, etc., which should have been paid in this and previous years, but which will not be received until some time after the close of the year. He declares that the substantial amount of current revenue, approximately \$5,000,000, which is constantly in arrears, compels the city to be a much heavier borrower than should be the case, and makes the municipality dependent upon its bankers. The city is compelled to pay \$250,000 a year for this accommodation.

"It appears to me," he adds, "that we should aim to so regulate the receipt of our revenue, that it will closely harmonize with the period of its expenditure."

Some Important Recommendations.

He also recommends that in respect to undertakings involving capital charges, the policy be adopted, that no new work, service, etc., shall be recommended, authorized, or proceeded with, during at least the period of the war, unless good and sufficient evidence can be adduced that the same is absolutely necessary; and, that all the outside boards be asked to adopt this policy also; and that a conference be held to determine what contemplated works may be deferred for some years.

The Toronto authorities are expected to give serious consideration and action to the report. Meantime, the issue of the document should cause other cities and towns to indulge in a little self-examination.

MR. GOLDMAN IS NORTH AMERICAN LIFE'S PRESIDENT

Mr. L. Goldman, who is well known in life assurance circles as the managing director of the North American Life Assurance Company, was at a meeting of the directors yesterday elected as president of that company, succeeding the late Mr. E. Gurney. Mr. W. K. George was elected first vice-president, Colonel D. McCrae second vice-president, Mr. M. J. Haney chairman of the executive, and the vacancy on the board of directors was filled by the election of Mr. W. Cromwell Gurney, who is now head of the Gurney Foundry Company.

ADDITIONAL WAR LOAN SUBSCRIPTIONS

The following additional subscriptions to the war loan have been reported to *The Monetary Times*:—

Montreal Locomotive Works	\$250,000
Nipissing Mining Company	100,000
Henry J. Fuller, Montreal	30,000
J. S. Hamilton, Brantford	10,000

These additions make a total of \$107,455,000, the details of which have been printed in these columns. The main list of the subscriptions making that total are published on page 22 of this issue.

The Nipissing Mining Company is also purchasing a considerable quantity more of the war loan in the open market. Through the St. John and Halifax offices of the Eastern Securities Company, subscriptions were received amounting to \$1,175,000. The chartered banks at St. John received subscriptions amounting to \$2,000,000.

Mr. H. J. Fuller is president of the Canadian Fairbanks-Morse Company, Limited, Montreal; he also holds a high position with the Fairbanks Company in the United States, and makes his headquarters New York, although much of his time is spent in Canada. He is as much interested in Canada, financially and otherwise, as he has ever been, and he is one of the best advocates that Canada has in the United States.

The finance department, Ottawa, has cabled the British government an offer to advance \$50,000,000 as a credit for the use of that government for the purchase of supplies here. This is possible on account of the oversubscription of the war loan, and will make a total of \$201,000,000 advanced by Canada in this way. The banks will furnish the money, as their \$50,000,000 subscription to the war loan will not be needed for war loan purposes.

WEEKLY RAILWAY EARNINGS

The following are the earnings of Canada's transcontinental railways during the three weeks ended September 21st:—

Canadian Pacific Railway.				
		1916.	1915.	Increase.
September 7		\$2,679,000	\$2,002,000	+ \$677,000
September 14		2,214,000	2,728,000	+ 514,000
September 21		2,779,000	2,408,000	+ 371,000
Grand Trunk Railway.				
September 7		\$1,276,061	\$1,091,711	+ \$184,350
September 14		1,054,808	1,263,629	+ 208,821
September 21		1,320,277	1,061,047	+ 259,288
Canadian Northern Railway.				
September 7		\$ 708,900	\$ 456,500	+ \$252,000
September 14		590,900	668,000	+ 77,100
September 21		726,000	654,700	+ 71,300

The Canadian Northern Railway's statement of earnings and expenses for August, 1916, is as follows:—

	1916.	1915.	Increase.
Total gross earnings..	\$3,684,900	\$1,083,600	+ \$1,701,300
Operating expenses ...	2,612,900	1,525,900	+ 1,087,000
Net earnings	1,072,000	457,700	+ 614,300
Aggregate gross earnings from July 1st.	\$7,510,100	\$3,945,300	+ \$3,573,800
Aggregate net earnings from July 1st.	\$2,269,400	\$ 944,100	+ \$1,325,300

The Bank of British North America

INCORPORATED BY ROYAL CHARTER.

The Court of Directors hereby give notice that an interim dividend, for the half year ended 31st May last, of 30 shillings per share, less Income Tax, being at the rate of 6 per cent. per annum, will be paid on the 6th day of October next to the Proprietors of Shares registered in the Dominion of Canada.

The Dividend will be payable at the rate of exchange current on the 6th day of October next to be fixed by the Managers.

No transfer can be made between the 22nd inst. inclusive and the 5th prox. inclusive, as the books must be closed during that period.

By order of the Court of Directors,

JACKSON DODDS,
Secretary.

No. 5 Gracechurch Street,
London, E.C.,

General Manager.

Montreal, 18th August, 1916.

SEPTEMBER MUNICIPAL BOND SALES

Municipalities Were Bond Buyers Rather Than Sellers
This Month—Edmonton's Issue

The municipal bond sales in Canada for September, as compiled by *The Monetary Times*, amounted to \$960,435, compared with \$852,447 for August and \$2,768,484 for the corresponding period of last year.

Comparing the record of September, 1915, with that of the month just ended, the bond sales are as follow:—

	1916.	1915.
Canada	\$ 960,435	\$2,768,484
United States	217,000	6,748,342
	<u>\$1,177,435</u>	<u>\$9,516,826</u>

Municipalities during September did not place any large issues on the market as in September, 1915, when Ottawa and Toronto were both in the market, and their issues approximated \$6,240,000.

This was largely owing to the issue of the Dominion's second domestic war loan, of which Canadian municipalities subscribed for \$3,341,400, or for more than three times as many bonds as were sold during the month.

The municipal bond sales in Canada during the first nine months of the past five years, according to *The Monetary Times'* bond record, were as follow:—

	1912.	1913.	1914.	1915.	1916.
Jan.	\$2,133,531	\$1,337,500	\$1,953,137	\$1,784,947	\$1,909,441
Feb.	2,596,378	1,038,806	5,995,336	3,047,011	1,419,909
Mar.	1,926,716	335,492	5,123,176	2,572,357	2,027,741
April	927,160	3,693,857	2,847,953	8,603,094	1,979,852
May	1,928,748	880,630	6,400,755	3,464,281	2,649,000
June	1,690,344	2,435,726	4,617,857	2,395,744	3,395,583
July	1,967,476	1,591,924	2,180,758	1,618,422	1,485,225
August	1,649,547	526,300	395,395	1,087,415	852,447
Sept.	1,998,605	1,663,260	535,050	2,768,484	960,435

Canadian municipal bonds sold in the United States during the first eight months of 1916, compared with sales of 1914 and 1915, were as follow:—

	1914.	1915.	1916.
January	\$ 340,000	\$3,183,215	
February	50,000	6,471,000	899,500
March	18,000	6,543,947	595,000
April	25,000	7,100,825	2,158,000
May	1,750,000	600,000	7,219,000
June	2,100,000		3,168,743
July	1,130,000	890,000	3,540,000
August	35,000	750,000	97,300
September	90,000	6,748,342	217,000

The following are the particulars of the sales in Canada by provinces:—

Alberta	\$563,000
Quebec	200,000
Saskatchewan	153,000
Ontario	44,435
	<u>\$960,435</u>

The following are the details:—

Alberta.

Edmonton	\$563,000	5	1934
--------------------	-----------	---	------

Quebec.

Cartierville	\$100,000	6	1956
Grand Mere	100,000	5½	1946
	<u>\$200,000</u>		

Saskatchewan.

Sutherland	\$ 36,000	7	1936-46
Assiniboia	68,000	6½	1946
Assiniboia	17,000	6½	1931
School Districts	33,000	..	
	<u>\$153,000</u>		

Ontario.

Wellesley Township	\$ 1,735	4½	1931
North Bay	15,000	6	1936
Stayner	2,000	6	1936
Petrolia	7,500	6	1936
Petrolia	1,700	6	1926
Kitchener	16,500	5	1931-46
	<u>\$ 44,435</u>		

The following issue was sold in the United States:—

British Columbia.

North Vancouver	\$217,000	...	
---------------------------	-----------	-----	------

Tenders for some of the above issues were as follow:—

Edmonton, Alta.—For the issue of \$563,000 5 per cent. 1934 bonds the following tenders were received by Mr. F. Barnhouse, city treasurer: W. Ross Alger and Company, 85; Imperial Bank, for Wood, Gundy and Company, 86.68; A. F. Carrothers and Company, 87.65; J. Bangs, agent for Hord and Company, Chicago (portion), 89. The bid of Messrs. A. F. Carrothers and Company, Edmonton, was accepted.

Messrs. Carrothers' offer was 87.65 and accrued interest, Edmonton delivery, subject to the following conditions: (1) Bonds issued under by-laws 682 and 686, totalling \$250,000, will be taken over as soon as a satisfactory legal opinion from either the Hon. Charles B. Wood, attorney, of Chicago, or J. B. Clarke, K.C., of Toronto, is obtained; (2) bonds under by-laws 549, 558, and 574, totalling \$313,000, desired to have re-issued in denominations of \$1,000, payable in gold coin in Edmonton, Toronto, Montreal and New York, with the same conditions regarding legal opinion from the men mentioned; (3) in each case the company will pay the cost of securing the necessary legal opinion; (4) the bonds to be approved by the Alberta Public Utilities Commission.

Mr. J. Bangs, agent for Hord and Company, Chicago, offered 89 and accrued interest for \$75,000 either under by-law 549 or 574, payable in New York subject to being furnished a certified copy of the proceedings authorizing the issue and the approval of an attorney.

The Imperial Bank, for Messrs. Wood, Gundy and Company, Toronto, offered 86.68 and accrued interest for 5 per cent. bonds, due July 1st, 1934, totalling \$563,000, payable in Toronto, New York and Edmonton, subject to Messrs. Wood, Gundy and Company's solicitors approving the legality of the bonds. Messrs. Wood, Gundy and Company also asked to have submitted a bid of 87.18 for \$250,000 of the issue with an option of sixty days upon the balance on the same terms.

Messrs. W. Ross Alger and Company, Edmonton, offered 85 cents on the dollar and accrued interest, subject to all the bonds being payable in denominations of \$1,000 in gold coin in New York and the legality subject to a satisfactory opinion of bond attorneys.

Petrolia, Ont.—For the issues of \$7,500 6 per cent, 20-year and \$1,700 6 per cent, 10-year bonds the bids were as follow, the first-named receiving the award: Canada Bond Corporation, \$9,509.20; Messrs. G. A. Stimson and Company, \$9,467.72; Messrs. W. A. Mackenzie and Company, \$9,389; Messrs. R. C. Matthews and Company, \$9,355; Messrs. Mulholland, Bird and Graham, \$9,343; Imperial Bank, \$9,318; Messrs. Brent, Noxon and Company, \$9,317.

North Bay, Ont.—Messrs. C. H. Burgess and Company were the successful tenderers for the issue of \$15,000 6 per cent. 20-instalment bonds, offering \$15,134. The other bids were: R. C. Matthews and Company, \$15,053; Imperial Bank of Canada, \$15,042; Mulholland, Bird and Graham, \$15,037; Canada Bond Corporation, \$14,757; A. E. Ames and Company, \$14,745; Brent, Noxon and Company, \$14,579.

NEW FRENCH LOAN

Calculations made on the French war loan about to be issued in the United States show that it produces slightly less for the investor than the 1915 loan. The former loan gave 5.88 per cent., while the new one gives 5.83.

NEW INCORPORATIONS

Forty-eight New Charters Granted — Three Mining Companies Capitalized at \$1,000,000

Canada's new companies incorporated this week number 48. The head offices of these companies are located in six provinces. The total capitalization amounts to \$5,565,500.

The largest companies are:—

Coast Copper Company, Limited	\$1,000,000
Manville Asbestos Company, Limited	1,000,000
Molly Gibson Burnt Basin Mining Company, Limited	1,000,000

Grouping the new concerns, according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Ontario	10	\$ 520,000
Quebec	13	1,878,000
British Columbia	7	2,135,000
Alberta	7	350,000
Saskatchewan	9	162,500
Manitoba	2	520,000
	48	\$5,565,500

The following is a list of charters granted during this week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

- Delisle, Sask.**—Pope and Given, Limited, \$20,000.
- Dodds P.O., Alta.**—Marcus L. Hyde, Limited, \$10,000.
- Medicine Hat, Alta.**—The State Ranch, Limited, \$20,000.
- High River, Alta.**—The Alberta Garage, Limited, \$10,000.
- Trail, B.C.**—Coast Copper Company, Limited, \$1,000,000.
- Assiniboia, Sask.**—Assiniboia Rink Company, Limited, \$10,000.
- Lethbridge, Alta.**—The Sick Farming Company, Limited, \$30,000.
- Humboldt, Sask.**—Humboldt Builders' Supply Company, Limited, \$25,000.
- Moosomin, Sask.**—The Saskatchewan Export Liquor Company, Limited, \$10,000.
- Roseland, B.C.**—Molly Gibson Burnt Basin Mining Company, Limited, \$1,000,000.
- St. Thomas, Ont.**—Nobility Chocolates, Limited, \$100,000. P. H. Kolb, C. Durdle, T. Roy.
- Hamilton, Ont.**—Hamilton Brass, Limited, \$40,000. J. M. Telford, R. P. McBride, H. J. Blaine.
- Chelmsford, Ont.**—Chelmsford Creamery, Limited, \$10,000. H. J. Gratton, J. Bradley, P. P. Oscar.
- Sherbrooke, Que.**—Panther Rubber Company, Limited, \$100,000. T. Halle, J. Surprenant, J. N. Decarie.
- Regina, Sask.**—Auto Service Company, Limited, \$40,000; Home Furnishing Company, Limited, \$20,000.
- Saskatoon, Sask.**—Logan's, Limited, \$20,000; Canadian Motors, Limited, \$10,000; May and Gebbie, Limited, \$7,500.
- Sudbury, Ont.**—The Sudbury Co-operative Creamery Company, Limited, \$20,000. D. J. McLean, R. Thaxter, W. Meadows.
- Edmonton, Alta.**—The Northern Petroleum Company, Limited, \$250,000; Fraser Grain Company, Limited, \$25,000; the Coal Market, Limited, \$5,000.
- Winnipeg, Man.**—The N. Bawlf Grain Company, Limited, \$500,000; Canadian Fancy Goods Company, Limited, \$20,000. L. A. Seipp, S. W. Marson, A. H. S. Murray.
- Vancouver, B.C.**—J. S. Patterson and Company, Limited, \$10,000; Canadian Robert Dollar Company, \$40,000; Younge and Gore Tugboat Company, Limited, \$40,000; Quatsino Trading Company, Limited, \$20,000; Western Sandstone Company, Limited, \$25,000.
- Toronto, Ont.**—Carola Company of Canada, Limited, \$40,000. H. R. Petersen, F. J. Foley, D. J. Coffey; John Ahlgren Ladies' Costumes, Limited, \$40,000. M. P. Van der Voort, Oliva Orton, Dillis Sleeth; Associated Investors, Limited, \$40,000. J. M. Bullen, H. L. Steele, J. H. Fraser; Globe Hotel and Lunch Company, Limited, \$40,000. A. W. Ballantyne, C. F. Ritchie; Canadian Poland Trading Com-

pany, Limited, \$40,000. A. Wacławski, A. Purst, A. L. Lozicki; the Dodge Metal Hose Company of Canada, Limited, \$150,000. D. L. McDonald, O. N. Richard, Elsie Grainger.

Montreal, Que.—Food Distributors, Limited, \$100,000. H. S. Ross, E. R. Angers, G. T. Porter; the Transfer Realty and Investment Company, Limited, \$50,000. J. H. Goyette, R. Duckett, A. Guilbault; the A. L. Johnson Shoe Company, Limited, \$200,000. J. S. Hough, A. L. Johnson, H. H. Dunwoody; Manville Asbestos Company, Limited, \$1,000,000. G. W. MacDougall, W. B. Scott, J. G. COCKSHUTT PLOW COMPANY

The annual report of the Cockshutt Plow Company shows that after making provision for anticipated losses, depreciation of plant and machinery, the profits indicate an increase of \$109,000 and the liabilities a reduction of \$1,264,000. The profit and loss account in the last two years, ending on June 30 respectively, compares as follows:—

	1916.	1915.
Net profits	\$465,211	\$369,388
Dividends on investments	34,965	21,975
Available for distribution	500,176	391,363
Transferred to reserves (\$100,000 to contingent and \$150,000 to merchandise)	250,000	313,451
To balance carried down	250,170	185,899

"The abnormal conditions which, on account of the war, have prevailed for some time, are still with us," states President Cockshutt. "The prices for raw material are high and deliveries slow and uncertain. The lack of sufficient labor has also proved a serious handicap to the business, and the present outlook does not hold out any hope for improvement in the near future. On account of the increased cost of raw material and labor that goes into the manufacture of implements, it has been found necessary to advance prices from time to time. How long the present situation will prevail is a difficult question to answer, and in consequence the directors have made provision to place in the merchandise reserve account \$150,000 to provide against any sudden return to normal."

Owing to the fact that the harvest prospects in Canada this season are not so bright as they were a year ago, when the bountiful crop greatly benefited the business of the company, the directors have considered it best that dividends should be deferred until such time as business and commerce is more settled. The dividends on the preference shares were declared and paid to June 30, 1914.

Mr. Edward Gurney, a prominent Canadian manufacturer, died last week at Toronto. He was one of the best-known and successful of Canadian business men. He was a life-long Conservative and ardent protectionist, and the author of the statement, "I would build the Canadian tariff as high as Haman's gallows if it would keep out United States manufacturers." He was the only son of the late Edward G. Gurney, a native of Holland Patent, N.Y., who, with his brother Charles, laid the foundation in Hamilton many years ago of the well-known foundry business of E. and C. Gurney. Mr. Edward Gurney was born in Hamilton on August 4, 1845. He was president of the following companies: The Gurney Foundry, the Gurney-Massey, of Montreal, the Gurney Heater Manufacturing Company of Boston. He was vice-president of the Gurney North-West Foundry Company, and president of the North American Life Assurance Company. He was a member of the Toronto, National and Automobile Clubs, and a member of the executive committee of the National Sanitarium Association, a vice-president of the American Life Assurance Company, was president of the Ontario Manufacturers' Association from 1880 to 1881, a vice-president of the Toronto board of trade in 1806 and president in 1897.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Abitibi Power and Paper Company.—The company has decided to double the capacity of its plant. This will bring the company's output up to 400 tons a day.

Smart-Woods, Limited.—The directors in declaring a dividend of $1\frac{3}{4}$ per cent. on the preferred stock for the quarter ended September 30, have also authorized a dividend of the same amount against the deferred dividends on the preferred. Both payments will be made on October 2 to shareholders of record September 27.

Canadian Northern Prairie Lands Company, Limited.—To the end of July last the company had sold 433,960 acres of land, on which the amount realized to date is \$3,429,873. The cost at \$3 per acre of the land sold is placed by the company at \$1,301,880. There are 66,040 acres remaining unsold.

Canadian Northern Railway.—In connection with the issue of \$1,250,000 of Canadian Northern equipment trust bonds maturing from 1917 to 1926, now being placed in New York, President Mackenzie states that, while the usual cash payment on account of equipment bought is only 10 per cent., the cash payment made on this equipment was 25 per cent., which tends to make the security the more secure.

A. Macdonald Company.—On November 1 the company will pay off its final \$202,000 of mortgage notes, one-half of which is held by the former owner of the business and one-half by the public. A similar amount of these notes has been paid off every year since the company passed into its present hands. After November there will be no liabilities outstanding ahead of the preferred stock.

Nova Scotia Steel and Coal Company.—At the directors' meeting held last week, the preferred dividend for the quarter ended September 30th at the rate of 8 per cent. per annum was declared, payable October 14th. No action was taken on the common stock dividend. The business of the past month was considered satisfactory, a large amount of additional business having been booked during that time, so that the business now on the books is sufficient to keep every furnace and mill of the company fully employed for more than 12 months.

Minneapolis, St. Paul and Sault Ste. Marie Railway Company.—Gross earnings for the fiscal year ended June 30 totalled \$35,010,064, or \$7,246,839 more than for the preceding year, according to the annual report. They are the largest in the road's history. Net earnings were \$15,928,995, an increase of \$5,977,144. The surplus increased \$5,115,698. Increased earnings were due principally to the big crops of 1915 and heavy shipments of iron ore, the report says. The net earnings show an increase of 60 per cent., and the gross earnings a gain of 26 per cent.

Ogilvie Flour Mills Company.—A bonus of 4 per cent. for the year ended August 31 last has been declared by the directors. The bonus will be paid on October 1, along with the regular quarterly dividend of 2 per cent., making a total distribution out of the year's profits of 12 per cent.

The bonus declared this week is the first extra distribution to be made by the company. When the stock was first listed on the Montreal Exchange back in 1908, the common shares were returning 6 per cent. The rate was advanced to 8 per cent. in 1910 and has been at that level since.

Eastern Car Company.—The company has completed the first contract for 1,000 cars for the French government, all of which have been delivered, and it expects to begin delivery next month on the second order from the French government for 3,000 cars. Work is also beginning on 500 freight cars for the Canadian government railways. The company is negotiating for a contract to build 4,000 cars for another foreign government, and if it is successful in securing this the works will be assured of orders to keep them employed for nine months of next year. Orders on hand are sufficient to keep the company busy every day this year.

Dominion Steel Corporation.—A contract covering the company's entire output of high explosives steel for the first six months of 1917, has been signed, according to an announcement made by President Workman. The corporation is preparing to retire, out of revenue, the balance of its short-term obligations, consisting of \$3,400,000 5-year 6 per cent. notes. Although these notes do not fall due until December 1, 1918, their maturity will be anticipated by two years. By December 1st of the current year the corporation will have sufficient money in the bank for the purpose, and it proposes to exercise its privilege of calling in the notes on that date. Mr. Workman pointed out that its debt to the banks was already discharged, and when these notes were paid off the company would be entirely free of floating indebtedness.

Porto Rico Railways, Limited.—The company's statement for August and the first eight months of the year follows:—

	August, 1916.	Increase over August 15.	*Per cent.
Gross	\$ 60,528.88	\$ 1,510.61	2.55
Net	21,148.59	*10,269.87	*32.65

*Decrease.

For eight months—

Gross	\$563,025.15	\$63,150.93	12.63
Net	281,445.76	40,530.46	16.82

The month's receipts were considerably reduced and operating expenses were increased from damage caused by a great storm that swept over the entire island on August 22.

Canadian Car and Foundry Company.—After consideration of the reports of Messrs. Price, Waterhouse and Company, and Colonel Dunn, of the New York agency, the directors issued the following statement: "The directors authorize a statement that a careful analysis of the results shown by these reports, coupled with the amended contracts made with the Russian government, convinces them that a substantial profit will accrue to the company from the undertakings. The numerous difficulties met with have been generally overcome, and the directors anticipate that the contracts will be fully completed by January, 1917. The directors state that the value of unfilled orders on the Canadian books of the company and its subsidiaries amounts at this date to over \$15,000,000, and that this amount may be greatly increased by inquiries now pending.

"Lack of working capital, due to the large sums necessarily tied up in the Russian enterprises, has been a handicap in the execution of the large war orders placed with the company's Canadian plants, but this difficulty should be removed within the next three or four months, when the company's entire capital, together with its energies, will be concentrated on its Canadian enterprises."

Canadian Locomotive Company.—The company has on its books total business of \$3,890,000, a sum in excess of both preferred and common stock issues of the company. Of the orders \$2,600,000 is for locomotives, representing the company's Russian order; \$1,200,000 for munitions and \$90,000 for extra work, and all of it, has been secured at satisfactory prices. These statements are made in the annual report of the company presented to the shareholders.

The balance sheet for the year ended June 30th, 1916, shows cash on hand of \$180,297; work in progress, at cost, \$395,095; materials and supplies, at cost, \$158,734; accounts receivable, \$601,761; and deferred charges to operations, \$8,804. The property account is increased to \$5,435,000 from \$5,047,499, and the president explains that this gain of \$387,829 is chiefly for machinery for munition and other business.

The manufacturing profits for the year were 44 per cent. in excess of those of any previous year. They were \$572,982, which compares with \$130,027 in 1915, \$334,114 in 1914, and \$377,043 in 1913. After bond interest of \$90,000, writing off an anticipated loss of \$12,601 on a mortgage realization, and transferring to special replacement, general depreciation reserve and amortization \$190,000, and \$15,000 to sinking fund, the year's surplus applicable to the preferred stock was \$267,520, or 17.83 per cent. Earnings in the 1914 year were 13.19 per cent. on the preferred, in 1913 14.61 per cent. and in 1912 13.41 per cent. In the latter year earnings included a special appropriation of \$105,000. Earnings on the common were 8 per cent., against 4.61 in 1914 and 5.71 in 1913. The 1915 year did not produce sufficient for the preferred dividend.

CANADIAN NORTHERN'S 2,182 WHEAT TRAINS

Canada's railways' share in distributing her wheat crop the world over is indicated in the following figures of the Canadian Northern Railway:—

During the twelve months ended August 31st the Canadian Northern Railway handled over its lines between Lake Superior and the Rocky Mountains 109,122 cars of grain produced along its rails, and inspected by the government at Winnipeg, Calgary and other points in the west. This is an increase of 69,828 cars over the previous year, and represents a gain of 178 per cent. A modern box car carries 1,200 bushels, so that the Canadian Northern transported more than 130,000,000 bushels of grain.

Coupled together, these 109,122 cars would form one continuous train from Toronto to Montreal and back, and up north as far as Parry Sound. Split this up into freight trains of fifty cars each, which is the average over the Canadian Northern between Winnipeg and Port Arthur, and there

are 2,182 trains, each with locomotive, caboose and train crew. The cars handled over and above the total of the year before would constitute a train continuing without a break from Toronto to New York. The terminal elevators at Port Arthur have been making records also. Of the crop of 1914, the movement of which closed on August 31st, 1915, the Canadian Northern Railway elevator at Port Arthur, the largest consolidated elevator plant in the world, handled 18,000,000 bushels. Of the crop year, which ended with August last, the same elevator handled 55,884,560 bushels. Its receipts of wheat alone this year totalled 38,582,531, or more than twice the handlings for the elevator of all grains during the preceding crop year.

The national business conference, for which Sir George Foster is arranging, has been postponed, and may not be summoned before December.

Your Estate Requires Expert Executorship

The Wills of the majority of men of wealth have appointed Trust Companies as their Executors. This is a proof of their appreciation of the permanency, efficiency and reliability of an organized Trust Corporation. We solicit interviews and correspondence regarding the executorship of your estate.

WAR LOAN OVERSUBSCRIPTION

Detailed List of Subscriptions Aggregating \$107,000,000
—Number of Subscribers May Reach 30,000

Up to midnight on Saturday last, the aggregate subscriptions to the war loan were \$169,000,000, including the \$50,000,000 applied for by the chartered banks. Of that total, reports have been made to *The Monetary Times* of subscriptions aggregating \$107,065,900. It was estimated at Ottawa when the subscription lists closed, that when all the returns are received, the subscriptions will total \$200,000,000. Ninety-five per cent. of the subscriptions are Canadian. The number of subscribers may reach 30,000. The lists closed on Saturday last, and no further subscriptions can be received.

The question as to the amount of the allotment of the subscribers cannot be considered until the returns are nearly all received about the middle or towards the end of this week. It is regarded as probable that the banks will receive no part of their \$50,000,000 subscription and that the smaller subscriptions will be allotted in full. The cutting down will be done in connection with the larger subscriptions. The finance minister will probably allot applications up to \$25,000 in full, and upon the volume of these applications will depend the amount which larger subscribers will receive.

The following table groups the subscriptions which have been reported to *The Monetary Times* :—

Banks	\$52,000,100
Industrial, and other corporations	15,905,000
Life insurance companies	15,225,000
Fire and miscellaneous insurance companies	1,130,000
Fraternal societies, etc.	1,201,500
Bond and investment houses	7,617,500
Trust and loan companies	5,199,000
Municipalities	3,341,300
Provinces	1,000,000
Individuals	4,386,500
	\$107,065,900

The following revised tables give the details of the subscriptions noted in the above classification :—

INSURANCE FOR CHILDREN

Educative plans for insuring children and minors are becoming more popular in late years, and are made a specialty by a few companies. One of the best policies for a child, perhaps, is an endowment, upon the life of the father or mother; if the insured dies while the child is young the policy makes the necessary provision, and if the parents live the endowment policy yields the cash necessary for a start in life, which presumably was the primary object. If the child should die the policy can be diverted to another purpose by the policyholder.

Many well-to-do people of middle age who have the necessary protection for themselves would like to assist their children by means of insurance for different reasons, suggests the Continental Life Assurance Company's publication, Life Line. We think of a man in good circumstances and well insured, whose 17-year-old son causes his parents much worry because of his extravagant habits. He earns a small salary in an office, and it would prove a real benefit to the son and a source of satisfaction to the parents if that boy could be got to save \$100 a year on a life policy. The father would doubtless pay part of the premium for a few years just to increase his knowledge of the value of money.

Another man has a 20-year endowment maturing, and is looking forward with keen pleasure to receiving the money; he is acutely impressed with the value of forced savings of life insurance policies. He has two young children, into whom he is endeavoring to inculcate the virtues of thrift by having them regularly deposit part of their small weekly emoluments in the local bank. That man would readily consider any scheme of insurance which would benefit those children; and by which they would save up part of the premiums, however small, and thus be taught the great importance of insurance and of meeting the premiums as they fall due.

According to Alfred Hunter, the well-known actuary, insurance statistics show that the man who overeats is a bad risk as well as the man who indulges in alcoholic beverages. Both, he says, are sure of a short life.

That Home of Yours

Is there a mortgage against it? In that case, what will happen if you should die suddenly? Will your widow be able to pay off the indebtedness? Or will she and the kiddies be thrown out on the street?

A few dollars saved each year and invested in an Imperial Endowment policy will provide for a mortgage repayment whether you live or die. We'll tell you all about it if you write to

NEED FOR MUNICIPAL PUBLICITY

Visiting Expert Outlines Plans for Toronto—How United States Capital Can Be Reached

That Russia is to be the coming field for the investment of United States capital is a conclusion of Mr. Samuel McRoberts, president of the National City Bank of New York, after his recent visit to that vast country. This statement was made before the Toronto Advertising Club by Mr. Herbert S. Houston, of New York City, to illustrate the fact that United States capital has favorable outlets, referring also to other profitable fields for investment such as South America, and that if Canada wants United States capital here Canada will have to go after it.

"How to Advertise Toronto to United States capital and the United States people," was the subject of Mr. Houston's address, and as the speaker has studied municipal advertising for over twenty years, and had intimate connection with the advertising of many United States cities, he was able to state facts and give advice that will prove to be valuable if Toronto takes up the problem that she is at present considering—that of instituting a publicity bureau to advertise the city of Toronto.

Mr. Houston came to Toronto as the guest of the Toronto Advertising Club. He is the president of the Associated Advertising Clubs of the World, and vice-president of Doubleday, Page and Company, and holds a prominent position among the men of letters, politics and business in the United States.

An Example Is Des Moines.

Des Moines is, perhaps, the best example in the United States of a city that has solved the question of municipal advertising. The leading business men in Des Moines formed a committee and collected from the business organizations, with the city as a contributor, \$60,000 to be expended for three years at the rate of \$20,000 a year. An administrator of affairs was appointed, after seeking all over the

United States for the most suitable man to take this position, and under the direction of a committee of fifty this money was expended and the results that have accrued have, so to speak, put Des Moines on the map. As one of the prominent business men of Des Moines stated, when he goes to Chicago or New York to talk to the bankers about bonds or finances in connection with Des Moines, the preliminaries are entirely dispensed with because Des Moines has made its name and reputation broadcast.

Plans for the Queen City.

Mr. Houston suggested that Toronto should spend \$60,000 a year for three years, and urged that to handle this publicity the organization should be kept entirely away from city control so that there will be no danger of mixing with politics. A committee of fifty, seventy-five, or one hundred business men who believe in such a proposition and would be prepared to carry through the organization and administration was suggested to be formed, these men being selected carefully from amongst the leaders of the city. If there are any important organizations that hold off from co-operating in such an undertaking these slackers would readily be forced to come in, should the matter be advanced with the co-operation and backing of some of the best people, because they could not afford to stay out.

Seeking for Capital.

In advertising for capital it may be concluded that the safety of an investment for Toronto is an established fact, intimated Mr. Houston, and what would have to be done would be to issue propaganda based on an industrial and commercial survey of the city with particulars as to its labour cost, shipping cost and other items that it would be required to place in the hands of capital to interest it and convince it of an income. As to how Toronto should advertise, the answer is: In the most effective way to reach capital and just the same as any business house advertises. United States capital is represented by the 800,000 people who are paying the income tax. Toronto can afford to take heed of what Mr. Houston advised in preparing such an advertising bureau as the commercial interests have in mind.

CONVERSION OF OLD LOAN

Further Reports to The Monetary Times Indicate Slight Use of Privilege

An official statement as to the amount of the old war loan which has been converted into the new loan has not yet been made. In the case of 68 of the many subscriptions to the current loan reported to *The Monetary Times*, the actual new cash subscribed was \$24,002,000 plus \$1,735,000 of old bonds converted. Roughly, that is equal to \$2,000,000 of converted bonds for every \$24,000,000 of new money, if these 68 subscriptions are a fair reflection of the general results. In that event, the full subscription of \$100,000,000 of the new loan would have brought with it approximately \$8,000,000 of converted bonds in addition. As reports on this point continue to come to *The Monetary Times*, this conclusion is strengthened. The conversion privilege in the old loan has not been freely exercised. The finance department at Ottawa knows exactly the amount so converted and will probably announce the figures later.

The following revised table, compiled by *The Monetary Times*, gives details of certain subscriptions to the present loan with a note as to how much of the old loan was converted in addition:—

Purchaser.	New subscription to pre-sent loan.	In addition, the amount noted below, was converted.

J. M. SPENCE AGAIN

Mr. J. M. Spence, intimately connected in past years with the interesting career of the Canadian Guardian Life Insurance Company, of Toronto, and associated with the promotion of several other insurance companies, is in trouble again. Information having been laid against the Alberta Life and Accident Insurance Company, and against the managing director of the concern, Mr. J. M. Spence, the latter appeared before Inspector King, of the Royal North-West Mounted Police, at Calgary recently in answer to both charges. The charges arise out of alleged infraction of the new sale and shares act in Alberta, the administration of which is in the hands of the public utilities commission.

Staff-Sergeant Waugh, of the mounted police, executed a search warrant at the same time that the summons was served on Mr. Spence and the books of the company were taken into the custody of the mounted police. When the case came up before Inspector King it was adjourned for one week at the request of the defence.

LOANS ON LIFE POLICIES

Mr. A. D. Besant, of the Clerical, Medical and General Life Insurance Society of London, England, discussing the table respecting policy loans, reprinted in *The Monetary Times* last week, points out that there is an essential difference between the return of the British and of the United States and colonial companies. A large proportion of the loans granted by British companies are direct advances secured by a mortgage deed or agreement, he says. On the other hand, such loans in the case of United States and colonial offices are to a much larger extent automatic advances made in order to keep the policy in force if the premium be not paid. This accounts for the higher ratio of policy loans to life funds in the case of the United States and colonial offices.

The high percentage in the case of three or four British offices in comparison with the others included in the table is mainly explained, he thinks, by the privilege they have long given to their assured of offering loans at 4 per cent. interest, and partly, no doubt, by special schemes for discounting premiums.

The figures of the Clerical, Medical, and General Life Assurance Society were omitted from the table. The policy loans of this society for the year ending June 30th, 1915, amounted to £290,000, the ratio to the life and annuity funds being 4.2 per cent. in 1910, 4.7 per cent. in 1914, and 4.7 per cent. in 1915.

SINKING FUND BONDS

Ottawa's Treasurer's Comment on Ontario's Municipal Act—Lethbridge's Mayor on Bond Markets

A municipal treasurer in an article published some time ago in *The Monetary Times*, stated that he had been trying for some time to find out how the ratepayers of cities which invest their sinking fund cash in debentures earning more than the rate calculated in the sinking fund instalment get the benefit of the increased earning. "I have learned little to satisfy me that the ratepayers get any benefit at all from the increased earning," he said.

Commenting on this article, Mr. H. L. Corbett, city treasurer, Ottawa, suggests to *The Monetary Times* that the municipal act of 1913 for Ontario under sections 301, 302 and sub-sections, makes it clear that the intention is to keep a separate account for each particular debt, and when there is sufficient no more should be collected until the debt matures. Of course, this would presume that up to a certain date, there would be sufficient in sight deposited at the lowest rate allowed in any chartered bank to raise the amount required to pay off the debentures. If this is not intended by sections 301 and 302 the section needs amendment, for the principle followed by municipalities of using the surplus generally instead of each particular debt is not giving the particular ratepayers concerned under each by-law the proper benefit of investment.

How System now Works.

City treasurer Corbett writes that taxpayers are called on to pay more for interest and sinking fund account for the majority of the debentures than was really necessary. The levy is continued practically the same from year to year, and the interest that accumulates on the deposits to the credit of the interest and sinking fund account in the bank has not been taken into consideration. The taxpayers are called upon to pay in hard cash the whole amount of each debenture issued, and the interest, it appears, is simply allowed to accumulate. This interest cannot be used for any other purpose than the sinking fund account, and consequently Ottawa or another municipality is in the position of a man who has money in his pocket and is not allowed to spend it, even though the money would pay some of his obligations.

Mr. Corbett proposes that when the sinking fund account, by the aid of the interest it accumulates in the bank, has become sufficient to pay off a debenture when it matures, the levy for that debenture in particular should be stopped, thus saving a considerable unnecessary demand upon the taxpayers each year. Take a debenture of the city of Ottawa, issued under authority of By-law No. 1555, for \$30,000, for public school purposes. This debenture is not payable until 1925, but an estimate prepared by Mr. Corbett shows that there will be sufficient money available in 1920 to pay off the debt. Nevertheless, under the present system, the annual levy on the people will be continued each year and the money will continue to accumulate in the bank, even though it cannot be used for any specially required purpose.

In Ontario and British Columbia.

Ottawa's treasurer thinks an endeavor should be made to have the legislature change the law regarding the interest and sinking fund account, and he will probably discuss the problem with the board of control of that city shortly.

In British Columbia, in the event of a surplus appearing to the credit of the sinking fund in respect of any debt of the municipality, the council may pass a by-law reducing the levy for the succeeding year or for any number of succeeding years, so that no more will be collected than is necessary. Before any such by-law takes effect, however, the council must obtain the consent of the lieutenant-governor in council, and in doing so must set forth all the circumstances and show the nature of the investment which is returning to them the higher rate of interest.

Serial Plan of Payment.

The above gives another viewpoint on the serial plan for bond issues. This plan has been explained and discussed in many articles appearing in *The Monetary Times*, since September, 1915. The majority of the authorities handling bond issues endorsed the serial plan.

The contribution of Mr. W. L. Hardie, mayor of Lethbridge, evoked some interesting comments. In an address

at Swift Current, Sask., Mr. Hardie spoke on municipal bonds and said:—

"One suspension of payment in the equal annual instalment bond is more serious and may lead to worse results than a considerable number of suspensions of the payments with the sinking fund.

"With the elimination of bad management from the sinking fund bond and the substitution of good management, which is in no wise impossible we unhesitatingly say that we think the sinking fund bond is a most desirable medium between the borrowers and the lender.

"However, on the other hand the bond that will establish the greatest confidence in the mind of the purchaser is the one that must of necessity become the most popular.

Suit the Market.

"One market will prefer the sinking fund and another will prefer the equal annual instalment, so that the first duty of the vendor is to determine the market he wants to sell in, which will depend on two elements in a bond sale—viz., the price obtainable and the promptitude of purchase.

"In the foregoing British conditions and particularly Canadian conditions have been conceived excepting the market for bonds which on account of the war is more largely centered in the United States than formerly, which may account for some of our United States friends objecting so strongly to our position.

"If the market is in the United States, comply with their conditions and get out equal annual instalment bonds which you will have difficulty in selling in Great Britain, vice versa."

MILLING COMPANIES HAVE DONE WELL

Output Has Been 30 Per Cent. More During the Past Twelve Months

The milling companies, during the 12 months ending with August, their financial year, have done an abnormal business, from which satisfactory profits have been derived. The output was 30 per cent. greater than in the previous year, and the greater part was exported. For the 12 months ended May last, the latest period for which trade returns are available, exports of flour amounted to 6,764,583 barrels, valued at \$37,352,859. The excellent quality of last year's crop made the surplus wheat readily marketable, with the result that the amount carried over is not more than 30,000,000 bushels.

In addition, an unusually large proportion of the crop was ground into flour at home, says a letter of the Canadian Bank of Commerce, with resulting benefit to home industries, and the additional quantity of subsidiary products was readily absorbed by the home market. There has been a yearly increase in the volume of foreign business transacted by the Canadian mills, in spite of variations in the amount of the crop and of the wheat exported. This progress has been hampered somewhat by the lower freight rates on wheat than on flour, but, despite this disadvantage, the annual gains are substantial. They are shown in the accompanying table, which gives the value and quantity of wheat, flour and bran sent abroad in each fiscal year since 1910:—

Exports of Wheat, Flour and Bran.

	Wheat.		Wheat Flour,		Bran.	
	Bushels.	Value.	Barrels.	Value.	Cwt.	Value.
1910	49,741,350	\$52,609,351	3,064,028	\$14,850,854	1,796,318	\$1,842,620
1911	45,802,115	45,521,134	3,049,046	13,854,790	1,872,089	1,850,219
1912	64,466,286	62,509,563	3,748,836	16,034,064	1,595,950	1,499,447
1913	93,166,009	88,608,710	4,478,043	19,970,689	1,662,338	1,603,003
1914	120,426,579	117,719,217	4,842,184	20,581,070	2,077,713	1,789,939
1915	71,013,385	74,203,548	4,952,337	24,610,046	1,038,134	946,331
1916	157,745,469	172,896,445	6,409,214	35,767,044		1,787,398

Although the crop this year will be smaller than usual the millers anticipate more than a normal volume of business accompanied by higher prices, due to the serious shortage of wheat on this continent and in Europe.

Mr. J. D. G. Kippen, formerly assistant manager of the Montreal office of the Merchants Bank of Canada, has been made manager in succession to Mr. D. C. Macarow, recently appointed general manager.

Is Your Estate Properly Protected?

No matter how little or how much you own, these possessions make up your estate, and should be protected by efficient and economical management.

This can best be done by an Executor or Trustee.

This Company, by acting in this capacity, will give your estate the benefit of experience gained in the management of many estates, of large and of only moderate size, and will scrupulously guard the interests of your heirs.

No charge for drawing up your will when the Sterling Trusts Corporation is appointed your Executor and Trustee.

Our officers will give you further information on request.

OFFICIAL CROP ESTIMATES

Preliminary Figures from Ottawa Give 168,811,000
Bushels of Wheat

The census and statistics office, Ottawa, has published the first or preliminary estimate of the yield of the principal grain crops of Canada in 1916 (wheat, rye, barley, oats and flaxseed), as well as a report on the condition of all field crops at the end of August.

Correspondents report that grain crops in Manitoba and Saskatchewan, which were highly promising at the end of July, have been so seriously affected by rust and hot winds during August that large areas sown will either fail to produce any crop at all, or have been cut green, whilst the yield of grain from producing areas will be very low, both in quantity and grade. Whilst the whole of Manitoba and Saskatchewan is badly affected by rust, the conditions are distinctly worse in the southern than they are in the northern parts of these provinces. In Alberta, rust, though present to a certain extent, has not proved destructive, and the grain crops continue promising. Frosts, however, of August 11th and again late in the month did considerable damage. In Ontario and Quebec grain yields have been greatly reduced by drought in August, but in the maritime provinces and in British Columbia the condition of the grain crops has continued to be quite favorable.

Yield of Principal Cereals.

It is estimated from the reports of correspondents that of the areas sown about 13.7 per cent. of spring wheat, 8 per cent. of oats, 5 per cent. of barley and 1.8 per cent. of flax will fail to produce any crop of grain. Of the areas sown, however, 3 per cent. of wheat, 5 per cent. of oats and a small area of barley have been cut for green feed or turned into hay. These percentages represent deductions from the areas sown of 1,432,300 acres of spring wheat, 849,000 acres of oats and 69,100 acres of barley. It is consequently estimated that the total yield of wheat this year will be 168,811,000 bushels from a harvested area of 10,085,300 acres, as compared with 376,303,600 bushels from 12,986,400 acres last year and 161,280,000 bushels from 10,293,900 acres in 1914. The average yield per acre is 16¾ bushels as compared with 29 bushels last year and 15.67 bushels in 1914.

The estimate for oats is a total yield of 341,602,000 bushels from 9,795,000 acres, as against 520,103,000 bushels from 11,365,000 acres in 1915 and 313,078,000 bushels from 10,061,500 acres in 1914, the average per acre being 34.88 bushels in 1916, 45.76 bushels in 1915 and 31.12 bushels in 1914. For rye, the estimate is 1,990,800 bushels from 101,420 acres, as compared with 2,394,100 bushels from 112,300 acres in 1915 and 2,016,800 bushels from 111,280 acres in 1914, the yields per acre being 19.63 bushels in 1916, 21.32 bushels in 1915 and 18.12 bushels in 1914. Barley yields 34,408,000 bushels from 1,326,800 acres, as against 53,331,300 bushels from 1,509,350 acres in 1915 and 36,201,000 bushels from 1,495,600 acres in 1914, the yield per acre being 25.89, 35.33 and 24.21 bushels, respectively.

The flaxseed estimate is for 8,625,300 bushels from 710,000 acres, an average of 12.15 bushels per acre. For the three North-West provinces the total estimated yields are for wheat, 145,466,000 bushels; for oats, 243,114,000 bushels; for barley, 24,502,000 bushels; for rye, 601,000 bushels; and for flax, 8,572,000 bushels. The average yields per acre of wheat are in Manitoba, 10½; Saskatchewan, 16, and Alberta, 24¾ bushels per acre.

Condition of Field Crops.

At the end of August the condition of field crops, expressed in percentage of a standard representing a full crop, was as follows: Spring wheat, 69; oats, 74; barley, 73; rye, 80; peas, 68; corn for husking, 67; potatoes, 72; alfalfa, 94; corn for fodder, 77; pasture, 86; hay and clover, 103. All other crops ranged between 75 and 78. In Manitoba the condition of spring wheat was marked down to 37 per cent. as against 85 per cent., and in Saskatchewan to 61 per cent. as against 94 per cent. at the end of July. The percentage of 37 for Manitoba on August 31 is the lowest on record since the present crop reporting system began in 1908.

Fifty squaws have helped with the stooking of the grain on the large Namaka Farm, Calgary.

LEGAL NOTICE

FESS OIL BURNERS OF CANADA, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 12th day of September, 1916, incorporating William Symon Morlock and Reginald Holland Parmenter, solicitors; Samuel Davidson Fowler, solicitor's clerk; Anna Latimer, office clerk, and Winnifred Elizabeth Skelcher, stenographer, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:-

(a) To carry on the business of manufacturers of engines and machinery of all kinds and of all articles and things used in the manufacture, maintenance and working thereof;

(b) To manufacture, buy, sell, lease, repair, alter and deal in crude oil and other burners, appliances, apparatus, implements, machinery, goods, materials, articles, and supplies of all kinds which shall be capable of being used in connection with the business of the company, or likely to be required by customers thereof, or in any way connected with or incidental to the use of any of the products of the company;

(c) To adopt on behalf of the company and to carry into effect (either with or without modification) a certain agreement between A. L. Ellsworth (therein called the Vendor) and Strachan Johnston, of Toronto (therein called the Trustee), dated the eighth day of September, 1916, whereby the said A. L. Ellsworth agrees to sell to the company the undertaking of The Fess System Company of Canada, Limited, a company heretofore incorporated under The Companies Act, 1910-1913 (British Columbia) by Memorandum of Association dated 26th January, 1914, whereby the said A. L. Ellsworth will make profit in shares of the company as shown by said agreement a copy whereof has been filed in the office of the Honorable the Secretary of State of Canada.

(d) To acquire, purchase, take on lease or license, hire, hold, use, sell, grant leases of, grant licenses of, exchange, alienate, dispose of and otherwise deal in or contract with reference to lands or interests in land, personal property of all kinds or interests therein, rights, privileges, licenses and concessions; to manufacture or trade in property and goods of all kinds; to operate construction or building plants and to take and carry out contracts for building or for construction work of any kind, and to undertake, carry on and execute transactions as financial or commercial brokers or agents;

(e) Notwithstanding the provisions of section 44 of The Companies Act, to subscribe for, purchase, assume liability under, acquire, hold, sell, exchange, dispose of or otherwise deal in or contract with reference to bonds, debentures, stocks or other securities or obligations or any estate or interest therein; and to apply or to accept, in whole or in part, as consideration for, satisfaction of or security for any contract, indebtedness or obligation, to or of the company, property, obligations, shares and securities of any kind at such valuation and upon such terms as may be agreed upon;

(f) To acquire, dispose of or otherwise deal in properties, businesses or undertakings of all kinds;

(g) To furnish aid to any business or undertaking similar in whole or in part to that of the company with which the company may have business relations, by way of loan, bonus, endorsement, agreement, guarantee, management or other service, and to manage, supervise and control the same in whole or in part and to act as agent or attorney for the same;

(h) To carry on any other business which may seem capable of being conveniently or advantageously carried on in connection with the business of the company or calculated directly or indirectly to enhance the value of, to facilitate the realization of or to render more profitable any of the company's businesses, properties or rights;

(i) To invest the moneys of the company not immediately required in such investments as may from time to time be determined;

(j) To co-operate in, aid in, subscribe towards or subsidize any proceeding or undertaking which may seem calculated directly or indirectly to benefit the company;

(k) To acquire or undertake the whole or any part of the business, property and liabilities of any person, partnership, association or company having objects altogether or in part similar to the company or carrying on any business which the company is authorized to carry on or possessed of property which may seem suitable or desirable for the purposes of the company;

(l) To apply for, purchase or otherwise acquire and to protect, prolong and renew patents, patent rights, trade-marks, formulae, licenses, protections, concessions and the like, conferring or relating to any exclusive or non-exclusive or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, improve, develop or grant licenses in respect of or otherwise turn to account the property, rights or information so acquired;

(m) To enter into partnership or into any arrangement for sharing of profits or expense, union of interests, co-operation, joint adventure, reciprocal concessions or otherwise, with any person, partnership, association or company carrying on or engaged in, or about to carry on or engage in, any business or transaction which the company is authorized to carry on or engage in, or any business or transaction which may seem capable of being conducted so as directly or indirectly to benefit the company, and to lend money to, guarantee the contracts of, or otherwise assist any such person, partnership, association or company, and to take or otherwise acquire shares and securities of any such partnership, association or company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same;

(n) To take or otherwise acquire and hold shares in any partnership or stock or shares in any association or company having objects altogether or in part similar to those of the company or carrying on any business which may seem capable of being conducted so as directly or indirectly to benefit the company;

(o) To apply for, promote and obtain from the Dominion of Canada or any other authority, whether Dominion, Provincial, Imperial, Colonial or foreign, and including subordinate and municipal authorities, any statute, ordinance, order, regulation or other authorization or enactment which may seem desirable to the company or calculated directly or indirectly to benefit the company;

(p) To enter into any arrangements with any governments or authorities, supreme, provincial, civic, municipal, local or otherwise, that may seem conducive to the company's objects or any of them, and to obtain from any such government or authority any statutes, ordinances, licenses, contracts, orders, regulations, decrees, rights, powers, franchises, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with the terms of the same;

(q) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company or of its predecessors in business or of any person, partnership, association or company allied with the company in business or subsidiary to the company or in which the company holds shares or securities, or to benefit the dependents or connections of such persons, and to grant pensions and allowances, and to make payments towards insurance and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object;

(r) To promote, form, organize, manage, develop, take interests or stock or shares in and assist financially or otherwise, any partnership, association or company for the purpose of acquiring or taking over all or any of the property and liabilities of the company, or for any other purpose which may seem calculated directly or indirectly to benefit the company;

(s) To acquire, purchase, take on lease, hire, construct, improve, own, maintain, operate, manage, carry out and control, plant, equipment, machinery, supplies, buildings, works, shops, warehouses, manufactories, pumps, tanks, tank cars, pipe lines, smelters, refineries, roads, ways, canals, bridges, electric works, electric plant, hydraulic works, hydraulic plant, boats, ships, docks, wharves, piers, gas works, cables, waterworks, reservoirs, aqueducts, flumes, ditches, and all such other structures, works, conveniences and appliances as may seem calculated directly or indirectly to advance the company's interests, and to contribute to, subsidize or otherwise assist or take part in the acquisition, purchase, leasing, hiring, construction, improvement, ownership, use, maintenance, operation, management, carrying out or control thereof;

(t) Where such course is required for the purposes of the company or may seem calculated directly or indirectly to advance the company's interests, to acquire, purchase, take on lease, hire, construct, improve, own, use, maintain, operate, manage, carry out and control, but only upon lands owned or controlled by the company, or over which the company may have a right of license to that effect, such roads, ways, bridges, lines of rail, spurs, sidings, tracks, rolling stock, cables, wires, motors, locomotives, electrical plant and all such other structures, works, conveniences and appliances as may be required for the purpose of maintaining communication by telegraph or telephone, or of effecting the transport of goods or passengers, and to contribute to, subsidize or otherwise assist or take part in the acquisition, purchase, leasing, hiring, construction, improvement, ownership, use, maintenance, operation, management, carrying out or control thereof;

(u) To draw make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments;

(v) To sell or dispose of the property or undertaking of the company, or any part thereof, for such consideration as the company may think fit, and in particular, and notwithstanding the provisions of section 44 of The Companies Act, for shares, debentures or securities of any other partnership, association or company;

(w) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations;

(x) To sell, exchange, lease, dispose of, turn to account or otherwise deal with or contract with reference to all or any part of the property and rights of the company;

(y) To consolidate or amalgamate with any other company having objects similar in whole or in part to those of the company;

(z) To procure the company to be registered, licensed or otherwise recognized in any foreign country, and to designate and appoint persons therein as attorneys or representatives of the company with full power to represent the company in all matters according to the law of such foreign country, and to accept service for and on behalf of the company of any process or suit;

(aa) To pay out of the funds of the company all or any of the expenses of or incidental to the formation and organization thereof; to employ, contract with and with the approval of the shareholders provide for the remuneration of brokers, commission agents and underwriters upon any issue of shares, bonds, debentures, debenture stock or other securities of the company;

(bb) To distribute or divide assets of the company in specie amongst the shareholders;

(cc) To do all or any of the above things as principals, agents, contractors or otherwise, and either alone or in conjunction with others;

(dd) To do all such other things as may seem directly or indirectly to be incidental or conducive to or convenient or proper for the accomplishment of the purposes or the attainment of the objects of the company, or any of them, or expedient for the protection or benefit of the company;

(ee) No power granted in any paragraph hereof shall be limited or restricted by reference to or inference from the terms of any other paragraph hereof.

The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Fess Oil Burners of Canada, Limited," with a capital stock of one hundred thousand dollars, divided into 1,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 14th day of September, 1916.

THOMAS MULVEY,

Under-Secretary of State.

LEGAL NOTICES

BARCALO MANUFACTURING COMPANY OF CANADA, LIMITED.

Public Notice is hereby given that under the First Part of Chapter 79 of the Revised Statutes of Canada, 1906, known as "The Company Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 30th day of August, 1906, (1916), incorporating Edward Joel Barcalo, Bryant Burwell Glenny, Jr., Alban Wilkinson Kirton, Charles Vallone and Frank Anderson, manufacturers, all of the City of Buffalo, in the State of New York, one of the United States of America, for the following purposes, viz.:

(a) To manufacture, purchase, import or otherwise acquire and to sell, export, exchange and otherwise dispose of and generally deal in all kinds of materials, goods, wares and merchandise;

(b) To do all and everything necessary, suitable and proper for the accomplishment of any of the purposes or the attainment of any of the objects or the furtherance of any of the powers hereinbefore set forth, either alone or associated with other corporations, firms or individuals, and to do any other act or acts, thing or things incidental or pertaining to, or growing out of, or connected with the aforesaid business, or powers, or any part or parts thereof, provided the same be not inconsistent with the law under which this corporation is organized.

The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Barcalo Manufacturing Company of Canada, Limited," with a capital stock of ten thousand dollars, divided into 100 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 31st day of August, 1916.

THOMAS MULVEY,
Under-Secretary of State.

CANADA LIGHT, HEAT AND WELDING COMPANY

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 8th day of September, 1916, incorporating Willis Bertram Sturupp, Law Clerk; John Fraser MacGregor, Accountant; Craig Allan St. Clair McKay and James White Bicknell, Students-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:

(a) To manufacture, buy, sell and deal in calcium carbide, chemical products, generators, burners, mantels, lamps, meters, apparatus, appurtenances and appliances connected with a light, heat and welding business; (b) To carry on the business of a light, heat and welding company in all its branches, provided, however, that any sale, distribution or supplying of any light and heat shall be subject to local and municipal regulations in that behalf; (c) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (d) To acquire or undertake the whole or any part of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company; (e) To apply for, purchase or otherwise acquire, any patents, licenses, concessions and the like, conferring any exclusive or non-exclusive, or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property, rights or information so acquired; (f) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in or any business or transaction capable of being conducted so as directly or indirectly to benefit the company, and to lend money to, guarantee the contracts of or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (g) Subject to section 44 of the said Act, to take or otherwise acquire and hold, shares in any other company having objects altogether or in part similar to those of the company, or carrying on any business capable of being conducted so as directly or indirectly to benefit the company; (h) To enter into any arrangements with any authorities, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions; (i) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company (or its predecessors in business) or the dependents or connections, of such persons, and to grant pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object; (j) To promote any company or companies for the purpose of acquiring or taking over all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company; (k) To purchase, take on lease or in exchange, hire or otherwise acquire, any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business and in particular any machinery, plant, stock-in-trade; (l) To lend money to customers and others having dealings with

the company and to guarantee the performance of contracts by any such persons; (m) To sell or dispose of the undertaking of the company or any part thereof for such consideration as the company may think fit, and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of the company, if authorized so to do by the vote of a majority in number of the shareholders present or represented by proxy, at a general meeting duly called for considering the matter and holding not less than two-thirds of the issued capital stock of the company; (n) To adopt such means of making known the products of the company as may seem expedient, and particular by advertising in the press, by circulars, by purchase and exhibition of work of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (o) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (p) To do all or any of the above things and all things authorized by the Letters Patent or Supplementary Letters Patent, as principals, agents, contractors or otherwise, and either alone or in conjunction with others; (q) To do all such other things as are incidental or conducive to the attainment of the above objects and of the objects set out in the letters patent and supplementary letters patent. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere, by the name of "Canada Light, Heat and Welding Company, Limited," with a capital stock of one million dollars, divided into 10,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 11th day of September, 1916.

THOMAS MULVEY,
Under-Secretary of State.

12-2

McCart Novelty and Toy Company, Limited.

PUBLIC Notice is hereby given that under the first part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the seal of the Secretary of State of Canada, bearing date the 13th day of September, 1916, incorporating Lester Millman Keachie, student-at-law; Sophia Tutty, bookkeeper, and Susie Ross, Ella Lester Kelly and Myrtle Etoile Thurgarland, stenographers, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:

(a) To manufacture, buy, sell and otherwise deal in all kinds of household furniture, fixtures, appliances and all kinds of toys, games, playthings, novelty and fancy goods, and to sell and manufacture any and all articles, materials and things used in the manufacture, maintenance and working thereof, and also all apparatus and implements and things for use in sports, games or household purposes; (b) To apply for, purchase or otherwise acquire and work the whole or any interest or interests in patents, brevets d'invention, licenses, concessions and the like, and to acquire any real or personal property; (c) To acquire and carry on any business or undertaking calculated directly or indirectly to benefit the company's business or property on such terms as it may deem proper, and to acquire and hold shares in any other company; (d) To sell or dispose of or otherwise deal with the undertaking, property or rights of the company or any part or parts thereof from time to time for such consideration as the company may think fit, and in particular the shares, debentures or securities of any other company, and to promote any company or companies for taking over all or any of the property or liabilities of the company, or for any other purposes calculated to benefit the company; (e) To acquire and undertake the whole of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on or possessed of property suitable for the purposes of the company or calculated to advance the interests of the company; (f) To buy, sell, repair, alter and deal in apparatus, machinery, materials and articles of all kinds which shall be capable of being used for the purposes of any businesses herein mentioned or likely to be required by customers of any such business; (g) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "McCart Novelty and Toy Company, Limited," with a capital stock of forty thousand dollars, divided into 400 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 19th day of September, 1916.

THOMAS MULVEY,
Under-Secretary of State.

13-2

The directors of the Steel Company of Canada have declared the regular dividend of 1¼ per cent. on the preferred stock. It was stated that with the orders on hand the company's outlook was good.

The Montreal special committee to find new sources of revenue has unanimously decided to recommend to collect a regular impost of 5 per cent. on all the gross earnings of all public utilities companies. This will require the sanction of the Quebec legislature.

DIVIDENDS AND NOTICES

TENDERS FOR PULPWOOD AND PINE LIMIT

Tenders will be received by the undersigned up to and including the 1st day of December next for the right to cut pulpwood and pine timber on a certain area situated on the Pic River and other territory adjacent thereto, in the District of Thunder Bay.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet, board measure, on pine, that they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, and \$2.00 per thousand feet, board measure for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario—the paper mill to be erected when directed by the Minister of Lands, Forests and Mines.

Parties making tender will be required to deposit with their tender a marked cheque, payable to the Honorable the Treasurer of the Province of Ontario, for twenty-five thousand dollars (\$25,000), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said \$25,000 will be applied on account of bonus dues as they accrue, but the regulation dues, as mentioned above, will require to be paid in the usual manner as returns of cutting of wood and timber are received.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned,

G. H. FERGUSON,

Minister of Lands, Forests and Mines.

Toronto, August 28th, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

Tenders will be received by the undersigned up to and including Monday, the 2nd October, 1916, for the right to cut the Pine timber (including Jackpine) on the Township of Pettypiece in the District of Kenora.

Tenderers shall state the rate per thousand feet Board Measure, they are prepared to pay for the Pine in addition to the Crown dues of \$2 per thousand feet Board Measure, and the rate per tie for any of the Pine timber suitable for the manufacture of railway ties, in addition to the Crown dues of 5c. each.

The timber to be removed by the 30th of April, 1918.

Each tender to be accompanied by marked cheque for \$700, payable to the order of the Provincial Treasurer. The party awarded the right to cut will be required to furnish a bond for the payment of the price and the due performance of all the conditions required by the Department.

The highest or any tender not necessarily accepted.

Tenders to be addressed to the Honourable, the Minister of Lands, Forests and Mines, Toronto, and marked "Tender for Timber."

G. H. FERGUSON,

Minister of Lands, Forests and Mines,

Toronto, August 31st, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

SMART-WOODS, LIMITED

NOTICE OF DIVIDEND

A dividend of One and three-quarters per cent. (1¾%) on the Preferred Stock of Smart-Woods, Limited, has been declared for the Quarter ending September 30th, 1916, payable October 2nd, 1916, to Shareholders of record September 27th.

(1¾%) has been declared upon the outstanding Capital Stock of the Company, payable October 10th, 1916, to shareholders of record at the close of business, September 30th, 1916. Transfer books will be reopened October 2nd, 1916, at ten o'clock a.m.

Cheques will be mailed to shareholders.

By Order of the Board.

JOHN H. KERR,
Secretary.

Hamilton, Canada, September 21st, 1916.

DEBENTURES FOR SALE

CITY OF QUEBEC

CALL FOR TENDERS FOR DEBENTURES

Public notice is hereby given that the Board of Roman Catholic School Commissioners of the City of Quebec calls for tenders for the sale of \$200,000.00 of its debentures bearing interest at five per cent., redeemable in five or ten years (a separate price to be given in each case), the principal and interest being payable at Quebec, Toronto, or New York.

The City of Quebec will guarantee such debentures and every tender must be addressed to the undersigned Secretary-Treasurer before 8 o'clock p.m., the second of October, 1916.

An accepted cheque for \$3,000.00 by a Canadian bank must accompany each tender.

A. C. TASCHEREAU,

Secretary-Treasurer of the Board of Roman Catholic School Commissioners of the City of Quebec.
Quebec, Canada.

CITY OF SASKATOON, SASKATCHEWAN

DEBENTURE INTEREST DUE OCTOBER 1st, 1916.

Holders of City of Saskatoon debentures payable at the Union Bank of Canada in Toronto and Montreal are requested to present their interest coupons due October 1st, 1916, for payment at the Bank of Montreal in either of the above-mentioned cities.

J. C. OLIVER,
Acting City Treasurer.

Saskatoon, Sask., August 30th, 1916.

NEW DOMESTIC WAR LOAN

In view of the great success of the NEW DOMESTIC WAR LOAN it is probable that you have not obtained as much of it as you may desire.

A demand will develop for it as soon as allotments have been made, and it will be advisable for you to place your order as soon as possible. We shall be glad to fill it at the lowest market price.

Telephone Main 3370, or telegraph at our expense.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; "Positions Vacant," "Agents or Agencies Wanted," 3c. per word; other condensed advertisements, 5c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

MOOSE JAW RENTAL AGENTS.—The Ralph Manley Agency, Limited, Walter Scott Block, Moose Jaw, handle the renting of Moose Jaw Improved City Property. Their facilities permit them to rent and re-rent property as well as looking after collections and any necessary repairs. Established 1908. Correspondence solicited.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over \$5,000.00, and he has built up a future income of over \$3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

ARE WE SLOW PAY?

In a letter to Slater and Company, of Toronto, a member of the firm of Wilson and Tattersall, of Bradford, Yorkshire, England, refers to the recent visit of the Canadian trade commission, and a meeting with Mr. Woods, the president, and Mr. Wardleworth, the vice-president. Messrs. Woods and Wardleworth, he says, clearly expressed their desires, and the only question asked of them was with regard to delay in paying of accounts by Canadian firms. One reason for limited trade with Canada, it was said, was that prompt payments were not kept. The minimum time in which an account had been paid, one merchant said, was ten days overdue, and some payments were retarded as long as six weeks. Canadian firms, it was said, average 14 to 21 days' interest on terms agreed on.

A Free Course In "Salesmanship"

We have thought about the young man who sees no prospects ahead. Would you like to be in a business that will give you

A Good Living Wage
A Profitable Future
A Provision For Old Age

We teach a man the Insurance Business, which offers permanent success, does not fluctuate, is a professional occupation, and has been truly named "The best paid hard work in the world."

This is done by a correspondence course and personal assistance, free of charge.

When he is fully prepared for the work, we place him in a position and help him to make good.

The first two lessons of the Company's correspondence course will be sent to anyone interested. It will pay young men who desire to get on in the world to look into this.

All correspondence strictly confidential.

CANADA LIFE ASSURANCE CO.
HEAD OFFICE, TORONTO.

Prosperous and Progressive

Up-to-date business methods, backed by an unbroken record of fair-dealing with its policyholders, have achieved for the Sun Life of Canada a phenomenal growth.

To-day, the Company operates actively in forty-two countries and upon five continents.

In the past six years its assurances in force have nearly doubled; in the past eleven years they have more than trebled.

More than 166,000 of its policies are now in force for assurances totalling over \$265,000,000—much the largest amount carried by any Canadian life company.

AGGREGATE TRADE.						
Merchandise.....	93,279,437	85,128,910	224,224,197	1,024,993,784	919,243,158	1,704,596,281
Coin and bullion.....	520,545	13,871,128	14,636,291	36,371,720	223,668,611	115,110,209
Total trade.....	93,799,982	99,000,038	238,860,488	1,061,365,504	1,142,911,769	1,819,706,490

*Note.—It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending July, 1916, were: imports 1916, \$33,717,992; 1915, \$133,113,099, and exports 1916, \$81,392,217; 1915, \$90,555,512. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

"BULAK" Egyptian Cigarettes

"Bulak" Cigarettes are the supreme achievement of one of the greatest blenders of tobacco in Cairo, Egypt.

Their exquisite aroma is fully in keeping with their elegant appearance.

10 FOR 15^C.

COBALT ORE SHIPMENTS

The following are the shipments of ore in pounds from Cobalt Station for the week ended September 22nd:—

O'Brien Mine, 66,000; Dominion Reduction Company, 88,000; McKinley-Darragh-Savage Mines, 80,309; Penn-Canadian Mines, 58,805; Nipissing Mining Company, 241,476. Total, 534,590 pounds, or 267.2 tons.

The total shipments since January 1st, 1916, now amount to 22,527,702 pounds, or 11,263.8 tons.

AUGUST COBALT ORE SHIPMENTS

The following are the shipments for month ended August 31st:

	Tons.
Aladdin Cobalt Mine	25
Beaver Consolidated Mines.....	52.6
Coniagas Mines	71
Dominion Reduction Company	209.8
Kerr Lake Mine	30
La Rose Mines	130.8
McKinley-Darragh-Savage Mines	214.6
Mining Corporation of Canada	183
Nipissing Mining Company	539.6
Penn Canadian Mines	43.7
Right-of-Way Mines	43.7
Trethewey Mine	38
Total	1,583.3

From New Liskeard—	
Casey Cobalt Mine	30.4
From Elk Lake—	
Miller Lake O'Brien	28.8
From Schumacher—Gold Slag—	
Porcupine Vipond Mines	1.7
From Porquus Junction—Nickel Ore—	
Alexo Mining Company	672.1

Bank Statement Reflects Strong Position

**DURING August Current Loans Were Practically Maintained—
Deposits at \$1,250,000,000 Make a New High Record—After
Notice Deposits May be Affected by New Decision on Interest Rate.**

	August, 1915.	July, 1916.	August, 1916.	Year's Inc. or dec.	Month's Inc. or dec.
Deposits on demand	\$334,022,174	\$431,958,188	\$443,317,275	+32.6	+2.7
Deposits after notice	692,580,626	789,363,919	806,774,687	+16.4	+2.1
Current loans in Canada	758,342,735	740,040,741	739,938,513	-2.5	-0.1
Current loans elsewhere	44,968,445	62,356,259	66,556,371	+48.1	+6.7
Loans to municipalities	46,020,730	42,385,096	39,882,811	-13.4	-5.9
Call loans in Canada	71,855,565	87,355,648	86,351,216	+20.1	-1.1
Call loans elsewhere	120,607,677	177,121,733	171,380,353	+42.5	-3.2
Circulation	99,610,962	123,530,451	122,656,083	+23.2	-0.81

THE above are the principal items in the statement of the chartered banks made to the government for the month of August. The figures show a substantial increase in demand and after notice deposits during the month. There is also a gain in current loans abroad. Municipal loans decreased during the month by nearly 6 per cent., this being due to economy on the part of municipalities and to sales of their bonds. Call loans abroad were reduced and circulation decreased slightly during August. Compared with the figures of a year ago there were very substantial increases in deposits, circulation, current loans abroad and call loans in Canada and elsewhere.

The following table shows the course of domestic deposit accounts for the past thirteen months:—

	On demand.	After notice.
1915—August	\$334,022,174	\$692,580,626
September	359,315,280	693,339,851
October	392,042,193	701,330,850
November	406,735,171	714,219,286
December	423,690,384	720,990,267
1916—January	387,002,926	714,264,486
February	380,825,667	728,242,609
March	380,165,388	738,169,212
April	402,060,955	748,359,957
May	412,301,481	765,064,041
June	428,117,340	767,598,130
July	431,958,188	789,363,919
August	443,317,275	806,774,687

Demand deposits have increased by more than 32 per cent. during the past year and after notice deposits, 16 per cent. Both these accounts gained substantially during the month. Total deposits at the end of August were \$1,250,000,000, a record amount. In addition, there were \$114,000,000 of deposits outside the country. The September statement will naturally show some reduction in deposits as a result of the war loan.

The deposits record for the past five years for the month of August is given in the following table compiled by *The Monetary Times*:—

August.	On demand.	After notice.	Total.
1912	\$360,575,425	\$643,663,596	\$1,004,239,021
1913	358,321,925	619,032,847	977,354,772
1914	338,984,418	659,399,151	998,383,569
1915	334,022,174	692,580,626	1,026,602,800
1916	443,317,275	806,774,687	1,250,091,962

For some time past certain amounts of business funds have been transferred from demand to after notice account. This may have resulted to some extent in the increase of the notice deposits. The decision of the banks to reduce the interest they pay on current accounts from 3 to 2½ per cent. will probably result in the transfer of many more accounts to after notice deposits. While this transfer is having its effect on the figures, the fact that the total of the two accounts is expanding month after month, indicates a degree of economy and the accumulation of funds generally.

The following table shows the trend of the Canadian loans account for the past thirteen months:—

Loans.	Current in Canada.	Call in Canada.
1915—August	\$758,342,735	\$71,855,565
September	771,086,757	71,578,886
October	780,785,754	74,574,270
November	777,162,563	83,203,787
December	775,517,947	84,228,155
1916—January	758,500,492	82,584,659
February	760,873,181	81,049,125
March	770,139,526	81,747,512
April	777,764,682	82,527,448
May	763,136,917	84,826,636
June	747,470,541	86,776,474
July	740,040,741	87,355,648
August	739,938,513	86,351,216

Of the deposit in Central Gold Reserves \$6,710,000 is in gold coin; the balance is in Dominion Notes.

Current loans in Canada are about \$18,000,000 or 2.5 per cent. less than a year ago. They decreased about \$1,000,000 during the month of August. While this account reflects to a certain extent Canadian business activity, there are a number of industrial concerns which are not requiring much bank accommodation just now. They have paid off overdrafts, reduced their general liabilities and built up substantial reserves. This tends to decrease the volume of current bank loans. Call loans in Canada are \$1,000,000 less than a month ago.

The course of call loans abroad for the period beginning two months before the declaration of war, is of interest and is shown in the following table:—

1914—June	\$137,120,167	August	\$120,607,977
July	125,545,287	September ...	135,108,412

T. C. BOVILLE, Deputy Minister of Finance.

They stand at one of the highest totals in recent years.

The following table shows the course of the loan accounts for the past five years:—

	Current loans August in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1912	\$852,045,024	\$37,846,222	\$75,194,735	\$114,847,864
1913	857,822,613	46,339,928	67,233,983	90,041,292
1914	836,574,099	47,314,832	69,229,045	96,495,473
1915	758,342,735	44,968,445	71,855,565	120,607,677
1916	739,938,513	66,556,371	86,351,216	171,380,353

The small decrease in total assets during August resulted from the payment in New York of the Dominion's one-year notes amounting to \$25,000,000. As the funds

required for this payment were lying in the Bank of Montreal and had been largely employed by that institution in the form of bank balances and call loans in New York, the effect of the payment would be to decrease the assets of the banks as carried in these forms, and at the same time to make a corresponding reduction in the liabilities in the form of deposits elsewhere than in Canada. On the other hand, the reduction of assets caused by this transaction was to a considerable extent offset by the expansion in connection with the temporary loans of \$30,000,000 made by the banks to the Dominion government. Note circulation in August was \$23,000,000 greater than a year ago, an indication of good fall business.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

The following table compiled by *The Monetary Times*, gives the bank loans to municipalities since August, 1913, to the latest month this year for which figures are available:—

	1913.	1914.	1915.	1916.
January		\$29,301,620	\$35,952,805	\$32,015,371
February		30,372,854	38,437,903	35,149,915
March		31,890,843	41,227,449	38,649,462
April		30,168,812	43,031,360	44,371,050
May		33,689,577	43,948,436	43,924,036
June		37,260,571	46,889,816	46,773,032
July		36,372,334	44,029,446	42,385,096
August	\$41,310,281	39,664,534	46,020,730	39,882,811
September	37,465,383	44,338,873	43,928,331	
October	37,846,369	47,316,076	45,682,230	
November	35,173,817	44,706,055	41,064,550	
December	30,518,573	38,256,947	30,878,028	

Melita, Man.—The issue of \$12,000 6 per cent. 25-year fire protection bonds has not yet been sold.

Rodney, Ont.—Tenders close on October 10th for \$8,500 5½ per cent. 30-year bonds. J. D. Shaw, clerk.

South Vancouver, B.C.—The municipality has arranged for the transfer to the London, England, branch of the Bank of Montreal of \$102,382, to meet bond interest falling due on October 1st. A payment of a similar amount is due in April next.

Grand Mere, Que.—For the issue of \$100,000 5½ per cent. 30-year bonds, the bids were:—Rene Leclerc, Montreal, 91.63; Ames & Company, Toronto, 91.57; Dominion Securities Corporation, Toronto, 90.59, Montreal payment; Dominion Securities Corporation, Toronto, 90.79, New York payment; N. G. Kirouac, Quebec, 90.00; Credit Canada, Montreal, 92.10, New York payment.

Oakville, Ont.—For an issue of \$6,023 5½ per cent. bonds, of which \$1,603 were 3-instalment, and \$4,420 20-instalment, these offers were made, that of the Canada Bond Corporation, Limited, being successful:—Canada Bond Corporation, Limited, \$5,990.66; Mulholland, Bird & Graham, \$5,978; R. C. Matthews & Company, \$5,948; Wood, Gundy & Company, \$5,908; A. E. Ames & Company, \$5,891; Brent, Noxon & Company, \$5,911.

Alberta.—Tenders will be received by the bond branch of the department of education, Edmonton, until October 18th, for \$5,550 rural school district bonds, also on \$3,000 Bideford Consolidated School District No. 13, and \$2,000 Frankland School District No. 1203. These are seven per cent. bonds, and are payable in ten instalments. They are dated October 15th, 1916, with coupons maturing annually on January 15th. Separate tenders are being asked for on the two latter issues. M. C. Elliott, manager.

Kitchener, Ont.—For the \$16,500 5½ per cent. bonds, of which \$9,300 were 30-instalment, and \$7,200 15-instalment, these bids were made, the first-named getting the issue:—Imperial Bank, 101.28; Mulholland, Bird & Graham, 101.26; Canada Bond Corporation, Limited, 100.47; Brent, Noxon & Company, 100.19; Emilius Jarvis & Company, 100; Wood, Gundy & Company, 98.56; W. L. McKinnon & Company, 98.83; Kerr, Bell & Fleming, 100.77; C. H. Burgess & Company, 99.54; Macneill & Young, 99.03.

York Township, Ontario.—For the \$4,000 5½ per cent. 20-instalment bonds, these offers were made, Messrs. Emilius Jarvis & Company, Toronto, receiving the award:—Emilius Jarvis & Company, \$4,062; Mulholland, Bird & Graham, \$4,042.80; Canada Bond Corporation, Limited, \$4,037.28; Brent, Noxon & Company, \$4,027; Imperial Bank, \$4,023; Wood, Gundy & Company, \$4,012.80; Macneill & Young, \$4,006; Geo. A. Stimson & Company, \$4,003.20; A. E. Ames & Company, \$3,987; C. H. Burgess & Company, \$3,986; W. L. McKinnon & Company, \$3,970.

Calt, Ont.—For the \$12,902 5½ per cent. 20-instalment bonds, the following bids were received, and the first-named received the award:—Canada Bond Corporation, Limited, \$13,206.41; Mulholland, Bird & Graham, \$13,202.13; Imperial Bank, \$13,178; W. A. Mackenzie & Company, \$13,163.42; R. A. Dalv & Company, \$13,118.26; Wood, Gundy & Company, \$13,118; Emilius Jarvis & Company, \$13,098.01; C.

H. Burgess & Company, \$13,087.30; Kerr, Bell & Fleming, \$13,053.75; Geo. A. Stimson & Company, \$13,034.40; Brent, Noxon & Company, \$13,029; A. E. Ames & Company, \$13,015; Macneill & Young, \$12,989.24; R. C. Matthews & Company, \$12,857.63; W. L. McKinnon & Company, \$12,773.76.

Halton County, Ont.—For the issue of \$24,400 5 per cent. 20-year bonds, the bids were as follow, the first-named being accepted:—

A. E. Ames & Company	\$23,820
Wood, Gundy & Company	23,687
Brent, Noxon & Company	23,561

Saskatchewan.—The following is a list of authorizations granted by the local government board for the week September 18th to 22nd, 1916:—

School Districts.—Mackay Creek, \$1,600. T. G. McIneray, Maple Creek; Denhurst, \$200. R. F. Snaith, Brock; Ingoldsby, \$1,600. E. J. Allen, Storthoaks; Cabri, \$8,000. Alex. Gibson, Cabri; Quimper, \$1,200. J. R. McKenzie, Quimper; Lipton, \$12,000. L. G. Wilkinson, Lipton; Sequin, \$350. B. W. Robinson, Creelman; Robertson, \$1,200. Gordon Smith, Togo; Alva, \$1,600. R. Tafiau, Margo.

Rural Municipality.—Wallace, \$1,000. R. C. Perkins, Yorkton.

Quebec R. C. Schools.—For the issue of \$200,000 5 per cent. 5 or 10-year bonds, Mr. A. C. Tachereau, secretary-treasurer of Quebec Roman Catholic School Commissioners, received the following tenders, the first-named firms receiving the award of 10-year bonds:—

	5 years.	10 years.
A. E. Ames & Company, Toronto, and R. M. Grant & Company, Boston.....	98.51	98.17
Brent, Noxon & Company, Toronto	98.168	96.98
Banque Provinciale, Montreal	98.01	97.22
C. Meredith & Company, Limited, Montreal	97.88	
Municipal Debenture Corporation, Quebec	97.66	97.66
Emilius Jarvis & Company, Toronto.....	97.31	95.50
Dominion Securities Corporation, Toronto	97.26	95.52
Wood, Gundy & Company, Toronto.....	97.04	
W. A. Mackenzie & Company, Toronto, and Hew R. Wood & Company, Montreal	96.879	95.079
Royal Securities Corporation, Montreal....	96.657	95.696

Montreal, Que.—Mr. C. Arnoldi, city treasurer, has reported to the board of control as follows:—"The civic authorities are making every effort to reduce the cost of administration, but the interest on the debt and sinking fund absorbs such a large proportion of the revenue that all possible retrenchment cannot materially affect the result. Hence the absolute necessity to meet the deficiency by increased taxation, as it seems probable that a further depression in real estate values and rentals will occur this year, and still further diminish the amount available in 1917.

"The bonded debt has only been increased during the year 1915 by an increase of a million dollars 5 per cent. twenty-five year loan for the construction of sewers, the cost of which will be met by special assessments payable by interested proprietors."

The summary of the financial situation for the year 1915 shows that the balance on hand at the beginning of that year was \$375,842, the receipts from revenue \$12,304,971, and the receipts from loans and other sources \$10,853,882, the total being \$32,572,131. Disbursements ex revenue were \$12,960,032, and from loans and special disbursements \$19,126,567, making a total of \$32,150,311. The balance carried to 1916 was thus \$44,820.

An analysis of disbursements, shows that interest on debt and sinking funds on special loans ex revenue required \$4,164,219; while the school tax, paid over to the school commissioners, was \$2,009,820. The cost of civic administration was \$6,785,993.

All mailed papers are sent direct to Friday evening trains. Any subscriber who receives his paper late will confer a favor by complaining to the circulation department.

CUSTOMS OFFICER AT NEW YORK.

For a long time now, the business interests of the Canadian Pacific coast have urged the appointment of a Canadian customs officer at New York. Eastern shippers cannot make use of the Panama Canal because they are not permitted to send their freight through New York in bond for water-carriage to Vancouver. This has had an unfavorable effect upon trade between Eastern and Western Canada. No good economic reason exists, so far as we can see, for a refusal of the Dominion government to make the suggested appointment.

BANKING AND TRADE

A committee, of which Baron Faringdon, chairman of the Great Central Railway, England, is the head, has recommended the formation of a British trade bank with a capital of £10,000,000. The committee was chosen to consider the most favorable method of meeting the requirements of British firms after the war, with particular reference to financing large overseas contracts. It suggests that the proposed institution could fill the gap between the home banks and the colonial and foreign British concerns, and develop facilities not provided by the present system.

If this recommendation is adopted by the British government it will be a notable departure from British traditions. Germany has for many years exercised considerable State influence in regard to banking, shipping, and industry to encourage business with other nations and to increase efficiency at home. Canadian bankers have recently discussed the desirability of extending their influence in order to encourage Canadian export trade. It is a move in the right direction. The war and the outlook for peace have shown the necessity.

CIVIC FINANCES

For the first time in the history of Toronto, its citizens understand the city's financial position. The report on the civic finances which finance commissioner Thomas Bradshaw presented to the board of control last week, was an admirable document. It put before the ratepayer in a way which he cannot fail to comprehend, the exact position of the city's treasury. His report, which was summarized in *The Monetary Times* last week, calls for a policy of strict economy and retrenchment, and recommends that no new works be undertaken, involving capital charges, during the continuance of the war unless the same is found absolutely necessary. The document contains a strong indictment of the unbusinesslike methods of administering civic finances which have been pursued by city councils for many years past.

Mr. Bradshaw is a counsellor whose advice in this matter cannot with safety be ignored. The citizens will expect their representatives on the board of control and in the city council, to act favorably on the report. Its publication, with the proper action to follow, will help, not hurt, the municipality's credit. Incidentally other cities may well consider the advisability of having made a thorough examination of their financial position.

EFFICIENCY AND COSTS

Efficiency has been talked and worked extensively on this continent. Where commonsense has remained with it, efficiency has saved money, but efficiency so-called has often proved an expensive fad. Real efficiency experts there are whose services are worth money. Others there are who, like the professional merger maker, are costly articles. Efficiency in business has been analyzed from index files upwards. The simple file of old has not lost all claim to efficiency in practice. The elaborate modern system seems to require an extensive staff to operate it and largely in theory. A Toronto firm once hired a corps of efficiency experts to tell them how to run the business. So efficient was one of the experts that a week later he had obtained a job behind a lunch counter.

The secret of efficiency, after all, is costs. A knowledge of what any item in a factory costs to make and to market, the knowledge of costs generally, is the cornerstone of a knowledge of business. Many concerns that report to the federal commission of the United States, manufacture four or five different articles. In these reports the commission ask them to give the sales of each product separately. Nine times out of ten they cannot do more than give the total for all their products together. "If," as Mr. H. M. Hurley, chairman of the commission, says, "they do not departmentalize their sales accounts they certainly do not departmentalize their costs; hence they make prices on particular articles without knowing what those articles cost. Since they cannot tell where they are making money and where they are losing it, they cannot tell where to introduce economies."

The question of costs is something about which Canadian institutions have much to learn. The waste and loss of money through the lack of such knowledge has been appalling. One moderately sized Canadian factory, for example, had until recently, only a vague idea of its costs. It possessed an office staff big enough to run the business of the United States Steel Corporation. Dividends do not grow on such practices.

PERSONAL NOTES

Mr. J. Burt Morgan, president of the Life Underwriters' Association of Canada, won second prize for the best closing suggestion at the National Life Underwriters' convention, St. Louis.

Lord Shaughnessy announced to the shareholders at the annual meeting of the Canadian Pacific Railway that he was not thinking of resigning the presidency of the company. Sir Vincent Meredith was elected a director of the Canadian Pacific Railway.

Mr. P. P. Barrett has severed his connection with Messrs. Nesbitt, Thompson & Company, Montreal, to take the position of sales manager with the bond house of Mr. Rene T. Leclerc, of that city, which will now take an active interest in selling Quebec municipal bonds.

Sir Thomas White, minister of finance, leaves this week for England, where he will discuss with the British chancellor of the exchequer a number of questions bearing upon war finances as between Great Britain and Canada. The finance minister goes at the request of the Imperial government.

Mr. F. B. Deacon, formerly of the Sun Life and Great-West Life, has been appointed provincial manager of the Manufacturers Life Insurance Company. Major W. B. Barwis, who has been 25 years with the company, still retains his position as district manager at Vancouver.

Mr. G. E. Moberley has been appointed as manager for Canada of the Northern Assurance Company. Mr. Moberley was engaged in the fire insurance business at Collingwood, Ont., until 1892, when he went to Montreal and entered the office of the Northern Fire Insurance Company as inspector. Later he became superintendent of agencies, and now has received the appointment as manager for the Dominion.

Mr. Z. A. Lash, K.C., has been elected president of the Great North Western Telegraph Company, and the following officers and directors: Mr. Adam Brown, vice-president; Mr. Geo. D. Perry, general manager; Hon. J. K. Kerr, K.C., Messrs. Jas. Hedley, Æmilius Jarvis, F. B. Hayes, D. B. Hanna, R. P. Ormsby. Mr. A. C. McConnell is secretary and auditor, and Mr. D. E. Henry, treasurer of the company.

Mr. J. E. Roberts, president of the Dominion of Canada Guarantee and Accident Insurance Company, Limited, Toronto, who was an insurance authority, died on Monday, at his home, 21 Scarth Road. Mr. Roberts came to Canada from England at the age of fifteen. He entered the insurance business in 1882, and in 1900 he became a director of the Dominion of Canada Guarantee and Accident Insurance Company. Shortly afterwards he was elected president. In 1905 he was made vice-president of the International Association of Accident Underwriters of America.

Mr. L. Goldman who, as noted in *The Monetary Times* last week, was elected president of the North American Life Assurance Company, Toronto, is one of the outstanding figures in Canadian life insurance spheres. He has been an insurance man for many years, having put in his apprenticeship as an accountant for the Confederation Life Association. When the North American Life Assurance Company was organized in January, 1881, he became its secretary, holding that office until 1903, when he was appointed managing director, which position he has held since. The handling of the company's presidential reins to Mr. Goldman as successor of the late Mr. E. Gurney, is a well-earned tribute of his work in helping to build up a substantial company on sound lines. He is an active member of the Insurance Institute of Toronto, of which he was president at one time. Mr. Goldman's personality has won him many friends and given him a reputation of a strong man with the courage of his convictions.

BABY BONDS TO BE ISSUED

The finance department will shortly announce the issue of Dominion debenture stock for small investors as well as bonds of denominations from \$10 up which will be purchasable through the banks, and on which interest of approximately 5 per cent. will be paid, the bonds being redeemable in 5 years.

The new war loan went to 98 yesterday, a point over its issue price.

WAR LOAN ALLOTMENTS

Small Investors Will Receive Their Full Subscription —Graduated Percentage Scale for Over \$25,000

According to the statement issued by the finance department, the allotment of the subscriptions to the Dominion war loan will be made on a graduated percentage scale, preference being given to the subscriptions for the smaller amounts.

As soon as this information concerning the allotment of the new war loan became public these securities found an active market at 97½ on the Toronto exchange.

Out of total subscriptions amounting to some \$200,000,000 the banks' total of \$50,000,000 will be eliminated altogether.

Banks' Subscriptions for a Credit.

This amount is being used in another way by being drawn upon by an arrangement with the banks to afford a further credit of fifty millions in Canada to finance British war orders placed in the Dominion.

Principle of Allotment.

All subscriptions of \$25,000 or under will be allotted in full. Subscriptions of amounts from \$25,000 to \$100,000 will be allotted on the basis of the first \$25,000 in full and thirty per cent. of the remainder. Subscriptions of amounts from \$100,000 to \$1,000,000 will be allotted according to the same basis for the first \$100,000 and forty per cent. for the remainder. Subscriptions in excess of \$1,000,000 will be allotted according to the basis adopted as above for million-dollar subscriptions and thirty-six per cent. of the remainder accepted.

This principle of allotment will result in subscriptions from \$25,000 to \$100,000 being allotted, an average of 58.7-10 per cent. of the sum subscribed; subscriptions from \$100,000 to \$1,000,000 an average of forty per cent. of the sum subscribed; subscriptions over \$1,000,000 an average of 31.2-5 per cent. of the sum subscribed.

At the opening of the Edmonton stock yards about 600 head of stock were in the yards.

Mr. P. W. Cashman has been admitted into the firm of Messrs. J. P. Bickell and Company, Toronto, as a general partner. For the past four years he has been office manager.

"That no money invested in a Canadian mortgage corporation has ever been lost" is a statement contained in an attractive booklet issued by the Standard Reliance Mortgage Corporation, 88 King Street East, Toronto. Another of this company's booklets, which will be sent to any applicant free, is "Profits from Savings" which contains interesting statistics.

Colonel Victor Buchanan is the third out of 13 members of the Montreal stock exchange who have made the supreme sacrifice, the two previous being Capt. Melville Greenshields, a member of the same battalion as Lt.-Col. Buchanan, and Capt. Fred. Shaughnessy. Colonel Buchanan was a well-known member of the stock exchange, being floor representative of Messrs. C. Simpson Garland and Company, of which he was a member. He transferred his seat at the time of his enlistment early in the war, but retained his partnership.

Director-general of national service Sir Thomas Tait has announced the appointment of 10 directors as follows:—District 6—Halifax, Mr. G. S. Campbell, Halifax. District 4—Montreal, Mr. J. H. Sherrard, Montreal. District 3—Kingston, Lieut. W. N. Bowen, Lansdowne. District 2—Toronto, Lieut.-Col. H. Brock, Toronto. District 1—London, Mr. K. W. McKay, St. Thomas. District 10—Winnipeg, Mr. E. R. Chapman, Winnipeg. District 12—Regina, Mr. A. L. Haining, Saskatoon. District 13—Calgary, Mr. R. B. Bennett, M.P., Calgary. District 6—St. John, Major P. L. Tilley, St. John. District 5—Quebec, Lieut.-Col. C. A. Chauveau, Quebec. The British Columbia director has yet to be appointed. A conference of all the directors of national service will shortly be held at Ottawa.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Price Brothers and Company.—Enlargements are to be made to the company's Chicoutimi plant, which will increase the output. A new unit will be added to the newsprint plant, and another addition to be made will result in a considerably larger output of sulphite and ground wood pulp.

Winnipeg Electric Railway Company.—The statement of earnings for August, 1916, is as follows:—

Gross	\$249,794.88
Net after operation	85,935.05
Net after fixed charges	26,375.00

Toronto, Hamilton and Buffalo Railway.—The Canadian Pacific Railway Company, the Michigan Central Railroad Company, New York Central Railroad Company and the Canadian Southern Railway Company are joining in jointly and severally guaranteeing \$2,000,000 of 4½ per cent. consolidated mortgage gold bonds, Series A, of the Toronto, Hamilton and Buffalo Railway Company.

Nova Scotia Car Company.—The reorganization of Nova Scotia Car is proposed on the basis of the issue of \$1,000,000 capital stock for subscription by note certificate holders and shareholders at the rate or price of \$50 per share. The proceeds of these shares will provide cash to the amount of \$500,000, less the actual cost of property. The list will close on October 10th. The property was brought in at liquidation sale for \$167,500 for the interests involved.

Montreal and Southern Counties Railway Company.—At the annual meeting of the shareholders of the Montreal and Southern Counties Railway Company the following directors and officers were elected for the ensuing year: Directors: Messrs. E. J. Chamberlin, Frank Scott, W. H. Biggar, W. H. Ardley and James A. Yates. Officers: Mr. E. J. Chamberlin, president; Mr. Frank Scott, vice-president and treasurer; Mr. James A. Yates, secretary; Mr. W. H. Ardley, comptroller; Mr. W. B. Powell, general manager.

Lake of the Woods Milling Company.—Profits for the year ended August 31 were \$525,141, the best since 1913. After allowing for the usual \$99,000 bond interest, the company in the past year had a net balance of \$426,141 available for dividends. From the remaining surplus the company followed its procedure of recent years in writing off \$50,000 from plant and \$50,000 from good-will account. The net surplus remaining was \$53,141, bringing the total surplus to \$989,135. Against that surplus the company charged up \$100,000 as provision for two years' war tax to August 31, 1916. Current liabilities, including the war tax provision of \$100,000, have increased from \$304,907 to \$1,006,094, but current assets are up from \$1,538,465 to \$2,204,570.

Anglo-American Hotel Company.—Application has been made for a provincial charter for the 600-room hotel to be erected on Yonge Street, Toronto, on the site of the Arcade. The company which is to build the hotel is named "The Anglo-American Hotel Company," and will have \$4,500,000 authorized capitalization. The directors are: Sir Henry Pellatt; Messrs. G. P. Schofield, general manager of the Standard Bank; E. F. B. Johnston, K.C., vice-president of the Royal Bank; H. C. Cox, president of the Canada Life Assurance Company; Alfred Rogers, president of the Elias Rogers Coal Company; F. Corey, president of the Ontario Power Company, and W. S. Dinnick, of the Standard Reliance Mortgage Corporation. The solicitors making the application are Messrs. Young and McEvoy. The city of Toronto has granted the company a fixed assessment.

Lake Superior Corporation.—Mr. J. Frater Taylor, vice-president of the corporation, said at the annual meeting at Camden, according to despatches, that a reorganization of the Lake Superior Corporation, possibly by a reduction of the capital stock, may be desirable sooner

or later. The large sum of \$47,974,556, which still appears unsecured on the balance sheet, must be dealt with drastically. The company's policy was to conserve the earnings toward paying off \$2,500,000 of notes due next March. By wiping out this debt a saving of \$150,000 annually would be effected.

It was reported that the railroad properties soon would be taken out of the receivers' hands. The Algoma Central was declared to be earning at the rate of \$500,000 net annually of the \$750,000 charges required, while the Algoma Eastern was stated as just about earning its interest charges.

Nova Scotia Steel and Coal Company.—"The company is turning out steel at the rate of 15,000 tons a month, as compared with less than half that amount a year ago, and the estimate for the entire output of the year in Canada will be approximately 1,500,000 tons as compared with 975,000 tons the previous year, which was short of the high mark touched in 1913 when the output reached 1,168,000 tons," according to the statement of Colonel Cantley, president of the company, who estimates that the productive capacity has increased to a greater extent than he had believed at the beginning of the year, when he estimated it at 1,350,000 tons. If the war should stop there will still be, in the opinion of the Colonel, a strong demand for steel.

Since the commencement of the war, Nova Scotia Steel and Coal Company have shipped to the United Kingdom 3,000 tons of marine forgings, and for this class of product the demand is still very heavy. When war broke out it was found that Britain was obtaining a large quantity of forgings from Germany. The price had been cut to such an extent that only one plant of any consequence was operating in the United Kingdom, hence the hydraulic forging plant which the Nova Scotia Steel Company had installed was turned to profitable account. Heavy shipments are being made periodically, or as tonnage can be obtained at the present time.

Canadian Pacific Railway Company.—Lord Shaughnessy, in the course of his address at the company's annual meeting, remarked that while the gross income of the railway was below the maximum that had been reached, the net revenue was in excess of any previous year. To make provision for excess war profit taxes the company may be required to pay, and for the rehabilitation of the ocean fleets the directors had decided to transfer to a fund for contingencies a substantial sum that would, in other circumstances, have gone to special income.

The cash in hand was nearly \$47,000,000, or about \$30,000,000 more than at the end of the previous fiscal year. In addition to the cash in the treasury, there was available for sale upwards of \$40,000,000 of 4 per cent. consolidated debenture stock for additional railway mileage, built with funds advanced by the shareholders.

The time had arrived when the company should arrange to carry its own fire and marine insurance, or the greater portion of it, instead of paying large annual premiums as at present, continued his lordship. To that end, a transfer of \$331,000 was made to the fund last year, and further transfers would be made year by year.

The grain crops in portions of the western provinces were injuriously affected by unfavorable weather conditions, and it was thought the total yield will be little more than half of last season's crop. These conditions would be reflected in the company's revenue returns during the next year, but general business was showing decided improvement and, in any event, there was every reason to expect that the company's net income for the year would be quite sufficient to meet the ordinary dividend distribution without encroaching on the surplus of previous years.

Mr. D. W. Alexander's funeral at Toronto was attended by a number of mourners prominent in government, business and financial circles. As manager of the London Guarantee and Accident Company, Limited, he was a well-known figure throughout the country and especially in Ontario. The company's rapidly expanding business is for the present under the careful supervision of Mr. George Weir, who for many years has been assistant manager of the company's Canadian office. Mr. Weir is a well-trained and capable underwriter and has the confidence of the insuring public. The corporation's interests here will be in good care in his hands.

NEW INCORPORATIONS

Brunner Mond Charter is Interesting—Western Canada Power Reorganization

Canada's new companies incorporated this week number 38. The head offices of these companies are located in four provinces. The total capitalization amounts to \$16,010,000.

The largest companies are:—

Brunner Mond Canada, Limited	\$ 3,000,000
Western Power Company of Canada, Limited	10,000,000

The Brunner Mond Canada Company, Limited, has received its charter this week, with headquarters at Toronto. The capital as given above is \$3,000,000. The business proposed to be carried on is described in the following terms: "To manufacture, recover or produce by the ammonia soda process, or by any other process, buy, sell and otherwise deal and deal with carbonate of soda or soda ash, caustic soda, bicarbonate of soda, soda crystals or other crystalline forms of alkali and all salts of soda in whatever form, potash and all forms of potassium, including all its salts, chlorine and all compounds containing chlorine."

The Western Power Company of Canada, Limited, with headquarters in Montreal, capitalized at \$10,000,000, will acquire the franchises and business of the present Western Canada Power Company.

Grouping the new concerns, according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Ontario	14	\$ 4,630,000
Quebec	12	10,815,000
British Columbia	9	340,000
Manitoba	3	225,000
	38	\$16,010,000

The following is a list of charters granted during this week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Sherbrooke, Que.—Spedolene Lubricants, Limited, \$20,000. C. W. Cate, J. P. Wells, C. D. White.

Matheson, Ont.—Attalah Trading Company, Limited, \$40,000. W. H. Irving, H. H. Davis, L. A. Laundriau.

Sarnia, Ont.—American Transit Company, Limited, \$50,000. F. P. Dawson, B. A. Ramsay, A. I. McKinley.

St. Hyacinthe, Que.—L'Entrepot Frigorifique de St. Hyacinthe, Limitée, \$50,000. T. Halle, J. Surprenant, J. N. Decarie.

Hamilton, Ont.—Dominion Soap Company, Limited, \$50,000. J. A. Henderson, F. A. Magee, J. Clayden; Fearman Brothers, Limited, \$40,000. F. G. Fearman, C. E. Wilson, J. B. Gay.

Winnipeg, Man.—The Canadian Dostawa Company, Limited, \$5,000. J. Marciniw, K. Holub, T. J. Marciniw; the National Trading Company, Limited, \$20,000. I. Pilypiuk, M. Kowal, M. Demchuk; Prairie Pulp and Paper Company, Limited, \$200,000. O. Montgomery, A. E. Hilder, C. Graham.

Vancouver, B. C.—Mathers and Powis, Limited, \$10,000; H. M. Ellis, Limited, \$50,000; Universal Car Company, Limited, \$10,000; C. E. Disher and Company, Limited, \$25,000; Pacific Steel Company, Limited, \$100,000; Midway Ranch, Limited, \$100,000; Marine Life Saving Company, Limited, \$10,000; Lummi Bay Packing Company, Limited, \$10,000; Canadian Metals and Equipment Company, Limited, \$25,000.

Toronto, Ont.—Brunner Mond Canada, Limited, \$3,000,000. C. D. Magee, J. S. Lovell, E. H. Stewart; C. F. Cole Company, Limited, \$50,000. C. D. Magee, J. S. Lovell, W. Bain; Witts, Limited, \$40,000. A. Abbott, F. E. Abbott, T. D. Wardlaw; the Trust Buildings, Limited, \$40,000. J. C. Stewart, R. L. Pattison, W. G. Rvan; Griffin Gloves, Limited, \$150,000. J. H. Fraser, J. M. Bullen, H. L. Steele; Ontario Toys, Limited, \$50,000. M. Swedlove, A. C. McNaughton, L. A. Maldaver; Sudbury Copper Company, Limited, \$1,000,000. R. H. Parmenter, W. S. Morlock, Anna Latimer; Clavir Hat Manufacturing Company, Limited, \$40,000. H. Clavir, T. H. Barton, Bella Fried; Cana-

dian Wood Products, Limited, \$40,000. K. F. Mackenzie, A. L. Reid, Ada I. Shortt; McCart Novelty and Toy Company, Limited, \$40,000. L. M. Keachie, Sophia Tutty, Ella L. Kelly.

Montreal, Que.—D'Allaird Manufacturing Company, Limited, \$50,000. F. G. Bush, G. R. Drennan, M. J. O'Brien; Felsen Company, Limited, \$40,000. L. A. David, S. H. R. Bush, J. S. Lamarre; Western Power Company of Canada, Limited, \$10,000,000. E. M. McDougall, P. F. Casgrain, C. M. Holt; Aetna Development Company, Limited, \$100,000. G. V. Cousins, N. R. Currie, A. H. Elder; the F. E. Partridge Rubber Company, Limited, \$125,000. N. R. Currie, F. E. Partridge, V. Cooke; Tip-it Welding Company, Limited, \$20,000. J. Y. Fortier, M. M. Sperber, H. Bourdon; Dextras, Limited, \$20,000. A. Caron, J. Lebrun, E. A. Connelly; Star Cut Glass Company, Limited, \$20,000. D. N. Weir, C. S. Weir, F. Martin.

INSURANCE INSPECTION AND ADEQUATE RATES

Editor, *The Monetary Times*:

Sir,—I have your issue of the 29th instant, and note with interest article on page 10 of *The Monetary Times*, which seems to me to be fair and reasonable.

The suggestion that the government should take part in the inspection of waterworks and fire appliances of the various municipalities in Ontario is a very important and seasonable one. Certainly, the work done along these lines by the Canadian Fire Underwriters' Association is in the nature of a public service, and, while I believe that the board inspectors' reports are absolutely impartial, it might be that a joint report would inspire more confidence in and command more attention from municipalities.

I believe, however, that you are in error when you state that the Canadian Manufacturers' Insurance Companies charged tariff rates. They may have done so in some instances, but I have positive knowledge that in many cases lower rates were charged than those asked by the Canadian Fire Underwriters' Association, and the failure of these companies—"Central Canada Manufacturers" and "Eastern Canada Manufacturers"—was, in my opinion, to be largely attributed to the fact that they charged lower rates than the experience of the associated companies has proved to be necessary.

Yours, etc.,

Alfred Wright,

Manager for Canada, London and Lancashire Fire Insurance Company.

Toronto, October 2nd.

MANAGEMENT OF RAILWAYS

Railway administration, engineering, operation, traffic, accounting, etc., and the work of each and the arrangements for performing that work are clearly set forth in a recently issued book on *Railway Organization and Management*. Charts show the relations of the officials to each other and guide the reader through the complexities of the organization.

The book discusses in an interesting manner the problems of all kinds which railroad men have to meet, from the vagaries of law-makers to the scarcity of wood for ties. Such vital topics as government regulation, valuation, staff versus line control, competition, track elevation, electrification, traffic associations, rate-making, inter-line billing, the management of great terminal stations—all have concise treatment.

"Railway administration involves so many and such widely varied subjects as to require for its successful conduct the largest possible survey as to commercial conditions, coupled with a knowledge of detail that takes into account all the varied operations incidental to the service. Properly to manage such an undertaking necessitates the employment of many men of many minds, and the plan by which homogeneity and efficiency are attained is known as railway organization."

Railway Organization and Management. By J. Peabody. Issued by the LaSalle Extension University, Chicago, and forms part of the material of its course in interstate commerce.

WILL THERE BE A STEEL MERGER?

An international syndicate, in which United States interests largely predominate, and which came into the Canadian markets as a buyer of steel stocks some time ago, has been very active recently. Large blocks of Nova Scotia Steel and Dominion Steel stock have been acquired. No information is available from the heads of the two companies as to the meaning of this movement. Colonel Cantley, president of the Nova Scotia Steel Company, in an interview at Montreal, said that so far as he knew Scotia had never approached any other company, nor has it ever been approached. In the Street the general disposition was to interpret this denial as largely of a technical character. It was admitted that Colonel Cantley could not discuss anything that might be done by interests not officially recognized by the company. It was stated with a great degree of positiveness, however, in well informed circles that within the past few weeks large interests and large shareholders in Scotia, have actually approached large shareholders and interests in Dominion Steel with a view to coming to some arrangement by which the two companies might be brought together.

When *The Monetary Times* sought information from Mr. Mark Workman, president of Dominion Steel, at Montreal this week, he was out of town.

ADDITIONAL INFORMATION CONCERNING FIRES
ALREADY REPORTED

Hull, Que.—The loss to property through fire in the city of Hull, for the first eight months of the year, is less by \$37,675.03 than during the corresponding period in 1915. This is shown by fire chief Tessier, who estimates that the department has responded to 102 alarms for fires, which caused damage to the extent of \$18,891.68. The loss to property not protected by insurance is given as \$3,375.

Iroquois Falls, Ont.—Abitibi Power and Paper Company. The loss on lumber and frame buildings amounted to \$450,000 with an insurance loss of \$325,000. The property was rated at \$1.50 per cent. The following companies are interested: On saw mills and contents: Stuyvesant, \$3,500; Lumber Underwriters, \$3,000; Merchants Fire, \$2,500; National Fire and Marine, \$1,500; Michigan, \$1,000; Capitol, Cal., \$500; Buckeye, \$500; total, \$12,000. On horses and other animals; Insurance Company of North America, \$11,000. On storehouse 59 and contents: North River, \$11,200. On sundries: North River, \$1,600; Richmond, \$1,000. General Schedule: Ohio Mill, \$12,750; Pacific, \$8,750; Lumber Underwriters, \$7,000; National Fire and Marine, \$5,500; Pacific, \$4,750; Commercial National, \$4,000; Stuyvesant, \$4,000; Insurance Underwriters, \$3,500; Central Manufacturers, \$3,450; Capital Cal., \$2,300; sundries, \$2,200; total, \$80,850. The New England Mutuals will probably lose \$200,000 on the company's lumber, etc.

Lambton County, Ont.—As a result of inspections and investigations made by deputy fire marshal S. H. Dickie, of Toronto, it has been found that the recent fires, which have destroyed barns in Kent and Lambton county, are entirely due to spontaneous combustion, as a result of farmers putting grain in the barns while it was wet and storing it in such quantities that the excessive heat has resulted in fires.

St. Catharines, Ont.—Fire Chief Early reports the following losses for August:—

August 15—Box call for a fire in rear of the store of J. D. Tait, drygoods. Value of building, \$20,000; contents, \$54,000; insurance on building, \$16,000; stock, \$54,000; loss on building, \$208; stock, \$1,350. Cause, somebody setting fire to a lot of packing boxes in rear of the store.

August 21—Telephone call, Yale and Towne. No damage.

August 22—Box call for sanding room of the Cuthbert saddle factory. Value of building, \$1,500; contents, \$450. No insurance on building or contents. Loss on building and contents, \$350. Cause unknown; adjoining building, broom factory of Mr. Ed. Mully. Value of building, \$2,000; stock, \$2,500; insurance on building, none; stock, \$1,800; loss on building, none; stock, by water, not over \$50.

London, Ont.—Twenty alarms were responded to by the fire department during August, of which three were false alarms. There were 16 during the month, the largest being

the fire at Hyman's tannery. The fire losses for the month, according to the estimate of the fire chief, amount to about \$36,000.

Toronto, Ont.—Harry Webb and Company, candy manufacturers, fire on September 10th. The insurance was as follows:—

	Building.	Contents.
Westchester	\$ 6,000	\$ 9,000
Continental	5,000	6,500
Royal	2,000	10,000
Waterloo	1,500	3,000
Millers and Manufacturing	2,000	3,000
Perth	1,000	1,500
Hand-in-Hand	2,000	3,000
Gore	3,000	4,000
Queen City	2,000	3,000
Fire Insurance Exchange	2,000	3,000

Nationale	3,000	2,000
National Ben Franklin	2,000	3,000
Dominion	1,000	2,500
Northwestern National	3,500	4,000
British-America	4,000	6,000
Liverpool and London and Globe	4,000	6,000
Employers' Liability	2,000	3,000
Equitable	2,000	3,000
Economical	2,000	4,000
State of Pennsylvania		5,000
National of Paris		3,000
Wellington		2,500
	\$55,000	\$100,000

Loss on building (estimated) 30 per cent.
Loss on contents (estimated) 70 per cent.

COBALT ORE SHIPMENTS

The following are the shipments of ore in pounds from Cobalt Station for the week ended September 29th:—

Penn-Canadian Mines, 107,637; La Rose Mines, 87,538; McKinley-Darragh-Savage Mines, 85,803; Right of Way Mines, 40,000; Temiskaming Mining Company, 83,099; Dominion Reduction Company, 75,000; Nipissing Mining Company, 241,488; total, 720,565 pounds, or 360.2 tons.

The total shipments since January 1st, 1916, now amount to 23,248,267 pounds, or 11,624.1 tons.

CANADA'S WEEKLY BANK CLEARINGS

The following are the returns of Canada's bank clearing houses for the weeks ended September 28th, 1916, and September 30th, 1915, with changes:—

	Week ended Sept. 28, '16.	Week ended Sept. 30, '15.	Changes.

CANADIAN FIRE UNDERWRITERS' ASSOCIATION

Marshal Heaton Says It Adopts "Unreasonably Autocratic Attitude"

In his report on fire insurance rates and their control to the Ontario Insurance Commission, Mr. E. P. Heaton, provincial fire marshal, discusses the attitude of the Canadian Fire Underwriters' Association to the insuring public. That part of his report reads as follows:—

The objects and purposes of the association having now been set out with some fullness, there remains to be considered its general attitude to the insuring public in the application of its rates, terms and rules. This attitude in turn may be appropriately dealt with first in relation to municipalities and then to individuals, firms and corporations.

The association comes into contact with municipalities in its definition of the key rate (reference to which is made in the section of the report dealing with rating system, paragraph No. 31), and beyond the usual complaint of unfairness and injustice in rating a town at a higher basis than the authorities of the town believe they are entitled to, there does not seem much to report upon under this particular head. It must be borne in mind that I have no access to the records and correspondence of the association, for they are jealously guarded and could only be opened up as a result of some extra judicial action or enquiry, but I think it is safe to state that the attitude on the whole has been exceedingly autocratic. In conversation with a former inspector of the fire appliance inspection department, I was informed that the instructions he received were to apply to key rate schedule in an arbitrary manner, with a view to making such rate as high as possible, and this, in the main, was done, although quite the reverse procedure was followed in other cases, with the inevitable result of creating unfair discrimination.

Have Enough Evidence.

We have enough evidence before us in the shape of rate legislation against cities and towns to reach the conclusion that the association is oftentimes drastic in its procedure and autocratic in enforcing it.

The case of Ottawa may be cited as a most recent illustration. On November 7th, 1914, the joint rates committee ordered an immediate increase in the following terms which are quoted from the minutes of the semi-annual meeting held at Montreal, 2nd December, 1914, item No. 29, page 3 (Exhibit No. 6):—

"All rates on mercantile and manufacturing risks, except those of 'fireproof' or 'mill' construction or equipped with automatic sprinklers, are increased on buildings and contents by 50 cents on the no-co-insurance rate and proportionately on the co-insurance rate.

"All rates on lumber yards are increased by 50 cents on the no-co-insurance and co-insurance rates.

"Rates on all risks rated under the three-year tariff are increased by 25 cents for three years or one-half of this amount if written for one year.

"All sprinklered, mill constructed and fireproof buildings will be re-rated and ratings published immediately."

In Consequence of Improvements.

This was followed by further action at the meeting of the executive committee held in Toronto on 26th May, 1915 (vide paragraph 4 of the minutes of that meeting):—

"In view of the improvement in the waterworks system advised to this association as in progress, and the acquisition of two additional steam fire engines, which are now in the city and in condition for immediate use, the committee considers that while these changes are not such as to radically alter the unfavorable situation in Ottawa, they are deserving of recognition, and would permit of the removal of the extra charge upon three-year risks imposed on 7th November last. The committee, therefore, recommends that this extra be cancelled, and, further, that, as it was only so recently imposed, the cancellation be from the date the extra was put in force."

On June 30th, 1915, an order was issued by Secretary J. A. Robertson reducing the surcharge by one-half, in consequence of improvements, and in the order the following arbitrary clause appears:—

"No rebates allowable on current policies issued prior to 1st June, and should such policies be cancelled short period rate must be charged to date of cancellation, even if replaced by new policies."

Effect of Arbitrary Ruling.

The effect of this arbitrary ruling can best be brought out by a simple illustration. On May 1st a real estate proprietor on Sparks Street (whose policies have been in my possession) insured his property for \$50,000, at a rate of 1.25 per cent., with an increase of 50 cents under the surcharge. The total premium paid was \$875; although improvements had been made in the fire protection which warranted a reduction of 25 cents, this proprietor could get no advantage or allowance except by the method of short period cancellation (a term, I think, sufficiently understood to obviate further explanation), which would have entailed upon him a loss in excess of the saving that should justly have come to him by the reduction in the surcharge.

I think this may safely be taken as an indication of the association's attitude to municipalities and will suffice, although a number of similar instances might be quoted.

With regard to the association's attitude to individuals, firms or corporations we have much more definite evidence that it is of the most autocratic and unreasonable nature. A perusal of the infractions substantiated and charged as recorded in Exhibit No. 6 is the first chain in this evidence. The second is found in Exhibit No. 7, which requires to be amplified by explanation.

Special Forms of Insurance.

In the bulletin enquiry (Exhibit No. 7) information was sought concerning special forms of insurance to Goodyear Tire and Rubber Goods Company, Limited, the E. B. Eddy Company, Limited, Canadian Westinghouse Company, Limited, Western Canada Flour Mills Company, Limited, and subsequent bulletins have sought information with regard to McLaughlin Carriage Company, Limited.

These five corporations have Dominion-wide business, with branches in one or more of the chief cities of each province, and typify a number of equally large concerns similarly situated. The nature of their business has necessitated a special class of policy commonly called a "blanket," which insured them anywhere and everywhere in Canada within certain limits.

I have had the advantage of studying the forms and statements in each of these cases, and I find in every one that the insurance covered outside of the provinces of Ontario and Quebec is much greater than that in the two provinces under the jurisdiction of the Canadian Fire Underwriters' Association; indeed, in one case, i.e., Canadian Westinghouse Company, Limited, less than 5 per cent. of the total insurance applied in Ontario and Quebec.

Technical Violation of Rule.

Because of some technical violation of a rule of the association all the companies insuring these properties have been ordered to cancel their policies and cease to write thereupon for 90 days, and then only under rates and rules to be fixed by the association, if it, in its wisdom, authorizes the insuring of the properties.

Policies of insurance have been issued on all these properties, and that naturally assumes the fact that according to the individual judgment of the managers the insurance is desirable for them to assume, and the conditions fair and reasonable to grant to large insurers, the ramifications of whose business requires covering of this special kind.

The attitude of the association in these particular cases is evidenced by a letter written under date of August 13th, 1915, to one of the companies interested in all the five cases named, and I am filing a copy of this letter marked Exhibit No. 13.

I am informed that the drastic action of the association in these cases prevents the insured from obtaining insurance to the extent desired in licensed companies, and that to protect themselves, as required, they will necessarily have to seek the protection of unlicensed companies, and this, too, in spite of the fact that companies are willing enough to write the business if they are permitted to exercise and enjoy any individual judgment.

One other instance is brought to my attention by a perusal of the minutes of the meeting of the executive committee held in Toronto, 26th May, 1915. This is the case of

OFFICERS OF THE BANK

R. Campbell, General Manager L. M. McCarthy, Supt. Branches
V. F. Cronyn, Supt. Eastern Branches J. P. Roberts, Supt. B.C. Branches

Messrs. J. J. McLaughlin, Limited, and the minute reads thus:—

"An application for a rate on a blanket policy to cover the firm's plant and stock in various risks in Toronto, Ottawa, Caledon and Edmonton, including also lien contracts, was considered, but as the proposed policy was to cover plant in various locations, which was contrary to precedent, the committee declined to authorize same."

An application was subsequently made in view of the objection to include "plant" to name a blanket rate on stock as had been done in other cases. This application was refused by the committee without any adequate reason.

I have had the opportunity of perusing the correspondence in this case, and have permission to produce it, should it be necessary; it will, if produced, be a very striking confirmation of the charge of an unreasonably autocratic attitude of the association in its relation to the insuring public.

The Canadian Fire Underwriters' Association will reply to these charges when the sittings of the Ontario Insurance Commission are resumed next month. A meeting of the executive of the association was held not long ago, and it is understood that Mr. Heaton's report was discussed there. The second part of Mr. Heaton's report is not so condemnatory as the first part, from which the above extracts are taken.

RETRENCHMENT IN MUNICIPAL EXPENDITURE

Editor, *The Monetary Times*:

Sir,—In your issue of September 29th I see by an article on page 12 that Mr. Bradshaw in a report to the board of control of Toronto recommends retrenchment in civic expenditures. Of course, one must understand from this that he means capital expenditures. When a city reaches a certain population it stands to reason that it must have paved streets, cement or other sidewalks, proper sewers, water-works, parks, sanitary arrangements, etc. The larger the city becomes the more its needs, and this can only be raised in one way, that is, by taxation, as no one person or firm is willing to advance the money in that particular city until his neighbour is ready or forced to pay his share. The banks or financial institutions provide the remedy by loaning in advance of tax collectors.

The taxes provide for borrowing on current expenditure for the year, and interest and sinking fund on the debt of capital expenditures. When a city, through capital expenditures on improvements, extends its paved streets more street cleaners are provided; in extension of population, more policemen are provided; in extension of buildings, more firemen and apparatus are required, and so on for all other departments of civic administration.

Then, for current expenditure, the tax rate depends on civic expansion, and is an ever-increasing charge unless the city stands still. The city administration may find some way of retrenching one year in this respect through advantages of a previous year or years, but it comes back forcibly in the following year or years that there is a certain expenditure for natural growth that must be met. Then, the only retrenchment for the present is capital expenditure, and that is doubtful with cities of many years' growth. There could be extravagance, but nearly all improvements are well conned over before action is taken, and, as a general rule, absolutely necessary before being even contemplated. Why should one ratepayer pay the full amount of general current expenditure tax if he is denied through lack of improvement the benefit enjoyed by his neighbor?

As for paying interest on outstanding taxes uncollected at the end of each fiscal year, the only way I can see to overcome it would be by raising an amount in the general estimates each year for the probable outstanding taxes. This would even up the bank account. If the city went bankrupt this would help pay the creditors: in other words, be a surplus provided by the person who pays promptly to meet the deferred payment of the one in arrears.

Yours truly,

H. L. Corbett,

City Treasurer, Ottawa.

A series of editions of "Sunshine," the bright journal issued by the Sun Life Assurance Company of Canada, describes Canada's industries and resources. The first of the series deals with agriculture.

FOR CANADA'S INSURANCE MEN

There are a thousand and one necessities and qualifications for the successful life underwriter. In a little volume just issued, which contains the story of the tenth annual convention of the Life Underwriters' Association of Canada, the art of finding the prospect, fitting him with a policy and obtaining his signature to the contract is outlined in a very practical manner.

Other phases of life insurance, such as its value to the state, the family and the individual are discussed, as well as many technical points of the business. The letterpress is interspersed with good sketches and photos of officers and speakers.

This book is a valuable compilation, and should be obtained by every life insurance agent. Those responsible for the volume have produced a creditable publication.

With the Life Insurance Men of Canada. Price, 50 cents. Life Underwriters' Association of Canada, 514 Manning Chambers, Toronto.

AUSTRALIA'S THREE DOMESTIC LOANS

Australia in its three domestic war loans has raised \$278,562,000. The third loan, just completed, realized \$115,000,000, and brought subscriptions from 81,727 people. The interest rate was 4½ per cent., payable half-yearly, the lowest bonds issued being for ten pounds sterling. Canada's loan of \$100,000,000 was doubly subscribed by about 30,000 investors.

Many Australian business firms and manufacturers rendered material assistance in the flotation of the last war loan by taking up bonds on behalf of their employees in return for small weekly payments, writes Mr. D. H. Ross, Canadian trade commissioner at Melbourne, in his report on the loan.

The general procedure was to assist any employee in receipt of less than £200 a year in taking up bonds from £10 to £50, the amount to be repaid at the rate of 2s. 6d. a week for each £10 bond.

The employers undertook to pay over the amount subscribed by the employee without interest being charged for the advance. Further, any employee subscribing to the loan and leaving the firm's service before the expiration of the eighteen months (the period for reimbursement of advances may obtain his or her bond on (a) by payment of the amount outstanding, or (b) transferring the subscription to another employee, or (c) arranging with the firm to take up the subscription, in which case the firm will repay the amount paid, together with the interest due thereon to date of transfer.

EUROPEAN MUNICIPALS IN NEW YORK

The over-subscription in New York by more than ten times of the \$50,000,000 loan to the city of Paris, France, is a striking indication of the opinion of the financial fraternity of the United States as to the course and the ultimate result of the war. The loan, which was negotiated by Kuhn, Loeb and Company, New York, was for relief work and to reimburse the city of Paris for heavy expenditures in connection with the war. It is offered to the underwriters at 97. Bankers declare that the loan is one of the most popular floated in Wall Street because a large part of the proceeds will be used to aid war sufferers. The loan is being offered to the public this week. The over-subscription by the syndicate in the short time is said to be a record. The principal and interest of the bonds are payable at the option of the holder either in United States gold coin in New York or in Paris in francs at the fixed rate of 5.50 per dollar, thus giving to the holder the prospect for a substantial profit in exchange, inasmuch as the normal rate of exchange before the war was about 5.18 francs per dollar.

The government of the French Republic is to undertake to furnish, if necessary, to the city of Paris gold to the amount needed to permit the payment of the principal and interest of the loan in New York. This is the second European municipal issue to be made in the United States. The first was one in August of \$6,400,000 1 year 6 per cent. discount gold notes of the Metropolitan Water Board of England. These notes were placed in a few hours.

Appointing an Executor

Every property owner should make a Will, and every Will should name an Executor. There are several advantages in naming a Trust Company, because it is **permanent**, is **organized**, **experienced**, financially **trustworthy**, is not influenced by favoritism, and its charges are no more than those allowed to an individual Executor.

Correspondence or Interview Solicited.

HOW OUR WHEAT IS SHIPPED

Much of It Goes to Europe Through United States Ports. —Passenger Boats Carry the Bulk

In examining during past years some features of the routing of Canadian traffic, Mr. Sanford Evans discovered several general conditions, which he discussed briefly before the American Association of Port Authorities at Montreal last week. He pointed out that a large proportion of the bulk traffic for export originated in the central districts, Canada's central district being north of that of the United States.

Through United States Ports.

"The port of Montreal is practically as convenient to that district of the United States as are the ports of Boston, Philadelphia, Portland, New York and Baltimore, and these ports in return are, geographically speaking, practically as convenient for the Canadian central districts as is the port of Montreal," said the speaker.

"There are a few formalities if goods are sent through in bond, but the fact remains that by a slight change in routing goods can be sent to any of these ports from these districts. In 1913, when I made a special study of Canadian wheat export traffic, I found that two-thirds of it went through the ports of Portland and other United States ports and the remainder through Canada. Every year a large proportion of our wheat goes out through United States ports."

In seeking a reason for this, the speaker said he had not been able to find any deficiency in handling in the port of Montreal, in the water communications with Montreal from the inland lakes, or in the ability of the railroads to carry all offered them. On the lakes Canadian vessels carried each month far more grain than the port of Montreal exported. There were two and a half times as much grain handled in Canadian bottoms on the lakes as was exported by Montreal.

Conditions of Purchase.

He could not find any of the transportation companies who were not willing to quote a lower rate on a Canadian route than to any of the other Atlantic ports. He found the answer to the problem in the conditions of purchase of the wheat. Europe would only buy enough wheat for her needs for a limited period, and she would not get in two or three months what she needed for the year. The fact of the matter was that Canada and the United States did not export wheat to Europe, but Europe imported wheat from these countries. Very little wheat is started from these countries which is not sold before it starts. There are many instances of how the Europeans have squeezed the shipper who exported grain to the other side before it was sold. As the 1915 Canadian crop was short, they took more United States wheat. Buying grain as they wanted it, ports open all the year around would be available for Canadian wheat in the winter time.

Passenger Boats Carry Wheat.

Mr. Evans also pointed out that passenger lines carry the bulk of wheat to Europe because they can do it more economically than tramps, because tramps come without an inward cargo as a rule and the outward cargo is expected to pay expenses both ways and a profit. His investigations showed that 50 to 60 per cent. of the grain from Canadian Atlantic ports had been exported in passenger ships, 5 per cent. in tramp boats, and all the rest in cargo liners. North of Philadelphia and Baltimore the liner had dominated the situation. They were distributed up and down the north Atlantic coast in proportion to the load factor. Liners coming to Montreal carried about 50 per cent. of what they carried out. What the ship would carry wheat for depended on how much she could get to carry both ways. If that could be better accomplished at one port than another, it would get the most ships. He thought this was underlying the whole question of distribution of ships. The effort of the Canadian people was to get all its own traffic going through its own ports.

The Excelsior Life Insurance Company's field men's journal, "The Banner," points out that the company's representatives are finding applications more plentiful, as evidenced by increases in June, July and August of 58 per cent., 93 per cent. and 66 per cent., respectively, over the corresponding months of 1915.

"BLACKLIST" COMING HERE?

Canadian Government May Take Only Logical Course and Institute One

Attention has been drawn in these columns to the fact that while there is a British blacklist of United States firms with whom the United Kingdom and Australian citizens are forbidden to trade, no such list has as yet been instituted in Canada. The matter has been brought by *The Monetary Times* to the attention of the proper authorities and it is understood that the Dominion government is considering the matter of establishing a blacklist applicable to Canada.

Will Stick to Policy.

In discussing on September 8 the possible effect of the new retaliatory legislation of the United States, Lord Robert Cecil, Great Britain's minister of war trade, stated that "it is not likely that Great Britain will change her blacklist policy at the request of the United States." To the Associated Press Lord Robert said that a reply to the blacklist protest made by the United States might be expected soon. He declined to enter into the details of the contents of the reply beyond the statement that the principle embodied in British legislation forbidding trading with an enemy country is not likely to be surrendered in any measure. In a general defence of British commercial acts Lord Robert said:—

"The ideas expressed by some of your newspapers that Great Britain is adopting a deliberate policy with which to injure United States trade is the purest moonshine, since outside of our own Dominions our trade with the United States is the most important. Of course, natural trade rivalry exists, but no responsible statesman in this country would dream of proposing an insane measure designed to injure United States commerce.

"Any impression that the blacklist is merely an entering wedge for a trade warfare after the war may be dismissed at once. I assure you the blacklist is purely a war measure, and I cannot insist too strongly that the government is taking every precaution to guarantee its enforcement so as to cause as little hardship as possible to innocent traders.

"We believe our trade measures are proving efficacious, although it is difficult to give any figures indicating the extent of the harm done to our enemies, but I might point out that the mark is still declining in value."

Fears are Ungrounded.

It was pointed out to Lord Robert that the belief prevailed that the shipment of consignments of firms trading with blacklisted firms might be refused from United States to other neutral ports through the fear of not getting coal. Lord Robert replied:—

"The fear is ungrounded, as we have no desire to interfere, nor does the law contemplate any interference with legitimate trade. We are taking precautions to prevent an unjustified extension of the blacklist."

Purpose is Misunderstood.

Lord Robert expressed the opinion that not only the purpose of the blacklist, but also the real design of the Paris Economic Conference, was misunderstood in the United States, saying on this point:—

"The real purpose of the Paris Conference was to arrive at some plan by which to prevent any resumption or extension of the politico-commercial system prevailing before the war in the first place, and, in the second, to devise means for accomplishing, both for ourselves and our allies, the enormous task of reconstruction. We fully realize that such a plan must involve readjustments of existing treaties, which, with their favored-nation clauses, now stand in the way. However, it must be remembered that with the exception of this country, which has no tariff wall, all countries have constantly evaded and violated the favored-nations clause."

In conclusion, Lord Robert said that the adoption of the plan outlined at the Paris Conference might result in a worldwide scientific tariff.

Announcement of the removal of the following United States firms from Great Britain's black list was made in the London Official Gazette, of August 8th: Electro Bleaching Gas Company, of New York and Niagara Falls; Richard Neuhaus, of the Electro Bleaching Gas Company, and Gravenhorst and Company, of 96 Wall Street, New York.

WAR LOAN SUBSCRIPTIONS

Further Purchases Announced—Conversion of Old Loan —Winnipeg Subscriptions Estimated at \$10,000,000

In *The Monetary Times* last week were printed details as to the conversion of the old war loan. Since then particulars in this connection, of other subscriptions have been received as follow:—

Purchaser.	New subscription to present loan.	In addition, the amount noted below was converted.
Nova Scotia Steel and Coal Co.	\$250,000	None
Osler, Hammond and Nanton, Win- nipeg	300,000	None
Brandon city	537,000	None
Northern Agencies, Winnipeg	97,500	None
Fort William city	250,000	None
J. K. L. Ross, Montreal	500,000	None
Edmonton city	250,000	None
Saskatoon city	100,000	None

An official statement as to the amount of the old war loan which has been converted into the new loan has not yet been made. In the case of 75 of the many subscriptions to the current loan reported to *The Monetary Times*, the actual new cash subscribed was \$26,286,500 plus \$1,735,000 of old bonds converted. Roughly, that is equal to \$2,000,000 of converted bonds for every \$26,000,000 of new money, if these 75 subscriptions are a fair reflection of the general results. In that event, the full subscription of \$100,000,000 of the new loan would have brought with it, say, approximately \$7,000,000 of converted bonds in addition. As reports on this point continue to come to *The Monetary Times*, this conclusion is strengthened. The conversion privilege in the old loan has not been freely exercised. The finance department at Ottawa knows exactly the amount so converted and will probably announce the figures later.

Details of Other Subscriptions.

To the list of subscriptions to the war loan, reported to *The Monetary Times*, printed on page 22 of last week's issue and aggregating \$107,065,900, may be added the following:—

Tetereault Shoe Company, Montreal	\$ 25,000
Chilliwack city, B.C.	7,000
Montreal Locomotive Works	250,000
Nipissing Mining Company	100,000
Henry J. Fuller, Montreal	30,000
J. S. Hamilton, Brantford	10,000
H. Cockshutt, Brantford	50,000
Eugene Coste	50,000
Dominion Securities Corporation (for own account)	1,500,000
Graham Company, Limited, Belleville	200,000
Belleville city	30,000
Vancouver Engineering Works	100,000
Pacific Marine Insurance Company	40,000
Sabulite Canada, Limited, Vancouver	25,000
Vancouver city	100,000
Western Life Insurance Company, Winnipeg Manitoba province (additional)	10,000
Osler and Hammond, Toronto (for own ac- count)	950,000
Economical Insurance Company, Kitchener	50,000

These additions make a total of \$110,642,900 subscriptions, the details of which have been printed in these columns.

With the purchase of \$200,000 of the present loan, the city of Edmonton now holds \$400,000 of war loans. Fort William has now \$528,000 of war loans including its subscription of \$250,000 to the present loan. Saanich, B.C., took \$17,000 of the loan and has also \$26,500 of the previous loan.

Investors in the city of Victoria, B.C., purchased approximately \$1,000,000 of the loan.

Tribute to the Press.

Writing *The Monetary Times*, Sir Thomas White, finance minister, says:—

"Please accept my thanks for the interest which *The Monetary Times* has been good enough to take in the success of the war loan."

Mr. A. E. Boyle, secretary of the Winnipeg board of trade, writes: "I am glad to be able to tell you that the re-

cent war loan proved to be a very popular form of investment in Winnipeg. Subscriptions received here are estimated to have amounted to more than \$10,000,000, and it may be that this total will be slightly increased when all the returns are received. *The Monetary Times* is assuredly entitled to a share in the credit for the success of the whole flotation."

INTERNATIONAL NICKEL TO BUILD

Sum of \$5,500,000 to be Spent by the Company in Canada

The International Nickel Company has appropriated \$5,500,000 from its cash on hand for the construction of a refinery in Canada, and the extension of its smelters. This money will be spent in Canada. The new construction programme will be commenced immediately. This expenditure, says the Wall Street Journal, will eventually be capitalized and distributed to common shareholders in the shape of a stock dividend, following the custom of the Nickel management in similar cases. Capitalization of this investment would indicate that the stock dividend when authorized will amount to 10 per cent. or higher. Last previous distribution in stock was 10 per cent. last year.

Demand for Nickel.

A straw showing the demand for nickel is the fact that the Midvale Steel has just placed a contract with International Nickel for 8,000,000 pounds of the metal to be delivered over a period. Early this year International Nickel received an order from the British government for a very large tonnage of nickel to be delivered over 12 months.

In August International Nickel sold 7,600,000 pounds of nickel, which was 1,500,000 pounds more than was ever sold in any previous month. With such great demand for the metal International Nickel has been unable to maintain the reserve supply on hand which according to its policy it has kept on hand.

Buying of the Stock.

Buying of the stock in the last few weeks has been based on realization by investors of the great strength of the company's position. Unlike other metals the price is not subject to wide fluctuations. Policy of International Nickel has been to encourage consumption of the metal by selling it at a reasonably low price. There has been no advance since the war except such as was required by increased costs.

Consequently ending of the war will not result in both decreased demand and lower prices for nickel, such as is to be expected in the case of other metals.

On the basis of dividends of 24 per cent. or \$6 a share International Nickel, at present figures, yields better than 12 per cent. on the investment. It has been the history of the company that dividends are on a steadily rising scale despite the fact of stock distribution in the interim.

FOREST FIRES AND PREVENTION

The Northern Ontario forest fire of July 29th last takes rank as the third most serious fire catastrophe in the history of this continent, according to the information submitted to *The Monetary Times* by the Canadian Forestry Association. The Hinckley fire in Minnesota, 1894, was responsible for 418 lives and the burning over of 160,000 acres. The famous Peshtigo fire in Wisconsin, 1871, killed 1,500 and devastated 1,200,000 acres of timber. In 1825 occurred the Miramichi fire of New Brunswick and Maine with a loss of 160 lives, six towns, 1,000 head of cattle, and damage of 3,000,000 acres of forest. The clay belt fire in Ontario, with 262 lives lost and 800,000 acres fire-swept, takes its place with the great disasters of history. The Porcupine fire in 1911 killed 84 persons.

Wisconsin, Minnesota, Maine and New Brunswick have taken comprehensive measures to prevent further disasters by organizing their forest patrol systems on modern lines, building trails, lookout towers, telephones, etc., as well as carefully supervising settlers' clearing fires, one of the worst sources of danger. Ontario, which has given the continent its two most recent fire catastrophes, has made no such move to modernize her forest-guarding system.

CASUALTY UNDERWRITING PROFITS

Reasons for Present Situation in This Class of Insurance Business—Making the Rate

Casualty insurance netted to the companies engaged in it an underwriting profit of barely more than a half of 1 per cent. This was the average for thirteen years and the average for the last five years was an underwriting loss of eight-tenths of 1 per cent. Why is it that this great business makes such a showing as this and seems to be getting steadily worse? Where is the end? These questions were asked by President H. G. B. Alexander, of the International Association of Casualty and Surety Underwriters, at the association's annual meeting.

"The diminishing underwriting profit which has been made in the casualty business, particularly in the accident and health branch of it, is due in a large measure to the inability of the companies to get together for the common good, or having got together, to observe their mutual obligations. Each company seems to proceed upon the theory that volume of business is the object to be sought rather than profitable business. Each company seems to be willing to adopt and follow methods that it condemns in the other. Each company seems to be willing to outbid the other, wholly oblivious of the fact that claims must be paid and that there are but one hundred cents in a dollar. This is the basic cause of the decline of underwriting profit in the casualty business.

Workmen's Compensation is Factor.

"Another cause of diminishing underwriting profit in the casualty business which threatens its ultimate extinguishment unless reform is made is the fact that the business of workmen's compensation has grown so rapidly, so spontaneously, it has become a large factor, while at the same time rates have not been maintained on that conservative basis which should have marked the course of the companies until exact information was at hand to warrant a lowering. At the outset the companies were without exact data on which to predicate rates. Even at the present time the data in many lines is woefully insufficient, although the volume of business now being transacted is such that within a few years statistical information which in volume and exactness will be such as to afford an absolutely correct basis for rate making should be available.

"Then, too, the advent of workmen's compensation has apparently by its very inherent qualities, increased the losses against which it indemnifies. This is an effect which the companies could not avoid, although they might have foreseen and mitigated.

Method of Rate Making.

"Another channel through which the advent of the compensation business has diminished underwriting profit is the method of determining the ultimate rate, the system of merit rating. It is sufficient to say that the merit rating system as at present applied takes the rate made as adequate for the average risk and reduces it for some risks and increases for none, thus giving lower than the adequate average rate for the average risk, a result which can have no other effect than loss. Incidentally, no more cunning or suitable device

for rate cutting could possibly be devised, than this same merit rating system.

"Closely allied to it is the system of experience rating. As this system has been applied in states where rates are not supervised by industrial boards or other official bodies, it has been a direct channel for discrimination as between risks. It has made of non-effect the carefully computed adequacy of basic rates and has given rise to vicious and illegitimate practices. Several states, recognizing the evils of the present system, have taken steps to abate them. The newly adopted plan of New York, which it is proposed to introduce elsewhere, will, if strictly administered, go a long way in the right direction, although the minimum experience which may be taken as a basis is too small to afford a dependable average. The Pennsylvania compensation rating and inspection bureau, also has under consideration a somewhat complicated plan designed to produce the desired results. The questions involved in any plan of experience rating, while most important, are by no means easy of solution.

Danger Signal to Interests.

"This absence of underwriting profit is a danger signal to all those who have a vested interest in the insurance business. It is a danger signal alike to the stockholder, the agent and the insured. It goes to the foundation of the casualty insurance business as transacted by stock companies and threatens their permanency. Stock companies have an important and most necessary part to play in the insurance activity of this country. It is equally true that stock companies to exist must be able to attract capital and keep it interested. Capital may be interested either by the possibility of large profit in return for large hazards, or by the surety of small profits in return for small hazards. Unfortunately, the casualty business of to-day does not offer either of these attractions.

FORTY YEARS IN THE WEST

Mr. R. McKenzie, secretary of the Canadian Council of Agriculture, Winnipeg, was a visitor to *The Monetary Times* head office this week. He reports that the western crops will probably be 50 per cent. of those of last year. The 1915 crops, however, were the largest within his memory, and he has been in Western Canada for over 40 years. The high prices ruling at present will compensate to a considerable degree for the reduction in the yield. Comparing the crops with those of 1914, the present harvest may be slightly less.

Mr. McKenzie was pleased with the efforts made by the Canadian bankers to remove causes for complaint on the part of western farmers in regard to financial accommodation. To the efforts of Mr. Vere C. Brown, the well-known western banker, he paid a particular tribute in this connection. Mr. McKenzie, who has been visiting Eastern Canada for three weeks, and who returns to Winnipeg this week, stated that the friction between the agricultural and financial interests was gradually being removed, now that representatives of the two groups were meeting in conference from time to time. He thinks that the agricultural interests should take a greater part in the affairs of the country, and that in view of their importance they should be consulted more frequently.

BRITISH COLUMBIA'S INSURANCE BUSINESS

Superintendent's Report Shows that 114 Fire Companies Are Operating There

At the end of 1915 there were 114 companies licensed to transact the business of fire insurance in British Columbia.

Where incorporated.	Dominion licensees.	Provincial licensees.
Dominion of Canada	18	..
Provinces of Canada	6	..
Great Britain	26	5
United States of America	29	24
France	4	..
New Zealand	..	1
Sweden	..	1
Totals	83	31

During the year the British Dominions General Insurance Company, Limited, obtained Dominion license to transact fire, inland transportation, and sprinkler-leakage insurance.

The following companies ceased business in British Columbia:—

Germania Fire Insurance Company, Dominion licensees. Austin Fire Insurance Company and Commonwealth Fire Insurance Company, business reinsured June, 1914, with Glens Falls Insurance Company; Citizens Fire Insurance Company (of West Virginia), business reinsured December 31st, 1914, with Niagara Fire Insurance Company; Hamburg Bremen Fire Insurance Company and Nord Deutsche Insurance Company, owing to war between Great Britain and Germany; Northwestern Insurance Company, Limited, amalgamated with British Dominions General Insurance Company, Limited, all provincial licensees.

The following companies commenced fire insurance business in the province during 1915:—

With Dominion license.—Dominion of Canada Guarantee & Accident Insurance Company, Toronto, Ont.; London Guarantee & Accident Company, Limited, London, Eng.; Ocean Accident & Guarantee Corporation, Limited, London, Eng.; the Phenix Fire Insurance Company of Paris, France, Paris, France.

Provincial licensees.—National Benefit Life & Property Assurance Company, Limited, (reinstated), London, Eng.

Amongst the causes of fires most frequently reported, Mr. E. F. Gunther, superintendent of insurance, classifies the following:—

Cause of fire.	No.	Loss reported.
Sparks from chimneys falling on shingle roofs	84	\$33,245
Defective chimneys and fireplaces	57	43,383
Furnaces, stoves, or pipes insufficiently protected	54	66,990
Clothes, decorations, or firewood too near stoves or pipes.....	24	7,713
Smokers' carelessness	25	17,811
Sparks from fireplaces, furnaces, or stoves	20	11,707
Defective furnaces, stoves, or pipes.....	16	17,544

The whole list, he says, shows that the fire waste is due almost entirely to preventable causes, the remedies for which are obvious but too frequently disregarded.

The importance of fire-prevention and the elimination thereby of fire waste is beginning to be recognized.

The net losses (paid) reported by the fire insurance companies for the past three years are as follow:—1913, \$1,043,254.41; 1914, \$1,542,845.20; 1915, \$1,311,370.18.

The fire losses reported by municipalities for the last two years are as follow:—

	Fires reported.	Amount of loss.	Loss over \$10,000.
1914	758	\$1,639,834	
1915	709	1,230,810	19 fires.

The only large fires in unorganized districts were mill fires. The most destructive of these, already referred to in the report of last year, occurred on April 4th, 1915, at Comaplix. Careful investigation showed this fire to have been of incendiary origin, but evidence as to the identity of the perpetrator of the crime was not obtainable.

Thirty-three fires of alleged suspicious origin were reported to the department and investigated. There were three convictions for arson in the province during 1915.

At the end of 1915 there were licensed under the "Insurance Act" ninety-four companies, as follow:—

Where incorporated.	Dominion licensees.	Provincial licensees.
British Columbia	..	2
Canada	32	..
Other provinces of Canada	5	1
Great Britain	17	8
Australia	..	1
Hong Kong	..	2
United States of America	23	3
Totals	77	17

The business of the companies was distributed as follows:—Life—twenty Canadian, six British, and seven American companies; accident—twelve Canadian, ten British, and nine American companies; sickness, twelve Canadian, nine British, and eight American companies; automobile—four Canadian, four British, and eight American companies; burglary—four Canadian, one British, and four American companies; explosion—one Canadian company; guarantee—nine Canadian, five British, and four American companies; hail—one American company; inland transportation—one Canadian, three British, and five American companies; inland marine—one British company; live-stock—one Canadian and one British company; marine—one Canadian, ten British, two Hong Kong, one Australian, and five American companies; plate-glass—two British Columbia, seven Canadian, five British, and six American companies; sprinkler-leakage—one British and one American company; steam-boiler—two Canadian and four American companies; fly-wheel—one American company; tornado—one Canadian and two American companies.

The Federal Life Assurance Company (Dominion licensee), ceased to do business in the province, and the following were added to the list of licensed companies during 1915:—

With Dominion license.—British & Foreign Marine Insurance Company, Limited, Liverpool, Eng., marine, inland transportation, and sprinkler-leakage insurance; Northern Life Assurance Company, London, Ont., life insurance; Norwich Union Life Insurance Society, Norwich, Eng., life insurance; Travelers Indemnity Company, Hartford, Conn., accident, sickness, steam-boiler, plate-glass, burglary, automobile, and fly-wheel; Western Assurance Company, Toronto, Ont., marine, inland transportation, explosion, and tornado.

Provincial licensees.—Royal Plate Glass Insurance Company of Canada, Vancouver, B.C., plate-glass insurance; Union Marine Insurance Company, Limited, Liverpool, Eng., marine, inland marine, inland transportation, accident, and automobile insurance.

The name of the First National Life Assurance Society of America was in August, 1915, changed to Union Pacific Life Insurance Company.

OPPORTUNITIES FOR MEN AND CAPITAL

A manager for Toronto and district is sought by the Monarch Life Insurance Company, of Winnipeg. This company has made excellent progress in recent years, and is in a sound and substantial position. Recently it has extended its activities in Ontario, and now desires a capable man to manage its Toronto and district office. The company's advertisement in regard to this appointment appears on another page.

An opportunity for investment is also brought to the attention of *The Monetary Times*, it being stated that \$10,000 cash will buy an \$80,000 corporation with \$60,000 annual business in Toronto. The past annual profits are stated to be \$7,500, which can, it is said, be duplicated on the investment of a further \$5,000. The past and present cost tables are available. The name of the parties interested will be furnished on application to *The Monetary Times*.

The choice of an executor is important. Some educative information on the subject is contained in "The Protection of Property," a booklet which can be obtained from the National Trust Company, Toronto.

Is Your Investing Helping Canada ?

Even when practising war time economy, Canadian Provinces and Municipalities require over \$100,000,000 annually for necessary public works. To help provide these funds is scarcely less a national duty than subscribing to war loans. Are you doing your share?

Canadian Government and Municipal
Bonds provide the safest investment
and yield an income of 5% to 6%.

Write us to-day for a list of these bonds, and be informed without incurring obligation.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Arkona, Ont.—September 24—Mr. T. Pressey's barn. Loss, \$4,000. Insurance, \$2,800.

Asquith, Sask.—September 7—Grand Trunk Pacific station entirely destroyed.

Aylmer, Que.—September 19—Mr. Staley's sawmill, Glencolin. Cause unknown.

Beechville, Ont.—September 27—Mr. J. Murray's residence. Partially insured.

Belleville, Ont.—September 21—Mr. Newton Bird's barns, Sidney Township. Loss, \$4,000. Cause unknown.

September 22—Mr. E. Welch's barn, Huntingdon Township. Loss, \$2,500. Partially insured. Cause, sparks.

Brandon, Man.—September 21—Mr. H. Madders' store, Madford. Loss, \$1,000; residence, 218 12th Street N. Loss and cause not stated.

Brockville, Ont.—September 14—Mr. H. Coville's residence, Algonquin. Partially insured.

September 18—Messrs. Sack Brothers' junk store. Loss, \$6,000. Cause unknown.

September 24—Mr. H. Aldrich's four farm buildings. Loss, \$2,000.

Calabogie, Ont.—September 12—Mr. J. Dempsey's sawmill. Loss, \$5,000. Cause unknown.

Cavan Township, Ont.—September 21—Mr. T. H. Aikers' barn. Loss, \$10,000. Insurance, \$3,000.

Charlottetown, P.E.I.—September 29—Victoria hotel garage and four automobiles. Loss, \$17,000. Cause, supposed short circuiting of electric wires.

Chatham, Ont.—September 18—Canadian Smallwares, Limited, store.

September 19—Messrs. Dingman Brothers' barns and outbuildings. Loss, \$2,000.

Chilliwack, B.C.—September 28—Mr. M. Green's tobacco store. Loss, \$2,500. Insured.

Colborne, Ont.—September 19—Mr. D. H. Orser's barn, Mount Olivet. Loss and cause not stated.

Delhi, Ont.—September 20—Grand Trunk Railway depot destroyed.

Fergus, Ont.—September 24—Mr. H. Howe's barn, Concession 5, West Garafraxa. Loss, \$1,350. Insured in Peel and Maryborough Mutual Company for \$1,750. Cause, lightning.

Flesherton, Ont.—September 25—Mr. W. A. Armstrong's stables and that of Mr. W. J. Strang.

Fort Erie, Ont.—September 16—Mr. N. Rodenburg's garage, Lavinia Street. Loss, \$2,500. Insured.

Fort William, Ont.—September 5—Three buildings, Home Avenue. Loss, \$6,000. Cause, lightning.

Glenella, Man.—September 8—Mr. Segal's residence. Loss and cause not stated.

Guelph, Ont.—September 28—Maylor Sales, Limited's automobile.

Ingersoll, Ont.—September 18—Dr. R. A. Williams' residence, Thames Street. Loss and cause not stated.

Kitchener, Ont.—September 17—Messrs. P. Hayman and Company, hardware merchant's barn. Loss, \$1,000. Insured.

Montreal, Que.—September 23—Quebec, Montreal and Southern Railway Company's round house, Chambly Road.

Marthaville, Ont.—September 25—Two residences. Loss and cause not stated.

Merrickville, Que.—September 27—Percival Plow and Stove Company. Cause unknown.

Mitchell, Ont.—September 27—Exhibition building. Loss, \$2,000. Insurance, \$1,400.

Moose Jaw, Sask.—September 11—Imperial Oil Company's stables. Caused, dropped match or cigarette.

Newdale, Man.—September 19—Mr. E. Wilson's barn, Marnev.

Oil Springs, Ont.—September 21—Mr. T. K. Thompson's barn, 3rd Concession, Enniskillen Township. Loss, \$10,000.

Peterborough, Ont.—September 25—Outbuildings, South Central school.

Petrolia, Ont.—September 14—Mrs. S. A. Ellacotts' residence, Railroad Street. Loss, \$300.

September 25—Messrs. Thompson Brothers' barn, Dawn Township.

Port Stanley, Ont.—September 29—Port Stanley Fish Company's premises.

Puslinch Township, Ont.—September 14—Messrs. J. and C. W. Barclay's barns. Loss, \$8,000. Partially insured in Puslinch Mutual Company.

Quebec, Que.—September 27—Home for Old Folks and Infants. Loss, \$50,000. Insurance, \$15,000.

Revelstoke, B.C.—September 22—Star theatre, Howser block, etc. Loss heavy.

St. Mary's, Ont.—September 25—Messrs. Chivalras' Kandy Kitchen. Loss, \$1,500. Insured.

St. Thomas, Ont.—September 17—St. Thomas Dehydration Company's plant and St. Thomas Woodenwares stock and machinery. Loss, \$40,000. Cause unknown.

October 2—Corner Ross and Centre Streets. Loss slight.

Sarnia, Ont.—September 14—Ontario Cannery's Association's plant and Laidlaw Lumber Company's premises. Loss, estimated, \$300,000.

Simcoe, Ont.—September 15—Mr. A. Osborne's residence, Main Street. Loss and cause not stated.

Strathroy, Ont.—September 19—Mr. A. Doan's automobile. Cause, light tank exploded.

Sydney, N.S.—September 23—Mr. J. A. McCallum's carriage shop, Townsend and Esplanade. Loss, \$10,000.

Vancouver, B.C.—September 11—Pacific Steel Products Company's plant. Loss, \$100,000.

September 25—Lee's tea rooms, English Bay. Loss, \$2,000.

September 30—Stores, etc., on wharves. Loss, \$10,000.

Victoria, B.C.—September 28—Victoria Shingle Company's premises, David St. Loss, \$9,000. Insurance, \$1,000.

Vittoria, Ont.—September 25—Mr. J. E. Butler and Sons' planing mills. Loss, \$3,000. No insurance.

Westboro, Ont.—September—Three stores, two residences, four sheds, one tin shop and one stable. Loss, \$57,000. Insurance, \$28,000.

Whitby, Ont.—September 21—Ontario government hospital barn. Cause, grass fire.

Winnipeg, Man.—September 22—Rev. Chavagen's stables, St. Adolphe. Insured; Old Folks Home, Middlechurch. Loss, \$800. Cause unknown.

September 25—Stables of Arctic Ice Company. Loss, \$15,000.

Wolfe Island, Ont.—September 18—Summer hotel, Channel Grove, Wolfe Island, owned Canadian Locomotive Company, Kingston.

Woodstock, Ont.—September 17—Mr. A. Goodall's barn, Vansittart Avenue.

OCTOBER FIRES

Montreal, Que.—October 3—Messrs. F. Thompson and Company's premises, 326 West Craig St. Loss, \$5,000. Cause not known.

Brantford, Ont.—October 3—Brantford Cordage Company. Cause unknown; Mr. W. G. Ash's barns, Mount Pleasant. Loss, \$3,000. Cause, spontaneous combustion.

BRITAIN'S SPIRIT IN WAR

A strong appeal to the British Empire is contained in a recent volume, of which the author says: "This book has been written to establish the need for national service in order that the British Empire may maintain itself securely in the present circumstances of the world. If this contention be true, it is obvious that a corresponding duty lies upon the whole nation to accept the burden."

From the introduction, through the chapters dealing with the causes of war, the spirit of the British and the German policy, democracy and national service, there rings a clear call to duty. "When there is a case to be laid before the British people," says the author, "it is folly to do it piecemeal by astute stages of pleading and with subtle reservations. If the whole can be put unflinchingly, it is not the people who will flinch. The issue may be left with safety to a tribunal which has never yet failed in its duty, when rulers have the courage to say where its duty lay."

Thus concludes a book well worthy the perusal of every Canadian.

Ordeal by Battle (abridged edition). By Frederick Scott Oliver. Price, 35 cents. Macmillan Company of Canada, St. Martin's House, Toronto.

Is Your Estate Properly Protected?

No matter how little or how much you own, these possessions make up your estate, and should be protected by efficient and economical management.

This can best be done by an Executor or Trustee.

This Company, by acting in this capacity, will give your estate the benefit of experience gained in the management of many estates, of large and of only moderate size, and will scrupulously guard the interests of your heirs.

No charge for drawing up your will when the Sterling Trusts Corporation is appointed your Executor and Trustee.

Our officers will give you further information on request.

NICKEL WORTH TEN MILLIONS

Returns from Ontario's Mines for Six Months—Gold and Silver Output

The returns of production for the first six months of 1916, made to the Ontario bureau of mines by the metalliferous mines and works of the province, are summarized in the following table, which also gives comparative quantities and values for the corresponding period of 1915:—

PRODUCT	QUANTITY		VALUE	
	1915	1916	1915	1916
Gold	173,021	oz. 235,060	\$ 3,570,072	\$ 4,822,740
Silver	11,101,909	" 10,287,743	5,188,763	6,188,269
Copper		lbs. 77,795		14,368
Cobalt (metallic)		" 121,817		103,677
Nickel (metallic)		" 13,933		5,899
Molybdenite (concentrates)		" 12,631		13,075
Cobalt and Nickel oxides	141,500	" 401,408	56,812	204,638
Copper in matte	8,523	tons 11,426½	1,704,600	2,285,096
Nickel	15,182	" 20,651½	7,591,000	10,325,766
Iron Ore	134,077	" 80,698	288,296	243,268
Pig Iron	225,940	" 295,349	2,856,040	4,424,496

The production for the six months ended June 30th, 1916, shows a material increase in value of all metals over that for the first six months of 1915, with the single exception of iron ore.

Porcupine is Productive.

If the present rate of production of gold is maintained Ontario should reach the \$10,000,000 mark for 1916, as compared with \$8,500,000 for 1915. Of the total yield the Porcupine camp contributed all with the exception of \$545,434, produced by the Croesus in Munro township, the Rognon near Dryden, the Tough-Oakes at Kirkland Lake and the Canadian Exploration Company at Long Lake, near Sudbury. The Hollinger Consolidated and Dome Mines are the big producers of the Porcupine camp. Before the year is out Boston Creek will probably be contributing to Ontario's gold production. Development is proceeding on some of the more promising claims at Kowkash (situated east of Lake Nipigon) on the National Transcontinental Railway.

Since the beginning of 1916 the price of silver has advanced considerably, the average being 62½ cents per ounce, low 56½ and high 77¼ cents. As a result production has been stimulated, and the value as compared with 1915 figures shows a considerable increase. Although the ounces sold were less than for the corresponding six months period of 1915, the total production was greater, over 1,000,000 ounces remaining to be marketed. Undoubtedly the life of the Cobalt camp will be prolonged as a result of introducing flotation treatment for handling low-grade dumps and slimes. Nipissing still leads in output with a valuation of \$1,766,561. The Mining Corporation of Canada (Cobalt Lake and Townsite City) is the next large producer, followed by Kerr Lake, Coniagas, McKinley-Darragh-Savage, Seneca-Superior, etc., in the order named.

Metallic Cobalt and Nickel.

With the outbreak of war the European market for cobalt oxide was suddenly cut off. However, new markets and new uses for metallic cobalt have improved the situation. High grade steels are now produced from cobalt alloys. Metallic cobalt production is greatly in excess of last year.

Metallic nickel from Cobalt ores is produced at the refining works of the Delora Smelting and Reduction Company, Limited, formerly known as the Delora Mining and Reduction Company. The output shows an increase over the 1915 production, which was not marketed during the six months' period.

Apart from the nickel-copper deposits of Sudbury, there has been a revival of copper ore mining in Ontario, partly due to the high price of the metal. The old Tip-Top mine and other properties near Mine Centre, in the district of Rainy River, are now producing. The Rand Syndicate is operating near Timagami. The Sable River Copper Company at Massey has erected a mill and is using the flotation process for the treatment of copper ore.

The smelters of the Canadian Copper Company at Copper Cliff and the Mond Nickel Company at Coniston are

turning out nickel-copper matte at an unprecedented rate. The production, as compared with the first six months of 1915, shows an increase of nearly 40 per cent. The valuation of the metallic contents of the matte has been made on a basis of 10 cents per pound for copper and 25 cents for nickel. The figures given for metallic copper and nickel separately show that the prices were over 18 and 42 cents per pound, respectively.

In addition to the above-mentioned companies the Alexo Mine, near Porquis Junction, produces a small amount of nickel-copper ore, which is treated at the Coniston smelter.

Iron Ore was Less.

Molybdenite occurs widely in Ontario, but is mined chiefly in Renfrew county. It is wanted at the present time for use in the manufacture of high-speed tool steel, and for this purpose molybdenum will probably replace tungsten to some extent. The demand for molybdenum steel to be used in munition factories comes largely from the allied nations, Britain, France and Russia. Molybdenite concentrates containing 85 per cent. or more of MoS₂ are worth about \$1 per pound. Ferro-molybdenum is now being manufactured for the first time in Canada by the Orillia Molybdenum Company at Orillia, and the Tivani Electric Steel Company at Belleville.

The only shipments of iron ore were from the Magpie Mine, operated by the Algoma Steel Corporation of Sault Ste. Marie. Although iron ore production shows a decrease as compared with the same period in 1915, that of pig iron shows a material increase, both in tonnage and value.

EDMONTON'S AUDIT SYSTEM

With reference to the comments in *The Monetary Times* of September 22nd in regard to Edmonton's audit system, the following letter from Mayor W. T. Henry, of Edmonton, appears to deal fully with the remarks made on the subject in these columns by "Edmonton Reader":—

"Adverting to Mr. Richardson's letter in this morning's Bulletin, there is apparently some misapprehension on his part in regard to the method of dealing with requisitions. No such change as he indicates has taken place. All requisitions continue to be audited in the comptroller's department as formerly, and no requisition is issued until finally approved and signed by the city comptroller. The system of pre-audit has sufficiently proved its effectiveness to preclude its being abandoned."

The letter in the Edmonton Bulletin, to which Mayor Henry replied as above, was as follows:—

"In a recent issue you announced, as an item of municipal news, that the audit or examination of requisitions would in future be carried out by Commissioner Harrison instead of the city comptroller. This apparently unimportant change is really one of great importance in view of previous announcements on the subject of municipal audits generally. In the city comptroller's several reports great importance is laid upon the system of audit, one item of which is:—

Before liability is incurred or expenditure authorized to be made against the appropriations sanctioned by the council.

"This, after one year's use, apparently has to be abandoned, thus reverting to the former system. It would be interesting to know why, after so much advertising of the merits of this idea, such a change has been made. It would further be interesting to learn Commissioner Harrison's views on this change in view of his former attitude on the same subject. Another feature of this is the contrast between the noise made when such so-called new systems are introduced and the exceeding quiet when they are dropped."

Approximately \$200,000 has been advanced to British Columbia farmers under the Agricultural Act. There have been 121 applications approved by the agricultural credits commission, the temporary superintendent of which is Hon. William Manson, minister of agriculture. The average loan is about \$1,600. The total applications received from all sections of the province number 976 for an aggregate of over \$2,000,000.

LEGAL NOTICE

FESS OIL BURNERS OF CANADA, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 12th day of September, 1916, incorporating William Symon Morlock and Reginald Holland Parmenter, solicitors; Samuel Davidson Fowler, solicitor's clerk; Anna Latimer, office clerk, and Winnifred Elizabeth Skelcher, stenographer, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—

(a) To carry on the business of manufacturers of engines and machinery of all kinds and of all articles and things used in the manufacture, maintenance and working thereof;

(b) To manufacture, buy, sell, lease, repair, alter and deal in crude oil and other burners, appliances, apparatus, implements, machinery, goods, materials, articles, and supplies of all kinds which shall be capable of being used in connection with the business of the company, or likely to be required by customers thereof, or in any way connected with or incidental to the use of any of the products of the company;

(c) To adopt on behalf of the company and to carry into effect (either with or without modification) a certain agreement between A. L. Ellsworth (therein called the Vendor) and Strachan Johnston, of Toronto (therein called the Trustee), dated the eighth day of September, 1916, whereby the said A. L. Ellsworth agrees to sell to the company the undertaking of The Fess System Company of Canada, Limited, a company heretofore incorporated under The Companies Act, 1910-1913 (British Columbia) by Memorandum of Association dated 26th January, 1914, whereby the said A. L. Ellsworth will make profit in shares of the company as shown by said agreement a copy whereof has been filed in the office of the Honorable the Secretary of State of Canada.

(d) To acquire, purchase, take on lease or license, hire, hold, use, sell, grant leases of, grant licenses of, exchange, alienate, dispose of and otherwise deal in or contract with reference to lands or interests in land, personal property of all kinds or interests therein, rights, privileges, licenses and concessions; to manufacture or trade in property and goods of all kinds; to operate construction or building plants and to take and carry out contracts for building or for construction work of any kind, and to undertake, carry on and execute transactions as financial or commercial brokers or agents;

(e) Notwithstanding the provisions of section 44 of The Companies Act, to subscribe for, purchase, assume liability under, acquire, hold, sell, exchange, dispose of or otherwise deal in or contract with reference to bonds, debentures, stocks or other securities or obligations or any estate or interest therein; and to apply or to accept, in whole or in part, as consideration for, satisfaction of or security for any contract, indebtedness or obligation, to or of the company, property, obligations, shares and securities of any kind at such valuation and upon such terms as may be agreed upon;

(f) To acquire, dispose of or otherwise deal in properties, businesses or undertakings of all kinds;

(g) To furnish aid to any business or undertaking similar in whole or in part to that of the company with which the company may have business relations, by way of loan, bonus, endorsement, agreement, guarantee, management or other service, and to manage, supervise and control the same in whole or in part and to act as agent or attorney for the same;

(h) To carry on any other business which may seem capable of being conveniently or advantageously carried on in connection with the business of the company or calculated directly or indirectly to enhance the value of, to facilitate the realization of or to render more profitable any of the company's businesses, properties or rights;

(i) To invest the moneys of the company not immediately required in such investments as may from time to time be determined;

(j) To co-operate in, aid in, subscribe towards or subsidize any proceeding or undertaking which may seem calculated directly or indirectly to benefit the company;

(k) To acquire or undertake the whole or any part of the business, property and liabilities of any person, partnership, association or company having objects altogether or in part similar to the company or carrying on any business which the company is authorized to carry on or possessed of property which may seem suitable or desirable for the purposes of the company;

(l) To apply for, purchase or otherwise acquire and to protect, prolong and renew patents, patent rights, trade-marks, formulæ, licenses, protections, concessions and the like, conferring or relating to any exclusive or non-exclusive or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, improve, develop or grant licenses in respect of or otherwise turn to account the property, rights or information so acquired;

(m) To enter into partnership or into any arrangement for sharing of profits or expense, union of interests, co-operation, joint adventure, reciprocal concessions or otherwise, with any person, partnership, association or company carrying on or engaged in, or about to carry on or engage in, any business or transaction which the company is authorized to carry on or engage in, or any business or transaction which may seem capable of being conducted so as directly or indirectly to benefit the company, and to lend money to, guarantee the contracts of, or otherwise assist any such person, partnership, association or company, and to take or otherwise acquire shares and securities of any such partnership, association or company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same;

(n) To take or otherwise acquire and hold shares in any partnership or stock or shares in any association or company having objects altogether or in part similar to those of the company or carrying on any business which may seem capable of being conducted so as directly or indirectly to benefit the company;

(o) To apply for, promote and obtain from the Dominion of Canada or any other authority, whether Dominion, Provincial, Imperial, Colonial or foreign, and including subordinate and municipal authorities, any statute, ordinance, order, regulation or other authorization or enactment which may seem desirable to the company or calculated directly or indirectly to benefit the company;

(p) To enter into any arrangements with any governments or authorities, supreme, provincial, civic, municipal, local or otherwise, that may seem conducive to the company's objects or any of them, and to obtain from any such government or authority any statutes, ordinances, licenses, contracts, orders, regulations, decrees, rights, powers, franchises, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with the terms of the same;

(q) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company or of its predecessors in business or of any person, partnership, association or company allied with the company in business or subsidiary to the company or in which the company holds shares or securities, or to benefit the dependents or connections of such persons, and to grant pensions and allowances, and to make payments towards insurance and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object;

(r) To promote, form, organize, manage, develop, take interests or stock or shares in and assist financially or otherwise, any partnership, association or company for the purpose of acquiring or taking over all or any of the property and liabilities of the company, or for any other purpose which may seem calculated directly or indirectly to benefit the company;

(s) To acquire, purchase, take on lease, hire, construct, improve, own, maintain, operate, manage, carry out and control, plant, equipment, machinery, supplies, buildings, works, shops, warehouses, manufactories, pumps, tanks, tank cars, pipe lines, smelters, refineries, roads, ways, canals, bridges, electric works, electric plant, hydraulic works, hydraulic plant, boats, ships, docks, wharves, piers, gas works, cables, waterworks, reservoirs, aqueducts, flumes, ditches, and all such other structures, works, conveniences and appliances as may seem calculated directly or indirectly to advance the company's interests, and to contribute to, subsidize or otherwise assist or take part in the acquisition, purchase, leasing, hiring, construction, improvement, ownership, use, maintenance, operation, management, carrying out or control thereof;

(t) Where such course is required for the purposes of the company or may seem calculated directly or indirectly to advance the company's interests, to acquire, purchase, take on lease, hire, construct, improve, own, use, maintain, operate, manage, carry out and control, but only upon lands owned or controlled by the company, or over which the company may have a right of license to that effect, such roads, ways, bridges, lines of rail, spurs, sidings, tracks, rolling stock, cables, wires, motors, locomotives, electrical plant and all such other structures, works, conveniences and appliances as may be required for the purpose of maintaining communication by telegraph or telephone, or of effecting the transport of goods or passengers, and to contribute to, subsidize or otherwise assist or take part in the acquisition, purchase, leasing, hiring, construction, improvement, ownership, use, maintenance, operation, management, carrying out or control thereof;

(u) To draw make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments;

(v) To sell or dispose of the property or undertaking of the company, or any part thereof, for such consideration as the company may think fit, and in particular, and notwithstanding the provisions of section 44 of The Companies Act, for shares, debentures or securities of any other partnership, association or company;

(w) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations;

(x) To sell, exchange, lease, dispose of, turn to account or otherwise deal with or contract with reference to all or any part of the property and rights of the company;

(y) To consolidate or amalgamate with any other company having objects similar in whole or in part to those of the company;

(z) To procure the company to be registered, licensed or otherwise recognized in any foreign country, and to designate and appoint persons therein as attorneys or representatives of the company with full power to represent the company in all matters according to the law of such foreign country, and to accept service for and on behalf of the company of any process or suit;

(aa) To pay out of the funds of the company all or any of the expenses of or incidental to the formation and organization thereof; to employ, contract with and with the approval of the shareholders provide for the remuneration of brokers, commission agents and underwriters upon any issue of shares, bonds, debentures, debenture stock or other securities of the company;

(bb) To distribute or divide assets of the company in specie amongst the shareholders;

(cc) To do all or any of the above things as principals, agents, contractors or otherwise, and either alone or in conjunction with others;

(dd) To do all such other things as may seem directly or indirectly to be incidental or conducive to or convenient or proper for the accomplishment of the purposes or the attainment of the objects of the company, or any of them, or expedient for the protection or benefit of the company;

(ee) No power granted in any paragraph hereof shall be limited or restricted by reference to or inference from the terms of any other paragraph hereof.

The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Fess Oil Burners of Canada, Limited," with a capital stock of one hundred thousand dollars, divided into 1,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 14th day of September, 1916.

THOMAS MULVEY,

Under-Secretary of State.

LEGAL NOTICES

BARCALO MANUFACTURING COMPANY OF CANADA, LIMITED.

Public Notice is hereby given that under the First Part of Chapter 79 of the Revised Statutes of Canada, 1906, known as "The Company Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 30th day of August, 1906, (1916), incorporating Edward Joel Barcalo, Bryant Burwell Glenn, Jr., Alban Wilkinson Kirtton, Charles Vallone and Frank Anderson, manufacturers, all of the City of Buffalo, in the State of New York, one of the United States of America, for the following purposes, viz.:-

(a) To manufacture, purchase, import or otherwise acquire and to sell, export, exchange and otherwise dispose of and generally deal in all kinds of materials, goods, wares and merchandise;

(b) To do all and everything necessary, suitable and proper for the accomplishment of any of the purposes or the attainment of any of the objects or the furtherance of any of the powers hereinbefore set forth, either alone or associated with other corporations, firms or individuals, and to do any other act or acts, thing or things incidental or pertaining to, or growing out of, or connected with the aforesaid business, or powers, or any part or parts thereof, provided the same be not inconsistent with the law under which this corporation is organized.

The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Barcalo Manufacturing Company of Canada, Limited," with a capital stock of ten thousand dollars, divided into 100 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 31st day of August, 1916.

THOMAS MULVEY,
Under-Secretary of State.

CANADA LIGHT, HEAT AND WELDING COMPANY

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 8th day of September, 1916, incorporating Willis Bertram Sturup, Law Clerk; John Fraser MacGregor, Accountant; Craig Allan St. Clair McKay and James White Bicknell, Students-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:- (a) To manufacture, buy, sell and deal in calcium carbide, chemical products, generators, burners, mantels, lamps, meters, apparatus, appurtenances and appliances connected with a light, heat and welding business; (b) To carry on the business of a light, heat and welding company in all its branches, provided, however, that any sale, distribution or supplying of any light and heat shall be subject to local and municipal regulations in that behalf; (c) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (d) To acquire or undertake the whole or any part of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company; (e) To apply for, purchase or otherwise acquire, any patents, licenses, concessions and the like, conferring any exclusive or non-exclusive, or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property, rights or information so acquired; (f) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in or any business or transaction capable of being conducted so as directly or indirectly to benefit the company, and to lend money to, guarantee the contracts of or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (g) Subject to section 44 of the said Act, to take or otherwise acquire and hold, shares in any other company having objects altogether or in part similar to those of the company, or carrying on any business capable of being conducted so as directly or indirectly to benefit the company; (h) To enter into any arrangements with any authorities, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions; (i) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company (or its predecessors in business) or the dependents or connections, of such persons, and to grant pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object; (j) To promote any company or companies for the purpose of acquiring or taking over all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company; (k) To purchase, take on lease or in exchange, hire or otherwise acquire, any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business and in particular any machinery, plant, stock-in-trade; (l) To lend money to customers and others having dealings with

the company and to guarantee the performance of contracts by any such persons; (m) To sell or dispose of the undertaking of the company or any part thereof for such consideration as the company may think fit, and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of the company, if authorized so to do by the vote of a majority in number of the shareholders present or represented by proxy, at a general meeting duly called for considering the matter and holding not less than two-thirds of the issued capital stock of the company; (n) To adopt such means of making known the products of the company as may seem expedient, and particular by advertising in the press, by circulars, by purchase and exhibition of work of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (o) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (p) To do all or any of the above things and all things authorized by the Letters Patent or Supplementary Letters Patent, as principals, agents, contractors or otherwise, and either alone or in conjunction with others; (q) To do all such other things as are incidental or conducive to the attainment of the above objects and of the objects set out in the letters patent and supplementary letters patent. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere, by the name of "Canada Light, Heat and Welding Company, Limited," with a capital stock of one million dollars, divided into 10,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 11th day of September, 1916.

12-2

THOMAS MULVEY,
Under-Secretary of State.

G. F. COLE COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 23rd day of September, 1916, incorporating James Steller Lovell and Charles Delamere Magee, accountants; William Bain, bookkeeper, and Robert Gowans and John Joseph Dashwood, solicitors' clerks, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:- (a) To manufacture, import, export, buy, sell and deal in all kinds of drawing and engineering instruments, supplies and scientific instruments; (b) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (c) To acquire or undertake the whole or any part of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company; (d) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (e) To take or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of the company or carrying on any business capable of being conducted so as directly or indirectly to benefit the company; (f) To lend money to customers and others having dealings with the company, and to guarantee the performance of contracts by any such persons; (g) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (h) To sell or dispose of the undertaking of the company or any part thereof for such consideration as the company may think fit, and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of the company; (i) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (j) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere, by the name of "G. F. Cole Company, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 26th day of September, 1916.

THOMAS MULVEY,
Under-Secretary of State.
BLAKE, LASH, ANGLIN & CASSELS,
Solicitors for the company.

Mr. C. C. Ballantyne, vice-president and managing director of the Sherwin-Williams Company of Canada, Montreal, is very busy now with the raising of the 245th overseas battalion, C.E.F., Canadian Grenadier Guards.

DIVIDENDS AND NOTICES

TENDERS FOR PULPWOOD AND PINE LIMIT

Tenders will be received by the undersigned up to and including the 1st day of December next for the right to cut pulpwood and pine timber on a certain area situated on the Pic River and other territory adjacent thereto, in the District of Thunder Bay.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet, board measure, on pine, that they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, and \$2.00 per thousand feet, board measure for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario—the paper mill to be erected when directed by the Minister of Lands, Forests and Mines.

Parties making tender will be required to deposit with their tender a marked cheque, payable to the Honorable the Treasurer of the Province of Ontario, for twenty-five thousand dollars (\$25,000), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said \$25,000 will be applied on account of bonus dues as they accrue, but the regulation dues, as mentioned above, will require to be paid in the usual manner as returns of cutting of wood and timber are received.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned,

G. H. FERGUSON,

Minister of Lands, Forests and Mines.

Toronto, August 28th, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

NOVA SCOTIA STEEL AND COAL CO., LIMITED

DIVIDEND NOTICE

A Dividend of two per cent. on the Preferred Shares of the Company, for the quarter ending September 30th, 1916, has been declared, payable October 14th, 1916, to shareholders of record of September 30th, 1916.

By Order of the Directors,

THOMAS GREEN,

Cashier.

New Glasgow, Nova Scotia, September 22, 1916.

THE STEEL COMPANY OF CANADA, LIMITED

PREFERRED DIVIDEND No. 21.

Notice is hereby given that a dividend of 1½ per cent. on the Preferred stock of the Company for the quarter ending September 30th, 1916, has been declared.

The same will be paid on November 1st, 1916, to shareholders of record at close of business, October 14th, 1916.

By order of the Board.

H. H. CHAMP,

Treasurer.

Hamilton, Ontario, September 27th, 1916.

MARCUS LOEW'S THEATRES, LIMITED

Notice is hereby given that a dividend of 1¼ per cent. for the quarter ending 30th September, 1916, being at the rate of seven per cent. per annum on the Preference Shares of Marcus Loew's Theatres, Limited, has this day been declared payable on 16th October, 1916, to shareholders of record on 30th September, 1916.

By order of the Board.

SAMUEL D. FOWLER,

Secretary.

Toronto, 28th September, 1916.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; "Positions Vacant," "Agents or Agencies Wanted," 3c. per word; other condensed advertisements, 5c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over \$5,000.00, and he has built up a future income of over \$3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

FIRE INSURANCE INSPECTOR.—Young married man, six years' experience in the business, would like position as Inspector; have covered the four Western Provinces; best of references and bond if necessary. Apply Box 7, *The Monetary Times* Office, 1208 McArthur Building, Winnipeg.

DEATH.—MORANT.—On the 26th August, 1916, at 17 Palmeira Court, Hove, Sussex, England, George Christopher Morant, formerly Manager of the Fire Department of the Commercial Union Assurance Company, Limited.

MANAGER FOR CITY OF TORONTO WANTED

LIFE INSURANCE MANAGER FOR CITY OF TORONTO AND DISTRICT:

REQUIREMENTS: Progressive man with good record and capable of organizing and producing business.

Apply J. W. W. STEWART, Managing Director.

The Monarch Life Assurance Co.

Head Office - Winnipeg

A clearing house map calendar, with American Bankers' Association numerical system, federal reserve banking system, and territory covered by each district, along with a table of states, showing holidays, the federal reserve district that each state is in, their transit number, rate of interest (legal and contract), and the days of grace allowed, has been issued by the L. L. Poates Publishing Company, 22-24 North William Street, New York

Notes on FOREIGN EXCHANGE and a FINANCIAL GLOSSARY

BY E. L. STEWART PATTERSON

Opinions of Some Authorities

H. M. P. ECKARDT,
Financial Expert:—"One can see that the vast amount of detail work involved in the calculations, tables and examples, has been conscientiously and efficiently performed. All the points likely to come up in actual business experience are lucidly explained. The Financial Glossary provides dependable and full definitions of practically all technical words and phrases, as used in day to day business."

S. A. CUDMORE,
B.A., University of Toronto:—"The book is an exceedingly able treatment of the elements of the subject, clearly and concisely expressed. Always practical, it is nevertheless of a high and scholarly type. Especially interesting at this present time are chapters 17 and 18 dealing with the effects on Foreign Exchange of the crisis of the first week of August, 1914, and the subsequent war."

PROF. STEPHEN LEACOCK, McGill University:—"I do not know of anything that is as good on the subject as your completed book will be. It has the quite unique advantage of combining the pure theory of the subject with detailed technical information. The manuals that are written by economists generally give theory without fact and the treatises of the bankers give fact without theory but you have managed to combine the two in just the right way. I wish your book every success."

THE AUTHOR

Mr. Patterson, has established well his qualifications for undertaking a work of this description. His long experience in active banking—first, in the Eastern Townships Bank, and later in the Canadian Bank of Commerce, each of these being high executive positions—enables him to speak with exactness and authority on all financial matters discussed in this new book.

Every Phase of Foreign Exchange is Dealt With and the Financial Glossary Defines over One Thousand Terms

The arrangement of the book and its style are both excellent. The author does not waste words, everything is compact, the language though simple and easy to understand is very direct and to the point. However, clarity has not been sacrificed for the sake of brevity—the book is so written that even the beginners have no difficulty in grasping the points. The matter is arranged in good order so as to permit of quick reference to all details of Foreign Exchange and practically all the technical words and phrases frequently used in finance and trade are defined clearly and concisely in the Glossary.

These Are Just a Few of The Many Subjects Covered

Gold the Standard
Inland Exchange
New York Exchange
Foreign Exchange
The Mint Par
Gold Points
Rates of Exchange
How the Rates are Made
Exchange Tables

GRAND TRUNK PACIFIC'S YEAR

Crops and Minerals Assisted Freight Returns—No New Construction Work

Substantial increases were shown in both passenger and freight traffic of the Grand Trunk Pacific Railway and prosperous conditions developed as the result of the enormous production in Western Canada. The increased business was most marked by the freight traffic from the large grain crop in the west last year, stated Mr. E. J. Chamberlin, president of the company, at the annual meeting. Preliminary reports of the present year's crop indicated that the grain traffic this year would exceed the volume of the next largest crop in 1913.

"The indications are," said Mr. Chamberlin, "that good traffic in supplies, such as implements, will result from the prosperous conditions of the agricultural communities and the towns depending upon the prosperity of agriculture.

"Agricultural settlement, however, has not shown rapid progress in any part of Western Canada during the last two years. It has not been entirely arrested, as during the year a fair number of settlers from the United States have gone over. Large settlement has taken place in the Edson district and it is believed the company will receive a very considerable and constantly growing traffic from that section.

"Mining is also going on in Northern British Columbia, tributary to the company's line, and substantial traffic is being derived from this source, discoveries of new and valuable deposits being frequently made, many of which are being followed up with the necessary development.

"The operations of the company's lines during the year show substantial increase in both passenger and freight traffic. Prosperous conditions developed as a result of the enormous production in Western Canada which was reflected in passenger receipts early in the present year when business began to show substantial improvement. In connection with the company's steamships on the Pacific coast, service was established between Prince Rupert and Alaska to meet the demand for transportation to that part of the world, coincident with the railway construction and development at present taking place there by the United States government, the steamers being taxed, as a rule, to their carrying capacity.

"Construction work during the year consisted of ballasting, bridging and rip-rapping on existing lines, but no new work of any consequence was undertaken. To comply with orders of the board of railway commissioners, and to give access to industries, certain construction was necessary, and this, with the minimum maintenance, required to keep the railway in good working condition, covers the construction work for the year. On the prairie section from Winnipeg to Wolf Creek, 916 miles, the work was almost entirely confined to maintenance and renewals, with the exception of a few sidings and spurs. On the mountain section from Wolf Creek to Prince Rupert, 833 miles, there were a number of minor bridge renewals, some small bridges and culverts being constructed. Considerable ballasting was done on this section of the line as well as right of way fencing. Steel water tanks and stand pipes were erected at Smithers and Endako, and the water supply in connection with these completed. Owing to amendments to the land titles acts in the western provinces, it was found necessary to make re-surveys by provincial land surveyors of the company's right-of-way in Alberta and Saskatchewan. This has been in continuous progress during the past year, and has been completed in Alberta."

The following officers were elected: President, Mr. E. J. Chamberlin; vice-president and general manager, Mr. M. Donaldson; vice-presidents, Messrs. F. H. Biggar, J. E. Dalrymple, Frank Scott; secretary, Mr. Henry Phillips; treasurer, Mr. Frank Scott; general counsel, Mr. W. H. Biggar; comptroller, Mr. W. H. Ardley. Messrs. J. B. Fraser, of Ottawa, and P. McArá, of Winnipeg, have been designated as representatives of the Dominion government on the board of directors, in addition to Jules Hone, and they were accordingly elected, the directors and officers elected for the ensuing year being as follows: Mr. Alfred W. Smithers, Sir Henry Mather Jackson, Bart., Sir Felix Otto Schuster, Sir Arthur Yorke, C.B., London, Wm. M. Macpherson, J. Hone, Quebec, J. B. Fraser, Ottawa, P. McArá, Winnipeg, E. J. Chamberlin, the Hon. R. Dandurand, E. B. Greenshields, W. H. Biggar, H. G. Kelley, J. E. Dalrymple, F. Scott and W. H. Ardley, Montreal. Mr. J. R. Booth, of Ottawa, retires from the board on account of ill-health.

NEW DOMESTIC WAR LOAN

In view of the great success of the NEW DOMESTIC WAR LOAN it is probable that you have not obtained as much of it as you may desire.

A strong demand is developing for it, and it will be advisable for you to place your order as soon as possible. We shall be glad to fill it at the lowest market price.

Telephone Main 3370, or telegraph at our expense.

R. A. DALY & Co.

BANK OF NOVA SCOTIA BUILDING
TORONTO, ONT.

DEBENTURES FOR SALE

TOWN OF HERBERT, SASKATCHEWAN.

Sealed tenders will be received until noon of the 23rd October, 1916, by the undersigned for the following debentures which are to be repayable in equal annual instalments of principal and interest combined.

\$2,000.00 for draining and grading streets repayable in ten years with interest at 6½% per annum.

\$800.00 for building plank sidewalks repayable in seven years with interest at 6½% per annum.

G. L. WHEATLEY,
Town Clerk.

LEGAL NOTICE

McGART NOVELTY AND TOY COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the first part of chapter 99 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the seal of the Secretary of State of Canada, bearing date the 13th day of September, 1916, incorporating Lester Millman Keachie, student-at-law; Sophia Tutty, bookkeeper, and Susie Ross, Ella Lester Kelly and Myrtle Etoile Thurgarland, stenographers, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture, buy, sell and otherwise deal in all kinds of household furniture, fixtures, appliances and all kinds of toys, games, playthings, novelty and fancy goods, and to sell and manufacture any and all articles, materials and things used in the manufacture, maintenance and working thereof, and also all apparatus and implements and things for use in sports, games or household purposes; (b) To apply for, purchase or otherwise acquire and work the whole or any interest or interests in patents, brevets d'invention, licenses, concessions and the like, and to acquire any real or personal property; (c) To acquire and carry on any business or undertaking calculated directly or indirectly to benefit the company's business or property on such terms as it may deem proper, and to acquire and hold shares in any other company; (d) To sell or dispose of or otherwise deal with the undertaking, property or rights of the company or any part or parts thereof from time to time for such consideration as the company may think fit, and in particular the shares, debentures or securities of any other company, and to promote any company or companies for taking over all or any of the property or liabilities of the company, or for any other purposes calculated to benefit the company; (e) To acquire and undertake the whole of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on or possessed of property suitable for the purposes of the company or calculated to advance the interests of the company; (f) To buy, sell, repair, alter and deal in apparatus, machinery, materials and articles of all kinds which shall be capable of being used for the purposes of any businesses herein mentioned or likely to be required by customers of any such business; (g) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "McGart Novelty and Toy Company, Limited," with a capital stock of forty thousand dollars, divided into 400 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 10th day of September, 1916.

THOMAS MULVEY,
Under-Secretary of State.

A Free Course In "Salesmanship"

We have thought about the young man who sees no prospects ahead. Would you like to be in a business that will give you

A Good Living Wage
A Profitable Future
A Provision For Old Age

We teach a man the Insurance Business, which offers permanent success, does not fluctuate, is a professional occupation, and has been truly named "The best paid hard work in the world."

This is done by a correspondence course and personal assistance, free of charge.

When he is fully prepared for the work, we place him in a position and help him to make good.

The first two lessons of the Company's correspondence course will be sent to anyone interested. It will pay young men who desire to get on in the world to look into this.

All correspondence strictly confidential.

CANADA LIFE ASSURANCE CO.
HEAD OFFICE, TORONTO.

Prosperous and Progressive

Up-to-date business methods, backed by an unbroken record of fair-dealing with its policyholders, have achieved for the Sun Life of Canada a phenomenal growth.

To-day, the Company operates actively in forty-two countries and upon five continents.

In the past six years its assurances in force have nearly doubled; in the past eleven years they have more than trebled.

More than 166,000 of its policies are now in force for assurances totalling over \$265,000,000—much the largest amount carried by any Canadian life company.

Total trade.....	93,799,982	99,000,038	238,860,488	1,061,365,504	1,142,911,769	1,819,706,490

*Note.—It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending July, 1916, were: imports 1916 \$33,717,992; 1915 \$133,113,099, and exports 1916 \$81,392,217; 1915 \$90,555,512. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

Investigation of Fire Insurance Matters

ONTARIO *Commission of Inquiry Resumes Its Sitzings—Commissioner is Impressed With Michigan Methods—Instructive Statement Filed by the Canadian Fire Underwriters' Association.*

THE Ontario investigation into fire insurance rates was resumed on Tuesday, and on Wednesday was adjourned until Tuesday, October 24th. A report of the fire chiefs' association, criticizing alleged lax insurance methods, was filed. Fire marshal E. P. Heaton, whose examination occupied much of this sitting, strongly maintained the statement in his report to the government that it had been generally admitted that the purpose of the Canadian Fire Underwriters' Association was more the control of rates than the prevention of fire, and that some insurance men had been known to say that they did not care what fires there were so long as they controlled rates.

Mr. Leighton McCarthy, counsel for the underwriters, thought such a statement was "outrageous" coming from the provincial fire marshal. Mr. Heaton pointed out that he was not making the statement himself, but simply recording the view of some insurance men. Later he said that he had not found one insurance man who, in personal conversation, was not interested in the prevention of fires. Mr. McCarthy replied with a report of an address made years ago by Mr. Heaton, lauding the Underwriters' Association as a force for fire prevention.

Commissioner C. A. Masten, in charge of the investigation, seemed to be impressed with methods in Michigan. "I understand each insurance company in Michigan is bound to belong to a rating bureau," he said. "The Michigan Act strikes me as a most satisfactory one." Mr. Heaton promised to submit to the commission a copy of correspondence with the insurance commissioner of Michigan, and of the Michigan Insurance Act.

Commissioner Masten advised Mr. McCarthy that accusations against the Canadian Fire Underwriters' Association contained in letters turned over by Mr. Heaton to the commission yesterday were too important to be overlooked. He thought it would be necessary to call some of the writers of these letters to give evidence before the commission.

The fire marshal was examined in regard to the information given in his report on the Fire Underwriters' Association, presented at the opening session of the commission, and several differences of opinion developed between Mr. Heaton and Mr. McCarthy. The counsel took up point by point, Mr. Heaton's statements as to the control exercised by the association and the regulations governing its members. The fire marshal admitted that uniformity of rates and forms operated against discrimination, but he pointed out that the fact remained that the Underwriters' Association did fix rates and enforced them. Mr. McCarthy objected to the statement in the report that the Underwriters' Association practically controlled insurance business in Ontario, claiming that the fact that its members did 80 per cent. of the business did not mean that it held control. Mr. Heaton submitted that it did.

Mr. Heaton explained the method of assessing the one per cent. tax upon the assured in unlicensed companies. The payment of the tax had never been waived in a single case. The tax as collected was turned over to the provincial treasury. He had assumed personal responsibility as to pay-

ment of this tax by fire sufferers in Northern Ontario, and told them that the department would be satisfied if the tax was paid as the assured received payments of their claims from the unlicensed insurance companies. A report would be submitted to the legislature containing all information gathered regarding fire losses in the north.

Mr. McCarthy informed Mr. Heaton that one of the rules governing Toronto agents preventing them from doing business with non-tariff companies had lapsed two years ago. Mr. Heaton said that when he made his report such a rule was still in existence, although a dead letter. In fact, he had found a general state of chaos in regard to some rules.

Mr. McCarthy made the following statement to the commission:—"We invite the fullest investigation of these complaints. We regard the report of the fire marshal, particularly the second part of it, as throwing a lot of light on the situation. It is this fire waste and fire loss which keeps up the rates. If municipalities would only take proper steps to eradicate this fire waste they would succeed in keeping the rates down as they do in continental Europe."

Mr. Robertson, secretary of the Canadian Fire Underwriters' Association, read an instructive statement showing the constitution and methods of the association. This is printed in detail below. After Mr. Robertson had completed the reading of his statement, Mr. Justice Masten asked:—

"What is the difference between a combination of insurance companies and a combination of grocers? Are they not both harmful to the public?" The commissioner also sought to learn the attitude of the association with respect to competition.

Mr. Robertson expressed the view that some kind of competition was not undesirable, and the association did not object to it.

"If any legislation is introduced along lines of the insurance legislation of Michigan, Iowa or New Jersey, it would have considerable effect upon non-tariff companies, would it not? It would prevent making special bargains with companies coming in?" enquired the commissioner.

"I doubt that," replied Mr. Robertson. "Some companies have their rates fixed and they are not subject to change."

The following is the statement of the Canadian Fire Underwriters' Association:—

The Canadian Fire Underwriters' Association is a voluntary and unincorporated body, instituted in 1882, and composed of companies and underwriters' agencies transacting fire insurance business. The territory in which it operates comprises the provinces of Ontario and Quebec, there being two principal offices, one in Toronto, covering Ontario business, and the other in Montreal, covering Quebec. These offices work on exactly similar lines as regards ratings, but the commissions paid to agents in the respective provinces differ somewhat, and in this memorandum, where commissions are referred to, it will be understood the remarks apply to the Province of Ontario.

The objects of the association, as defined in the constitution, are as follow:—

"The objects of the association are the fixing of equitable rates of fire insurance, the establishment and maintenance of departments for the inspection of mercantile, manufacturing and other risks, of municipal waterworks and fire appliances, of electrical and other fire hazards, looking to the reduction of the fire waste of the country and generally to the promotion of the interests of its members."

The membership at present numbers seventy-eight—of these seventy-two are stock companies, one is a cash mutual company, and five are underwriters' agencies. Any company licensed to do business, either by the Province or the Dominion, is eligible for membership.

Association Has Two General Objects.

(1) The regulation and equalization of rates according to the different classes of risks insured. These results are arrived at by the use of various rating schedules adopted by the association as a whole, and the rates brought out by these schedules are binding on all members.

(2) The reduction of the expense of conducting the business. This is secured (a), by the association instead of individual members carrying out the necessary inspections and other details required for properly rating the various kinds of risks and (b), by limiting the amount of commission payable to agents, on the different classes of property insured.

Members, in joining the association and accepting the constitution, agree to be bound by the rates and rules promulgated by the association, and further agree that where it is found they have accepted insurances under rates and conditions not in compliance with the association's rates and rules, they will cancel such insurances and allow a period of three months to elapse before again taking any amounts on the properties in question. This is the only penalty the association imposes.

As to Rates.

In the early days of insurance it became evident to companies, when the business began to assume large proportions, and when it was discovered that considerable variations in rates were required so that different hazards might pay their fair proportion of premiums collected, that only by combining the knowledge and experience of as large a number of companies as possible could a fair distribution of charges be made. These charges require to be sufficient in the aggregate in average years to pay the losses incurred, plus expenses, and a fair profit on the capital invested, and to provide for the accumulation of resources against extraordinary conflagration losses, which, experience has shown, are from time to time inevitable.

This combined experience is especially necessary in order that the premiums collected might be so apportioned among the various classes of risks as to make each pay as nearly as possible its fair share, and the combination of companies was needed so as to secure such common action as would provide that there was no unfair discrimination between risks of essentially similar hazard. The latter feature has led to the institution of schedule rating, which provides for such credits and charges as in the best judgment of underwriting experts are called for on the ground of particular merits and defects in individual risks. By this method of rating each property owner may see exactly how his rate is made up, to what extent he is himself responsible for it, and why it may be different from another in the same line of business.

Operation of Schedule Rating.

In the operation of schedule rating the fire protection service in every town in Ontario is inspected and reported on by a qualified civil engineer, and nearly every mercantile and manufacturing risk in the province has been seen by an inspector of the association, the only exceptions being such risks as these inspectors have not yet had an opportunity to visit. In these latter cases the insured gives full particulars on detail forms which are provided, and the rate is made on these particulars. The result of the adoption of this detailed method of rating, which shows plainly to the owner of the property what charges are made against his risk, has been the most effective means of bringing about better methods of construction and management. These various inspections can only be uniformly and equitably carried out by the combination of the companies acting together, and, in fact, unless they so acted no results in the direction of betterment

would be obtained. The association provides every municipality with a copy of the engineer's complete report on its waterworks or other fire preventive appliances, on its brigade, equipment, fire alarm and all other details of this service, with the full recommendations of their expert for such improvements as are needed. It is evident that such work can only be carried out by a large body acting in unison, and it is submitted that this work is in the interest of the community as a whole. The disclosure of notable deficiencies in waterworks or other fire appliances leads to pressure being brought on the municipalities for improvements, and in some cases to general increases in rates in the city or town affected. Such increases are made only where deficiencies are of so grave a character as to call for special action, but, generally speaking, the view of the members of the association is in opposition to violent changes, and the usual manner of dealing with such matters is by an insistent endeavor to have the condition improved. Higher rates are really a last resort. It is again quite plain that action in such cases would be totally ineffective if attempted by individual companies. If those cities and towns with inferior fire preventive appliances, or that allow these appliances to run down, either in themselves or relatively to the growth of the population, are not brought up to a proper standard or penalized, an injustice would be done to all the other places where good conditions are maintained, and as before stated, it is the effort of the association so to distribute insurance charges that each place and each risk shall approximately bear its proper share of the aggregate premium paid.

Rates Are Lowered.

In this effort changes both up and down are constantly being made to meet altered conditions and a somewhat notable instance of the latter class was the general reduction made about five years ago on practically all of the waterworks towns in the province. This did not follow any solicitation or pressure, but was simply due to the fact that in the judgment of the majority of the members of the association these towns were contributing an undue share of the premiums collected.

The association is also constantly called upon to pass upon and advise as to the best and safest methods of building construction and protection against fire, and the services of expert inspectors are always freely rendered to aid architects and property owners in this desirable direction.

Schedule Rating Advisable.

It may be proper at this point, with reference to all the foregoing remarks re rates, to quote from the report of a legislative committee of the State of New York, which made a most exhaustive enquiry into the general insurance situation as follows:—

"The economic, even the sociological, effect of the application of schedule rating can scarcely be overstated. It is doubtless true that schedule rating is at present by far the most powerful agent in the inauguration of good building construction and in checking the appalling fire waste of the country."

and again:—

"Not only does the application of schedule rating operate to improve already existing risks, but it leads in a similar way to greatly improved construction in new buildings. Most new buildings of any importance that are being built nowadays are planned with full consideration of the reductions in rate which various features of construction will command. It is not too much to say that to schedule rating is due, as much as to any other one cause, the credit for improvements in modern construction."

and again:—

"The operation of schedule rating in bettering fire prevention is one of those powerful unconscious agencies like the betterment of the race through natural selection."

Findings Have Been Confirmed.

It may be added that the various features referred to above as to the necessity for combination for making and maintaining rates, and the merits of rating by schedules have been completely confirmed by the findings of all the states that have recently taken up questions regarding insurance companies and underwriting organizations, and the New York report may again be quoted as follows:—

"It is recognized that a rate equitably should depend upon the hazard; that the hazard, however, is known in general only by experience; that for this no one company has a broad enough experience of its own, and that, therefore, the making of equitable rates demands co-operation; furthermore, since the same rates are needed by all the companies, economy would suggest that the work should not be duplicated."

"It has been demonstrated by the experience of all times and all places that open competition in fire insurance is an unstable condition which leads to the general weakening of the companies, and eventually to the elimination of small companies, further, that under open competition there is always discrimination in favor of the policyholder with influence."

"Very Unfairly Expressed."

The various criticisms in the first part of Mr. Heaton's report of the rules of the association governing the maintenance of rates and allied matters (and which it must be said are in that part of the report very unfairly expressed), are so completely answered by the latter part of his report where he definitely approves of the practices he originally condemns, as not to require at this time any lengthy reply. It must, however, be said that his details are in many instances incorrect, and his unfavorable deductions from such facts as he brings forward unwarranted. Where, for instance, he charges arbitrary action against large insurers, it is found on analysis he is simply voicing the complaints of these large insurers and of the agents who hope to control their business, because special terms are not granted to them that are not given to the general public, and where he says the association was arbitrary and discriminating in its dealings with Ottawa, it can be shown that the action taken resulted distinctly to the advantage of every business man and every resident of the city in securing for them a better supply of better water than they have ever had, and in greatly minimizing the danger of those conflagrations to which Ottawa has been so subject.

Independence of the Association.

In both these cases the independence of the association, both of political or local influence, is a point to be strongly emphasized, and it is at least doubtful whether any government department, or any government official would have been strong enough to resist the pressure that would unquestionably have been brought to bear.

The report of the New York legislative committee may again be referred to, and in its summary appears the following:—

"The committee believes that state interference with rates has not been beneficial and has been brought about upon the wholly theoretical grounds that combinations in fire insurance were a menace to the people which an actual investigation of the facts fails to disclose. This committee believes that a purely academic view of what combinations in fire insurance might do should not be allowed to usurp the place of what actual facts under a reasonable interpretation seem to show."

Unfavorable Legislation.

It is true, as Mr. Heaton reminds us so constantly in his report, that in the States during the past ten years a good deal of legislation unfavorable to insurance interests has been passed, but they are now discovering that this legislation was in the main not only unnecessary but actually harmful to the community as a whole. As proving this and showing the saner trend of thought that is now making itself felt, the following extract from an address made last month by one of the leading insurance commissioners is interesting:—

"In Europe schedules and rate-making are not even discussed outside the insurance fraternity. This for the reason that rates are so low that they are negligible and the reason their rates are low is because their losses are small. The reason their losses are so small is because they have legislated against fires instead of legislating against fire companies. We have been so busy regulating the insurance business we have not had time to regulate the fire waste. They have directed their attention to the suppression of fires; we have spent our time discussing mere manifestations of a vital, economic problem, and instead of dealing with fundamentals we experiment

with legislation that operates not at all upon the cause but only upon the manner of distributing an appalling waste. Their laws fix the doctrine of personal responsibility, and we pass valued policy laws which encourage arson and reward the dishonest at the expense of the honest. They have building laws strictly enforced. Few of our states have such laws, and where they have been adopted in our cities they are frequently disregarded or suspended in the interest of individuals. Our fire waste is largely a matter of mental attitude."

Changes Were Needed.

It cannot be denied that some changes were needed in several of the states in connection with their rating methods. Enquiries made on the spot show that, owing to an old-established plan of making rates by means of semi-independent local boards, controlling perhaps a county or some similar district, serious differences were found to exist in the rates for risks that were of essentially similar hazard, but no system of this kind has ever been in force in this province.

The members of the Canadian Fire Underwriters' Association transact over 80 per cent. of the insurance of the province, and their assets for the protection of policyholders represent an even greater proportion of the total assets of all the companies licensed to do business here. It is quite correct, as Mr. Heaton has pointed out, that the business of the members of the association has been steadily increased, while the business of those companies outside the association has, by their failure and absorption, steadily decreased. This, in itself, is an illuminating fact as showing the fallacy of the methods adopted by the latter class of companies, but there is another important feature in connection with this reduction in competition, and it is this, that notwithstanding this reduction, a gradual decrease in the cost of insurance has been effected, the Dominion Blue Book showing that while in 1905 the average cost per \$100 was 1.60, in 1915 this had come down to 1.16.

Absolutely Unfair Competition.

The business of fire insurance is carried on by the licensed companies in the face of absolutely unfair competition. Competition in itself cannot be objected to, and is in fact desirable, but this association, speaking as it is entitled to do for fire insurance interests generally, protests against the inefficiency of any existing legislation in protecting those companies which are licensed and have their offices in this country against companies which have no license; have no deposits or other funds in Canada; pay no taxes; have no offices or office staffs, and consequently disburse the considerable sums that go to form the expenses of the business, entirely for the benefit of residents of foreign countries. Such companies, even if sound (and they frequently are not), can obviously afford to cut the rates which the companies here have had all the expenses, by inspection and otherwise, of making. The permission given, therefore, for any insurer who can get a lower rate from an unlicensed company to place his business with such a company without paying any taxes, or if he employs a broker, on the payment of a tax of 1 per cent., is quite unfair. The change recently made which requires 1 per cent. of any loss in an unlicensed company to be paid to the fire marshal, besides being unjust in principle in taxing only the man who has a loss and is less able to afford it, is quite ineffective. What the association contends is required, is that prompt publicity should be given to all transactions effected with unlicensed companies, either by the assured or his agent, and that a substantial tax should be collected on all premiums paid to these companies.

What the Association Claims.

To conclude, the association claims:—

(1) That its existence is necessary for the preservation of the well-being and solvency of the companies, in itself a vital matter for every member of the community.

(2) That by combining to make all inspections both of waterworks and fire preventive appliances, as well as of individual risks, not only is the work better done, but an enormous saving in expense is secured as compared with what would be needed if each company had to do this for itself, and thus a direct saving in the cost of insurance is effected.

(3) That prompt recognition is given by reductions in rates to municipalities and individuals when improvements bettering the conditions are carried out.

(4) That in assisting and advising architects and property owners as to the best methods of construction and prop-

tection, it is performing a valuable public service that no other machinery could do as well.

(5) That its rules and regulations are made with the purpose of maintaining equality of consideration for risks of similar hazards and thus preventing any unfair discrimination.

Placed with Tariff Companies.

(6) That without any stipulation as to insurance being placed with tariff companies, expert free service and advice are given to every one desiring it, to aid in better construction and better protection, and thus to obtain the lowest possible insurance rates.

(7) That by its methods of operation, and particularly by schedule rating, the association has been and still is the only effective force in the direction of bringing about a betterment of conditions leading to a reduction in our tremendous fire loss.

(8) That in the application of its rules and rates it is quite independent of local or political influence, and it is absolutely impartial.

Open to Fulllest Examination.

If these claims are substantiated, and nothing so far has been brought forward to the contrary, the association holds that no legislation inimical to it has been justified, and in this connection it cannot do better than again repeat the words used in the New York committee's report:—

"The committee believes that state interference with rates has not been beneficial, and has been brought about upon the wholly theoretical grounds that combinations in fire insurance were a menace to the people which an actual investigation of the facts fails to disclose. This committee believes that a purely academic view of what combinations in fire insurance might do should not be allowed to usurp the place of what actual facts under a reasonable interpretation seem to show."

The association would further say that its office and everything in connection with it are open to the fullest examination, and it trusts the Honorable Commissioner may find an opportunity to make such an examination before any finding is made following this investigation. It ventures to hope also that this definite statement of its activities and aims may give the public a better appreciation of what the association really means, and help to clear away misunderstandings than can only have arisen through want of true knowledge of the facts.

CANADIAN GOVERNMENT IN SHIPPING BUSINESS?

British shipping circles are interested in rumors in Belfast, Liverpool and Glasgow that the Canadian government has either purchased or optioned a large liner now in the transport service between Halifax and England. To those watching various amalgamations and shipping agreements looking to after-the-war traffic, both on Atlantic and Pacific, the report is regarded as partly confirming the report from Ottawa that the Canadian government has decided on plans for a transatlantic fleet as an additional step toward the all-red line project.

The Liverpool Journal of Commerce says: "It evidently is going to become a habit for overseas governments to become shipowners. In the meantime it will be interesting to await publication in due course of Australia's balance sheet in respect to its second entry in the great adventure of shipowning.

The late Mr. James J. Hill, railroad builder, left property subject to probate in Minnesota courts, valued at more than \$52,000,000 by his son, Mr. Louis W. Hill, in an inventory furnished appraisers of the estate. The inventory does not include several parcels of real estate in the north-west or Mr. Hill's properties in other states. Stocks and bonds are also entered at par, and the market value will be largely in excess of figures given. Men who were familiar with Mr. Hill's holdings roughly estimate that the total market value of his securities and other properties listed in the inventory at par would make his estate total around \$100,000,000. The inventory reveals that Mr. Hill was an investor in Anglo-French bonds to the value of \$1,500,000.

INVESTIGATING EMPIRE'S STRENGTH

Dominions Royal Commission, Now in Canada, is Inquiring into Natural Resources, Trade and Legislation

The Dominions Royal Commission, now touring Canada, is one of the most important investigating commissions visiting this country. The commission was appointed in April, 1912, and has since visited Australia, South Africa and Newfoundland. Just prior to the outbreak of war, it had commenced its sittings in Canada, in the maritime provinces, but when war was declared, the sessions were adjourned. The members recommenced their investigation in this country last month, taking evidence first on the Pacific coast and working eastward through the prairie provinces. They will arrive in Toronto to-morrow.

Terms of Commission.

The terms of the royal appointment of the commission states that it will enquire into and report upon the natural resources of our Dominion of Canada, our Commonwealth of Australia, our Dominion of New Zealand, our Union of South Africa, and our colony of Newfoundland; and, further, to report upon the development of such resources whether attained or attainable upon the facilities which exist or may be created for the production, manufacture and distribution of all articles of commerce in those parts of our empire: upon the requirements of each such part and of our United Kingdom in the matter of food and raw materials and the available sources of such: upon the trade of each such part of our empire with the other parts, with our United Kingdom, and with the rest of the world: upon the extent, if any, to which the mutual trade of the several parts of our empire has been or is being affected beneficially or otherwise by the laws now in force, other than fiscal laws: and, generally, to suggest any methods, consistent always with the existing fiscal policy of each part of our empire, by which the trade of each part with the others and with our United Kingdom may be improved and extended.

Personnel of Commission.

The commissioners are as follows: Lord D'Abernon (formerly Sir Edgar Vincent), chairman; James Lyle, Baron Inchcape, Sir Charles John Owens, Sir Henry Rider Haggard, Tom Garnett, William Lorimer, Sir George Foster (Canada), Donald Campbell, Sir Joseph George Ward, Sir David Pieter de Villiers Graaff and Sir E. R. Bowring (Newfoundland). Certain changes have been made in the personnel of the commission since 1912 and the party in Toronto this week is as follows: Sir Geo. E. Foster, K.C.M.G., P.C., Sir Alfred Bateman, K.C.M.G., Mr. T. Lorimer, Mr. T. Garnett, Mr. J. Tatlow, Hon. J. R. Sinclair (New Zealand), Sir Jan Langerman, Hon. Sir E. R. Bowring (Newfoundland), Mr. E. J. Harding and Mr. Bridgeman. Several of the commissioners are accompanied by their wives. Neither Lord D'Abernon nor Sir Rider Haggard are in the party, which are making their own hotel arrangements in advance, as they are travelling in Canada with their private car and diner. The party will be entertained by the National Club in Toronto.

The commission has already made three interim reports. The first deals with minutes of evidence taken in London in October and November, 1912; the second is a report of the Australasian investigation; and the third of the South African inquiry. The reports are of considerable interest at this time.

IMPORTS FROM STATES \$373,000,000

Canada's imports from the United States for the first eight months of the calendar year, according to United States official statistics, totalled \$373,736,569, an increase of \$163,000,000 over the corresponding period of last year, and \$29,000,000 more than for the full 12 months of 1914.

The largest gain shown by the figures was in exports to the United Kingdom, which took nearly one-third of all goods exported from the United States in that period. They amounted to \$1,207,751,939, showing an increase of \$554,000,000 over the same eight months last year, and \$713,000,000 more than the entire fiscal year of 1914. France, the second best customer of the United States, took goods valued at \$544,475,000, an increase of \$211,000,000 over the previous eight months and \$384,000,000 more than in 1914.

Canada stands as the third best customer of the United States, following Great Britain and France.

When changing your mailing instructions, be sure to state fully both your old and your new address.

All mailed papers are sent direct to Friday evening trains. Any subscriber who receives his paper late will confer a favor by complaining to the circulation department.

PROSPERITY AND SACRIFICE

At the end of September, which marks half of the current fiscal year, Canadian trade totalled \$791,000,000, compared with \$399,000,000 for the same period a year ago. Bank deposits at the end of August aggregated \$1,250,000,000, an increase of more than \$250,000,000 during the year. The national revenue at the close of the fiscal year, to end in March next, will probably exceed \$200,000,000. The government by then may have \$50,000,000 to pay against the principal outlay on war account, after having settled its interest charges.

These figures reflect the prosperity of war. Business on this side of the Atlantic has flourished on the supply of the belligerents' needs overseas. Therein two important considerations arise. First, because of our geographical position, we have not suffered the hardships or made the sacrifices which Great Britain is doing. Second, the material improvement in our national position as a result of the war, may easily be shattered after the war unless thrift, foresight and foreaction are practised.

While the finance department was handing the press a statement as to the greatly improved national position, Sir Hamar Greenwood, member of the British House of Commons (and an Ontario boy), was telling Toronto's Canadian Club some striking facts. We do not realize in Canada the mighty and major part which Great Britain is playing in the war. There are more motor cars being used in Toronto to-day than in all Great Britain, whose citizens have sent their cars in tens of thousands to the front for war service. We go on in Canada as if war were not our first consideration. Great Britain has instituted a tax of 60 per cent. on war profits; it is being paid cheerfully—a double fact unexampled in the history of taxation. These were a few of the statements of Sir Hamar Greenwood. They should point to greater sacrifices, to larger assistance in the conduct of the war, to more economy and forethought so that a substitute for war orders may be obtained when peace comes.

NATIONAL BUSINESS CONFERENCE

Some months ago, the government announced that it would hold a national business conference. An indefinite postponement of the affair has been made until about December. Unofficially it is said that from Canadian business men the response to the government's invitation to take stock of the national situation has been poor. Sir George Foster's clarion call to action seems to have fallen on deaf ears. This is in a country, too, which has prided itself upon the possession of initiative, energy and foresight. Need there is for a definite plan of financial and commercial action with a view to mapping the course for the period to follow the war. War supplies are the backbone of our current exports. With peace will come new conditions. The evils of trade depression and economic readjustment may be mitigated by means of foresight.

The federal government months ago set in motion a somewhat vague plan for a business conference, leaving the country to push it along. The country has failed to do the pushing. Should not the government, through its department of trade, use enough compulsion to make the proposed national business conference a fact and a success? In other words, the government must do the entire work of organizing. It will cost labor and money. Business men should have helped to supply the labor as they have supplied the money. If they will not, the government need not necessarily emulate their poor example.

FOR THE SMALL INVESTOR

The government soon will offer the public bonds of denominations of \$10 and upwards. These will be purchasable through the banks and will yield the investor approximately 5 per cent. and will be redeemable in five years. They are designed to attract the surplus funds of several hundred thousand people who have comparatively small amounts to invest, who will also be given an opportunity to buy Dominion treasury debenture stock. These investments are safe; they will always have a market, and investors will have the satisfaction of knowing that their savings are helping to win the war.

The issue of the bonds which is now being planned by the finance department, is to be highly commended. In Great Britain, even the school children are placing their savings into war securities. A strong effort to induce Canadians to economize is needed. The American continent is extravagant. The hardships of periodical depressions have not yet taught the lesson of thrift in times of prosperity. A nation which conserves its small savings grows strong quickly.

While the government's plan to issue baby bonds is excellent, its application is a matter of considerable importance. If Canadians are not taught more about these securities than they have been about government annuities, for example, the sales of the bonds will be disappointing. Great Britain has advertised its war securities by means of posters, leaflets, through the banks, through the press, through the investment houses, in every available way. The advertising has been as attractive as the securities and the small investor in Britain has handed the government many millions of surplus savings. Baby bonds will not be bought here in quantities unless the masses know of them as they do the most popular breakfast foods.

REGULATING FIRE INSURANCE RATES

During the course of the Ontario fire insurance enquiry, Commissioner Masten expressed a favorable opinion of the rating bureau and law provided for the regulation of companies in the Michigan insurance act. He stated as his opinion that this seemed to be entirely satisfactory. How such a law would work in Ontario is problematical. The Canadian Fire Underwriters' Association should prove agreeable to justifying their rates in any complaint of discrimination between risk and risk of the same class, following the suggestion of *The Monetary Times* last week.

The association should, we believe, be agreeable to demonstrate the equity of its rates. There is a danger, however, in connection with the application in Ontario of an act similar to that of Michigan, of the creation of a political commission with powers to adjudicate generally on rates. This would open a way by which any group of insurers representing one particular industry, sufficiently strong politically and otherwise, might combine in a complaint stating that their insurance rates were too high. Judging by past events in Canadian politics in relation to business matters, such a group might have the rates on an entire class decreased at the expense of other classes of insurers with less political influence.

DAY BY DAY

The war may be over at the end of 1917 or in the summer of 1918. It may finish this year, or, if Germany wishes to be completely knocked out, it may last five or seven years. In that event, how many men would Canada have to send to the front, what would be the labor situation, what would be the trend of business? When the war ends, will we have a steady volume of immigration? Can we finance a very large war debt? How long will war orders continue here? How much of the business of rebuilding Europe will Canada get? A thousand such questions are asked daily, the chief topic being the probable duration of the war. The field of operations is vast, the nations involved are many. In the situation are numerous unforeseen factors, favorable and unfavorable. Four things are there, then, to do—turn every effort to the successful conclusion of the war; meet each day's problems as they arise; make tentative plans for the period of peace; trust in Providence and keep the powder dry.

MARKETS FOR LIVE STOCK

The fourth national conference on marketing and farm credits will be held in Chicago, December 4-9, at the Hotel Sherman. This conference has been doing educational work along the line of better business methods for the sale of farm products and the improvement of farm finance.

The feature of the marketing section will be the hearing on the livestock industry. Representatives of ranchmen, farm feeders, co-operative shipping associations, farm buyers, commission men and publishers of livestock papers will be invited to confer as to methods of obtaining better markets for livestock.

This section will also deal with the milk question; the co-operative marketing of grain—local, terminal and export; improvement of marketing of farm produce—the auction system, methods of supervision, improvement of containers and grades, and disposal of surplus products.

WESTERN REFUNDING SCHEME

According to a Winnipeg dispatch, Hon. Edward Brown, provincial treasurer of Manitoba, is reported to have stated that Mr. J. P. Morgan and his partner, Mr. H. P. Davison, will interview the Imperial treasury in London with the object of having provinces other than Manitoba and Saskatchewan included in the mobilization scheme. Those two Western provinces and the city of Winnipeg have been endeavoring to refinance in New York about \$36,000,000 of their \$58,000,000 debt in London. About \$6,500,000 have been refunded to date. The British treasury consented to the mobilization of the securities and offered 80 and interest for them.

As was intimated in these columns in July, advices from London seem to indicate that it is unlikely that the large holders in the United Kingdom of our Western securities will sell at 80 and interest, because such a sale necessitates the burden of a heavy capital loss, and it is difficult, if not impossible, to reinvest the proceeds to any better advantage. While there are available government securities yielding 6 per cent., these are short-term issues and cannot take the place of the long-term bonds which are sought for the refunding scheme.

Hon. Edward Brown is credited with the statement that \$100,000,000 of our provincial and other securities may be refinanced in this manner. Such a scheme will meet with obstacles. The British treasury has not deemed it desirable to impose the penalty upon holders of the securities who have not complied with the invitation to surrender them. Mr. Brown is reported to have said that the Morgan representatives will ask that the tax penalty clause be enacted in regard to these Canadian securities, as is now enforced against United States issues. He is said also to have expressed the belief that there is a strong probability that the tax will be applied because the securities of Manitoba, Saskatchewan and the city of Winnipeg, included in the mobilization scheme, are not coming in as rapidly as desired. Application of the tax will now be necessary especially if other willing provinces are included in the scheme, says Manitoba's treasurer.

Unless there is a factor in the scheme, of which we are unaware, the suggested imposition of the penalty in this case seems unfair.

The subscription lists of the fifth German war loan closed on October 5th, but there is significant delay in announcing the padded result.

The farm credits section will hold conferences on the workings of the federal farm loan act; on ways of aiding land settlement by turning tenants into home owners, and by providing for the landless man; on the immigrant question in relation to agriculture; and on the great problem of improvement of banking accommodations for the tenant farmer who must borrow money to carry on his farm operations.

Mr. Charles W. Holman, 230 South La Salle Street, Chicago, is secretary of the conference, and Mr. Frank L. McVey, president the University of North Dakota, Grand Forks, is the chairman.

Mr. C. C. Ferguson, A.I.A., F.A.S., has received the appointment as general manager and actuary of the Great-West Life Assurance Company. During the past year, Mr. Ferguson, as actuary-in-charge, was acting manager as well as actuary and, as was anticipated by those who know him, qualified for the position to which he has now been appointed.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Lethbridge, Alta.—An issue of \$100,000 6 per cent. 3-year bonds has been sold.

New Glasow, N.S.—Tenders close on October 24th for \$100,000 5 per cent. 42-year bonds. J. Roy, clerk.

Shallow Lake, Ont.—On October 30th the taxpayers are to vote on a by-law to loan R. Ceaser Woodworking Company \$4,000.

Maisonneuve, Que.—For the issue of \$200,000 5½ per cent. 20-year bonds the tender of 93.26 by J. A. Richard was accepted.

Humberstone Twp., Ont.—The by-law to fix the International Nickel Company's plant at \$50,000 for ten years was passed.

Herbert, Sask.—Tenders are required for \$2,000 6½ per cent. 10-year bonds and \$800 6½ per cent. 7-year bonds. G. L. Wheatley, town clerk. (Official announcement appears on another page.)

Ontario.—Twenty-five municipalities will vote on New Year's Day on the proposed hydro radial from Port Credit to Bridgeburg. The estimated cost is \$4,000,000.

Nanaimo, B.C.—Bonds, \$7,772, issued for local improvements street regrading, 20 years, 5½ per cent., payable half-yearly, and bonds, \$5,000, bridge, 10 years, 6 per cent., payable half-yearly, have been certified by provincial municipal department.

Humberstone, Ont.—For an issue of \$1,800 5 per cent. 5-instalment school bonds the bids received by Mr. J. J. Wichmann, clerk, were:—

Robert McClelland, Welland Junction, Ont., to realize.. 6¼ %
W. H. Rock, Port Colborne, Ont., to realize..... 6 %
Edmond Barrick, Port Colborne, Ont., to realize..... 6 %
Geo. A. Stimson & Company, Toronto, Ont..... \$1,728.54
Jacob Biederman, Port Colborne, Ont. 1,800.00

The Pas, Man.—For the issue of \$12,000 5 per cent. 20-year telephone bonds the bids received by Mr. H. W. Elliott, clerk, were:—A. E. Ames & Company, Toronto, \$11,126; R. C. Matthews & Company, Toronto, \$10,925; W. A. McKenzie & Company, \$10,680; G. A. Stimson & Company, Toronto, \$10,820; Bond and Debenture Corporation of Canada, Manitoba, \$11,040; Kerr, Fleming & Company, Toronto, \$10,600; Macneill & Young, Toronto, \$10,680; C. H. Burgess & Company, Toronto, \$10,560.

Monk Twp., Ont.—For the issue of \$4,600 5½ per cent. 10-year telephone bonds, Mr. H. F. Bickmore received five bids, as follows:—

R. J. Campbell	\$1,000	par.	Alport.
Richard Dinner	1,000	"	Fiska.
Walter Kaye	1,000	"	Point Kaye.
William Hamilton	1,000	"	Raymond.
Mrs. Wolstan Riley ..	600	"	Bracebridge.

St. John, N.B.—The city government is planning large extensions to the water systems on either side of the harbor, which have been rendered necessary by the growth of the city and by the largely increased demands of ocean steamers in the winter months. Mr. R. E. Armstrong, secretary St. John board of trade, informs *The Monetary Times*. The city-planning commission is also busy on a scheme of development. The civic tax commission, appointed last year, have brought in a report, recommending many changes in the present method of city assessment. The recommendations are now being considered.

Saskatchewan.—The following is a list of authorizations granted by the local government board:—

School Districts.—Strathcarroll, \$1,800. Secretary-treasurer, E. J. Stevens, Qu'Appelle; Meusatz, \$1,000. Rudolf Doering, Schmidt; Piccadilly, \$1,600. A. P. Webster, Macrorie; Plessis, \$1,500. N. A. Morrison, Plessis; Wayne Valley, \$1,500. S. H. Kendall, Lancer; Leggett, \$1,600. Frank Leggett, Abbey; Rockhaven, \$1,800. D. E. McNeff, Rockhaven; Look Out, \$2,000. Geo. L. Snelgrove, Willow Brook; Tessier, \$3,600. J. Helliwell, Tessier; Friesen, \$1,600. W. H. Ellis, Waldeck.

Rural Telephone Companies.—Star City, \$14,600. W. McMunn, Star City; Golden Acre, \$10,500. W. F. Brundell,

Golden Acre; Marquis, \$2,000. F. E. Hurd, Marquis; Eastern Star, \$4,700. C. W. Williams, Webb; Stelcam, \$2,700. W. H. Cradock, Stelcam; North Weldon, \$19,000. T. F. Astley, Weldon.

Interest rate on above issues is not to exceed 8 per cent. annually.

Montreal, Que.—In the comptroller's report appears an interesting comparative table with regard to receipts in 1915 and 1914. Some of the items are:—

	1915.	1914
Assessments	\$4,512,653	\$3,363,679
Water rates	817,762	843,905
Business tax	873,256	908,947
Meter rates and arrears....	411,048	429,220
Licenses	404,370	460,572
Recorder's court	85,849	94,733
Markets	155,189	151,368
Interest	380,330	280,157
Montreal Street Railway, per cent. on earnings..	398,378	

Edmonton, Alta.—The earnings of the utilities of the city of Edmonton for the seven months ending July 31st, 1916:—

	Surplus on all operation.	charges (includ- ing depreciation and capital charges.)
Telephone department	\$ 98,267	\$ 6,710
Electric light department	85,174	37,342
Waterworks department	103,525	14,625
*Power house (to June 30th).....	109,968	38,930
Street railway department	85,859	63,010 deficit
Total	\$482,795	\$97,608 \$63,010 deficit
Surplus balance over all charges.....		\$34,597

*Taken over by Alliance Power Company, Limited, on July 1st.

In connection with the street railway, the deficit for the first seven months of 1915 was \$75,136, and for the first seven months of 1916 was \$63,010, showing a betterment of \$12,126, writes Commissioner A. G. Harrison to *The Monetary Times*, in spite of the fact that the city of Edmonton has decreased in population and that five battalions of soldiers have been in camp at Calgary and elsewhere during the summer, and are still away.

IS CANADA GETTING FULL SHARE?

Up to the time Canadian troops leave for overseas, their equipment and provisions are purchased by the war purchasing commission in Ottawa, whose policy is to keep the business as far as practicable at home. Upon their arrival in England, however, they are taken in charge by the British war office under an arrangement whereby the latter does all the purchasing, the understanding being that Canada will ultimately bear the expense on some per capita or per diem basis that has yet to be agreed upon.

It is claimed at Ottawa that Canada is receiving its full share of the business arising out of the maintenance of Canadian forces in England and on the continent. Letters have been received by the Canadian Manufacturers' Association from many quarters alleging that large orders are being placed in the United States for goods that could be supplied by Canadian manufacturers, who meanwhile are short of work.

With regard to many lines of trade, it is a matter of common knowledge that the shortage of labor in Canada would make it impossible for manufacturers to fill additional orders within the time allowed. In a great deal of such business, time of delivery rather than price is the determining factor, and the Manufacturers' Association think it would be unwise to raise the issue at all unless it is prepared to demonstrate the ability of Canadians to fill satisfactorily orders to which they are fairly entitled but which they are not receiving.

Providing reasonable grounds upon which to base a case are forthcoming, the executive committee of the Canadian Manufacturers' Association will take the matter up through the proper channel, promptly and vigorously.

NEW INCORPORATIONS

Toronto's New Hotel Has Largest Capital—Forty-three Charters

Canada's new companies incorporated this week number 43. The head offices of these companies are located in six provinces. The total capitalization amounts to \$7,209,700.

The largest company is:—

The Anglo-American Hotel Company,
Limited \$4,500,000

Grouping the new concerns, according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Ontario	15	\$5,255,000
Quebec	9	804,000
British Columbia	1	25,000
Manitoba	5	664,000
Alberta	4	246,000
Saskatchewan	9	215,700
	43	\$7,209,700

The following is a list of charters granted during this week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Vancouver, B.C.—Iron Salesman, Limited, \$25,000.
Moose Jaw, Sask.—Union Farms, Limited, \$20,000.
Duluth, Minn, U.S.A.—The Moon Company, Limited, \$1,600.

F. G. Bush, H. W. Jackson, F. B. Common.

Application for letters patent is being made by Island Silver Foxes, Limited, Summerside, P.E.I., \$150,000. W. S. Wetherbee, J. B. Roper, J. W. Callbeck.

BELGIUM'S CREDIT IS GOOD

Those who might doubt of the solidity of the Belgian state's credit and of the financial world's confidence in the successful issue of the war, will read with interest, suggests the Belgian consul-general in Canada to *The Monetary Times*, the following telegram sent from Brussels to the Frankfurter Zeitung, by its German correspondent in Belgium:—

"Several Belgian banks have formed a syndicate, with a capital of 40 million francs, for the payment of the dividends due of the Belgian and Congolese annuity fund and to make cash advances for state guarantees.

"The 'Caisse de Reports et de Dépôts' advances, at the rate of 5 per cent. interest, 75 per cent. of the dividend-coupons due of the societies which cannot pay such coupons for want of ready cash. The dividends of all the bank deposits are paid entirely."

Belgian financiers remain confident in the country's destinies.

SHIPBUILDERS AND LUMBERMEN ON TARIFFS

(Staff Correspondence.)

Vancouver, B.C., October 7th.

It was stated in *The Monetary Times* recently that a proposal to start a shipbuilding yard on the Pacific coast of British Columbia if the government would concede something in the way of free entry of the necessary machinery had been made. A point akin to this came up at the sitting of the Royal Trade Commission here. Mr. A. Wallace, of the Wallace Shipbuilding Yards, said that steel ships could be built here if the government would make some concession. Engines, boilers, etc., used in ships are manufactured in England and Scotland, and besides labor being cheaper there there was a duty of 17½ per cent. If the whole ship was imported, it came in duty free. The result is that almost all the ships on the coast run have been built in Great Britain. If yards were here, it would be much easier to make repairs, the high cost of which on this coast has been complained of in London. The reason is that there is not the necessary work to keep men constantly engaged. Mr. Wallace suggested either free entry of manufactured material or assistance on a tonnage basis, and he suggested \$8 per ton on freight boats, \$10 on passenger and freight boats, and \$12 on high-class passenger boats. Several boats are now being built on this coast, and it is probable that consideration will be given the suggestion.

British Columbia lumbermen are making a determined effort to secure preferential treatment within the empire for British Columbia lumber. Apart from a plentiful supply of tonnage, it is stated that no greater stimulant could be given the lumber business. By a co-ordination of financial, transportation and other interests, the British empire could so establish itself in the trade that it would secure to itself a supply of lumber that would make it, broadly speaking, independent of the world.

Interest payable January 1 and July 1 at Bank of Montreal in Canada and London; and at Bankers Trust Company, New York. Principal and Interest payable in Canadian, United States or British gold coin. Coupon Bonds of \$1,000 denomination, registerable as to principal. Callable as a whole after January 1st, 1920, on three months' notice at 105 and interest. Sinking Fund: 1% per annum of bonds issued, first payment January 1, 1920.

CAPITALIZATION.

	Authorized.	Outstanding.
5% First Mortgage Bonds	\$ 7,500,000	\$ 7,500,000
Common Shares	10,500,000	10,500,000

Laurentide Power Company, Limited, owns a modern hydro-electric plant with an installed capacity of 125,000 horse-power at Grand Mere, on the St. Maurice River, Province of Quebec. Power is sold to The Laurentide Company, Limited, and to the Shawinigan Water & Power Company which, through its extensive transmission system, serves Montreal, Quebec and the other large industrial centres in the adjacent territory.

We summarize as follows from a letter of Mr. J. E. Aldred, President of the Company:—

1. First (closed) mortgage on a modern hydro-electric plant with installed capacity of 125,000 horse-power.
2. Bonded debt of \$60 per horse-power is less than that of any similar hydro-electric development.
3. Sinking Fund provides for redemption of approximately half of entire issue before maturity.
4. Fifty year contracts (pledged under the mortgage) with the Shawinigan Water & Power Company and The Laurentide Company, Limited (one of the largest and most successful paper manufacturing companies in the world), provide for the sale of 75,000 horse-power.
5. The net income assured from the above contracts will be nearly twice the interest charges on the entire bond issue, without considering revenue to be derived from sale of the 50,000 additional horse-power under option.
6. Strength of the two contracting Companies is evidenced by the market value of their capital stocks which exceeds \$35,000,000.
7. Power is distributed over the transmission system of Shawinigan Water & Power Company, embracing over 700 miles of lines extending west to Montreal and east to Quebec, and also serving a prosperous intervening territory, from which there is a constantly increasing and unusually diversified demand for electric power.
8. Shawinigan Water & Power Company operates the plant, thus giving the Laurentide Power Company, Limited, the advantage of an experienced organization at nominal cost.

Over two-thirds of these bonds having been sold, we offer the balance subject to prior sale at:

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Hollinger Consolidated Gold Mines, Limited.—The company's gross profits for the four weeks ended September 8th were \$221,543. The mill ran 90.4 per cent. of the possible running time, treating 50,177 tons. The average value of the ore treated was \$8.59 per ton. Milling costs were \$0.927 per ton.

Dominion Transmission and Power Company.—The company's net earnings for the six months ended June 30th are \$113,248 more than in the corresponding period of 1915. Gross earnings for the first six months of the year were \$1,293,046, net from operation \$592,074, and the balance after renewal and maintenance reserve and bond interest \$294,372. The net surplus for the period available for dividends, after some interest adjustments, was \$313,748. The company has \$3,681,100 preferred stock and \$7,714,500 common stock outstanding. The common stock was recently placed on a 4 per cent. dividend basis. Messrs. J. M. Robinson and Sons and F. B. McCurdy and Company, Montreal, are offering common stock of Dominion Power and Transmission Company, Limited, at \$65 a share.

Canadian Car and Foundry Company.—The Robert Dollar Company of California has entered suit in New York supreme court against the Canadian Car and Foundry Company, the Russian Military Attache, and a group of New York banks, including the Irving National Bank, the Farmers' Loan and Trust Company, and the Guaranty Trust Company, for \$1,250,000, and will probably be met with a demurrer from the Canadian concern. The Canadian company claims that the agency was situated in New York, was not a part to the original contract and therefore cannot be sued in the New York supreme court, and that as the Canadian company is a foreign corporation, neither can it be sued in that court.

Mr. W. W. Butler, vice-president of the company, states that this suit is the outcome of a contract for 2,000,000 shrapnel shells given to the Allison Supply Commission by the Russian government, and which was later taken over by the car company. Mr. Butler explained that at the time Senator Curry agreed to pay the Allison concern something as a commission, but almost immediately afterwards the shrapnel order was cancelled by the Russian government and a new order secured by the car company.

The Robert Dollar Company of California, which has entered the action against the car company, is in the opinion of Mr. Butler a concern which has taken over the affairs of the Allison Supply Commission.

Brazilian Traction, Light and Power Company, Limited.—The statement of combined earnings and expenses of the tramways, gas, electric lighting, power and telephone services, operated by subsidiary companies, controlled by this company, for August were as follows:—

	1916.	1915.	Increase.
August, 1916.	Milreis.	Milreis.	Milreis.
Total gross earnings..	7,184,000	6,576,000	+ 608,000
Operating expenses ..	3,202,000	2,769,000	+ 433,000
Net earnings	3,982,000	3,807,000	+ 175,000
Aggregate gross earnings from Jan. 1st	54,320,000	50,963,110	+ 3,365,890
Aggregate net earnings from Jan. 1st	30,670,000	29,650,420	+ 1,019,580

Twin City Rapid Transit Company.—The company's returns for August and the year to date are as follows:—

	Month of August.	Year to date.
	1916.	1915.
Gross revenue.....	\$849,966	\$798,901
Operating expenses ..	525,187	406,686
Net revenue	324,779	302,214
Fixed charges and taxes	144,734	145,696
Net income	180,045	156,517

Sherbrooke Railway and Power Company.—The profit and loss account for 1916 compares with 1915 as follows:—

	1916.	1915.
Gross revenue	\$140,069	\$146,769
Operating maintenance	73,719	90,848
Net revenue	\$ 66,349	\$ 55,920
Interest on bonds	54,525	49,535
Interest on notes	186	
Interest on current liabilities ..	3,712	4,204
Bad debts	246	376
Head office expenses	1,426	1,780
Expenses and dividends on notes ..	2,533	
Credited profit and loss	\$ 3,719	\$ 1,181
Carried forward	4,900	

Mr. C. J. McCuaig, the president, in his address to the shareholders, states: The attention of the shareholders is called to the fact that owing to the adoption of the standard system of accounting approved of by the National Electric Light Association, inter-company charges, that is to say bookkeeping entries, between the company and its subsidiary companies have been eliminated. This makes an apparent reduction in both gross receipts and operating expenses, but it will be noted that the net receipts show an increase notwithstanding the fact that conditions in the early part of the fiscal year were not satisfactory.

The acquisition of the lighting and power business of Waterville and Compton, combined with the increased demand for power in the second half of the year, have created a market in excess of the capacity of the company's hydro-electric development on the Magog River. To provide for this demand for power and the requirements in the future, the directors deemed it advisable to make a contract through the Southern Canada Power Company, Limited, for the purchase of sufficient power to cover same and this should be available in October. A quantity of this power has already been contracted for. An extension of the power house and some of the transmission and distributing systems has been rendered necessary to handle this additional power, and this work is now nearing completion and should materially increase the earning power of the company for the current fiscal year.

WEEKLY RAILWAY EARNINGS

The following are the earnings of Canada's transcontinental railways during September:—

Canadian Pacific Railway.			
	1916.	1915.	Increase.
September 7	\$2,679,000	\$2,002,000	+ \$677,000
September 14	2,728,000	2,214,000	+ 514,000
September 21	2,779,000	2,408,000	+ 371,000
September 30	3,660,000	3,371,000	+ 289,000
Grand Trunk Railway.			
September 7	\$1,276,061	\$1,091,711	+ \$184,350
September 14	1,263,629	1,054,808	+ 208,821
September 21	1,320,277	1,061,047	+ 259,288
September 30	1,796,466	1,416,944	+ 379,522
Canadian Northern Railway.			
September 7	\$ 708,900	\$ 456,500	+ \$252,000
September 14	668,000	590,900	+ 77,100
September 21	726,000	654,700	+ 71,300
September 30	1,085,000	1,054,900	+ 30,100

The Canadian Pacific Railway reports August earnings as follows: Gross earnings, \$13,270,467; working expenses, \$7,802,680; net profits, \$5,467,787.

For the two months ended August 31 the figures are: Gross earnings, \$25,517,908; working expenses, \$16,033,029; net profits, \$9,484,879.

There was a reduction of \$30,000,000 in our bank deposits abroad in August. This was probably due to the drawing by the government on the balance built up at New York from its borrowing there. The bringing in of that money and its disbursement for expenditure incurred in Canada would in turn contribute in part to increases in Canadian deposits. That this transfer of government funds took place is necessarily conjecture.

WOMEN AS LIFE INSURANCE PROSPECTS

Medical and Other Phases of This Class of Risks— How Companies Select Risks

The early attitude of United States companies in regard to female risks with one or two exceptions had evidently been inspired by the experiences of the British and other foreign companies as restrictions of one kind or another were placed upon the business and in spite of these the results were unfavorable, said Mr. T. A. Phillips, secretary, Minnesota Mutual Life Insurance Company, at the American Life Convention. The reasons generally assigned by the United States companies were:—

1. The difficulty of obtaining a satisfactory medical examination. The vital organs, such as the heart and lungs cannot be easily examined, so that many incipient cases of lung diseases and abnormalities of the heart pass unnoticed. Added to this, is the fact that many serious conditions of the female constitution cannot be discovered except by pelvic examination, which is almost never possible.

2. The peculiar faculty of intuition common to women by which they sense an impending ailment before it is discoverable by a physician.

3. The element of moral hazard and speculation that enters into the insurance of women to much greater extent than with men. Until of recent years women were of lesser importance economically (outside of their natural sphere), and their death, except in rare instances, would mean no serious financial loss. Insurance under such conditions must naturally involve a large proportion of moral hazard, where unfavorable elements or motives prompting the insurance were unknown to the companies.

Seeking for Business.

One remedy proposed was a more active solicitation of female risks by agents accompanied by the removal of nearly all restrictions, using every precaution to eliminate possible speculation. The New York Life and the Metropolitan recognizing the serious effect speculation had had in the insurance of women, also that female mortality in the main was superior to males, they proceeded on the theory that active solicitation would reduce the percentage of cases which were presented to the company from speculative motives, that strict and severe selection of cases presenting the possibility of speculation would still further reduce the hazard. That if agents by an active, but not promiscuous solicitation succeeded in securing a larger percentage of insurable females a better representation of the class would be obtained, and consequently more favorable mortality. Another feature of prime importance is the great number of women in commercial work. There is need for their protection, and it is only natural that the vigor and independence of these women would be reflected in their mortality as insured lives. The theory is that the introduction of a large proportion of such risks among the total of insured females would have a beneficial effect.

The Minnesota Mutual had issued insurance to women at the same rate as men (term insurance excepted), including joint policies on husband and wife since 1909. Care is taken to detect cases of moral hazard especially in the case of married women and a clear need for the insurance is required to be shown. Amounts issued are usually limited—with married women almost always nominal amounts—and in addition the husband must be carrying an amount which we regard as adequate for the protection of his wife and family. The total issued in six years is somewhat less than \$2,000,000. The actual claims have been under 75 per cent. of those expected by the M. A. select table. The amount of the insurance, however, is so limited that this experience does little more than express an initial success.

Aggregate Results not Unfavorable.

This experience is particularly instructive and helpful for the reason that it is modern and reflects largely present methods of selection (only $\frac{3}{4}$ of the policies were in force more than ten years and less than one-half more than five years). The mortality for the first five years can be closely observed therefore under conditions which nearly parallel those upon which companies act to-day.

In the aggregate (all female lives and durations of policies) the results were not markedly unfavorable, the ratio for the first year being 113 per cent.; for the first five years

108 per cent., and for all years combined 104 per cent. of the deaths expected by the M. A. select table. From ages 15 to 39 an excess is shown over males, and the principal adverse selections appear in the first policy year.

The data was divided into the four following classes, with the result as shown (this division, of course, assumed that those who entered the experience as spinsters, married women and widows respectively, would remain throughout in that condition).

Spinsters, 81 per cent.; married women—husband beneficiary, 126 per cent.; married women—beneficiary other than husband, 114 per cent.; widows and divorcees, 105 per cent.

In a table showing the percentage for each class for all policy years combined, arranged according to age at entry so as to show comparatively the incidents of mortality according to age, spinsters are the only ones that show a mortality at all ages at entry within the experience on men. In another table Mr. Phillips shows the relative difference in the mortality of the groups, with the comparison made on endowment insurance, whole life and all plans combined.

Selection is Future Factor.

It must not be assumed that the mortality of women as shown in this investigation will be reproduced in the future. If the general rules of selection are held; if the same proportion of single and married women and widows is maintained, and the same proportion also as to plans and insurance, it is probable that the future will show about the same relative mortality between males and females. The severity practised in the selection of female risks, particularly married women, will be one of the principal factors in determining the future. That it has been of great influence is shown by the M. A. experience. The entire observations made in Medico actuarial investigation give the strongest evidence that a fine screening process in the selection of risks has a strong control (within limits, of course), over the resultant mortality. The experience shows a low mortality in so many groups of a kind known to be sub-standard that no other explanation can be offered, i.e., a severe selection will lessen the mortality, and lax selection heighten it; and it is possible within fairly wide limits to obtain various degrees of mortality corresponding to the degree of "screening" practised in selection.

A large class of risks presenting a widening field for underwriting is analysed into groups. It is known that one of these groups is a preferred class while others show a distinct excess of mortality. According to the table certain classes of married women can be accepted with profit, while others in spite of the care in selection will show abnormal mortality at least in the first few years of insurance. He went on to show that those companies will have the best experience that limit the insurance on married women, to policies of nominal size in favor of dependent children and the premiums paid out of the mother's independent income. The next most favorable class of married women is where the policy is taken out in favor of children, the husband paying the premium and the need for the insurance is established.

Minimize the Risk.

The active canvass of women introduces a large proportion of single women and tends to reduce the mortality. It must not be overlooked, however, that the introduction of married women among the insured risks produces adverse selection during the early policy years, and that portion should be avoided that presents the greatest possible moral hazard. Of the two divisions mentioned the second probably presents the most practical solution of the problem. A prepared table shows that tuberculosis strikes earlier among females than males. Under cerebral hemorrhage and apoplexy, nephritis and Brights Disease, which are in the so-called degenerative diseases the female has slightly the advantage. It is important to note, however, that these diseases are distinctly on the increase with men, but not so markedly so with females according to different authorities. Perhaps the most striking difference between the sexes is found in the ratios for suicide and accident; the combined rates for these two for males being practically three times those for females. This feature is shown to an equal degree in other published statistics. On the other hand, the ratios for female diseases and pregnancy have no corresponding entry for males. Even taking this, however, with the rate for cancer, to which females seem extraordinarily susceptible, the balance is in favor of the female, owing to the greater mortality of the male in other diseases. It is worthy of note that the ratio for pregnancy and puerperal

diseases is less than the corresponding figure in such statistics met relating to the industrial classes and the population generally. This indicates that the life companies have managed in the process of selection to minimize the risk of pregnancy to a considerable extent.

The decline in the birth rate was doubtless due to the tendency to marry later in life. The proportion of married women under thirty seems to be decreasing and that above, increasing, due possibly to the tendency toward greater comforts in life and the increasing employment of women in commercial avenues. This condition must reflect a greater vitality and better conditions during the ages 20 to 30.

MANUFACTURERS IN BRITISH COLUMBIA

Basic Industries of Province Will Be Needed After War —Growth of Mining

A large part of Canada's present prosperity is due to high prices for war supplies, and to the tremendous orders for war munitions and equipment, which will cease when the war ceases, and it behoves the manufacturers of British Columbia to conserve their resources and practise thrift and economy. All the province's resources will be required to exploit other markets on the cessation of hostilities, suggested President J. A. Cunningham, of the British Columbia Manufacturers' Association, at the annual meeting.

"British Columbia will not be affected to the same degree as the other provinces. The three basic industries are lumbering, mining and fishing. During the last year the lumber industry has greatly improved. Fully 50 per cent. of the mills are in operation to-day, the prairies and Eastern States placing large orders, and only the shortage of tonnage is preventing a large export business. The war has devastated tremendous territories on the continent and in Russia and Poland. Towns have been blotted out; those towns have to be rebuilt. The farmers will have balances to their credit in the bank and will have time to devote to building. Britain will require large quantities of lumber in shipyards, etc., stocks in all European countries will have to be replenished, and on the whole the prospects for the lumber industry are very bright for some years to come.

Growth of Mining.

"Mining, while not experiencing any boom, has had a wonderful growth in the last two years. In 1915 this industry showed an increase over 1914 of three million dollars and in 1916 it is estimated the mineral output will be in the neighborhood of fifty millions, an increase of some twenty millions. In addition, both federal and provincial governments are taking an active interest in the exploitation of our mineral resources. Zinc is being refined in the new smelter at Trail, and we may expect the erection of a smelter on the coast in the near future. The question of the construction of blast furnaces and the utilization of British Columbia's iron deposits is being earnestly considered, and it is now simply a question of the releasing of capital from war issues to have a start made. British Columbia rolling mills would then secure the Western Canada markets, and in addition would be in a position to cater in certain other markets."

With regard to war orders Mr. Cunningham said, "British Columbia's machine shops have completed the order for 650,000 18-pound high explosives, and are now engaged on an order for practically 100,000 4.5 shells. Mr. Leckie has supplied 200,000 pairs of boots and slippers without one rejection. Vancouver Knitting Company has supplied over 30,000 sweater coats. Messrs. Storey and Campbell supplied large quantities of harness and saddlery, etc. It is not possible to give a list of everything that has been purchased, but the following will give a good general idea:—Shells, shell boxes, boots, slippers, harness, saddlery, brooms, folding hospital beds, mattresses, pillows, flannel shirts, service shirts and trousers, mitts, socks, braces, handkerchiefs, towels, oilcloth, jam, bread, butter, cheese, meat, bacon, lard, groceries, potatoes, vegetables, forage, coffee, milk, fish, flour, drugs, flys for tents, disinfectants, hardware, buttons, truck parts, furniture, shiplap coal, paint, paint brushes, chemicals, wagons, carts, grease, gasoline and oil."

RAILWAYS BUILT TOO SOON

Lord Shaughnessy thinks that the recently appointed railway board of enquiry will be of service to the Dominion government. In his remarks at the annual meeting of the Canadian Pacific Railway he said:—

"The progress and prosperity of the Canadian Pacific Railway Company during the past few years tempted other railway companies to enter the field, and they received encouragement and support from the Dominion and provincial governments in the shape of cash bonuses and guaranteed securities, with the result that hundreds of millions of dollars were invested in railway lines throughout Canada, many of them in territory already served by the Canadian Pacific Railway, years before they were required or could be made self-sustaining. It has been necessary for the government on more than one occasion, to come to the aid of these companies by advancing large amounts of money to prevent liquidation and collapse. As a consequence a situation fraught with anxiety and some apprehension has developed. Within the last few months a board of inquiry, composed of expert and capable men has been selected by the Dominion government to study every phase of the railway problem, and to make a report incorporating suggestions and advice that may serve to guide the government in dealing with the subject hereafter. It is to be regretted that a board of this kind was not asked to give information and advice before these large expenditures and obligations were incurred, rather than afterwards, but there is little doubt that its report and recommendations will be very useful to parliament and the government."

NOT CONTRIBUTORIES TO DOMINION TRUST

The names of the following shareholders in the Dominion Trust Company, Limited, must be stricken from the list of contributories of the Dominion Trust Company (in liquidation), according to the decision of Justice Murphy, as given in a Vancouver dispatch. This means that 190 shareholders are, for the time being at all events, relieved from a liability to pay \$170,000 to the liquidator of the Dominion Trust Company.

The shareholders who benefit by this ruling include among others W. H. P. Clubb, who is relieved of a liability to pay \$10,360; E. W. Keenleyside, \$4,550; Dr. G. R. Drew, of New Westminster, \$5,110; R. L. Reid, K.C., \$4,515; James Ramsay, \$2,135; A. M. Stewart, \$2,275; G. R. Ashwell, \$1,750; F. R. Begg, \$1,750; D. W. Bole, \$1,750; S. M. Brydges, of Nelson, \$3,500; L. Manson, of Nanaimo, \$3,500; Cornelius Martin, \$2,870; J. C. Mathers, \$1,050; Dr. A. S. Monro, \$1,750; Robert Macpherson, \$2,100; F. A. Pauline, of Victoria, \$3,500; T. W. Paterson, \$1,050; J. M. Prentice, \$1,750; George Service, of London, \$9,450; Mrs. and Misses Sills, of Calgary, \$5,250.

All of the above and other amounts claimed against the 194 shareholders of the old company, the Dominion Trust Company, Limited, were for unpaid amounts due on their stock. Through their counsel, led by Mr. S. S. Taylor, K.C., these shareholders claimed that they had never exchanged their shares in the Dominion Trust Company, Limited, for shares in the Dominion Trust Company, which took over the assets of the Dominion Trust Company, Limited, in 1914. Many of the shareholders claimed that they were unaware of the agreement whereby the old company sold out to the Dominion Trust Company.

Mr. Justice Murphy, in upholding the contention of the objecting shareholders, pointed out that nowhere in the agreement was there any clause purporting to make the shareholders in the old company shareholders in the new, and that such could not be done without their consent. The ordinary provision for absorption where there was an exchange of shares was contemplated, but the offer required some concrete act of acceptance to be binding on the shareholders.

"All these names must be removed from the list of contributories of the Dominion Trust Company," declared his lordship.

It is said that the liquidator and his legal advisers will now attempt to procure the contributions of these shareholders by asking the court to wind up the Dominion Trust Company, Limited, and hold them liable for the same amounts in the liquidation of the old company. Mr. Joseph Martin, K.C., appeared on behalf of the liquidator.

LOANS ON LIFE POLICIES

Must Be No Tampering with Contracts, Says an Actuary

BY R. W. BARTON, A.I.A.

The important question of loans on life policies has been dealt with in the financial press on many occasions in the last few years, but nearly always from the point of view of the life companies.

A recent communication in the columns of *The Monetary Times* expressed the feelings of a wealthy merchant and holder of policies for a large sum, who went so far as to say that if the loan privileges of his policies were in any way tampered with, he would lose all confidence in the companies and at once surrender his policies.

Except for the fact that some provinces have already obtained legislative sanction to over-ride the terms of mortgage contracts and their recent and persistent efforts to still further reduce lenders' security, one could hardly believe that honorable governments would countenance such perilous interference with what has almost been considered the sacred law of contract.

The hasty action of the Ontario Government, too, in introducing prohibition without reference to the people, so soon after they had clearly demonstrated that whatever its merits the people did not wish it, cannot fail to have a disturbing effect on investors for a long time. The widespread ruin of many honorable citizens in order to try a very doubtful remedy for a comparatively restricted disease, will, if history is any guide, have its nemesis in the introduction of greater evils still.

Crank Laws on Statute Books.

Canada seems to be passing through a period when fanatics and ill-balanced statesmen are enabled to place crank laws upon the statute books, without regard to the rights of more far-seeing citizens, or the interests of those foreign to the Dominion, who have loaned money here relying upon the British tradition of fair play for all.

Warning of the probable effect of all this on future borrowing in the provinces has already been sounded in the financial press, not only in Canada, but also in Europe and America.

In view of these facts and what is considered by many thousands of life policyholders an interference in their private affairs, by the suggestion of life company officials, that in borrowing upon their policies they are robbing their families, an element of suspicion and distrust is arising in the public mind, which if pressed will lead to results disastrous alike to the companies and the community.

Restriction Would be Set-Back.

Any drastic restriction of these loan privileges in existing policies would be the most disastrous set-back life assurance ever had; the breach of contract it would involve would so shock the financial world as to make the question really unworthy of serious consideration had it not already been suggested in high places.

In the case of loan restrictions in future policies there can be little doubt but that life assurance would lose a large proportion of what attraction it has in the public mind, and since payment on the surrender of a policy could hardly be refused by the companies, a policy would be wholly lost by surrender instead of only partly impaired by loan.

Again if Canada imposed restrictions that other countries did not, competition not only would attract insurers to those foreign contracts, but the great funds accumulated by Canadian life companies, and which have proved so useful to the government in this time of stress, would be seriously depleted, to the advantage of those other countries and to the great loss of Canada.

Death Not Only Contingency.

It should be remembered in considering the various aspects of this question that the policy is called a "life" policy. Death is not the only contingency in life. It is the final one in this life, but many other vicissitudes arise and the more of these the policy can provide against the more nearly does it fulfil its ideal function.

Up to now every innovation has been with the object of extending benefits and covering more and more of these chances and changes in life. The abolition of the clause relating to death by suicide, duelling, or at the hands of justice. The introduction of world-wide and unconditional policies, disability clauses giving relief from premiums under certain conditions, regulations as to admission of age and many other attractions, lacking when life assurance first solved the problem of provision for early death, have slowly inspired a reluctant public with a sense of the very real value a life policy now has.

Must Maintain Loan Function.

Even at the cost of reduced interest earnings the loan function of a life policy must be retained. An increase in premium rates for future entrants would do less harm than a restriction of established rights and privileges.

Suggestions have already been made in these columns to mitigate the situation, and we believe executive officers will be equal to the task of meeting a difficulty daily faced by banks and of which life companies have now had warning and experience.

TORONTO INSURANCE INSTITUTE'S PROGRAMME

The insurance institute of Toronto has arranged its programme for the forthcoming session as follows:—

October 19, opening meeting; president's inaugural address, Mr. A. E. Blogg; address, Hon. W. H. Hearst, premier of Ontario. November 16, "Some Features of Quebec Insurance Law," Mr. J. Armitage Ewing, K.C., legal adviser, Sun Life Assurance Company, Montreal. December 14, "Public Safety Education," Mr. R. Morley, secretary, Ontario Safety League; "The Fire Insurance Business as a Profession," Mr. J. E. Hodgins, A.C.I.I., inspector St. Lawrence Underwriters' Agency.

1917—January 18, "Modern Fireproof Construction," Mr. W. W. Pearse, city architect, Toronto. February 15, "Some Notes on the Preparation of Government Returns," Messrs. W. H. Gilliland and A. N. MacTavish, Department of Insurance, Ottawa. March 15, "Recent Legislation Affecting Insurance Companies' Investments," Mr. E. M. Saunders, treasurer, Canada Life Assurance Company. May, annual meeting; results of examinations; election of officers.

CANADA AS AN INVESTMENT FIELD

Others, besides the United States investor, whose funds are threatened by the menace of organized labor, may find the Canadian issues worth examination, says the Wall Street Journal, in a very appreciative editorial. Just now, it says, the market is skyrocketing, but the shrewd buyer knows that it may drop on unfavorable news just as it rose in the bull movement.

With the close of the war, no man can say what our condition will be, or even if immigration will begin. Of this, however, we may be sure—all the belligerents will be united in their desire to get back the money they have been forced to pay to us, and no nursery sentiments of friendship will halt the process.

Consider the Canadian position at the close of the war: The pressure of the British government for war loans will tend to liquidate the market there as it has the London exchange, and prices will be low. Even now Toronto is borrowing at 5 per cent., Dominion fives are on a 5 per cent. basis, and ultra conservative securities like Ontario fives of 1920 and Newfoundland fives of 1919 are on about a 4.90 basis, while the city of Edmonton, a good western municipality, has bonds outstanding on a 5.90 basis that are due in 1921.

The basis of Canada's riches is the fertility of her soil, and no freak of warfare can injure that while her grain will increase in demand as the population of the world grows. Farm labour has not tended to unionize and even if it could, the Canadian system of deferring strikes pending investigation, has shown itself of incalculable value. Her banking system is tried and of proven worth. As an investment field, Canada is worthy of consideration.

A branch of the Bank of Nova Scotia has been opened at East End, St. John's, Newfoundland, under the management of Mr. J. A. Dunbar.

Behind the firing line—Official Film, "Battle of the Somme."

THE British Red Cross again appeals to the generous heart of Ontario for funds to carry on the splendid work of caring for our sick and wounded defenders on every front.

It is the deep concern of British subjects everywhere to aid and hearten the workers in their splendid, self-imposed duties. All can help—will YOU?

By proclamation of His Honor the Lieutenant-Governor of Ontario, Thursday, October 19th, "OUR DAY" is set aside as a day of giving to

The British Red Cross

Here is a call to touch Men's hearts, and Women's, too. Give generously, that the cry of your anguished defenders may not go unheeded.

The British Red Cross maintains hundreds of hospitals in Great Britain and on every battle-front. It provides and runs hundreds of motor ambulances, steamships, motor launches, rest stations and convalescent homes. In France, Flanders, Italy, Salonika, Mesopotamia, Armenia, Galicia, Russia, East Africa, Egypt, Arabia its blood-red emblem of healing is known and blessed.

Give through the Treasurer of your Local Committee, or send your subscription to the Clerk of your municipality, or make it payable to Hon. T. W. McGarry, Treasurer, British Red Cross Fund for Ontario, Parliament Buildings, Toronto. Do it on "OUR DAY," October 19th, or sooner.

Your Defenders Need YOUR Help

Why Should You Give to the British Red Cross?

BECAUSE your gift may save some gallant life.

BECAUSE without Red Cross work thousands of soldiers and sailors would die.

BECAUSE trained men are vitally necessary to the Empire's safety, and their lives must be saved.

BECAUSE your own friend, son, brother, husband may be the next to call for Red Cross aid.

BECAUSE you may not be able to fight, but you can **HEAL** with your gift.

BECAUSE the British Red Cross is the greatest physical agency for good in the world, and the most efficient.

BECAUSE your money does more good in the hands of the British Red Cross than spent in any other way.

BECAUSE the Motherland's only direct appeal to us Canadians is for assistance in the great mercy work.

BECAUSE Ontario's shining gift of \$1,514,000 last year should be an inspiration to us now.

BECAUSE the number of sick and wounded is ever increasing as the price of victory.

BECAUSE if you do not give you will have missed a great opportunity for doing good—"the Angel of Mercy will move on, abashed, from your doorway."

Give and Heal!

GIVE ON

OUR DAY

OCTOBER

19th

Royal Bank Buys Quebec Bank

Every Three Shares of Quebec Bank Stock will get One of Royal and \$75 cash—Minister of Finance has Approved Merger—Quebec Directors say Best Interests of Shareholders are Served by Amalgamation with a Large and Strong Bank—Some Interesting Figures.

OPPPOSITION to the proposed absorption of the Quebec Bank by the Royal Bank of Canada is not likely to develop. When tentative proposals for the amalgamation of the Royal Bank and the Bank of Hamilton were made last year, the sanction of the government was not given. In the present instance, the finance department has consented to the preliminary negotiations and if the shareholders of the two banks agree with the views of their directors, the merger seems likely to become accomplished. Judging by the strong ground taken by the government when the previous amalgamation proposal was placed before the finance department, the finance minister apparently sees substantial reasons which make desirable the present suggested absorption.

By the amalgamation, the Royal Bank will obtain a strong foothold in Quebec city, where heretofore it has had little business as its branch was opened there only six years ago. It will also secure other good branches in Quebec province, notably at Three Rivers. The addition of a large number of stockholders of Quebec province will strengthen the Royal Bank there as hitherto the majority of its shareholders have been in the maritime provinces and in Ontario. The Royal Bank will also obtain a large and welcome addition to its staff, which is badly needed on account of war conditions, and of the expansion of the bank's enterprise in the West Indies and elsewhere. It will also obtain a substantial increase in its Western business. The cost of management will probably be reduced owing to the merging of branches. The customers of the Quebec Bank will benefit by becoming customers of a larger bank quite able to take care of their legitimate business requirements. The stockholders of the Quebec Bank, although obtaining a smaller dividend than previously, will have a sound investment and assured dividends.

The Royal Bank of Canada will purchase the Quebec Bank. The directors of the banks have reached an agreement whereby for every 3 shares of Quebec Bank stock shareholders of the Quebec Bank will receive one share of Royal Bank stock and \$75 in cash.

A circular has been sent to the shareholders of the Quebec Bank calling a special meeting to ratify the agreement. In this circular the directors of the Quebec Bank state that "with the present condition of business in the west, your directors cannot hold out the hope that, if the separate existence of the bank is maintained, the dividends would be continued. On the contrary, your directors feel that it is necessary for them, owing to severe competition, if the proposed amalgamation were not sanctioned by shareholders, to reduce the dividend for some years to come."

It is also pointed out that "the tendency of modern banking business has been towards the amalgamation of banks and the creation of financial institutions having large resources for the purpose of financing modern industries. It has happened that your directors have been obliged to refuse advances to some of the bank's best customers, because in their opinion the amount asked for, though safe and profitable, bore an undue proportion to the resources of the bank."

"After a persistent and vigorous effort to establish the bank in the west, and to increase its business in the east, your directors, after consultation with some of the principal shareholders, have come to the conclusion that the inter-

ests of the shareholders would be better served by an amalgamation with a larger bank than by continuing the separate business of the institution. The experience of banks both in Europe and in Canada has shown that amalgamations such as that proposed are highly advantageous to the shareholders."

Three directors of the Quebec Bank will be added to the board of the Royal Bank of Canada.

Sanction of the finance minister has been obtained for the conduct of negotiations, and these negotiations have now reached a stage at which the directors of the two banks are in agreement, and the shareholders are being called upon to pass upon the proposal. Shareholders of the Quebec Bank will vote on the agreement on November 28. A two-thirds assent is necessary to the execution of the agreement, but in view of the strong terms in which assent is urged by the directors of the bank, it is unlikely that opposition will develop.

This is the first bank merger since July, 1914, when the Bank of Nova Scotia absorbed the Metropolitan Bank. The terms under which the Metropolitan became part of the Nova Scotia were \$200 in cash and one share of the Bank of Nova Scotia stock for each two shares of the Metropolitan Bank. As an institution the Metropolitan Bank received \$1,000,000 in cash and 5,000 shares of the Bank of Nova Scotia stock. The market price of shares of the Bank of Nova Scotia at that time stood around 264 and Metropolitan stock at \$205 bid. Under the terms of the agreement the stock figured out at \$232 per share.

In April, 1912, the Royal Bank absorbed the Traders Bank of Canada, Toronto, and a number of directors of the Traders Bank joined the board of the Royal. This merger left 26 chartered banks in Canada.

The present merger will reduce the number of chartered banks in Canada to 21. How this compares with the position in certain previous years is shown in the following table compiled by *The Monetary Times*:—

July.	No. of chartered banks in Canada.
1869	27
1879	40
1880	41
1899	38
1900	29
1912	26
1914	22
1916 (October)	21

The two banks have been competing institutions at about 18 centres in Canada. The absorption of the Quebec Bank will therefore reduce the number of branch banks. The following table, compiled by *The Monetary Times*, shows approximately the situation of the two banks' branches at the end of August, the latest date for which official figures are available:—

	Royal Bank.	Quebec Bank.
Ontario	121	9
Quebec	31	26
Nova Scotia	50	..
New Brunswick	18	1
Prince Edward Island	5	..
British Columbia	39	2
Manitoba	4	1
Saskatchewan	23	11
Alberta	26	2
United States of America ..	1	..
England	1	..
Newfoundland	4	..
West Indies	37	..
British Honduras	1	..
British Guiana	3	..
Costa Rica	2	..
	366	52

When tentative proposals were made to the government in the summer of 1915, to amalgamate the Royal Bank and the Bank of Hamilton, permission to merge the two banks was refused by the department of finance. The minister of finance, Sir Thomas White, issued a statement at the time to the effect that after giving the matter very careful consideration, he had reached the conclusion that as both the banks in question were strong, favorably known and well-established institutions, and were actual and potential competitive factors in the Canadian banking field, it would not be in the public interest that he should give the consent required from him under the terms of the bank act. The interested parties were notified accordingly.

In view of the merger, the following table is of interest. The Royal Bank's figures represent the combined assets and liabilities of the Royal and Quebec banks:—

	Montreal.	Commerce.	Royal and Quebec.
Assets	\$343,226,140	\$253,886,257	\$260,661,261
Liabilities	307,418,025	224,094,910	230,421,476

Total liabilities, merged banks . \$230,421,476

The Royal Bank was incorporated in 1869 and was known previously to 1901 as the Merchants Bank of Halifax. The Quebec Bank was founded in 1818.

Stock Exchange Records.

The following is a record of the high and low prices and sales of Royal Bank stock on the Montreal Exchange during the past few years:—

Year.	High.	Low.	Sales.
1906	247½	222	1,140
1907	242	218	900
1908	233	211¾	793
1909	233	212	1,436
1910	245	224½	4,236
1911	241½	224	2,761
1912	234	220	9,611
1913	228	213	3,938
1914	228	219	1,890
1915	221¾	221¾	340
1916 (to September 30) ...	221¾	212¾	

The record of high and low prices and sales of stock on the Montreal Exchange of the Quebec Bank during the same years is as follows:—

Year.	High.	Low.	Sales.
1906	145	139½	375
1907	145	119	471
1908	135	120	598
1909	126	122	1,106
1910	135	122	1,553
1911	145¼	128¼	3,022
1912	140	130	1,964
1913	133	119	931
1914	122	118	437
1915	119	119	112
1916 (to September 30) ...	119	101½	

The stock of the Royal Bank is listed on the Montreal, Toronto and Quebec stock exchanges, and that of the Quebec Bank on the Montreal Stock Exchange.

Capital Stock Allotments.

Previous to 1902 \$2,000,000 of capital stock of the Royal Bank had been allotted. The record since then has been as follows:—

Sold privately Dec. 30, 1902	\$ 481,000 at \$250 per share
Sold privately Jan., 1903	19,000 at \$250 per share
Allotted Feb. 16, 1903	500,000 at \$200 per share
Allotted Feb. 16, 1906	900,000 at \$210 per share
Allotted Feb. 8, 1909	1,100,000 at \$200 per share
To shareholders Union Bank of Halifax, Nov. 1, 1910.	1,200,000 at \$250 per share
	\$200
Allotted Dec. 15, 1911	2,000,000 at \$210 per share
To shareholders Traders Bank of Canada, Sept. 3, 1912	3,360,000 at \$240 per share
	\$180
*Allotted Jan. 12, 1916	440,000 at par
	\$12,000,000

A block of stock was also sold by public tender later this year.

*\$10 per share payable on each of the following dates: February 16th, March 17th, April, 17th, May 17th, June 16th, July 17th, August 16th, September 15th, October 16th, November 15th.

On February 28th, 1911, the shareholders of the Quebec Bank authorized an increase of its capital stock from \$3,000,000 to \$5,000,000 to be issued from time to time as required. Previous to 1901 \$2,500,000 of the capital stock had been allotted and in January, 1913, \$500,000 of capital stock was allotted at 125.

Net Earnings of the Banks.

The net earnings of the two banks concerned in the amalgamation are shown in the following table:—

Year.	Royal Bank.	Quebec Bank.
	%	%
1907	19.02	12
1908	19.15	11.24
1909	18.08	10.11
1910	18.29	11.16
1911	18.58	11.05
1912	18.25	11.16
1913	17.66	10.69
1914	15.02	9.54
1915	14.70	8.04

The 1912 to 1915 returns of the Royal Bank are after deduction of contribution to pension fund. The 1914 return is after deduction of \$50,000 contributions to patriotic funds, and the 1915 returns after deducting war tax on note circulation.

The 1912 to 1914 returns of the Quebec Bank are after deducting contributions to pension fund and business taxes. The 1914 return of this bank is also after deducting \$10,000 contribution to the patriotic fund.

Dividend Record and Officers.

The Royal Bank paid a dividend of 9 per cent. in 1906, 10 per cent. from 1907 to 1909, 11½ per cent. in 1910 and 12 per cent. since that year. The Quebec Bank has paid 7 per cent. for a number of years including the last ten.

The following are the officers and directors of the Royal Bank of Canada, which has its headquarters at Montreal:—

Directors—Sir Herbert S. Holt, president, Montreal; E. L. Pease, vice-president, Montreal; E. F. B. Johnston, K.C., 2nd vice-president, Toronto; Hon. D. MacKeen, Halifax; Jas. Redmond, Montreal; G. R. Crowe, Winnipeg; D. K. Elliott, Winnipeg; Hon. W. H. Thorne, St. John; H. Paton, Montreal; T. J. Drummond, Montreal; Wm. Robertson, Halifax; A. J. Brown, K.C., Montreal; W. J. Sheppard, Waubesa-shene; C. S. Wilcox, Hamilton; A. E. Dymont, Toronto; C. E. Neill, Montreal; general manager, C. E. Neill; managing director, E. L. Pease; assistant general manager, F. J. Sherman; superintendent of branches, W. B. Torrance; supervisors of branches, Stuart Strathy, Ontario branches; C. A. Crosbie, British Columbia branches; N. H. Hillary, central western branches; A. D. McRae, maritime provinces branches; T. F. Dever, Cuban branches; inspectors, W. C. Harvey, J. W. Cameron, H. K. Knight.

The following are the officers and directors of the Quebec Bank, which has its head office at Quebec and general manager's office at Montreal:—

Directors—John T. Ross, president, Quebec; R. MacD. Paterson, vice-president, Montreal; Vesey Boswell, Quebec; Gaspard LeMoine, Quebec; Thomas McDougall, Montreal; G. G. Stuart, K.C., Quebec; J. E. Aldred, Montreal; Peter Laing, Montreal; John M. McIntyre, Montreal; general manager, B. B. Stevenson, Montreal; superintendent of branches, R. C. Patton, Montreal; inspector of western branches, W. H. Clarke, Calgary; inspector of eastern branches, R. L. Young-Jones, Montreal; chief accountant, A. W. Brown.

TEXTILE STOCK OFFERING

A current industrial stock offering is that of \$175,000 7 per cent. preferred participating cumulative shares of Dominion Linens, Limited, which is being offered by Messrs. Ferguson, Sanson and Graham, Toronto. The company's profit and loss account for the half-year ended June 30th, shows profits of \$14,212, and \$13,909 was brought forward from December 31st, making \$28,122 available for distribution.

The objects of this issue are to provide new buildings; to purchase and install spinning plants, additional looms and other equipment and to furnish working capital. The additions and improvements mentioned are well under way.

The earnings mentioned above for the first six months of 1916 thus show over 15 per cent. on the common stock, after paying 7 per cent. on the preferred. It is anticipated that the enlarging of the mills and introduction of spinning plants will further increase the rate of earnings.

The directorate of the company, which is very well managed, is as follows: Mr. D. M. Sanson, president, Guelph; Mr. J. W. Lyon, vice-president, Guelph; Messrs. G. D. Perry, F. Barry Hayes, G. H. Muntz, J. B. Ferguson, Toronto, and Messrs. G. B. Ryan, W. Berry, Guelph. Mr. H. A. Hignell is secretary-treasurer.

LAURENTIDE BOND OFFERING

An offering of \$1,500,000 first mortgage 5 per cent. sinking fund gold bonds of the Laurentide Power Company, Limited, is being made by the Royal Securities Corporation and Messrs. McDougall and Cowans, Montreal. The offering is being made at 90 and interest, yielding about 5.70 per cent. The prospectus printed on another page contains the statement of Mr. J. E. Aldred, president of the company, in which the following particulars are given:—

The bonded debt of the company of \$60 per horsepower, is less than that of any similar hydro-electric development. Fifty-year contracts with the Shawinigan Water and Power Company and the Laurentide Company, Limited, provide for the sale of 75,000 horsepower, out of the installed capacity of 125,000 horsepower. The net income from these contracts will be nearly twice the interest charges on the entire issue.

The attractiveness of the offering is indicated by the sale already of over two-thirds of the bonds by the issuing houses.

CANADA'S MONTHLY BANK CLEARINGS

The following are the returns of Canada's bank clearing houses for the month of September, 1916, and September, 1915, with changes:—

	Sept., 1916.	Sept., 1915.	Changes.
Montreal	\$295,337,209	\$206,673,288	+ \$ 88,663,921

Lake of the Woods Milling Company's Annual Report Shows Steady Progress

Surplus After Providing for Two Years' War Tax Stands at \$889,135.77

MONTREAL, October 10.—(Special).—Strength and stability are shown by the report of the Lake of the Woods Milling Co. for the year ending August 31, 1916, presented to the Shareholders to-day. Net earnings for the year were \$525,141.51, apportioned as follows:—

Interest on \$900,000 Lake of the Woods Milling Co. 6% Bonds	\$ 54,000
Interest on \$750,000 Keewatin Flour Mills Co. 6% Bonds	45,000
Dividend on \$1,500,000 7% Preferred Stock....	105,000
Dividend of 8% on \$2,100,000 Common Stock..	168,000
Written off Property Account	50,000
Written off Goodwill and Trade Marks Account.	50,000
	\$472,000

This leaves a balance of \$53,141.51, which is carried to Surplus Account, raising it to \$989,135.77. From

this, however, must be deducted \$100,000 to provide for War Tax for two years, leaving a balance in Surplus Account of \$889,135.77. The War Tax for 1915 having been levied after the last Annual Statement was presented explains the deduction of two years' tax in this year's statement. It will be noticed that provision for this year's War Tax (\$50,000) leaves just \$3,141.51 of the sum which would otherwise have gone to increase the Surplus Account.

The Company's Medicine Hat Mill, destroyed by fire on April 29th, last, is being rapidly replaced by a more modern plant, which should be running before the end of the year. Plant, stock and dividend income were all fully covered by insurance, but the loss of the Mill's output during a busy eight months was unfortunate.—(Adv.)

SASKATCHEWAN BUYS FROM UNITED STATES

Branch Houses of Implement Houses Across the Line Are in Every Centre

While Canadian manufacturers are alive to the Western market, their United States competitors are not losing opportunities. Present conditions in Saskatchewan are of interest to exporters in the United States, says United States Consul J. A. Gore, Regina, and supplies the following information regarding Saskatchewan's development. The province was established by act of the Dominion parliament on September 1, 1905, with its capital at Regina. It is the eastern portion of the former territories of Assiniboia and Saskatchewan and occupies a part of the great alluvial plain of the Canadian northwest, one of the most fertile wheat fields in the world. It lies immediately west of Manitoba and extends north from the United States boundary line. Its length from north to south is 740 miles and its breadth 375 miles. Its land area is 250,650 square miles and its water area 27,000 square miles. The province is larger than France, twice the size of the British Isles, and larger than Ontario and New Brunswick.

Growing Purchaser of Manufactured Goods.

While large quantities of mill products and lumber are exported from this province to the United States and other countries, Saskatchewan will be a growing purchaser of manufactured goods for many years to come. There are nine cities and towns in the province having an estimated population of over 4,000. These are: Regina, population, 45,000; Moose Jaw, 25,000; Saskatoon, 25,000; Prince Albert, 12,000; North Battleford, 5,000; Swift Current, 5,500; Weyburn, 5,500; Yorkton, 5,000; and Estevan, 4,200. Many smaller towns are scattered throughout the province.

Although high import duties are charged on many articles produced in the United States, large quantities of United States manufactured goods, such as textiles, clothing,

hats, boots and shoes, groceries, machinery, hardware, musical instruments, books, sporting goods, coal, building material, etc., are sold in this country, and several United States implement and thrashing-machine concerns have branch houses in practically every important business centre in the province.

Wheat Growing Is Chief Business.

Saskatchewan has the largest acreage suitable for growing hard spring wheat that any Canadian province contains. At least 50,000,000 acres of its land are capable of producing an average of 20 bushels of wheat to the acre, a large portion of which will grade No. 1 Northern. There are 86,000 square miles of land suitable for grain growing, 32,000 square miles more that need only irrigation to fit them for raising wheat, and 100,000 square miles suited for ranching and mixed farming. Wheat growing is the chief business of the province. Next in order are oats, barley, flax and cattle raising. Potatoes do well here, but, unfortunately, there are no near-by markets for the product, and freight rates are too high on a long haul for potato raising to be a profitable business. Saskatchewan also yields annually about \$250,000 worth of furs.

There are valuable deposits of coal in the southern part, underlain with clay suitable for the manufacture of high-class bricks and pipes. There are also many minor opportunities for industries.

The province is principally prairie, although timber is found in some sections, generally along the banks of streams, lakes and rivers. It has about 4,700 miles of railroad and a government telephone system with about 2,000 miles of long-distance lines, 42 exchanges, and more than 5,000 subscribers, besides 213 rural lines, representing 4,800 miles and serving more than 2,000 farmers. The estimated population is about 650,000.

Saskatchewan is being rapidly settled by emigrants from eastern Canada, Great Britain, the United States and Europe. A scheme is on foot to settle British soldiers in western Canada after the close of the present war.

CANADA'S IMMIGRATION POLICY

Lord Shaughnessy Gives Some Good Advice—Preparing for Peace

Canadians must try to determine what the Dominion's policy is going to be in the future, that is, the policy of all of us who are interested in the welfare and progress of the Dominion, said Lord Shaughnessy, president of the Canadian Pacific Railway, at Vancouver, during his tour of the company's system. At the moment we have one working thing that supersedes all others. The war must be prosecuted to a successful conclusion at all hazards. Nothing that is either directly or indirectly connected with the successful prosecution of the war should occupy more than a secondary place in our thoughts. The war will not last for ever.

"Indeed there are those of us who think that the end is not far off. But whether it be this year or next year, or the year after, we must be prepared to take advantage of such opportunities as may offer. The fact that we have taken such a strong position, that we have done so much to help, has won for us the sympathy beyond doubt of Great Britain and of British allies, and to the extent that those nations can be of service in forwarding large industrial and commercial and agricultural interests, and that we can count on their co-operation.

Capacity for Business.

"It is useless to imagine that because of the animosities arising from the war, that the Germans and Austrians are to be shut out from all civilized countries of the world, compelled to confine their trade relations in their own countries and with each other.

"Those feelings of animosity will be rapidly dissipated if there be a commercial advantage in forgetting that they exist. We cannot count upon that either as a very important influence in determining what our policy must be. We must try to frame our own policy, and must try to carry it out vigorously, receiving, of course, such advantages as may properly come to us. But our own capacity for business, our own organization, our own energy, are the factors that will determine what is exactly the amount of progress we are going to make.

By Canada's Efforts.

"About the future we have no doubt whatever. If we continue as we are, conserving our resources, avoiding unnecessary expenditure until we can afford it better, if we conclude that our success is going to be dependent entirely on our own efforts and that any assistance we get from other causes must be considered extraneous and not essential, if we make up our minds that we are going to be equal to any country in the world, that of our ability to do things there is no question, there will be no doubt as to the position of Canada in the future. I have not a doubt that there are in this room many young men who will see this country with a population trebled at least, and even larger figures might not be excessive if we perform our duty as I have remarked."

Speaking at Calgary on immigration Lord Shaughnessy said:—"The great need of Western Canada is population. No one can foretell with certainty the trend of events after the war, but the first obligation will be to take proper care of the returned Canadian soldiers, who will probably require all the transportation facilities available for at least ten months after the close of the war. They will doubtless be followed by soldiers of the British army, and by others desiring to settle in Western Canada, and a bureau combining the functions of a labor bureau and an immigration agency should be established to assure the expeditious and economical handling of this flood of immigration.

Select the Immigrants.

"Intending settlers should be carefully selected and those unsuited for the conditions to be faced should not be accepted. Those accepted should not be sent to districts removed from transportation facilities, but should be located convenient to railways and this end should be accomplished by a government tribunal, having authority to commandeer unused lands at a price to be fixed by the tribunal and make them available for settlement."

Lord Shaughnessy emphasized that this tribunal should be as far removed from political influences as is possible in a country of representative government.

The future of such places as Calgary for many years to come depended on the development of the surrounding agricultural territory and although western centres had suffered reverses, he was confident the history of the development of the western states would be repeated in Western Canada. He never felt greater confidence in the future of the country than at the present time. Manufacturers would follow population, but the present great need is population, and all organizations should co-operate towards the settlement of the western soldiers and the immigrants who will follow them.

AFTER WAR TRADING CONDITIONS

Information regarding changes in European commercial policy brought about by the war and their effect upon the foreign trade of the United States has been collected and presented in a concise volume. Canada's position in the world of commerce receives particular mention and of the British Empire it is remarked that its predominance in the world's trade is largely due to the world-wide distribution of the United Kingdom's sources of raw materials, which bring laden vessels from all parts of the world to the United Kingdom ready to carry back to the same or other sources of supply British manufactures and coal. The booklet is an extremely valuable one.

"European Economic Alliances." 25 cents. National Foreign Trade Council, India House, Hanover Square, New York.

NEW BRITISH BONDS ARE POPULAR

The offering of 6 per cent. three-year exchequer bonds at par by the British government will be on sale daily until further notice, like previous issues, and will be free of tax to foreigners. It is believed that the bonds will be well taken, the government having reduced the rate offered on yearling treasury bills to 5½ per cent. Much money hitherto subscribed to these bills will flow to the new issue of bonds, while by not making a longer dated issue the necessity is avoided of raising the rate on the old 4½ per cent. war loan, which retains the privilege of conversion into any new long loan.

The decision to borrow for a short period again by the government indicates the strong official belief that with the coming of peace short loans could be funded on a basis below present rates. The rate of interest now offered displeases holders of the old war loan, who are disappointed at missing the opportunity to convert their holdings into a new long loan.

COMMONWEALTH OF NATIONS

An inquiry into the nature of citizenship in the British Empire, and into the mutual relations of its several communities is not a small task, for, as a new volume representing the outcome of this search and study says:—"Mankind may be compared to a stratified formation consisting of a series of graduated layers. The Chinese Empire is a state cut from the thickest of these layers. The British Empire is a section of humanity cut from top to bottom, and a sample of every typical layer is contained in its jurisdiction."

The matters gleaned by the Round Table clubs since 1910 have been divided into nine chapters:—Earlier relations of East and West; The English Commonwealth; The opening of the seas; The commercial system; Inclusion of Scotland in the British Commonwealth; The American Colonies; Ireland; The American Commonwealth, and the Schism of the Commonwealth. The editor, Mr. Lionel Curtis, has produced a compressive and interesting book, which will be productive of discussion and debate. He concludes the work in these words:—"The people of Britain and those of the Dominions have yet by some solemn and irrevocable act to decide whether in the last analysis, it is to the mighty commonwealth as a whole, or merely to the territory in which they live, that their final allegiance is due. Citizens of no mean city, we have yet to declare what for us and for those who come after us that city is to be."

The Commonwealth of Nations. Part I. Edited by L. Curtis. Price \$1.50. Macmillan Company of Canada, St. Martin's House, Toronto.

American Investment in Canadian Bonds

Since the war United States investors have increased their annual buying of **Canadian Government and Municipal Bonds** from approximately \$40,000,000 to \$125,000,000. Are you equally appreciative of the sound investment opportunity these bonds afford?

**It means absolutely safe investment
of your funds to yield 5% to 6%.**

Write us for a list of these bonds.

WHAT ACCIDENTS COST CEMENT INDUSTRY

Need for Reliable Statistics—Question of Compensation Legislation

Workmen's compensation legislation, which has spread over the United States, has made of accident prevention and the study of accidents an imperative proposition if manufacturing and industrial enterprises are to be carried on with every degree of efficiency possible. In Canada similar conditions prevail. That country has awakened to the enormous economic waste occasioned by industrial accidents and agitation and investigation along these lines are on the increase. State departments are looking into industrial conditions in their commonwealths in so far as they affect the health, safety and general well-being of the workers. The Portland Cement Association, Chicago, through its bureau of accident prevention, has made an interesting compilation relative to that particular industry.

Accidents cost the cement industry in the United States in 1915, \$161,280, made up as follows: Compensation deaths, \$39,894; compensation accidents, \$9,814; days lost, medical treatment, loss of output, etc., \$111,572.

Per Million Barrels Produced.

At the end of 1915 the bureau had on file over 11,000 reports of accidents, 135 of which covered fatalities which occurred during 1913, 1914 and 1915. A summary of the accident figures for the three years during which statistics have been collected, are as follows:—

(All figures—per million barrels of cement produced.)

	1913.	1914.	1915.
Number of accidents reported ...	62.7	74.8	64.0
Days lost due to accidents	7,473.8	11,047.0	5,640.0
Number of no-time lost accidents	21.7	29.1	27.5
Number of accidents causing less than 15 days lost	47.7	60.9	53.4
Number of accidents causing more than 14 days lost	15.8	13.9	11.4
Fatalities	0.8	1.2	0.6

A reduction of 50 per cent. in fatal accidents is shown when compared with the figures for the year 1914. The causes of these fatalities are: Belt, caught between belt and pulley, 2; belt, struck by and thrown, 1; car, railroad, box, run over by, 1; coal dust, spontaneous combustion of, burned by, 1; drowning, 1; earth, sliding, crushed by, 1; electrical, contact with exposed wires, 4; shock from switch, standing on wet ground, 1; shock from switchboard, 440 volts, 1; elevator, working inside, started unexpectedly, 1; explosion, coal dust, burns from, 1; dynamite, 1; falls, from piers, 1; from trestle, struck by car on same, 1; from pulley, started without warning, 1; lightning, struck by, 1; locomotive, started while man was working beneath, 1; locomotive, run over by, while attempting to board, 1; shafting, clothing caught on, 2; fooling, threw rope over, which caught and threw man, 1; stone, falling, all in quarry, 4; suffocation, sliding shale, buried by, 1; sliding coal, buried by, 1; sliding raw material, buried by, 1; sliding stone in storage, buried by, 2; inhalation of gas and dust in feed hopper, 1; total, 35.

Caught by Machinery.

The following summary groups the fatalities for three years under general headings:—

	1915.	1914.	1913.
Caught by machinery	7	21	13
Electrical	6	5	2
Sliding material	6	7	6
Falling stone	4	4	2
Falls	3	6	4
Rolling stock	3	6	5
Explosions and fires	3	5	6
Miscellaneous	3	5	3
	35	59	41

The accident figures for three years according to this classification are shown:—

	Number of accidents.			Number of accidents per million bbls. produced.		
	1913.	1914.	1915.	1913.	1914.	1915.
Hand tools and appliances	451	515	595	8.6	10.2	9.7
General machinery	778	810	709	14.8	16.0	11.6
Electrical apparatus	92	92	59	1.8	1.8	0.9
Rolling stock	295	306	318	5.6	6.0	5.2
Stationary objects	248	225	205	4.7	4.5	3.4
Miscellaneous small objects	1,265	1,715	1,983	24.1	33.9	32.4
Miscellaneous general	163	123	98	3.1	2.4	1.6
Totals	3,292	3,786	3,967	62.7	74.8	64.8

STEEL COMPANIES' AFFAIRS

Mr. Mark Workman, president of the Dominion Steel Corporation, Limited, writes *The Monetary Times* as follows with regard to the rumor of a steel company amalgamation:—

"While I have, of course, heard that an effort is being made to this end, I know nothing of it officially."

Mr. J. K. L. Ross, stated in an interview in Montreal, that he had been a large buyer of Dominion Steel, although he had no connection with any group or effort for control. He was seeking good-looking investments, and Dominion Steel stock looked exceedingly promising. He had bought the Steel and would put it away for a good while at least. Mr. Ross said it was difficult at present to secure good investments, and as he had only secured \$200,000 of the war loan, and not the \$500,000 applied for, he had purchased the steel stock.

A Boston dispatch states that listing of Nova Scotia Steel shares including the \$7,500,000 common is about ready to be announced on the New York Exchange. The listing notice, it is said, will contain a record of earnings promising this year profits better than \$55 per share of common without taking into consideration any earnings from the car-building plant or allowing anything for the development of the ore end of the business.

CREDITORS CLAIM ARNOLD INSURANCE

Mr. W. E. Burns, with C. S. Arnold, appeared for the creditors of the W. R. Arnold estate, before Justice Murphy in the supreme court in reference to the \$450,000 of insurance money which the liquidator of the Dominion Trust collected in his capacity as executor of the estate of the late Mr. W. R. Arnold, and which he proposed to appropriate to the Dominion Trust Company under his right of retainer as a creditor of the estate. Mr. Burns said that the liquidator of the Dominion Trust Company in his capacity as executor of the Arnold estate originally had an undoubted right to retain as a first charge on the estate whatever sums he could lay claim to as a creditor. As the total assets of the Arnold estate are \$426,000, and the claims of the Dominion Trust, apart from the misfeasance charges amount to \$753,000, it meant that there was not a cent left for distribution among the general creditors of the late Mr. Arnold, including the claims of the widow and children under the will.

"In October, 1915," said Mr. Burns, "the liquidator, in his capacity as executor, made a declaration of insolvency. This brought the estate under the operation of the Creditors Trust Deeds Act, which provides that the net estate, after the payment of costs should be held by the administrator as a trustee to be distributed among the creditors according to their priority. The result is that the liquidator has lost his right to hold the Arnold insurance moneys in payment of the claims of the Dominion Trust, and must now rank as an ordinary creditor for a pro-rata share."

Justice Murphy reserved his decision.

The National City Bank of New York has offered a loan of \$5,000,000 at 5½ per cent. to the housing committee of the Dublin corporation, which recommends the acceptance of the offer. The amount is to cover the cost of a scheme for workers' dwellings.

WANT CUSTOM OFFICER AT NEW YORK

Vancouver Business Men See Minister of Customs
—Farming, Industry and Labor

(Staff Correspondence.)

Vancouver, October 9th.

While Hon. Dr. Reid, minister of customs, was on the coast recently, opportunity was taken by Vancouver business men to again ask that a customs officer be stationed in New York to facilitate and make possible the shipment of eastern Canadian goods via the Panama Canal to British Columbia, as well as to make possible the shipment of timber to eastern Canadian points other than by railway. An interested listener was Sir George Foster, acting chairman of the Royal Trade Commission. It was pointed out that his action in refusing to install such an official was forcing business men to buy in the United States goods which could be supplied by eastern Canada. It was cheaper to pay the duty, ship via the canal and land them here than it was to buy in Canada and bring to this coast by railway freight. The matter was discussed at some length by leading merchants and manufacturers, and Dr. Reid said that he was satisfied something could be done which would be satisfactory to east and west alike. He acknowledged that perhaps the matter was more serious than he at first thought.

Coast and Oriental Labor.

When the Royal Trade Commission met at Victoria representation was made by Mr. R. M. Palmer that the British Columbia farming industry was in need of labor and the best way to meet the difficulty was to allow free entry on all classes of labor, white or alien. He declared that the Chinese exclusion bill had doubled the cost of labor to the farmer, without any corresponding benefit. Mr. Palmer was for some years in the provincial department of agriculture, and of late has been farming in Kamloops and the Okanagan. Mr. Ernest McGaffey, secretary of the provincial bureau of information, took the opposite view. He said the way to meet the demand for labor was to bring out immigrants from the Old Country for the work. These men in time took up holdings of their own and raised families.

Asiatics are Farmers.

The question is important in view of the scarcity of labor and particularly for farming and lumbering. While the Chinese would be of help in farm work, they are of no use in the logging camps, but can be used in the mills. The Japanese, against whom there is little or no restriction of entry, do not engage in logging, but they go into the woods and get out large quantities of shingle bolts. To facilitate work at the Ocean Falls plant of the Pacific Mills, Limited, a pulp and paper concern, men had to be secured in Seattle.

LAKE OF THE WOODS MILLING COMPANY

Well known in commercial and financial spheres, the Lake of the Woods Milling Company increased its profits last year, despite loss of its Medicine Hat plant by fire, and other obstacles. The figures for the year ended August 31st, show profits of \$525,141, compared with \$518,920 in the company's previous return. Of these profits bond interest absorbed \$99,000, preferred dividends \$105,000, and common dividends \$168,000. The sum of \$100,000 was written off and \$53,141 carried to surplus account, which stands at \$889,135, after providing \$100,000 for war taxation.

This showing is good. The company's assets are as follow and total \$6,395,230:—

Plant, \$3,042,787; investments, \$300,000; advances, \$181,061; goodwill, etc., \$600,000; equipment, \$66,811; wheat flour, etc., \$1,280,548; accounts receivable, \$843,593; cash, \$80,427.

The liabilities are: Common stock, \$2,100,000; preferred stock, \$1,500,000; bonds, \$900,000; accrued interest, \$13,500; accounts payable, \$892,594; war tax, \$100,000; surplus, \$880,135.

The company's management and directorate are to be congratulated on the excellent report presented.

ADDITIONAL INFORMATION CONCERNING FIRES
ALREADY REPORTED

Saskatoon, Sask.—The report of the fire department for July is as follows:—

July 1—Brick apartment block, owned by S. R. Ross, Ross Block. Supposed fire.

July 3—Frame grocery store of Mrs. F. Simpson, 720-Avenue, I. Cause, lightning. Loss contents, \$483.50; building, \$171. Insurance, St. Paul Fire and Marine, stock, \$800; building, \$900.

July 10—Frame dwelling of D. Bray, 122-J South. Supposed fire.

July 19—Frame dwelling of Mrs. Ferguson, 725th-6th Avenue N., owned by MacIntosh and Simpson. Cause, chimney fire.

July 21—Frame dwelling of W. E. Spafford, 905-Avenue H.N., owned by Wm. Richardson. Cause, overheated stove. Loss, contents, \$1,000; building, \$250. Insurance, American of Newark, St. Paul Fire and Marine, building, \$1,000; contents, \$250.

July 26—Cement dwelling of S. Emmerson, 748-Spad. Crescent, owned by D. S. Smith. Cause, electric iron left turned on. Loss, \$25.

July 28—Frame dwelling of Mrs. N. Tetlaw, 128-11th Street, owned by Wm. Young. Cause, defective chimney. Loss, contents, \$38. Insurance, American of Newark, Scottish Union N.J., building, \$800.

St. Catharines, Ont.—Fire Chief W. J. Early reports the following losses:—

September 2—Box call, saddle factory of W. Cuthbert, Brewery Street. Value, building, \$3,000; value, stock and machinery, \$5,000; insurance, stock and machinery, \$3,000; loss, stock and machinery, \$1,194. Cause unknown. On the top flat of this building was a paper box factory. Value, stock, \$2,000; insurance, stock, \$1,000; insurance, machinery, \$1,000; value, machinery, \$1,800; loss, stock, \$750.

September 18—Phone call. Grocery store of Mrs. Flinn, Welland Avenue. Value, building, \$750; insurance, building, \$500; value, stock, \$600; insurance, stock, \$300; loss, stock, \$250; loss, building, \$400. Cause of fire unknown.

September 22—Phone call. Motor truck. Value, \$800; no insurance; loss small.

September 25—Still alarm in residence of Mrs. Hill. Value, house, \$2,000; value, contents, \$1,700; insurance, building, \$1,300; insurance, contents, \$1,000; loss, building, \$10; loss, contents, nil. Cause, spark from chimney.

September 26—Still alarm. Roof of R. H. Smith's saw works. Value, building, \$20,000; value, contents, \$35,000; insurance, building, \$8,000; insurance, contents, \$18,000; loss, no claim. Cause, spark from chimney.

Winnipeg, Man.—Winnipeg Paint and Glass Company, fire on August 2nd. The insurance was as follows: Aetna, \$6,548; American Central, \$8,185; Alliance, \$6,548; British Crown, \$3,274; British-America, \$3,274; British Colonial, \$4,911; British Northwest, \$3,274; Canadian, \$9,822; Canada National, \$9,822; Continental, \$19,644; Employers', \$3,274; Fidelity-Phenix, \$22,918; Firemen's, N.J., \$4,911; Fidelity Underwriters, \$13,096; Guardian, \$11,459; German-American, \$3,274; General (Perth), \$3,274; General (Paris), \$6,548; Hartford, \$9,822; Home, \$14,733; Hudson Bay, \$3,274; Insurance Company of North America, \$8,185; London Guarantee and Accident, \$3,274; Mercantile, \$9,822; Fire and Marine Underwriters, \$8,185; New York Underwriters, \$6,548; Nova Scotia, \$6,548; National Union, \$6,548; National of Hartford, \$6,548; Providence-Washington, \$4,911; Phoenix of Hartford, \$13,096; Phoenix of London, \$3,274; Protectors, \$3,274; Royal, \$6,548; Rochester Underwriters, \$3,274; Royal Exchange, \$9,822; State of Pennsylvania, \$13,096; Stuyvesant, \$22,918; St. Lawrence Underwriters, \$3,274; Scottish Union, \$8,185; Western, \$3,274; West of Scotland, \$4,911; total, \$327,400. Loss, \$60,000.

General business at St. John has been well maintained since the war began, the bank clearings showing a satisfactory volume of trade. The clearings for the nine months ended September, amounted to \$65,532,334, as against \$56,916,297 in the same period in 1915. New buildings include two schools under construction, and ground is shortly to be broken for The Strand theatre, also an apartment hotel. The McAvity Company has just completed a large machinery plant, which is now working on shell construction.

8% NET FARM MORTGAGES

We want \$1,000 on each of thirty-two quarter sections of first-class land. Principal re-payable in five years; interest payable the First of January and the First of July. All expenses paid by the Mortgagors. Titles examined by MacDonald, Craig, Tarr & Ross.

LEGAL NOTICE

FESS OIL BURNERS OF CANADA, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 12th day of September, 1916, incorporating William Symon Morlock and Reginald Holland Parmenter, solicitors; Samuel Davidson Fowler, solicitor's clerk; Anna Latimer, office clerk, and Winnifred Elizabeth Skelcher, stenographer, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:-

(a) To carry on the business of manufacturers of engines and machinery of all kinds and of all articles and things used in the manufacture, maintenance and working thereof;

(b) To manufacture, buy, sell, lease, repair, alter and deal in crude oil and other burners, appliances, apparatus, implements, machinery, goods, materials, articles, and supplies of all kinds which shall be capable of being used in connection with the business of the company, or likely to be required by customers thereof, or in any way connected with or incidental to the use of any of the products of the company;

(c) To adopt on behalf of the company and to carry into effect (either with or without modification) a certain agreement between A. L. Ellsworth (therein called the Vendor) and Strachan Johnston, of Toronto (therein called the Trustee), dated the eighth day of September, 1916, whereby the said A. L. Ellsworth agrees to sell to the company the undertaking of The Fess System Company of Canada, Limited, a company heretofore incorporated under The Companies Act, 1910-1913 (British Columbia) by Memorandum of Association dated 26th January, 1914, whereby the said A. L. Ellsworth will make profit in shares of the company as shown by said agreement a copy whereof has been filed in the office of the Honorable the Secretary of State of Canada.

(d) To acquire, purchase, take on lease or license, hire, hold, use, sell, grant leases of, grant licenses of, exchange, alienate, dispose of and otherwise deal in or contract with reference to lands or interests in land, personal property of all kinds or interests therein, rights, privileges, licenses and concessions; to manufacture or trade in property and goods of all kinds; to operate construction or building plants and to take and carry out contracts for building or for construction work of any kind, and to undertake, carry on and execute transactions as financial or commercial brokers or agents;

(e) Notwithstanding the provisions of section 44 of The Companies Act, to subscribe for, purchase, assume liability under, acquire, hold, sell, exchange, dispose of or otherwise deal in or contract with reference to bonds, debentures, stocks or other securities or obligations or any estate or interest therein; and to apply or to accept, in whole or in part, as consideration for, satisfaction of or security for any contract, indebtedness or obligation, to or of the company, property, obligations, shares and securities of any kind at such valuation and upon such terms as may be agreed upon;

(f) To acquire, dispose of or otherwise deal in properties, businesses or undertakings of all kinds;

(g) To furnish aid to any business or undertaking similar in whole or in part to that of the company with which the company may have business relations, by way of loan, bonus, endorsement, agreement, guarantee, management or other service, and to manage, supervise and control the same in whole or in part and to act as agent or attorney for the same;

(h) To carry on any other business which may seem capable of being conveniently or advantageously carried on in connection with the business of the company or calculated directly or indirectly to enhance the value of, to facilitate the realization of or to render more profitable any of the company's businesses, properties or rights;

(i) To invest the moneys of the company not immediately required in such investments as may from time to time be determined;

(j) To co-operate in, aid in, subscribe towards or subsidize any proceeding or undertaking which may seem calculated directly or indirectly to benefit the company;

(k) To acquire or undertake the whole or any part of the business, property and liabilities of any person, partnership, association or company having objects altogether or in part similar to the company or carrying on any business which the company is authorized to carry on or possessed of property which may seem suitable or desirable for the purposes of the company;

(l) To apply for, purchase or otherwise acquire and to protect, prolong and renew patents, patent rights, trade-marks, formulae, licenses, protections, concessions and the like, conferring or relating to any exclusive or non-exclusive or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, improve, develop or grant licenses in respect of or otherwise turn to account the property, rights or information so acquired;

(m) To enter into partnership or into any arrangement for sharing of profits or expense, union of interests, co-operation, joint adventure, reciprocal concessions or otherwise, with any person, partnership, association or company carrying on or engaged in, or about to carry on or engage in, any business or transaction which the company is authorized to carry on or engage in, or any business or transaction which may seem capable of being conducted so as directly or indirectly to benefit the company, and to lend money to, guarantee the contracts of, or otherwise assist any such person, partnership, association or company, and to take or otherwise acquire shares and securities of any such partnership, association or company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same;

(n) To take or otherwise acquire and hold shares in any partnership or stock or shares in any association or company having objects altogether or in part similar to those of the company or carrying on any business which may seem capable of being conducted so as directly or indirectly to benefit the company;

(o) To apply for, promote and obtain from the Dominion of Canada or any other authority, whether Dominion, Provincial, Imperial, Colonial or foreign, and including subordinate and municipal authorities, any statute, ordinance, order, regulation or other authorization or enactment which may seem desirable to the company or calculated directly or indirectly to benefit the company;

(p) To enter into any arrangements with any governments or authorities, supreme, provincial, civic, municipal, local or otherwise, that may seem conducive to the company's objects or any of them, and to obtain from any such government or authority any statutes, ordinances, licenses, contracts, orders, regulations, decrees, rights, powers, franchises, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with the terms of the same;

(q) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company or of its predecessors in business or of any person, partnership, association or company allied with the company in business or subsidiary to the company or in which the company holds shares or securities, or to benefit the dependents or connections of such persons, and to grant pensions and allowances, and to make payments towards insurance and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object;

(r) To promote, form, organize, manage, develop, take interests or stock or shares in and assist financially or otherwise, any partnership, association or company for the purpose of acquiring or taking over all or any of the property and liabilities of the company, or for any other purpose which may seem calculated directly or indirectly to benefit the company;

(s) To acquire, purchase, take on lease, hire, construct, improve, own, maintain, operate, manage, carry out and control, plant, equipment, machinery, supplies, buildings, works, shops, warehouses, manufactories, pumps, tanks, tank cars, pipe lines, smelters, refineries, roads, ways, canals, bridges, electric works, electric plant, hydraulic works, hydraulic plant, boats, ships, docks, wharves, piers, gas works, cables, waterworks, reservoirs, aqueducts, flumes, ditches, and all such other structures, works, conveniences and appliances as may seem calculated directly or indirectly to advance the company's interests, and to contribute to, subsidize or otherwise assist or take part in the acquisition, purchase, leasing, hiring, construction, improvement, ownership, use, maintenance, operation, management, carrying out or control thereof;

(t) Where such course is required for the purposes of the company or may seem calculated directly or indirectly to advance the company's interests, to acquire, purchase, take on lease, hire, construct, improve, own, use, maintain, operate, manage, carry out and control, but only upon lands owned or controlled by the company, or over which the company may have a right of license to that effect, such roads, ways, bridges, lines of rail, spurs, sidings, tracks, rolling stock, cables, wires, motors, locomotives, electrical plant and all such other structures, works, conveniences and appliances as may be required for the purpose of maintaining communication by telegraph or telephone, or of effecting the transport of goods or passengers, and to contribute to, subsidize or otherwise assist or take part in the acquisition, purchase, leasing, hiring, construction, improvement, ownership, use, maintenance, operation, management, carrying out or control thereof;

(u) To draw make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments;

(v) To sell or dispose of the property or undertaking of the company, or any part thereof, for such consideration as the company may think fit, and in particular, and notwithstanding the provisions of section 44 of The Companies Act, for shares, debentures or securities of any other partnership, association or company;

(w) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations;

(x) To sell, exchange, lease, dispose of, turn to account or otherwise deal with or contract with reference to all or any part of the property and rights of the company;

(y) To consolidate or amalgamate with any other company having objects similar in whole or in part to those of the company;

(z) To procure the company to be registered, licensed or otherwise recognized in any foreign country, and to designate and appoint persons therein as attorneys or representatives of the company with full power to represent the company in all matters according to the law of such foreign country, and to accept service for and on behalf of the company of any process or suit;

(aa) To pay out of the funds of the company all or any of the expenses of or incidental to the formation and organization thereof; to employ, contract with and with the approval of the shareholders provide for the remuneration of brokers, commission agents and underwriters upon any issue of shares, bonds, debentures, debenture stock or other securities of the company;

(bb) To distribute or divide assets of the company in specie amongst the shareholders;

(cc) To do all or any of the above things as principals, agents, contractors or otherwise, and either alone or in conjunction with others;

(dd) To do all such other things as may seem directly or indirectly to be incidental or conducive to or convenient or proper for the accomplishment of the purposes or the attainment of the objects of the company, or any of them, or expedient for the protection or benefit of the company;

(ee) No power granted in any paragraph hereof shall be limited or restricted by reference to or inference from the terms of any other paragraph hereof.

The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Fess Oil Burners of Canada, Limited," with a capital stock of one hundred thousand dollars, divided into 1,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 14th day of September, 1916.

THOMAS MULVEY,

Under-Secretary of State.

LEGAL NOTICES

BARCALO MANUFACTURING COMPANY OF CANADA, LIMITED.

Public Notice is hereby given that under the First Part of Chapter 79 of the Revised Statutes of Canada, 1906, known as "The Company Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 30th day of August, 1906, (1916), incorporating Edward Joel Barcalo, Bryant Burwell Glennay, Jr., Alban Wilkinson Kirton, Charles Vallone and Frank Anderson, manufacturers, all of the City of Buffalo, in the State of New York, one of the United States of America, for the following purposes, viz.:-

(a) To manufacture, purchase, import or otherwise acquire and to sell, export, exchange and otherwise dispose of and generally deal in all kinds of materials, goods, wares and merchandise;

(b) To do all and everything necessary, suitable and proper for the accomplishment of any of the purposes or the attainment of any of the objects or the furtherance of any of the powers hereinbefore set forth, either alone or associated with other corporations, firms or individuals, and to do any other act or acts, thing or things incidental or pertaining to, or growing out of, or connected with the aforesaid business, or powers, or any part or parts thereof, provided the same be not inconsistent with the law under which this corporation is organized.

The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Barcalo Manufacturing Company of Canada, Limited," with a capital-stock of ten thousand dollars, divided into 100 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 31st day of August, 1916.

THOMAS MULVEY,
Under-Secretary of State.

CANADA LIGHT, HEAT AND WELDING COMPANY

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 8th day of September, 1916, incorporating Willis Bertram Sturupp, Law Clerk; John Fraser MacGregor, Accountant; Craig Allan St. Clair McKay and James White Bicknell, Students-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:- (a) To manufacture, buy, sell and deal in calcium carbide, chemical products, generators, burners, mantels, lamps, meters, apparatus, appurtenances and appliances connected with a light, heat and welding business; (b) To carry on the business of a light, heat and welding company in all its branches, provided, however, that any sale, distribution or supplying of any light and heat shall be subject to local and municipal regulations in that behalf; (c) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (d) To acquire or undertake the whole or any part of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company; (e) To apply for, purchase or otherwise acquire, any patents, licenses, concessions and the like, conferring any exclusive or non-exclusive, or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property, rights or information so acquired; (f) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in or any business or transaction capable of being conducted so as directly or indirectly to benefit the company, and to lend money to, guarantee the contracts of or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (g) Subject to section 44 of the said Act, to take or otherwise acquire and hold, shares in any other company having objects altogether or in part similar to those of the company, or carrying on any business capable of being conducted so as directly or indirectly to benefit the company; (h) To enter into any arrangements with any authorities, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions; (i) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company (or its predecessors in business) or the dependents or connections, of such persons, and to grant pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object; (j) To promote any company or companies for the purpose of acquiring or taking over all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company; (k) To purchase, take on lease or in exchange, hire or otherwise acquire, any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business and in particular any machinery, plant, stock-in-trade; (l) To lend money to customers and others having dealings with

the company and to guarantee the performance of contracts by any such persons; (m) To sell or dispose of the undertaking of the company or any part thereof for such consideration as the company may think fit, and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of the company, if authorized so to do by the vote of a majority in number of the shareholders present or represented by proxy, at a general meeting duly called for considering the matter and holding not less than two-thirds of the issued capital stock of the company; (n) To adopt such means of making known the products of the company as may seem expedient, and particular by advertising in the press, by circulars, by purchase and exhibition of work of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (o) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (p) To do all or any of the above things and all things authorized by the Letters Patent or Supplementary Letters Patent, as principals, agents, contractors or otherwise, and either alone or in conjunction with others; (q) To do all such other things as are incidental or conducive to the attainment of the above objects and of the objects set out in the letters patent and supplementary letters patent. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere, by the name of "Canada Light, Heat and Welding Company, Limited," with a capital stock of one million dollars, divided into 10,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 11th day of September, 1916.

THOMAS MULVEY,
Under-Secretary of State.

G. F. COLE COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 23rd day of September, 1916, incorporating James Steller Lovell and Charles Delamere Magee, accountants; William Bain, bookkeeper, and Robert Gowans and John Joseph Dashwood, solicitors' clerks, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:- (a) To manufacture, import, export, buy, sell and deal in all kinds of drawing and engineering instruments, supplies and scientific instruments; (b) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (c) To acquire or undertake the whole or any part of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company; (d) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (e) To take or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of the company or carrying on any business capable of being conducted so as directly or indirectly to benefit the company; (f) To lend money to customers and others having dealings with the company, and to guarantee the performance of contracts by any such persons; (g) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (h) To sell or dispose of the undertaking of the company or any part thereof for such consideration as the company may think fit, and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of the company; (i) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (j) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere, by the name of "G. F. Cole Company, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 26th day of September, 1916.

THOMAS MULVEY,
Under-Secretary of State.
BLAKE, LASH, ANGLIN & CASSELS,
Solicitors for the company.

Mr. W. Sturgis Macomber, bond broker, 35 Wall Street, New York, has opened a Canadian public utility and industrial department, in addition to handling government, provincial and municipal issues.

DIVIDENDS AND NOTICES

TENDERS FOR PULPWOOD AND PINE LIMIT

Tenders will be received by the undersigned up to and including the 1st day of December next for the right to cut pulpwood and pine timber on a certain area situated on the Pic River and other territory adjacent thereto, in the District of Thunder Bay.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet, board measure, on pine, that they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, and \$2.00 per thousand feet, board measure for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario—the paper mill to be erected when directed by the Minister of Lands, Forests and Mines.

Parties making tender will be required to deposit with their tender a marked cheque, payable to the Honorable the Treasurer of the Province of Ontario, for twenty-five thousand dollars (\$25,000), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said \$25,000 will be applied on account of bonus dues as they accrue, but the regulation dues, as mentioned above, will require to be paid in the usual manner as returns of cutting of wood and timber are received.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned,

G. H. FERGUSON,

Minister of Lands, Forests and Mines.

Toronto, August 28th, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

The Merchants Bank of Canada

QUARTERLY DIVIDEND

Notice is hereby given that a dividend of Two and one-half per cent. for the current quarter, being at the rate of Ten per cent. per annum, upon the Paid-up Capital Stock of this Institution, has been declared, and will be payable at its Banking House in this city and at its Branches, on and after the 1st day of November next to Shareholders of record at the close of business on the 14th day of October.

By order of the Board,

D. C. MACAROW,

General Manager.

Montreal, 26th September, 1916.

The Canadian dollar is now being quoted on the Paris exchange. This has been done by the French minister of finance and the brokers' syndicate at the request of Canadian exporters, many of whom have representatives now in Paris. The occurrence of wide fluctuations in the exchange markets makes this move of interest to Canadian export firms.

DIVIDENDS AND NOTICES

The Consumers' Gas Company of Toronto

The Annual General Meeting of the Shareholders of the Consumers' Gas Company, of Toronto, to receive the report of the directors, and for the election of directors for the coming year, will be held in the Company's Board Room, No. 17 Toronto St., on Monday, the 30th day of October, 1916, at 12 o'clock noon.

ARTHUR HEWITT,

General Manager.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; "Positions Vacant," "Agents or Agencies Wanted," 3c. per word; other condensed advertisements, 3c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over \$5,000.00, and he has built up a future income of over \$3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

FIRE INSURANCE INSPECTOR.—Young married man, six years' experience in the business, would like position as Inspector; have covered the four Western Provinces; best of references and bond if necessary. Apply Box 7, *The Monetary Times* Office, 1208 McArthur Building, Winnipeg.

MOOSE JAW RENTAL AGENTS.—The Ralph Manley Agency, Limited, Walter Scott Block, Moose Jaw, handle the renting of Moose Jaw Improved City Property. Their facilities permit them to rent and re-rent property as well as looking after collections and any necessary repairs. Established 1908. Correspondence solicited.

DEBENTURE STOCK, SAVINGS CERTIFICATES

These Securities Provide New Opportunities for Canadian Investors

Dominion of Canada five per cent. three-year debenture stock, maturing October 1st, 1919, with interest from date of purchase payable by cheque free of exchange, is being issued by the department of finance for purchase by investors. Mention of this proposed issue was made in *The Monetary Times* some time ago. The new stock issue will be available for purchase at par at any time, and will afford an opportunity for investment between the war loans made, the third one of which is expected early next year. Particulars of the stock will be given at an early date. The government will accept this stock from purchasers at par with accrued interest in lieu of cash in payment of any allotment under future Canadian war loan issues.

Baby Bonds for Small Investor.

In addition to the stock, the government will probably provide also for the issue of war savings certificates of small denominations. These certificates, bearing the same rate of interest as the debenture stock issue, will give opportunity for those with small amounts to invest from time to time to place their savings to the national credit, secure a good rate of interest for themselves, and at the same time provide funds for defraying Canada's war expenses.

The combination of war loans, debenture stock issue, and war savings certificates is anticipated to bring the treasury a steady supply of funds.

Save, Save, Save.

Sir Thomas White has made the following statement:—

"In carrying out the campaign of national savings for war purposes which he has in view the minister of finance will utilize the three thousand and more branches of the chartered banks and the post office savings branches throughout the Dominion.

"The minister's idea is to provide facilities whereby individual savings from one dollar up may be accumulated in a special war savings account until a certain sum is reached when the privilege will be given the depositor of purchasing war savings certificate of the Dominion government, which will be most attractive as a short date investment security and whose terms will be such as to encourage the holder to retain it until maturity.

"To work out the details of the proposal and arrange for the effectual co-operation of the banks, the minister has asked a committee of the Bankers' Association to confer with the deputy minister of finance who has had the plan of the minister under consideration for some time past. The carrying out of the campaign will involve extensive advertising by both the Dominion government and the banks and in this connection the minister favors a steady, persistent, rational propaganda and not one of the sensational or whirlwind variety.

"Upon his return from England he will speak throughout the country upon the subject and arrange any further organization that may be necessary to make the scheme a success. Apart from the advantage of the plan in assisting the war finance of the Dominion government and incidentally the Imperial government in meeting its obligations on works placed in Canada, the national benefit to be derived from increased savings will be apparent to all."

FOR THE EMPIRE'S WOUNDED

Over \$20,000,000 have been given for the noble work of the British Red Cross Society, and more is needed. The empire-wide appeal has gone out from the motherland. Last year Ontario gave \$1,514,000. Can we do less this year when the need is greater? October 19th is the day. Give your share to the local treasurer, or send it to Hon. T. W. McGarry, provincial treasurer, Toronto.

The expenses of the joint war committee are estimated to be about \$170,000 a week, and during the coming year the need is expected to reach the total of \$8,750,000.

DEBENTURES FOR SALE

TOWN OF HERBERT, SASKATCHEWAN.

Sealed tenders will be received until noon of the 23rd October, 1916, by the undersigned for the following debentures which are to be repayable in equal annual instalments of principal and interest combined.

\$2,000.00 for draining and grading streets repayable in ten years with interest at 6½% per annum.

\$800.00 for building plank sidewalks repayable in seven years with interest at 6½% per annum.

G. L. WHEATLEY,
Town Clerk.

LEGAL NOTICE

McGART NOVELTY AND TOY COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the first part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the seal of the Secretary of State of Canada, bearing date the 13th day of September, 1916, incorporating Lester Millman Keachie, student-at-law; Sophia Tutty, bookkeeper, and Susie Ross, Ella Lester Kelly and Myrtle Etoile Thurgarland, stenographers, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture, buy, sell and otherwise deal in all kinds of household furniture, fixtures, appliances and all kinds of toys, games, playthings, novelty and fancy goods, and to sell and manufacture any and all articles, materials and things used in the manufacture, maintenance and working thereof, and also all apparatus and implements and things for use in sports, games or household purposes; (b) To apply for, purchase or otherwise acquire and work the whole or any interest or interests in patents, brevets d'invention, licenses, concessions and the like, and to acquire any real or personal property; (c) To acquire and carry on any business or undertaking calculated directly or indirectly to benefit the company's business or property on such terms as it may deem proper, and to acquire and hold shares in any other company; (d) To sell or dispose of or otherwise deal with the undertaking, property or rights of the company or any part or parts thereof from time to time for such consideration as the company may think fit, and in particular the shares, debentures or securities of any other company, and to promote any company or companies for taking over all or any of the property or liabilities of the company, or for any other purposes calculated to benefit the company; (e) To acquire and undertake the whole of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on or possessed of property suitable for the purposes of the company or calculated to advance the interests of the company; (f) To buy, sell, repair, alter and deal in apparatus, machinery, materials and articles of all kinds which shall be capable of being used for the purposes of any businesses herein mentioned or likely to be required by customers of any such business; (g) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "McGart Novelty and Toy Company, Limited," with a capital stock of forty thousand dollars, divided into 400 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 19th day of September, 1916.

THOMAS MULVEY,
Under-Secretary of State.

A Free Course In "Salesmanship"

We have thought about the young man who sees no prospects ahead. Would you like to be in a business that will give you

**A Good Living Wage
A Profitable Future
A Provision For Old Age**

We teach a man the Insurance Business, which offers permanent success, does not fluctuate, is a professional occupation, and has been truly named "The best paid hard work in the world."

This is done by a correspondence course and personal assistance, free of charge.

When he is fully prepared for the work, we place him in a position and help him to make good

The first two lessons of the Company's correspondence course will be sent to anyone interested. It will pay young men who desire to get on in the world to look into this

All correspondence strictly confidential.

CANADA LIFE ASSURANCE CO.
HEAD OFFICE, TORONTO.

Prosperous and Progressive

Up-to-date business methods, backed by an unbroken record of fair-dealing with its policyholders, have achieved for the Sun Life of Canada a phenomenal growth.

To-day, the Company operates actively in forty-two countries and upon five continents.

In the past six years its assurances in force have nearly doubled; in the past eleven years they have more than trebled.

More than 166,000 of its policies are now in force for assurances totalling over \$265,000,000—much the largest amount carried by any Canadian life company.

*Note.—It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending August, 1916, were: imports 1916, \$50,627,035; 1915, \$122,473,271, and exports 1916, \$275,544,713; 1915, \$94,838,702. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

Germany Loses Five Billions of Trade

MILITARISM *Pays the Price in Trade Losses Which Cannot be Counterbalanced by Closer Economic Ties with Austria-Hungary, Turkey and Bulgaria—Bright Outlook for Britain and the Allies.*

GERMANY has lost, since the beginning of the war, about \$5,000,000,000 worth of trade. The British Export Gazette, in disclosing the above conditions, says the supreme folly and madness of the Prussian military hierarchy in precipitating the world war cannot be better illustrated than by the figures of the commerce the German nation has absolutely thrown away since it started. Judging from the actual trade volumes of 1913, the last normal year before hostilities broke out, the enemy's total loss at date, if imports and exports are included, cannot be less than the stupendous sum of \$5,000,000,000 in regard to transactions with the Allies alone, or about half what would have been Germany's total trade with all countries for the period in question. None of this huge loss can, of course, ever be recovered. Put into concrete form, and taking 1913 as a standard for calculation, Germany so far has lost \$935,000,000 in exports to the British Empire; \$402,500,000 to France and French possessions; \$480,000,000 to Russia; \$270,000,000 to Belgium; \$100,000,000 to Italy; and another \$100,000,000 to the other countries with which she is at war, or, in round figures, nearly \$2,500,000,000. In return she would have received raw materials, produce and manufactures to the value of \$585,000,000 from the British Empire, \$330,000,000 from France and French possessions, \$722,500,000 from Russia, \$170,000,000 from Belgium, \$77,500,000 from Italy, and \$55,000,000 from other countries she is fighting—another \$2,500,000,000 in round figures.

We need scarcely point out how preposterous it is for Germany to imagine that such gigantic losses can be commercially compensated by the suggested closer economic ties with her own allies, Austria-Hungary, Turkey and Bulgaria. Her normal trade with these three countries amounted to only a little more than \$500,000,000, including both imports and exports. How much of the commerce of these derelict nations do German manufacturers imagine will remain to them after the war? From the economic point of view they will possess practically no value as trade factors for decades, all being virtually bankrupt and absolutely devoid of all credit.

On the other hand, the figures we have quoted should provide nothing but encouragement for Great Britain and her Allies. Germany's annual loss of \$500,000,000 in exports alone will, when conditions are once again normal, and she finds herself cut off for decades from all com-

mercial intercourse with the entente powers, mean just so much additional interchange of trade between the nations now fighting side by side for the salvation of the world from Prussian dominance. That is a prospect of inspiring significance, and should act as a clarion call to the manufacturers and workers of the allied powers for the utmost exertion of output in the days that will follow the coming peace.

The idea of a Central European commercial union between Germany, Austria-Hungary and Turkey is discussed in the German press, but no record of official action corresponding to that taken by the Entente Allies is to be found in the European press. Franz Koehler, in a book entitled "The New Triple Alliance," wrote:

"It will be the principal aim of this combination to regulate offer and demand between the individual countries according to their mutual interests and needs. So, for instance, the demand for breadstuffs satisfied up till now by Russian and American imports, will have to be filled by the newly acquired eastern countries and also by Turkey. This will lead principally to a regulation of the imports from the individual states which will have to be suited to the demand of the others. Egypt and Turkey are the only countries in this combination of states producing cotton.* Copper will be found in future to some extent in Servia and still more in Turkey. Besides copper, Turkey also will be able to supply paraffin in sufficient quantity to make independent the new combination from foreign supplies."

It is also contemplated by those who support such a scheme to turn Germany, Austria-Hungary, Turkey and Bulgaria into an economic unit, self-containing, and self-supporting, independent from the other countries.

While this idea certainly finds considerable support from certain German interests others have pointed out the difficulties of such an enterprise. Also they have shown that even if carried to completion, it hardly would compensate Germany for the loss of her ante-bellum commercial position.

Many objections against it have been raised not only by German economists, but also by merchants and manufacturers interested in the continuation of German foreign trade. Owing to the interruption of the mail service and

*Practically all German comment dates back several months and was based on the German hope then entertained of a return of Egypt to Turkey.

the difficulty of obtaining German journals of all descriptions, it is, however, impossible to say how far the discussion has gone.

A conference of leading commercial associations of Germany interested in the foundation of a Central European Zollverein was held in Munich. The London Times Trade Supplement of July, 1916, says:—

"Some fairly outspoken views on behalf of the three nations involved came out at Munich, where a joint conference was recently held of the leading commercial associations. Germany was upheld by 460 representatives, Austria by 100, and Hungary by 40.

"Dr. Gustav Stolper (Vienna) insisted that any commercial union of the Central Empires should be accompanied by a strong political union, in view of the financial burden to be borne and the prime necessity of ensuring supplies of raw materials. For both these reasons a speedy resumption of international trade relations was, in his opinion, imperative.

"Hungary's watchfulness over her agrarian interests was voiced by Dr. Gratz, of Budapest, who stipulated that each member of the Union should undertake to fill

its requirements in raw materials—particularly agricultural—from within the Union. He alluded to the damage done to Hungarian trade in agricultural produce by German import duties. If this protection were fully maintained against outsiders, he looked forward to great developments.

"A more despondent note was struck by Professor Herkner, of Berlin. He recognized the serious financial straits Germany would be in after the war through the need for importing far more goods than it would for a long time be in a position to export. He said:

"A system of interdependence between ourselves and our allies is impossible. A growth of one and a half milliard marks in trade within the Union would not free us from the necessity for regaining international custom amounting to eight and a half milliards. Furthermore, merely to win this back would not suffice to ease the financial burden left by the war. . . . There is no doubt that we must place the fruits of our industry in ever-increasing volume on the world's markets, and our allies will need to do the same. The idea of a self-sufficient Central European Union is fallacious."

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Waterloo, Ont.—The council is expected to issue \$5,000 bonds for patriotic purposes.

St. Romuald d'Etchemin, Que.—The by-law to borrow \$25,000 is to be voted on October 30th.

Kitchener, Ont.—The council has passed a by-law to issue \$12,000 bonds for patriotic purposes.

Quebec, Que.—The council is applying to the provincial legislature for authority to borrow \$796,000 for civic purposes.

Saanich, B.C.—An issue of \$10,000 5½ per cent. 15-year local improvement bonds has been awarded to Messrs. Macneill and Young, Toronto.

Saskatchewan.—The following bonds have been reported sold to the firms mentioned:—

School Districts.—Dubois Lake, \$1,200. Saskatchewan General Trust Corporation; Eagle Point, \$800. Nay and James, Regina, Sask.

Rural Telephones.—Lawson, \$9,000. J. A. Thompson, Winnipeg; Round Lake, \$5,000. H. O'Hara and Company, Toronto; Cana, \$11,000. Nay and James, Regina; Shallow Lake, \$6,700. Nay and James, Regina; Ponnant Northern, \$10,000. W. L. McKinnon and Co., Regina; Oak Knoll, \$4,600. H. O'Hara and Company, Toronto; Pelly, \$6,000. Nay and James, Regina; Big Quill, \$8,300. Nay and James, Regina; Shaunavon Pioneer, \$3,600. Nay and James, Regina; Eden Valley, \$5,900. Goldman and Company, Regina.

Saskatchewan.—The following is a list of authorizations granted by the local government board:—

School Districts.—Foxdale, \$1,200, not ex. 8 per cent. instalment. A. N. Pugh, Foxdale; Rock Plains, \$1,600, not ex. 8 per cent. annuity. O. C. Morey, Lovernia; Eston, \$2,000, not ex. 8 per cent. annuity. L. H. Horncastle, Eston; Peronne, \$1,800, not ex. 8 per cent. instalment. Clint Hartman, Kyleville.

Rural Telephone Companies.—North Webb, \$5,000, not ex. 8 per cent. annuity. C. Williams, Webb; Ponass Lake, \$10,600, not ex. 8 per cent. annuity. E. Wilson, Ponass Lake; Kerrobert Northern, \$11,000, not ex. 8 per cent. annuity. R. H. Rudd, Kerrobert; Eddy, \$450, not ex. 8 per cent. annuity. E. J. Stoner, Bulvea; Khedive, \$5,600, not ex. 8 per cent. annuity. W. A. Parrett, Khedive; Verdun, \$4,600, not ex. 8 per cent. annuity. C. F. Ranson, Kipling; Sovereign, \$12,000, not ex. 8 per cent. annuity. A. W. Staples, Sovereign.

Tribune Village, \$1,000, 7-years, not ex. 8 per cent., and \$1,900, 10-years, not ex. 8 per cent. A. W. Ivey, Tribune.

Saltcoats Town, \$16,000, 20-years, 6½ per cent. D. G. Fisher, Saltcoats.

GROWING CREDIT OF BRITISH EMPIRE

There are many indications that we have entered an important new stage in the economic struggle with Britain's enemy, and it is one in which the developments may conceivably be of a rapid and startling character. In the first place, we have already witnessed during the past month an appreciable improvement in the exchange of practically every neutral country on London, an improvement, moreover, which has coincided with a corresponding depreciation in the German mark, writes Mr. A. M. Kiddy in the Journal of the Canadian Bankers' Association. And, to quote one instance alone, it may be noted that whereas for a very considerable period the British sovereign was at a discount in Switzerland, owing to the exceptional exports from that country, the discount has now given place to quite a substantial premium. In the case of the New York exchange, it can be frankly admitted—for there is no desire here, as in Berlin, to hide the essentials of the position—that the steadiness is largely due to the remedial measures adopted, but even in this connection the point to be remembered is that these measures have been adopted to cover a period of special strain during the months which have just come to a close. There are, however, good grounds for assuming that the improved condition of the foreign exchanges—in other words, the growing credit of the British Empire—will steadily increase in the near future.

SEPTEMBER COBALT ORE SHIPMENTS

The following are the shipments for month ended September 30th:—

	Tons.
Beaver Consolidated Mine	35
Coniagas Mines	79.7
Dominion Reduction Company	125
Hudson Bay Mine	30
La Rose Mines, Limited	91
McKinley-Darragh-Savage Mines	130.8
Mining Corporation of Canada (Townsite City Mine)	38
Nipissing Mining Company	615.2
O'Brien Mine	33
Penn-Canadian Mine	83
Right-of-Way Mine	20
Temiskaming Mining Company	41.5
Trethewey Silver Mines	44.8

Total	1,368.1
From New Liskeard—	
Casey Cobalt Mine	27
From Elk Lake—	
Miller Lake O'Brien	20
From Porquis Junction—Nickel Ore—	
Alexo Mine	384.6

NEW INCORPORATIONS

Twenty-two Charters Granted with Total Capitalization of \$4,263,000

Canada's new companies incorporated this week number 22. The head offices of these companies are located in four provinces. The total capitalization amounts to \$4,263,850.

The largest companies are:—

Bell Automatic Shocker, Limited \$1,000,000
Inspiration Gold Mines, Limited 2,000,000

Grouping the new concerns, according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Ontario	13	\$2,944,850
Quebec	3	99,000
Manitoba	3	1,045,000
New Brunswick	3	175,000
	22	\$4,263,850

The following is a list of charters granted during this week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Belleville, Ont.—The Earle and Cook Company, Limited, \$40,000. H. C. Earle, J. W. Cook, H. F. Ketcheson.

Port Arthur, Ont.—Central Buildings, Limited, \$400,000. A. J. McComber, G. A. McTeigue, A. Paterson.

Gravenhurst, Ont.—Slater and Company, Limited, \$40,000. W. H. Clipsham, Irene M. Finn, Anna M. Reid.

Ida, Ont.—North Cavan Rural Telephone Company, Limited, \$450. L. H. Winslow, J. A. Vance R. McCamus.

Union Point, N.B.—Nashawaak Pulp and Paper Company, Limited, \$75,000. L. H. Bickford, M. S. Bird, H. J. Chisholm.

Loiselleville, Ont.—Sandwich West Co-operative Telephone Company, Limited, \$9,400. C. C. Chauvin, C. Moore, W. Pajot.

Tillsonburg, Ont.—The Tillsonburg Foundry and Machine Company, Limited, \$25,000. S. E. Dykeman, D. J. Downs, F. J. Bushnell.

St. John, N.B.—American Globe Laundries, Limited, \$100,000. J. C. Salmon, A. Florence Coughlan, Gladys L. Dodge; Hatheway Syndicate, Limited, \$5,000. J. G. Harrison, H. P. Robinson, P. W. Thompson.

Montreal, Que.—Millinery Company, Limited, \$30,000. A. Roy, R. Jodoin, A. Yvon; Mount Royal Securities, Limited, \$20,000. P. Caumartin, L. Barry, L. S. Jaslow; Compagnie d'Epicerie Nationale, Limitee, \$49,000. H. Rivard, C. Beauchemin, A. Langevin.

Toronto, Ont.—Inspiration Gold Mines, Limited, \$2,000,000. A. Fasken, G. H. Sedgewick, F. H. Hurley; the White Company, Limited, \$40,000. W. M. Cox, H. A. Harrison, W. J. Beattie; Pressed Metals, Limited, \$60,000. O. J. P. Crick, J. H. Chewett, E. V. Boyd.

Winnipeg, Man.—Bell Automatic Shocker, Limited, \$1,000,000. R. W. Killey, D. L. Bastedo, F. M. Burbidge; the Dominion Sheet Metal and Roofing Company, Limited, \$5,000. I. Jones, G. W. Reckie, J. M. Isaacs; Gas Economizer, Limited, \$40,000. H. W. Hollis, A. B. Alexander, P. W. James.

Ottawa, Ont.—D. L. Campbell, Limited, \$40,000. S. R. Broadfoot, D. L. Campbell, Ida M. Campbell; George Higman and Sons, Limited, \$50,000. G. Higman, Sr., G. Higman, Jr., H. S. Higman; Maxville Creamery Company, Limited, \$40,000. R. M. Easton, C. L. Bray, N. M. Retallack; Ocean Steamship Company, Limited, \$200,000. C. Pringle, N. G. Guthrie, W. E. Stitt.

"That no money invested in a Canadian mortgage corporation debenture has ever been lost," is a statement contained in an attractive booklet issued by the Standard Reliance Mortgage Corporation, 88 King Street East, Toronto. Another of this company's booklets, which will be sent to any applicant free, is "Profits from Savings," which contains interesting statistics.

PROBING EMPIRE'S RESOURCES

Interesting Evidence Before Dominions Royal Commission—Investment of Capital

Problems of immigration, trade, transportation, mining, milling, cable rates and imperial reorganization were among the subjects discussed during the investigations of the Dominions Royal Commission in Toronto this week.

A number of witnesses were heard on immigration "The younger children are brought into the country the better," declared Mr. Alfred B. Owens, of the Barnardo Homes, testifying on this matter. Those who came to Canada at six or eight years of age grew up readily with the country and made good citizens. More than 5,000 of the Barnardo boys who had been brought to Canada have enlisted, according to Mr. Owens. He thought it better that the children should be placed first in Ontario, going west later, if desired, after they had become accustomed to the climate and the ways of the country.

Ocean Freight Rates.

Two important witnesses were heard in regard to ocean freight rates. Mr. C. B. Watt, representing the Dominion Millers' Association, claimed that excessive freight rates were charged by the railways for the shipment of flour. The rates had been unduly increased, as compared with the rates charged for wheat. This was an unfair handicap for the milling industry, and he suggested that an effective remedy might be found by the government purchasing and operating a line of steamships in competition with the boats of the railways. He declared it was nothing but shortsightedness that prevented action in the manner suggested; \$800,000,000 had been spent in Canada on railways and canals to provide ample transportation facilities for the products of the country.

Yet with all this, the producers could only ship their commodities to the seaboard, and not direct to the great outside markets at reasonable rates. He thought it would be infinitely better for the general welfare of the country that the government should have absolute control of all transportation facilities, including shipping. The present system of control, by which rates were made subject to the approval of the Dominion Railway Board, might be all right in theory, but it was bad in practice. Private ownership of transportation facilities was all right in some respects, but it required competition to get rates down to a proper level, and that could be provided by the government.

Rates Too High.

Mr. T. Marshall, traffic expert of the Toronto board of trade, also gave evidence regarding railway and ocean ship freight rates and bills of lading. He considered ocean rates were too high and favored an investigation under government auspices to ascertain if same were justifiable. He thought the railway companies should not be allowed to own, operate and control shipping, and pointed out that in the United States the railways were not permitted to own steamships. He admitted that ocean rates from Canadian ports to England were practically the same as those from New York to England. This had been brought about by a combination of the shipping interests. Mr. Marshall did not consider it beneficial that the dockage facilities at the ports should be controlled by the railways. Regarding bills of lading, he contended there was unfair discrimination between incoming and outgoing shipments. The former contained a contracting out clause indemnifying against damage caused by negligence, which was omitted from the latter. Another matter requiring a remedy was the clause limiting the amount that could be collected for damage to goods caused by negligence when coming into the country.

Analysis of Trade.

Mr. C. Hamilton Wickes presented two written statements to the commissioners at their request, and dealing exhaustively with trade intelligence, exhibitions, statistics, trade competition, tenders, communications and the Panama Canal. In giving evidence, he discussed clearly and logically the reasons for the supremacy of the United States manufacturer in the Canadian market. He stated that 94 per cent. of the \$260,000,000 worth of goods imported into Canada every year came from the United States. He attributed the success of the Americans to their splendid consular service and to their close proximity to the Canadian

consumer. As a result, the standards of the United States had become the standards for Canada. He reiterated the complaint that the British manufacturer did not give sufficiently close attention to the requirements of the colonial markets. While the respective systems of credits were about the same, the United States firms were more businesslike in their methods here, closely following up payments due, etc. The witness advised greater intelligence on the part of the British manufacturer in placing his goods on the Canadian market. The Britisher did not use the same care in introducing his product as did the man from the States, who depended much on the power of salesmanship and personal touch.

Replying to interesting questions of Hon. J. R. Sinclair, Mr. Wickes advised that merchandise be classified into two divisions: first, all articles handled by retail trade; and, secondly, machinery and similar articles used in the various processes of manufacturing. In the first class Great Britain was fairly well represented in Canada, but only poorly in the second class.

He did not favor exhibitions of samples of enemy goods unless their exhibit was confined to British manufacturers. Mr. Wickes also discussed German trade in Canada and the organization of the commercial intelligence service in Canada.

Canadian Northern Railway.

Mr. L. C. Fitch, general manager of the Canadian Northern Railway Company, was asked to prepare and forward to the commission statements showing the total capitalization of the Canadian Northern Railway, classified as to bonds, loans, preference stock, etc.

The earnings of the road and the costs of operation were asked for, and allusion was made to the deficit of \$1,640,000 shown by the Canadian Northern Railway for the year ending June, 1915. Mr. Tatlow asked for a written statement from Mr. Fitch which would show to what extent any deficit had been made up by Dominion or provincial funds. Asked about the present year, Mr. Fitch said: "We may not quite make our fixed charges this year, but at the present rate of increase in our traffic we should begin to more than pay expenses next year." Later, Mr. Fitch stated that he was very much gratified at the way in which traffic was developing over the mountain section of the Canadian Northern Railway running in and out of Vancouver.

Empire, Exhibitions, Harbors.

Professor Mavor, head of the Department of Economics in the University of Toronto, spoke to the commission on Empire organization. An imperial federal parliament was favored by Professor Mavor as a condition of any constitutional reorganization following the war.

Mr. W. K. McNaught, M.P.P., former president of the Canadian National Exhibition, addressed the commissioners on the educational value of fairs and exhibitions.

Messrs. E. L. Cousins, engineer, and Lionel H. Clarke, chairman of the Harbor Commission, appeared before the commission, and by means of a map of the entire waterfront presented the plans of harbor improvements. The plans, it was shown, provide for conditions which will enable boats drawing twenty-four feet to be loaded and unloaded at Toronto docks. Ultimately, it was hoped, British tramp steamers would be enabled to come up the St. Lawrence through a system of canals to the very doors of this city.

Mr. W. Lorimer and Sir Jan Langerman formed a special branch of the commission, and received evidence from Mr. Thomas Southworth concerning cobalt and nickel, from Mr. J. B. Tyrrell concerning gold and silver, and from Prof. T. A. Walker, of Kingston, about tungsten and molybdenite, and other evidence.

Sir Alfred Bateman is acting chairman of the commission, and the commissioners present were: Sir Jan Langerman, South Africa; Hon. Sir Edgar Bowring, Newfoundland; Mr. W. Lorimer, Scotland; Mr. Joseph Tatlow, Ireland, and Hon. J. R. Sinclair, New Zealand. Sir George Foster, who represents Canada, rejoined the commission on Wednesday.

Mr. Justice Riddell, on the subject of commercial law, said that Canada ought to have something in the way of a bankruptcy act such as they have in England. The demand for such an act had not been so great as it had been from the United Kingdom. A greater uniformity in the commercial laws of the different provinces of the Dominion was also desirable, the witness claimed.

Mr. J. D. Falconbridge drew particular attention to extra-provincial legislation in Canada, and advised the arrangement of a more harmonious legal relationship between the different provinces of Canada and between these provinces and other parts of the empire.

Ontario's Fruit Industry.

Evidence on the Ontario fruit industry was given by Mr. P. W. Hodgetts, director of agriculture; Prof. J. W. Crow, of the Ontario Agricultural College, and Mr. E. F. Palmer, director of the horticultural experiment station.

According to Mr. Hodgetts, there is a total fruit acreage of 330,340, of which 298,627 acres are orchard, 10,850 vineyard, and 23,863 for small fruits. Apple trees easily predominate, there being no fewer than 6,710,033 in bearing and 2,073,576 non-bearing. The next highest bearing trees in number are peaches, which number 794,192, whilst pears are the lowest, 505,368.

Seventy-five per cent. of the fruit grown in all Canada was produced in Ontario, but fruit-growing in this province was the smallest part of the agricultural industry, its annual value being \$20,000,000, and entire capital invested amounting to \$80,000,000.

Mr. E. F. Palmer said that the acreage of peaches in the province had increased by 31 per cent. in the ten-years period 1901-1911, but the prices obtained suggested over-planting or under-consumption. Plums decreased in acreage for the same period by 48 per cent., owing to American growers being able to produce them cheaper by their more complete organization. Cherries showed an increase of 21 per cent.

Sir Edgar Bowring, of Newfoundland, asked Professor Crow if manufactured grape juice would likely take the place of the wines which are now prohibited. Professor Crow replied: "The whole thing is problematical. But I would say that from New York State's experience it would be likely that the grape juice business would replace the wine business in Ontario."

Mr. W. Bert Roadhouse, deputy minister of agriculture, told the commission about the experimental work being conducted now throughout Ontario in field cropping, drainage, soil analysis, live stock feeding and breeding, dairying and co-operative marketing.

Mr. Fred Dane, loan commissioner for New Ontario, and Mr. Albert Grigg, deputy minister of lands and forests, testified as to the conditions of settlement and development along the Timiskiming and Northern Ontario Railway and the government transcontinental line.

Mr. John Ross Robertson, president of the Canadian Associated Press, in giving evidence on cable charges and service, touched the long-proposed question of an "all-red" cable route, and Mr. C. O. Knowles, manager of the Canadian Press, Limited, gave information as to the working of the Canadian press bureau in New York. He stated that an Imperial cable could give no cheaper rates than the Canadian Associated Press is now enjoying. The association was serving Canada efficiently now, and it would cost perhaps three times as much to try to duplicate it. Mr. F. B. Fetherstonhaugh, patent solicitor, urged the establishment of uniform patent laws throughout the empire. Mr. F. G. Morley, secretary of the board of trade, spoke on the matter of adopting a trade mark for all goods manufactured within the United Kingdom and the overseas dominions.

At yesterday's session, Mr. Perry, manager of the Great Northwestern Telegraph Company, discussed telegraph rates, and submitted a statement on this matter.

Capital Investments in Canada.

A statement in regard to the investment of British and foreign capital in Canada was submitted at the request of the commission by Mr. Field of *The Monetary Times*. This statement showed that to date at least \$2,914,000,000 of British capital and \$636,000,000 of United States capital had been invested in this country. The statement pointed out the different channels through which British and United States investments had been made here and dealt with French, German and other investments in the Dominion. Particular emphasis was placed in the memorandum upon the enterprise shown by United States industrial interests to take advantage of United States investments in the Dominion in order to obtain further Canadian trade. Questions were asked of the witness by the commissioners, particularly in regard to German investments and activities in this country.

RUSSIAN BONDS

The sale of Russian government securities in the United States, and some have been bought in Canada, has given a speculative fillip to the decorous group of government bond issues on this side of the Atlantic. The Russian internal 5½s are quoted at about \$312 flat per 1,000 rubles, which compares with about \$301 per 1,000 rubles two months ago. Bonds may be bought and left in Petrograd, or they may be shipped to this side. Many banking houses have imported blocks of bonds, and it is intimated that some of the recipients of Russian munitions contracts accepted bonds in part payment, and that these have also come upon the market. In any event, Russian bonds have been offered in the United States at prices below the cost of buying them in Petrograd, and shipping them across the Atlantic, which lends color to this theory.

Leading foreign exchange bankers advise purchasers of Russian bonds to let them remain in Petrograd. Delivery in the United States costs \$4 or \$5 more per 1,000 rubles, while there are banks in Petrograd which are considered as strong as the government itself. A transaction in Russian internal 5½s of 1915, based on an actual purchase, is figured as follows by the Wall Street Journal:—

	Rubles.
1,000 rubles at 95 (price in Petrograd)	950.00
Approximate interest May 1 to October 28	27.20
	Dollars.
977.20 rubles at 31 cents	312.93
Brokers' commission ½ per cent.	1.56

Cost of 1,000 ruble bond 314.49

In this case the purchaser pays the interest from May 1, the last interest date, up to the time when it is expected the seller in Petrograd will receive the money. If payment is effected before October 28, the purchaser receives a rebate. Interest on the bonds is credited every six

months by the Petrograd bank in which they are deposited.

The Canadian purchases of these bonds has probably not exceeded \$2,000,000. The recent warning of the finance minister that the purchase here of government issues made in the United States might be made the object of a special tax, has tended to prevent further purchases. Those who like a speculative touch to their bonds are, in the case of the Russian securities, basing their hopes on an advance in rubles, which show a depreciation of about 40 per cent. from the normal of 51½ cents. Buying rubles, however, is not free from speculative dangers, a fact which many prospective purchasers probably have in mind.

STILL NO BLACKLIST

A well-known Canadian investment house, which has been corresponding for many years with one of the banking firms now on the British blacklist of United States firms, recently sold some securities to that firm. Their attention was drawn to the fact that this firm is on the blacklist, a fact of which they were unaware. The investment house communicated with *The Monetary Times* asking as to their position in the matter. We were obliged to inform them that their sale of bonds to this enemy firm was quite legal, as there is no blacklist in Canada. The bond house representative expressed surprise at this and added that his firm had deleted the name of the enemy firm from their mailing lists, and did not intend to trade further with such a firm.

More than three months ago, the British government established a blacklist of United States firms, with which citizens of the United Kingdom were forbidden to trade. Canada has failed as yet to follow the example. Action should have been taken by the Dominion government immediately upon receipt of the official blacklist from the Imperial government. If it is illegal and undesirable for citizens of Great Britain to trade with these enemy firms, surely it is equally undesirable for Canadians to trade with them. Yet, trading is being done with some of the firms. There is no blacklist in Canada. What sort of business morals are we cultivating in these days of war?

GERMANY'S WAR LOAN

On October 5th the subscription lists of Germany's fifth war loan were closed. No announcement has yet been made as to the result. Judging by articles in the German press, much suspicion had to be overcome to induce the German people to subscribe freely to the new bonds. The German investor is beginning to wonder what his ultimate position as an investor will be when peace terms are discussed. He cannot forever ignore the fact that the par value of the mark in New York is 28.82 cents and that to-day it is quoted there at 17.68 cents. Neutral opinion of German credit, as expressed in the money markets at present, is an important sign of the times. The statement of Dr. Georg Bernhard in the *Vossische Zeitung* recently that "the good name of Germany's credit in the world remains unshaken," is made without regard to the facts.

In Germany, there is considerable perturbation among investors as to the safety of their war bonds. This has been satisfactorily pronounced as to draw strong and supposedly reassuring statements from such a medium

as the official Norddeutsche Allgemeine Zeitung. Of the suggestion heard in Germany that it might not be able to pay the interest and redemption on the loans, that journal says: "Up to the year 1924 the empire is bound to pay 5 per cent. interest on its war loans. Only in that year could a reduction of interest follow, and the government would have to pay back the face value of the loan to such owners as would not agree to the reduced interest. A premature reduction of the rate of interest would be a breach of contract and a wrong of which nobody would believe the leaders of the German empire would be guilty."

Germany is in the loser's shoes and the German people will one day learn that fact. In the meantime, Canada has subscribed \$200,000,000 to its second \$100,000,000 war loan, and with the fullest confidence in its national credit, the credit of the Empire, and the final result of the war. Great Britain has just voted another £300,000,000 for war. Despite the fact that £3,132,000,000 has been voted to date and that her war borrowings have been £2,381,051,000, the world's money markets continue to have unbounded confidence in British credit, confidence which people throughout our Empire know is well deserved.

TRADE AND PACKAGES

Throughout the British Empire are evidences of a desire to enlarge trade with the Empire and to remove obstacles which have sometimes prevented the natural increase of such trade. One by one these obstacles have been noted in Canadian government and other official reports. The matter of packages may be taken as an example of one of the practical points in regard to the furtherance of Empire trade, which will need remedy when the various governments begin to discuss the important details of this trade. In the report of the British trade commissioner to Canada and Newfoundland, on the trade of the Dominion last year, attention is drawn to the value of packages or coverings of goods which enter

Canada from the United Kingdom as compared with the value of packages used in the importation of goods from the United States.

There is, it is recalled, a preferential rate of duty on the value of packages coming into Canada from the United Kingdom, which is lower than the duty on the value of packages coming from the United States, but it is pointed out that United Kingdom goods require much more expensive and careful packing safely to negotiate the rougher handling occasioned by an ocean voyage, and, in addition, the handling of cargo when discharging at the port of destination. The United States traders, on the other hand, can, and do frequently, rail goods cheaply crated and, on occasion, without any crate or case whatever. How these conditions work in actual trade is shown in the following table for the fiscal year 1915:—

	Canadian imports from United Kingdom (packages).		
	Value.	Duty.	
Trade, \$90,160,781	\$ 805,952	\$122,984	
	61,808	10,985	
	314,309	63,563	
	\$1,182,069	\$197,532	
	Canadian imports from United States (packages).		
	Value.	Duty.	
Trade, \$428,616,927	\$220,807	\$ 44,161	
	100,374	25,093	
	117,688	38,251	
	\$438,869	\$107,505	

In 1915 the total value of Canadian imports from Great Britain was \$90,160,781 and from the United States \$428,616,927. The value of packages in which British goods were shipped was \$1,182,069 and the duty paid, \$197,532. United States exporters to Canada on a trade volume nearly five times greater than that of Britain, packed their goods with a value of only \$438,869 paying duty of \$107,505. In these figures, there is an important trade factor.

CHARTERED COMPANIES AND PROVINCES TAXES

The Canadian Manufacturers' Association states that it has a vital interest in seeing that the decision of the privy council in the case of the John Deere Plow Company vs. Wharton is protected against evasion or circumvention of any kind, for it was in that decision that the privy council recognized the right of a company operating under a Dominion charter to carry on business in any part of Canada without provincial permission, and denied the right of the provinces to impose disabilities on federal companies refusing to become registered or licensed.

Most of the provinces are ignoring the decision in at least one respect—viz., by renewing their demand upon federal companies for the annual return and the annual registration fee. Our policy is to encourage federal companies to ignore such demands, believing that the provinces will be well content to keep what they can collect, but will not insist upon payment. Where federal companies are unwilling to court the trouble they fear might follow such a refusal, we urge that the return be made and the fee paid under protest.

Some of the provinces have completely changed their companies' acts since the judgment was rendered, presumably in a clever attempt to evade it, and in making their demand upon federal companies to register, they now point out that the privy council decision no longer applies. Test cases have recently been started to determine whether or not these provinces are within their rights. The manufacturers' association is hoping to be able to prove they are not.

CANADA TO MANUFACTURE AEROPLANES

A government aeroplane factory is to be established in Canada, probably in Toronto, costing approximately a million dollars, and it will be equipped to turn out six machines weekly. These machines will be purchased by the imperial government.

The flying school, which is also to be established, it is understood, will be financed by the imperial government, and will be controlled by a board of three members, one representing the admiralty, one the war office, and a business man nominated by the imperial munitions board. The factory is to be built and equipped by the Canadian government, or out of moneys advanced by the government. It will be administered by the imperial munitions board, and the imperial government will place with this board a contract for the output of the factory.

The supervision of all matters connected with the establishment of the factory will probably be entrusted to Mr. C. S. Wilcox, of Hamilton, chairman of the Steel Company of Canada, who is also likely to be the board's nominee on the committee which will have charge of the flying school. This plan follows an inquiry which has been in progress by members of the imperial munitions board since the early summer. It was found that large orders for aeroplanes had been placed in the United States, some \$12,000,000 with the Curtiss Company, of Buffalo. As a result, the board made representations to the ministry of munitions to the effect that this industry, with proper organization, might be built up in Canada. There has since been much correspondence on the subject, leading to the arrangement now outlined.

RAISING STANDARD OF INSURANCE SALESMEN

The average man for some years past has been more or less critical of the life insurance salesman, but business men generally will now readily admit that the standard of the life insurance agent has been raised, and the very best men now approach them on the subject. Many forces have been at work to this end, and the enormous growth of the life insurance idea has been due to the better class of men who have been attracted to the business of selling life insurance and to the use of more businesslike and efficient methods on the part of the solicitor. One of the greatest difficulties encountered has been the proper education of the men who were sent out to solicit, and often advise. A recent innovation of the Canada Life Insurance Company, which has always been one of the leading institutions in maintaining a high grade of salesmen, is a correspondence course on salesmanship. This is a series of studies in life insurance salesmanship, which is not only for the training and advancement of their own active forces, but is available to men outside of the business who wish to improve their position.

The Canada Life evidently finds that a thorough course of training not only improves the presentation of their contracts to the insuring public, but also attracts to the company a higher grade of men than would be the case were salesmen selected in a haphazard manner. By taking a short preliminary course of study, a man who contemplates entering the life insurance business has an opportunity to find out for himself just what qualities are needed; he learns more of the fundamentals of the business, and in a few weeks or months he can judge for himself what affinity he has for the work. When he commences active soliciting he is not so likely to fall into the errors which have sometimes characterized the life insurance men. The Canada Life is teaching through its correspondence course and through its general literature for its representatives the best and up-to-date methods of serving their customers. It is the object of this company evidently to have its representatives well received everywhere, and such condition arises from the careful and well-planned methods which are now being followed.

A review of the course of instruction shows a most interesting and almost entertaining story of life insurance, the field for its advancement, and the many interesting phases of the work of the solicitor. Inquiry by *The Monetary Times* at the Canada Life office has elicited the fact that anyone interested will be sent the first lesson free of charge, and that alone is well worthy of perusal by any policyholder or business man interested in the subject. The lessons are well written and printed and are of great interest and value.

REPORT ON WINNIPEG'S AQUEDUCT

Bondholders of the Greater Winnipeg water district will be interested in the following conclusions of the special board of consulting engineers, consisting of Brigadier-General H. N. Ruttan, Messrs. J. G. Sullivan and R. S. Lea, which are contained in its report on Greater Winnipeg water district's aqueduct. The conclusions are in the following terms:—

The practical questions to be answered in connection with the project are:—

(1) When the aqueduct and its accessories are completed will the works be of such a character that they will satisfactorily perform the service for which they have been designed—viz., the delivery of Shoal Lake water to the city of Winnipeg and the surrounding municipalities in the quantities specified and without pollution on the way?

(2) Will the work as projected be of such a substantial and permanent character as to require only a reasonable charge for maintenance?

(3) Will the cost of the completed work be fair and reasonable?

Subject to the careful carrying out of the work on the lines indicated in this report all the questions may be answered in the affirmative.

Reference has been made in this report to hydrostatic tests of two of the repaired sections of the aqueduct, in which the loss of water was much below the permissible limit of good practice. Further tests which are being carried on at the present time show still better results.

By the use of steel arch forms and by careful attention to details by the workmen an interior surface of unusual smooth-

ness has been obtained, the effect of which will be to materially increase the discharge capacity of the aqueduct above that estimated. These results could only be obtained with concrete of the highest quality both as to materials and workmanship.

The cost of the completed work, according to the latest estimates, will compare advantageously with that of similar works anywhere; when the capacity and length of line are considered.

The securities recently issued for the carrying out of this work have been as follows: \$1,000,000 5 per cent., due 1920, sold in April, 1915; \$1,000,000 5 per cent., due 1920, sold in November, 1915; and \$1,500,000 5 per cent., due 1921, sold in July, 1916.

MAY INVESTIGATE PRICE OF PAPER

In a conference of newspaper publishers and newsprint paper manufacturers, held at Ottawa, the manufacturers adhered to the price of three cents a pound that was quoted as a minimum in the conference last week before the minister of finance. The conference was presided over by R. W. Breadner, of the department of finance.

The paper manufacturers quoted figures showing increased cost of labor and raw materials. It was not claimed that the increased cost of production to-day was sufficient to account for the proposed increase of 60 per cent. in the price of newsprint paper, but the manufacturers endeavored to justify so large an increase on the ground of the uncertainty as to certain further increases in cost of production, coupled with a desire to take advantage of the present strength of the paper market of the world.

The publishers conceded that some increase might be necessary, but took the position that the proposed minimum price of three cents a pound was prohibitive. For some time past efforts had been made to meet the present conditions and other increases in cost of production by advancing subscription and advertising rates, and by the elimination of paper waste and other reductions in paper consumption.

Further increases in advertising and subscription rates would be necessary, but it would be impossible to make so large and immediate increases as would be necessary to meet an increase of 60 per cent. in the cost of paper.

As the publishers and the paper manufacturers were unable to reach an agreement, the request of the former for an investigation by the government stands, and it is likely an enquiry will be made by the department of finance.

CANADIAN BANK CLEARINGS

The following are the returns of Canada's bank clearing houses for the weeks ended October 12th, 1916, and October 14th, 1915, with changes:—

SASKATOON'S TAXES AND ASSESSMENTS

City Commissioner Graphically Shows Reductions Since Boom Period—Low Per Capita Basis

The accompanying diagram shows in graphical proportion the tax levies, assessment and rates for the city of Saskatoon for the years 1914, 1915 and 1916, as prepared by Commissioner C. J. Yorath.

The problem which had to be solved by the civic administration at the commencement of the depression, following the boom of 1911 to 1913, was to reduce the assessment from high speculative values to sound economic values without unduly increasing the tax rate.

This could only be done in the best interests of the citizens by a reduction in the tax levies if at the same time efficiency of the civic service and a high standard of public health could be maintained.

What Diagram Shows.

The diagram shows that the city's assessed value has been reduced from \$56,679,425 in 1914 to \$37,646,827 in 1916, a reduction of \$19,032,598, or 33 per cent. The tax levy has been reduced from \$1,227,547 to \$821,759, a reduction of \$405,799, or 33 per cent., while during the same interval the public school supporters' rate has been only increased from 17.55 mills to 18.35 mills.

It will also be seen from the diagram that the portion of the tax levy for which the city council is responsible—i.e., general and local improvements, has been reduced from a total of \$890,153 to \$562,296, a reduction of \$327,857, or 36 per cent.

Per Capita Basis.

Owing to the large reduction in the general expenditure the general rate has been reduced from 12 mills in 1914 to 11.50 mills in 1916, in spite of the fact that the assessment has been reduced by 33 per cent.

The city's assessment, tax rate and tax levies are lower on a per capita basis than any other city west of Winnipeg with a population of over 15,000.

HOW LIFE INSURANCE SERVES THE STATE

About twenty-three per cent. only of the people of Canada are insured, was a remark of Mr. E. J. L'Esperance, of the Imperial Life Assurance Company, in an address at Montreal. In the recent subscriptions to the war loan the insurance companies have been the medium by which thousands of small accounts were gathered up and converged into several large organizations where it could be handled, making a subscription of over thirty millions.

Another point brought out was the fact that life insurance companies have loaned approximately one hundred million dollars to the farmers of the west.

The Bank of Nova Scotia has opened a branch at East End, St. John's, Newfoundland, under the management of Mr. J. A. Dunbar.

The October number of the "International Digest" is devoted to the interests of Canada and the United States. It contains various articles by well-known writers, including Agnes C. Laut and P. T. McGrath, on the relations between the Dominion and the Republic, and is well written and illustrated.

PERSONAL NOTES

Mr. J. Ambrose O'Brien has been added to the directorate of the Home Bank of Canada, succeeding Mr. T. Flynn.

Messrs. J. R. Easton and J. W. Long, of Messrs. Spitzer, Rorick and Company, Toledo, Ohio, have been visiting various western municipalities of which this company has purchased bond issues.

Mr. A. MacKenzie, formerly superintendent of agencies of the Federal Life Insurance Company, Hamilton, has been appointed superintendent of agencies for Ontario of the Manufacturers' Life Insurance Company, Toronto.

Mr. A. Gordon McIntyre, B.A., B.Sc., Montreal, a Canadian authority on the manufacture of paper, has been retained by the American Newspaper Publishers' Association to take charge of the newsprint problems of that organization.

Mr. J. Harrington Walker, of Walkerville, Ont., has been elected a director of the National Trust Company, Toronto, thus still further strengthening the representative and in-

MR. J. HARRINGTON WALKER.

fluent directorate of the company. Mr. Walker is one of those Canadians who has made his business fortune and reputation largely in his home town, in this case, Walkerville, where he was born in 1859. He is associated with Hiram Walker & Sons, Limited, of that town, his father's business, and has been connected with it since 1874. A few years spent in Detroit have brought to him the directorship of several companies there, notably the Walkerville Detroit Ferry Company, and the Hoskins Manufacturing Company. He is also director of the Walkerville Land and Building Company, and the Walkerville Light and Power Company. Mr. Walker has an attractive personality, and his views invariably command respect. His services as a director of the National Trust Company will be a distinct acquisition to the company.

Mr. B. Hal Brown, president and general manager of the Prudential Trust Company, Limited, Montreal, who sustained an accident in Quebec last month, has now been able to leave the Royal Victoria Hospital at Montreal, for his home. He hopes in a reasonably short time to be back at the office.

Mr. W. C. Hawkins, of Hamilton, managing director of the Dominion Power and Transmission Company, and Mr. F. W. Teele, of Boston, formerly vice-president and general manager of the Porto Rico Railways Company, have been elected to the directorate of the Southern Canada Power Company.

Mr. E. H. Ambrose, of the firm of Mewburn and Ambrose, barristers, Toronto, has been elected to fill the vacancy in the directorate of the Landed Banking and Loan Company

caused by the recent death of Mr. S. F. Lazier, K.C., and Mr. R. Hobson, president of the Steel Company of Canada, was elected vice-president.

Mr. George Weir was appointed this week general manager of the London Guarantee & Accident Company, Limited, with Canadian headquarters at Toronto. He was born in Scotland in 1876, and educated at the public schools and the Glasgow Technical College. He commenced his career as a law clerk in Thurso, Scotland, in 1893, and in 1896 was engaged in real estate and insurance business in Glasgow until 1907 when he came to Canada in charge of guarantee department of the London Guarantee & Accident Company, Toronto. In that capacity he remained until 1914, when he became assistant manager of the company. His present appointment as general manager is in succession to the late Mr. D. W. Alexander. Mr. Weir is a member of the Toronto board of trade. He has served over 20 years in old country and Canadian regiments, and is at present with the Queen's Own Rifles, Toronto. He is well known in business and insurance circles, is a capable underwriter and a man of careful judgment. His appointment will secure for the company the maintenance and proper expansion of its business in this country, where both the company and its new general manager have excellent reputations.

Mr. J. Burt Morgan, manager of the Vancouver Island office of the Great-West Life Assurance Company, is a regular and persistent member of the company's hundred thousand club. He is the president of the Life Underwriters' Association of Canada, and is a forcible public speaker, and as his energy and enthusiasm are unbounded his tenure of office will undoubtedly be a great success. The Winnipeg Association recently turned out in large numbers to hear Mr. Morgan speak and in response to his appeal for an increase in membership expressed a firm determination to become the possessor of the Totem Pole to be presented to the association securing the largest increase in membership this year. Mr. Morgan is interviewing college presidents in every province with a view to the introduction of educational courses relating to life insurance, and is also devoting attention to the question of uniformity of legislation. He recently visited St. Louis where he attended the meeting of the National Association of Life Underwriters, and as previously stated in *The Monetary Times*, for the "most effective closing suggestions" won the second prize of \$10. Mr. Morgan addressed the Toronto Association of Life Underwriters this week.

OGILVIE MILLING COMPANY'S RETURNS

"We were more fortunate than in average years in our wheat purchases. We also profited largely in the increase in returns which we received from our investments in business other than flour milling. Our interest charges for borrowed money have been much less, owing, of course, to the large capital now invested in our business, which has been accumulated for some years past out of surplus earnings." These words of Mr. W. A. Black, vice-president and managing director of the Ogilvie Flour Mills Company, Limited, show the trend of certain business factors which are favorably affecting Canadian companies at the present time. The annual report of the Ogilvie Company reflects the good direction and management of the company. Profits of \$774,270 are shown after provision for the war tax and bond interest. Of this \$440,000 was allotted for preferred and common dividends and \$334,270 carried to the credit of profit and loss account, which is given as \$846,330. The balance sheet shows assets totalling \$10,910,192. The report is an excellent one.

The extent of the company's system of country elevators in the North-west was increased during the year by 21 buildings, making a total of 168 elevators, with a storage capacity of 5,385,000 bushels, and covering a wide area of territory. With terminal and country elevators combined, the company's total wheat storage capacity now amounts to 10,335,000 bushels.

The company's directors are as follows: Sir Montagu Allan, C.V.O., Sir Herbert Holt, K.B., Messrs. W. A. Black, C. Chaput, G. E. Drummond, C. B. Gordon, C. R. Hosmer, A. M. Nanton and S. Ogilvie, and the officers are: Mr. C. R. Hosmer, president; Mr. W. A. Black, vice-president and managing director; Mr. S. A. McMurtry, treasurer; Mr. G. A. Morris, secretary; and Mr. W. R. Dean, assistant secretary.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Mackay Companies.—The operating revenue of the companies' land for the first six months of 1916 is given as \$4,552,000. Operating expenses were \$4,405,000, and the net earnings of \$53,282 shown, compare with an operating deficit of \$96,140 in the same six months of 1915.

Toronto, Hamilton and Buffalo Railway Company.—The company is making an issue of \$10,000,000 4½ per cent. consolidated bonds due in 1966 for the purpose of retiring a maturing bond issue and to provide some \$5,000,000 for betterments. The bonds are being guaranteed by the owners of the road, the Canadian Pacific Railway, the New York Central, and the Michigan Central, jointly. A protest is being made from one of the stockholders of the Michigan Central who objects to the guarantee on the ground that United States roads have no authority to guarantee the bonds of another corporation without obtaining legislative authority.

Hudson's Bay Company.—The returns of land sales and receipts for the three and six months to September 30 compare favorably with the corresponding periods of last year.

In the quarter 40,300 acres were sold for £127,800, as compared with 10,900 acres for £31,900. Town lots were sold for £380, as compared with £1,800. The receipts were £59,000, as compared with £28,600.

For the six months 85,426 acres were sold for £275,400, as compared with 19,500 acres for £63,000. Town lots were sold for £5,800, as compared with £3,900. The total receipts were £135,000, as compared with £72,000.

Toronto Terminals Railways Company.—At the annual meeting of the Toronto Terminals Railways Company, Mr. Howard G. Kelley, president of the company, reported good progress on the construction of the new station building in Toronto, which will be owned and occupied jointly by the Canadian Pacific and Grand Trunk Railway companies, each of which holds an equal interest in the property. The steel work on the new building was reported as practically all complete, and the stone work is being delivered and cut preparatory to its erection, which it is expected will be commenced during the present month.

The directors and officers of the company were elected as follows: Directors, Messrs. George Bury, I. G. Ogden and E. W. Beatty, K.C., representing the Canadian Pacific Railway Company, and Messrs. E. J. Chamberlin, Howard G. Kelley and J. E. Dalrymple, representing the Grand Trunk Railway Company. Officers, Mr. Howard G. Kelley, president; Mr. Geo. Bury, vice-president; Mr. Henry Philips, secretary; Mr. H. E. Suckling, treasurer; Mr. W. H. Ardley, auditor; Mr. J. W. Leonard, general manager; Mr. W. C. Chisholm, K.C., general solicitor; Mr. J. R. W. Ambrose, chief engineer; Messrs. W. H. Biggar, K.C., E. W. Beatty, K.C., general counsel; Messrs. H. R. Safford and J. M. R. Fairbairn, consulting engineers.

St. Lawrence Flour Mills Company, Limited.—Profits of the St. Lawrence Flour Mills Company, Limited, for the year ended August 31 totalled \$132,497. It has not been the policy of the directors to give out any statement for publication since 1912, when the net earnings were \$62,319, and the surplus carried forward \$13,007.

From the profits of the year, \$21,365 was required to take care of a deficit of last year. Dividends on the preferred shares took \$40,215, bond interest \$16,551, bond discount written off \$750, and organization expense written off \$2,500, a total of \$81,381, which leaves a surplus for the year of \$51,116. The balance sheet shows total assets amounting to \$2,488,339, in which is included \$532,087 covering real estate, buildings and machinery. Accounts receivable, after providing for bad debts, are down at \$310,237, and stocks on hand amount to \$359,797. Investments total \$7,500, and cash on hand \$1,321. Special account, property, goodwill, etc., is down at \$1,200,000.

The company has \$574,500 preferred shares outstanding and \$1,200,000 common shares, and \$240,750 6 per cent.

bonds. Accounts payable amount to \$44,807, sundry credits, \$222,386 and bank loans, \$139,352.

The directors were re-elected as follows: Mr. G. A. Grier, president; Mr. T. Williamson, vice-president; Mr. C. J. Fleet, K.C., Sir Rodolphe Forget and Brig.-General A. E. Labelle.

Standard Chemical, Iron and Lumber Company.—Mr. L. M. Wood, president, reports that the developments during the current year have been such as to warrant the prediction that the company can be put upon a permanent dividend-paying basis with its present capitalization, provided that the outstanding note issue of £60,000 due May 1 next, and the present bank indebtedness, amounting to about £60,000, are retired out of profits. When this has been accomplished, liabilities, apart from capital stock and arrears of dividends, will be confined to the funded debt and ordinary trade accounts, and the net earnings permanently improved to the extent of about £8,000 annually. Already the process of retiring these obligations has been commenced, and about £10,000 of notes purchased and cancelled.

The net profits for the six months ending June 30 amounted to \$312,424, as compared with \$169,108 for the whole year 1915. Business already placed indicates that the present earning power will be maintained, if not increased, until the end of 1917 at least, so that after allowing for depreciation, a dividend distribution may reasonably be expected next year.

During the current year the business of the company has been substantially increased. Two crude chemical plants have been acquired for cash at prices most favorable to your company. Although this expenditure absorbed a large part of the profits for the first half-year, it was of the greatest importance that the company should increase its production to take full advantage of the opportunities being opened up by the shifting of trade previously controlled by Germany.

Although one of the company's products, acetate of lime, may be adversely affected by the termination of the war, the others should be favorably affected. The market for wood alcohol is broadening very considerably, owing, amongst other things, to the development of the dye industry in Great Britain and the United States.

The demand for charcoal, always the most difficult of the products to sell, is increasing steadily. It will give you an idea of the extent and stability of this trade to say that this year we shall distribute about 12,000,000 paper bags of charcoal, of 8 pounds each, for domestic use in the various cities and towns of Canada.

Although the company is now on a permanent and satisfactory basis as regards its business and organization, in the judgment of the directors it is advisable to strengthen its financial position in the manner above outlined before resuming dividend payments.

Russell Motor Car Company.—After making provision for depreciation and reserve, bad debts, amortization of munitions plant, etc., the company's profit and loss account to be presented to the annual meeting is as follows: August 1, 1915, balance of loss brought forward, \$703,363; July 31, 1916, trading profits for year (less war profits tax), \$499,354; balance carried forward, \$204,009.

The report shows that the motor business of the Willys-Overland, Limited, has shown a large increase over the total volume done by the two separate companies a year ago, and at the present time, it is added, the outlook is for a still further increase. Willys-Overland, Limited, have acquired the whole Russell plant at West Toronto.

The Russell Company is now building a factory at Weston for the manufacture of bicycles, accessories and skates, for which an active demand was in evidence during the past year. The business along these lines was only limited by the ability of the company to secure raw material and labor to produce the goods.

When the factory mentioned has been completed, it is the intention of the board to arrange for the organization of the bicycle business as a separate company under the name "Canada Cycle and Motor Company, Limited."

"At the last annual general meeting," Mr. Lloyd Harris, the president, intimated, "the directors reported that the company had undertaken the manufacture of important munitions for the Imperial government. The contracts which the company had at that time have been successfully completed, and the company is now operating on large contracts for the coming year. For this purpose it has leased three separate premises, and the company has orders which will re-

quire the operation of these plants to capacity for several months. All the orders are taken subject to immediate cancellation by the Imperial munitions board, but upon terms which protect the contractor against loss in respect of machinery, material, etc., which he may have ordered."

In the balance sheet the item of real estate, which stood at \$456,253, is reduced to \$67,000. The item of "patents and goodwill," which was set down at \$264,228, has disappeared. The linking up with the Willys-Overland Company meant an investment of \$1,366,915. This is the only interest of the Russell Company in the motor-car industry.

The principal items of the balance sheet for this year, compared with the report for the year ended July 31, 1915, are as follow:—

Assets.	1915.	1916.
Cash	\$ 34,429	\$ 4,118
Bills receivable	743,336	409,335
Investments in other companies	1,366,915	1,366,915

Common	800,000	800,000

JAMES J. HILL'S ESTATE

The late James J. Hill, the Canadian-born president of the Great Northern Railway, left an estate inventoried at over \$52,000,000, exclusive of several parcels of real estate in the north-west and properties held in other States. The inheritance tax in Minnesota is estimated at \$1,500,000, although an exact determination of the tax is impossible, until the appraisal is filed. The stocks and bonds are entered in the inventory at their par value; the market values are much larger and, it is said, because of this, the total estate will run several millions more than indicated in the inventory. Mr. Hill's largest holdings of securities consisted of bank stocks, these totalling \$24,812,000. The largest of these are distributed as follows:—

First National Bank, St. Paul	\$2,205,000
Northwestern Security Company	2,414,000
Northwestern Trust Company, St. Paul..	995,000
First National Bank, New York	410,000
First National Bank, Chicago	150,000
Chase National Bank, New York	125,000
National Bank of Commerce, New York..	100,000
Illinois Trust and Savings Bank, Chicago	100,000
Stock Yards National Bank, St. Paul ...	99,999
Third National Bank, St. Louis	25,000

The next item of importance in the inventory are railroad stocks, amounting to \$7,299,400, while railroad bonds aggregate \$7,164,000. Among the larger blocks of railroad stocks, \$5,200,000 consist of Great Northern preferred, \$1,150,000 Northern Pacific and \$517,700 Chicago Burlington and Quincy. Mr. Hill held \$13,000,000 of Great Northern refunding bonds, \$2,000,000 Eastern Railway of Minnesota bonds, \$2,250,000 Burlington general mortgages and \$800,000 Spokane and Inland Empire Railroad preferred. Cash on hand is given at \$4,449,348; notes at \$2,444,251, and real estate, subject to probate in St. Paul at \$1,500,000. Mr. Hill also held \$1,500,000 in Anglo-French bonds. In aid of industries and public institutions in the North-west, Mr. Hill lent to manufacturers, mining companies and various schools, commercial associations and clubs, \$2,253,000, nearly \$1,000,000 being in open accounts. The art collection owned by Mr. Hill is valued at \$1,000,000 in the inventory.

As Mr. Hill left no will the estate will be divided under the Minnesota laws concerning inheritances. One-third of his estate will go to his widow and the remainder will be divided among his nine children.

DEVELOPING MARKETS FOR FISH

Canadian Product is Supplied to Overseas Troops—Commercial Demands in Europe

Plans have been perfected to extend the use of Canadian fish as rations for Canadian soldiers, stated Sir Sam Hughes, minister of militia, on his return from England. This has given great satisfaction. Not only do the men desire the ration of Canadian fish, but the use of fish for one day per week for the Canadian force has saved Canada already approximately \$750,000, as compared with the cost of the same ration of Argentine beef.

"The fish used is largely Maritime Province cod and haddock, British Columbia salmon, and whitefish from the interior of Canada. The fish, thus far furnished, is all frozen, but in order that the troops at the front may be more thoroughly served, it is proposed to furnish them with Canadian canned haddock and other brands of canned fish already cooked.

Large Amounts Required.

"The purchases of fish are made through the war purchasing commission, from principal companies, wholesale dealers by contract. These dealers have been requested to take steps to greatly increase their output.

"The reason for this is that I brought the matter to the attention of British authorities and the response is most gratifying from Mr. Lloyd George and the military heads of the War Office down to the rank and file of the army. The result is that through the board of trade of Britain, which is the official channel for supplies, the British government are now giving their first order for more than one million pounds of fish from Canada. This is preliminary, but the purpose of the British government is to use approximately half a million dollars worth of Canadian fish weekly, if they can obtain it in proper condition.

Fish is Cheaper.

"Further, the commercial dealers in Britain unable to obtain supplies during the war from home sources are endeavoring to obtain fish supplies from Canada. Within a couple of weeks, one dealer requested information as to where he could secure ten millions of pounds of this canned Canadian haddock. In brief, the fish movement has taken great hold, not only with the Canadian and British soldiers, but with the British public as well. The cost per pound, as a food ration, is estimated to be upwards of 8 cents to 10 cents per pound less than Argentine beef. Owing to the high price and scarcity of meat in Britain, the government has decided that one day per week shall be meatless.

"While in France I had an interview with the minister of war, who took up the subject of fish for the French troops, and on my return I am to furnish him with full reports on the subject. The Italian government is also looking in the same direction."

OCTOBER RAILWAY EARNINGS

The following are the earnings of Canada's transcontinental lines for the first two weeks of October:—

Canadian Pacific Railway.

	1916.	1915.	
October 7	\$2,966,000	\$2,915,000	+ \$ 51,000
October 14	3,034,000	2,988,000	+ 46,000

Grand Trunk Railway.

October 7	\$1,319,090	\$1,019,826	+ \$299,264
-----------------	-------------	-------------	-------------

Canadian Northern Railway.

October 7	\$ 857,400	\$ 847,500	+ \$ 9,900
October 14	847,700	767,800	+ 79,900

The Grand Trunk Railway system reports for August and the eight completed months of the fiscal year, are as follows:—

	1916.	1915.	1914.
For August:			
Gross	£ 949,550	£ 740,200	£ 809,900
Net	305,650	248,706	235,700
For Eight Months:			
Gross	£6,136,700	£5,291,600	£5,788,200
Net	1,731,500	1,507,550	1,502,500

TRADE BANK FOR CANADA?

Efforts Now Being Made for Foreign Trade Must Be Backed by Government, Financiers and Traders

BY A. T. DRUMMOND, LL.D.

The department of trade and commerce has, especially since the war broke out, been making important efforts to develop the foreign trade of Canada by establishing representatives at many foreign centres of trade, by issuing weekly bulletins in which are published the reports from these representatives, and by affording valuable facilities to manufacturers and exporters for making general enquiries as to conditions of trade at these foreign centres. Much more, however, requires to be done. The information and facilities afforded by the government will be barren of results if they are not supported by the personal efforts not merely of the manufacturing, mining and agricultural interests, but also of the banks, the press, the universities and the moneyed public. Foreign trade has been practically thrown at us by the war, but when peace arrives and government war orders cease, it will require enterprise and much courage in maintaining the business when the competition of other nations will have to be faced. Personal acquaintance must be made on the spot with the merchants of the foreign countries and with conditions in these countries, and hence there must be knowledge of foreign tongues among the heads of the mercantile establishments or their representatives who visit these countries, and ability among their staffs in Canada to deal with foreign correspondence. The banks and other financial corporations must be ready to assist with capital the development of business here in Canada on a larger scale, and must afford favorable facilities for dealings in exchange, not merely with London and New York, but directly with other great centres of trade. Our universities must not only encourage the mastery of the languages of modern European countries and knowledge of the history, literature, institutions and customs of these countries, but from their laboratories must emanate new ideas which will assist the manufacturers in overcoming their difficulties, in utilizing their waste products, and in bringing the raw material of the country into useful service. The daily press, also, by dropping unimportant trivialities and by disseminating more information about foreign countries and the political and mercantile conditions existing there, can give to the people a broader outlook and a better knowledge than now that they form an important section of a great imperial power which, at its centre, trades with the whole world.

Banking System is Domestic.

Even if all this is accomplished, a further important step is necessary. The demand for some of our special products will have to be created by our own personal efforts in foreign countries; the export of their products to us will have to be encouraged; favorable rates of exchange between these countries and our own will have to be arranged and terms of credit adjusted; whilst to properly foster trade with some important countries we must be prepared to develop enterprises there which will both, directly and indirectly, lead to consumption of our products, and which will, in turn, facilitate the production and export of their products; and we must be prepared, further, to ourselves finance these enterprises, whether railway or industrial, and, at the same time, assist their municipalities, and even their governments, in borrowing for public improvements. It may be thought that it would be in the interest of our larger banks to, in some respects, meet these requirements. By opening branches at Buenos Ayres, Montevideo, Rio Janeiro, Genoa, and, possibly, in the near future, at Petrograd and Moscow, the National City Bank of New York has confirmed its belief that the banks must assist in important ways if the foreign trade of the United States is to be rightly developed. Our Canadian institutions, in establishing branches in the West Indies, the United States, Newfoundland, Mexico and elsewhere, have also shown most commendable enterprise. It must, however, be remembered that the Canadian banking act and the long-established policy of the banks incorporated under it, somewhat restrict the operations of these institutions, and provide rather for a purely Canadian banking business than for all the ramifications which a world-wide expansion of trade requires.

What is needed is an institution, with large capital, which, whilst having some of the characteristics of our local banks, would have the wider powers of certain well-known Paris and Berlin banking institutions, and a broad policy which would be capable of adjustment to the particular needs of each country with which trade was to be developed. Among the distinctive characteristics and powers which this institution should possess should be: to have offices in the large exporting cities of Canada and branches at the foreign trade centres where business was to be developed; to specialize in all foreign, as well as sterling, exchange; to make advances on long as well as short-term paper as the foreign conditions may require; to issue bonds and treasury notes; to accept deposits both at its Canadian and foreign offices for the special accommodation of its own customers; to undertake the flotation of foreign loans, whether government, municipal, railway or industrial; to assist in promoting new enterprises in foreign countries which would require Canadian material and Canadian or other capital, and to accept the stock and bonds of such enterprises, as well as cash, as its profit or commission; and to be a centre of information for, and assistance to, its customers in regard to foreign conditions and the standing of mercantile houses, corporations and municipal and other organizations in foreign countries.

To illustrate the need of such an institution after the war, it is only necessary to refer to Russia, Italy, Spain, the Argentine Republic and Brazil, all of which are to us in Canada like sealed books in the face of our desire to have trading relations with each one of them. With France and man capital and German acquaintance with the language of these two countries and that of Germany are practically the only modern foreign tongues we have allowed our English-speaking college men to grapple with, and even then, we give them merely a reading acquaintance.

Cannot Grasp Special Conditions.

When our merchants and manufacturers come to deal with the business of our other allies, Russia and Italy, how many of them are in a position to grasp the special conditions surrounding the initiation and development of that business? In both countries in the past German banks, German capital and German acquaintance with the language have played important parts in initiating and controlling many lines of business in these two countries, and of, in this way, creating extensive openings for German trade. We must use similar effective forces if we would develop an important trade in these and other countries. It is here where an institution with large capital and wide powers, as above indicated, becomes a valuable instrument in this development. It should appeal to our Dominion government as a necessary means by which its strong desire to extend the foreign trade of Canada can be accomplished, and it should equally appeal to our local banks, as the extension of this trade with foreign countries means greatly enlarged output by Canadian manufacturers and a correspondingly enlarged demand for banking facilities in Canada. Bankers in New York have become interested in an institution of a somewhat similar nature for the promotion of especially the trade with South America, whilst in London, England, both politicians and bankers are arranging for the establishing of an institution for like purposes, and to be effective at the close of the war. Will Canadians have the broad vision to do the same?

WILL MAKE CALCIUM CARBIDE

Interests in the United States, associated with the Union Carbide Company of New York, have organized under the laws of Canada, the Electric Furnace Products Company, Limited, and are building a large plant at Saude, Norway, for the manufacture of calcium carbide and other electrochemical products for sale in the United States market. Edgar F. Price, an officer of the Union Carbide Company, is president of the new concern, which expects to have its plant completed for the beginning of shipments by 1918.

Cheapness and accessibility of water power has attracted the United States capitalists to the Norwegian field. They expect to be able to manufacture calcium carbide and other products of a similar character at a price that will make it possible to compete successfully in the United States market.

WHAT THE BOND MEN THINK

Proposed Debenture Stock and Savings Certificates Issues Excite Interest

The proposed issue by the government of Dominion of Canada five per cent. three-year debenture stock, maturing October 1st, 1919, with interest from date of purchase, payable by cheque, free of exchange, has excited considerable interest among investment houses. The new stock issue will be available for purchase at par at any time, and will afford an opportunity for investment between the war loans made, the third one of which is expected early next year. Particulars of the stock are to be given soon. The government will accept this stock from purchasers at par with accrued interest in lieu of cash in payment of any allotment under future Canadian war loan issues.

Announcement was made by Sir Thomas White in his budget speech in February that such issues would be made at some time, but nothing further was heard of the proposal until a few weeks ago. When Sir Thomas outlined the plan last spring the bond brokers were generally favorable to the scheme.

May Divert Purchases.

The view held by a number of them is that ultimately the issue of government debenture stock in small denominations will stimulate the bond market considerably, as the proposed stock is likely to reach a large number of small investors who have not previously purchased bonds. At the same time, it is thought that the issue may divert the present purchasing movement in other kinds of bonds to Dominion securities.

A prominent Toronto bond broker thinks the proposal of the minister of finance is a sound and wise provision, in view of the conditions through which we are passing. He adds: "The objects—to promote saving among the public at a time when national conditions demand economy and thrift, and afford a remunerative investment in Dominion securities—undoubtedly will appeal to the small investor. It will, no doubt, attract from banks, post office savings banks, loan and trust companies, a considerable amount of their deposits, and, for this reason, depository institutions may not altogether look upon it with favor.

Will Stimulate Investment.

"The scheme will, no doubt, stimulate the investment in government and municipal bonds. Those who never before invested in bonds will become better acquainted with this class of security, which, of course, is the first in point of merit in this country.

"Considerable of the savings of the people of this country have been lost through ill-advised speculation and investment. This has been brought home to many in a more pointed manner during the past two years than in probably any period in the history of Canada. The opportunity now presented for safe and sound investment will probably be largely taken advantage of and tend to educate the small investor in placing his moneys where they will be safe, even if the return is not so alluring as the estimates of probable profits which, not infrequently, tempted many to place their money in doubtful and speculative enterprises."

Is Demand Limited?

Another bond broker thinks that "the cry for 'baby bonds' was based on theory entirely, as the call for them is very limited." However, there is nothing that would attract the small investor more than a government bond, he adds, "and if through the issuing of these bonds and the sale of them to the people, a system of saving among the people and the investment of funds in this manner will be created and made popular, it will be a good thing for the country, and as it developed, coming years would see the beneficial effect of the policy."

Investment houses favor the view expressed by *The Monetary Times* last week that the new stock issue will not reach the rank and file in the investment field unless it is given considerable publicity in various ways.

In addition to the stock, the government will probably provide also for the issue of war savings certificates of small denominations. These certificates, bearing the same rate of interest as the debenture stock issue, will give opportunity for those with small amounts to invest from time to time to place their savings to the national credit, secure

a good rate of interest for themselves, and at the same time provide funds for defraying Canada's war expenses.

The combination of war loans, debenture stock issue, and war savings certificates is anticipated to bring the treasury a steady supply of funds.

WAR ORDERS OF \$550,000,000

Munition orders placed in Canada since the outbreak of the war amount to \$550,000,000. An order for munitions to the value of \$60,000,000 has just been received and contracts to that amount are to be placed. Since the first of the year orders have been placed amounting in value to \$185,000,000.

These figures have been announced by the Imperial munitions board. During the months of July and August the output from Canadian industries was interrupted by reason of the difficulty experienced in procuring the necessary steel and forgings. Due to the efforts put forth by manufacturers, the output on most contracts is more satisfactory and increasing in volume each week.

ROYAL FINANCIAL CORPORATION

A frank and gratifying report was presented to the shareholders at the seventh annual meeting of the Royal Financial Corporation, Limited, Vancouver. Despite the fact that the profit and loss account for the year ended June 30, 1916, shows a net loss of \$2,999, the result must be considered satisfactory, for the loss in the previous year was \$8,889. British Columbia has felt the effect of the war severely, and all things considered the management and directorate, judging by their annual report and balance sheet, have conducted the company's affairs in a progressive way.

The directors' report says in part:—

"Located, as we are, some four thousand miles from the Atlantic, our manufacturers have not been able to participate in the manufacture of munitions to any great extent owing to the long haul and, consequently, heavy freight rates, so that practically all this business has gone to the eastern provinces. By the same token, when the war is over, we will not have the problem of the unemployed to deal with as the cessation of munition work will have no appreciable effect on British Columbia. Up to two years ago our entire business consisted of buying and selling of real estate, promotion of new industries, underwriting and sale of bonds and the handling of mortgage investments for clients. Practically all of this business has been cut off. As you know, we are not now permitted to offer for sale on the British market, any shares, bonds or other securities for new enterprises while the local market for such investments is at present practically nil. We have, therefore, been compelled to direct our efforts in other channels. Our insurance department, which we established somewhat over two years ago, has been making magnificent strides, thanks to the careful and whole-hearted co-operation of every member of the staff in that department. Our real estate department shows signs of renewed activity and we anticipate that this department will, in the near future, prove a profitable source of income.

"Sales of government and municipal bonds have been more frequent during the past three months than ever before. While securities of this nature are handled on a very small margin, yet, as the business develops, it will, in all probability, provide a substantial income.

"Thus, your directors feel that we have no reason for despondency or pessimism. While some of our shareholders may suffer from the delay in payment of dividends, yet even these will, we believe, wait with patience for the return of better days. The matter of protecting your capital investment has received the special consideration of your directors. By referring to the balance sheet you will see that during the year our liabilities have been reduced by \$14,718, despite the fact that in order to protect some securities we assumed during the year, new liabilities amounting to \$8,166. During the past three months our liabilities have been further reduced by over \$16,000, while a still further reduction of \$20,000 has been arranged for and the transaction will be completed within a very short time. All of this is extremely encouraging."

The officers of the company are: President, J. Y. Griffin; vice-presidents, J. F. Langan, L. E. Mair; secretary-treasurer, P. Lamont; managing director, E. B. McDermid.

The Monetary Times.

MANY INSURANCE MEN FIGHTING

Among the British insurance companies issuing journals for their staff and field men is the General Accident, Fire and Life Assurance Corporation, Limited. The current number of its "Review" is an unusually good one. In the affairs of the empire are at present engaged over 90 per cent. of the company's employees in Britain. Mr. F. Norie Miller, the general manager, in his quarterly message indicates how in France, Egypt, British East Africa, and other points of the battle, they are doing their bit. A particularly striking article on the spirit of insurance is reprinted on another page.

FOR MERCHANT AND MANUFACTURER

A volume of much practical utility is the "Canadian Trade Index," issued by the Canadian Manufacturers' Association. It contains an alphabetical list of Canadian manufacturers, with their addresses, branches and export representatives; a directory of manufactures classified according to the articles made, together with various other features of value to every business man.

"Canadian Trade Index, 1916-1918." Price, \$5. Published by Canadian Manufacturers' Association, Traders Bank Building, Toronto.

LIFE INSURANCE AND INCOME TAX

According to the ethics of economy the British government is exhorting every individual to save, and there is no better way in this world to inculcate the virtue of thrift than by practising the art of assurance, writes Mr. E. W. Powell, agency manager of the General Accident, Fire and Life Assurance Corporation, Limited, in that company's "Review."

Discussing the question of life assurance and income-tax, he says: The most scientific form of thrift is generally acknowledged to be life assurance, and, with the high-rate of income-tax prevailing, the public are beginning to realize that savings of this nature are not only highly remunerative when regarded from that point of view alone, but that the acme of security for such savings is attained, inasmuch as the face value of a life assurance policy never depreciates, notwithstanding all fluctuations that take place in the interest yield of other forms of savings.

A question in the British house of commons, on May 17th last, brought out the interesting statement that the amount of life assurance premiums relieved from payment of income-tax for the three years, ended April, 1915, was as follows:—

1912-13	£12,518,938
1913-14	13,394,633
1914-15	13,850,000

and there is every indication that the figures for 1915-16 will show a big increase.

These figures prove that the public are gradually, year by year, increasing their savings, and that they are appreciating the concession whereby the British government allows a rebate of income-tax to a man and wife who invest in the aggregate one-sixth of their total income.

If, for instance, a person takes out a policy of £1,000 at an annual premium of £50, then, assuming the relief rate of income-tax to be 3s. in the £, 50 times 3s.—i.e., £7 10s. rebate will be allowed when paying the tax upon income, which, regarded from an investment point of view only, shows a yield of 15 per cent.

Consequently, it will be seen that life assurance is the only form of savings that the British government encourages in this way.

The Dominion government also recognizes this principle, but the provincial governments have not yet been converted to the fact that life insurance is of great value to the state.

The Ocean Accident and Guarantee Corporation is moving its offices to the third floor of the Ocean Building (formerly the Manufacturers' Life building), corner of King and Yonge Streets, Toronto.

TO MANUFACTURE STEEL WHEELS

The Hamilton Steel Wheel Company has purchased a site and will erect a plant costing \$200,000, for making steel wheels which product was formerly furnished by Germany and the United States.

This industry will give employment to about 200 men and will turn out about 75 tons of steel wheels per day.

Mr. C. W. Sherman, of the Dominion Steel Foundry Company, will be managing director of the new concern.

SASKATCHEWAN'S ARREARS OF TAXES ACT

The Saskatchewan department of municipal affairs states that the fact that a sale is to be held by every one of the municipal institutions to clear their records of arrears of taxes has had a beneficial effect in bringing home to each taxpayer that all assessments should be paid before they fall into arrears. Where taxes have fallen into arrears, however, preparations are being made before the sale under the arrears of taxes act takes place to clear them off, which means that during the present month each municipal institution is in receipt of heavy amounts of taxes. This in turn means that the school districts are receiving in good time the amounts which they have asked from the municipalities, and also means that where there is bank indebtedness it is being wiped off, together with the interest charges, which accumulate at no small rate on current loans.

The arrears of taxes act, although it is scarcely 18 months since it became law, has interested a large number of people in the United States and in other provinces, who have small amounts to invest. Its simple provisions make it clear that the investor at a tax sale is sure to receive 10 per cent. on his money, and if the land is not redeemed, he has a splendid opportunity of becoming owner of valuable property.

From information received it would appear that lands offered for sale under the arrears of taxes act will be bid in even more promptly than they were last year. Many municipalities who were obliged at the last sale to bid in properties, have since found a ready market for the tax sale certificates.

WHAT IS MANUFACTURED IN CANADA?

The commercial intelligence branch of the department of trade and commerce is constantly receiving enquiries for Canadian manufactured goods from almost every quarter of the world. In addition to these enquiries from overseas, letters are received from all parts of the Dominion asking whether various articles are obtainable in Canada. Canadians who would gladly give a preference to home products often buy abroad because they do not know that the article they want is made in Canada. Many Canadian manufacturers import materials which might be produced in Canada if the home demand were known.

After the war there will be a period of reconstruction in the countries devastated by German and Austrian invaders. Great quantities of cement, structural steel, exterior and interior woodwork, builders' hardware, etc., will be required.

In the allied countries and neutral countries merchants' supplies of textiles, hardware, smallwares, and other goods will be almost exhausted. The great demand for nearly every kind of manufactured goods may have a tendency to maintain prices and permit Canadian competition in countries where under ordinary conditions Canadian manufacturers would find it difficult to get a foothold.

In order to answer enquiries for Canadian products from at home and abroad it is desired to obtain the fullest possible information from manufacturers regarding the lines they manufacture, the materials they require and the products they have for export at the present time or are likely to have for export at the close of the war. The patriotic co-operation of manufacturers is desired by the department.

An exhibition of German and Austrian samples is being held at the Convocation Hall, Toronto, from October 23rd to November 6th for the benefit of Canada's manufacturers.

The crops in the Saskatoon district are really good and yields are running high, Mr. F. Maclure Sclanders writes *The Monetary Times*. About 20 per cent. only of the thrashing is done, but labor is scarce.

Invest in Canada

Before the war Great Britain supplied Canada with upwards of \$200,000,000 annually for Government, Municipal and Railroad needs. This market is not now open—Canada must finance largely at home.

By investing your funds in Canadian Government and Municipal Bonds, you obtain an absolutely safe investment, yielding from 5% to 6%.

Write us for a list of these bonds.

INTERPROVINCIAL TRADE BETTERMENT

The formation of an interprovincial trade betterment commission was proposed to the Ontario business men in the address of welcome presented by the citizens of Three Rivers, during the recent trip of business men of the two provinces, Ontario and Quebec.

The proposed commission would take into consideration all questions having a tendency to develop further the trade between the provinces of Ontario and Quebec. It would also collect statistics on goods shipped of surplus raw materials obtainable.

A careful study of the commission's receipts might show that through inadvertence Ontario was purchasing in other countries large quantities of raw materials which might be easily obtained in Quebec, and vice versa.

Through the agency of this commission the occasional misunderstandings which cannot help but crop up from time to time through a lack of knowledge of the real facts or a lack of continuous business and social intercourse would never exist.

AGRICULTURAL PROGRESS IN SASKATCHEWAN

A table in the annual report of the Saskatchewan bureau of statistics shows the average yields of spring wheat per acre in Saskatchewan during the last ten years, compared with the six heaviest wheat raising states of the American Union. The yield per acre in Saskatchewan in 1915 was 25.2 bushels, which is seven bushels per acre higher than in any of the states, its nearest competitor being North Dakota, with 18.2 bushels. Saskatchewan's yield per acre last year was no less than 7.1 bushels above the average of the ten-year period, the previous high year being 1909, when 22.1 bushels were raised. Dealing with the actual production, it is shown that Saskatchewan's total, when compared with 12 of the states, was 21,753,775 bushels in excess of the nearest competitor, which was again the state of North Dakota.

Another table shows the results obtained from different methods of preparing the land. Four methods are compared—namely, summerfallowing, fall plowing, spring ploughing and sowing on stubble, and the result shows that in all four of the principal grains, but particularly so in the case of oats, by far the largest yields were secured from the summer-fallow. In the year 1916, however, it is quite possible that owing to the fact that there was little or no rust in crops put in on stubble, this method may have given the biggest yields.

It is not only in wheat that the large increases are reported. In the case of oats, while the average per acre yield was exceeded in the year 1909, the total production was over 20 million bushels in excess of any previous year. The acreage of barley was much reduced, but the average yield per acre was greater by three bushels than in any of the previous ten years, and the total production was only surpassed in the year 1913.

In the live stock industry large increases and satisfactory progress are shown. The report indicates that in comparison with the year 1914 there were in round numbers 27,000 more horses, 20,000 more milch cows, 32,000 more "other cattle," 15,000 more sheep. Swine alone show a decrease, but this is of the least importance, suggests the report, as their number can be increased more rapidly and easily than any other kind of live stock.

Other interesting comparisons and deductions show that the business of agriculture in Saskatchewan made more progress in 1915 than in any other year in the history of the province.

A concise resumé of the latest available information about companies whose securities are dealt with in Canada, is the "Investors' Reference," issued by the statistical department of Messrs. A. E. Ames and Company, Toronto.

Orders have been placed in Pittsburgh for steel to complete a new span in the Quebec bridge to replace that which recently fell into the St. Lawrence River. The Dominion Bridge Company has placed a contract with the American Bridge Company to fabricate the new span and the Carnegie Steel Company will roll 5,000 tons of steel shapes and beams at its Homestead plant.

COMMUNITIES FOR RETURNED SOLDIERS

The New Brunswick farm settlement board and advisory committee have completed an investigation of settlement lands on the transcontinental railway for returned married soldiers, and will recommend the selection of a site 20 miles from Moncton, writes Mr. R. E. Armstrong, secretary of St. John board of trade to *The Monetary Times*.

The lands selected by the board will be laid out in communities of not less than 100 families, radiating from the central or governmental farm, where church, school and other buildings will be established. No settler will be more than two miles from the railroad. The lots range from ten to 100 acres, and will be sold to married veterans on easy terms. Each community will have a resident superintendent. A uniform set of buildings will be erected on all the lots, and the whole community will be connected by telephone with the central farm, which will have outside connection with the whole province. Teams and implements will be available for hire at a low rate, and co-operative purchasing and marketing will be encouraged.

NORTHERN ONTARIO FIRE LOSS

Reports to the fire marshal's office from northern Ontario fire are now closed, and after a thorough survey of the territory, the following figures were given to *The Monetary Times* by provincial fire marshal E. P. Heaton, as the official record of the loss to created property:—

In all, 849 people have suffered loss, some having more than one property involved, but no effort has been made to ascertain the total number of buildings destroyed.

The aggregate loss sustained reaches a total of \$2,134,349. The insurance recovered or claimed upon licensed and unlicensed companies is \$1,045,585, and the loss sustained by the people in excess of insurance is \$1,088,764. About 50 per cent. of the actual loss on property is covered by insurance.

No provision is made for loss on standing timber, but included are pulpwood cut, stacked and ready for delivery.

Of the claims upon insurance companies \$654,922 is borne by the regular licensed companies, and \$390,663 by unlicensed insurance companies. Of the latter, at this date, practically all has been paid, or will shortly be paid, with the exception of \$28,200. This amount represents claims upon a number of small unlicensed companies, the payment of which is not yet due. All, however, is due, and should be paid before the end of this month, and the fire marshal will then be in a better position to know what, if any, is to be the extent of the default in payment of the unlicensed companies.

At Cochrane 203 people had a total loss of about \$960,000, with \$525,000 of insurance.

At Matheson, 51 people had an amount of \$126,000; the total insurance was only \$12,800.

At Iroquois Falls, which includes the loss of the Abitibi Power and Paper Company and their tenants, the loss was distributed among 31 people, with a valuation of \$316,000, and an insurance of \$289,000.

Pulpwood, not including the Abitibi Power and Paper Company, cut and ready for delivery, is represented by a total of \$63,000, which carried insurance of \$43,000.

In the fire of August 2nd, which occurred in the New Liskeard district, and which involved the townships of Harley, Dymond, Harris and Casey (including the Casey Cobalt Silver Mine and the Croesus Mine), the loss was distributed over 124 people, who suffered to the extent of \$254,000, with insurance of \$135,000.

The settlers constitute by far the greatest number of sufferers, and represent the balance of the amount to the number of 345, with a loss of a little over \$300,000, upon which the total insurance was less than \$12,000.

Having thus obtained as full, complete and accurate a statement as it is possible to get, the fire marshal has now under consideration a mass of testimony taken in the country from settlers, prospectors, woodsmen and insurance men as to how a repetition of this disaster can be averted.

The testimony is mixed in its character, contradictory and difficult of assembly in any concrete form, but the whole subject is being considered and the fire marshal's conclusions will be presented to the minister of lands, forests and mines.

Protection Doubly Sure

You protect your family from possible want, by Life Insurance.

But do you realize that if you do not make **A WILL** your estate may be disposed of by law very differently from the way you would wish?

You can be assured that your heirs will receive full protection if you will permit the Sterling Trust Corporation to advise you on this important matter.

We make no charge for assisting in drawing up your will—and will store it in our Safety Deposit Vaults free, when we are named as executors.

An officer of the company will be pleased to give you full information and advise on wills.

MONEY IN RUBBER

The cultivation of rubber in plantations is a new British staple industry which has practically superseded the gathering of rubber by natives from the forests, and in a very few years has proved so successful that these plantations now supply two-thirds of the world's rubber.

Their produce is raised so cheaply by these new scientific methods that their rubber sells at two or three times the gross cost of production, and many thousands of small British investors are now enjoying huge dividends from their rubber securities.

We deal in some of the best selected shares in plantation rubber companies listed on the London Stock Exchange, with fine dividend records, and yielding 9% to 10% at to-day's prices. Rubber shares are rising steadily and dividends increasing, and investors should avoid delay.

NO CUSTOMS OFFICER AT NEW YORK

Hon. Dr. Reid, minister of customs, has refused the request of the British Columbia business men for the appointment of a customs officer in New York to arrange for the passage of Canadian goods, via the Panama Canal.

It is argued that the appointment of such an officer would be of great advantage to United States railway lines, and that in view of the hundreds of millions spent on the Canadian transportation system, traffic should be encouraged rather than discouraged to go entirely via Canadian systems.

Hon. Dr. Reid and Sir George Foster took up the matter with the British Columbia business men while at the coast recently and explained the position of the government on the subject.

AS MR. BRITLING SEES IT

In his book, "Mr. Britling Sees It Through," Mr. H. G. Wells has adopted a style that is at once original and extraordinary. The opening chapters dealing with the quaint English village of Matching Easy, of its peacefulness, of the home life of the Britling family, his original type in Mr. Britling, of the views and impressions of England and Englishmen by the American on his first visit, make the book an attractive study.

The author leads one right out of the peacefulness of the English countryside to the great world war which is involving so many nations, in a manner so natural that one cannot help feeling that his Mr. Britling is taken from the character of almost any Englishman—the threat of war, the seeming impossibility of it, until we were actually caught by its torrent and swept into the stream of world-wide military domination. Mr. Wells misses nothing of the events as they happened, taking things as they occurred in Matching Easy and Sarajevo, making his novel a chronicle that should live many years, so well does he cover and carry his reader along the trend of events, of which as yet we have not seen the end.

"Mr. Britling Sees It Through." By H. G. Wells. Price, \$1.50. Published by Macmillan Company of Canada, St. Martin's House, Toronto.

TO SECURE RUSSIAN TRADE

"Co-operation in the matter of organization and in the plan of campaign to be adopted for securing Russian trade, is necessary," is the statement of Mr. J. Picton Bagge, acting British consul at Odessa. "Co-operation may take two forms. First, a group of firms of allied trades, the demand for the products of each which does not justify a separate organization, could join together to form an agency or branch in Russia. Secondly, but of far greater general importance, is the co-operation of all merchants trading with Russia. By means of this general co-operation a standard of terms of credit and conditions could be set up, and a system of reliable information as to the financial standing and commercial morality of Russian traders could be established, and last, but not least, a trading bank founded in which merchants engaged in Russian trade might be mutually interested.

"It is of the utmost importance that no time be lost in entering into business relations with Russia. The initial work should be done now, during the war. Exporters should either come out themselves or at least send capable representatives to study the market and its requirements and get acquainted with Russian merchants. They should also make arrangements to send out after the war young men to represent them. As it is probable that not many men can be found at the present time with an adequate knowledge of Russian, it would be well to send such as have some knowledge of other European languages. It is suggested that exporters, if unable to effect arrangements for placing these young men in Russian offices, would find it profitable to send them out to Russia and maintain them there for some months while learning the language. The great handicap to be overcome at the outset by British traders will be the language difficulty. The supply of British subjects who at present know Russian is very limited, and will not be equal to the demand. Until this necessary link is forged, British trade cannot be properly pushed. It stands to reason that, however honest a Russian merchant may be, he cannot have the same interest as the British merchant in furthering the interests of British trade as opposed to that of other nations."

LEGAL NOTICES

CANADA LIGHT, HEAT AND WELDING COMPANY

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 8th day of September, 1916, incorporating Willis Bertram Sturupp, Law Clerk; John Fraser MacGregor, Accountant; Craig Allan St. Clair McKay and James White Bicknell, Students-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture, buy, sell and deal in calcium carbide, chemical products, generators, burners, mantels, lamps, meters, apparatus, appurtenances and appliances connected with a light, heat and welding business; (b) To carry on the business of a light, heat and welding company in all its branches, provided, however, that any sale, distribution or supplying of any light and heat shall be subject to local and municipal regulations in that behalf; (c) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (d) To acquire or undertake the whole or any part of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company; (e) To apply for, purchase or otherwise acquire, any patents, licenses, concessions and the like, conferring any exclusive or non-exclusive, or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property, rights or information so acquired; (f) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in or any business or transaction capable of being conducted so as directly or indirectly to benefit the company, and to lend money to, guarantee the contracts of or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (g) Subject to section 44 of the said Act, to take or otherwise acquire and hold, shares in any other company having objects altogether or in part similar to those of the company, or carrying on any business capable of being conducted so as directly or indirectly to benefit the company; (h) To enter into any arrangements with any authorities, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions; (i) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company (or its predecessors in business) or the dependents or connections, of such persons, and to grant pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object; (j) To promote any company or companies for the purpose of acquiring or taking over all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company; (k) To purchase, take on lease or in exchange, hire or otherwise acquire, any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business and in particular any machinery, plant, stock-in-trade; (l) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any such persons; (m) To sell or dispose of the undertaking of the company or any part thereof for such consideration as the company may think fit, and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of the company, if authorized so to do by the vote of a majority in number of the shareholders present or represented by proxy, at a general meeting duly called for considering the matter and holding not less than two-thirds of the issued capital stock of the company; (n) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of work of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (o) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (p) To do all or any of the above things and all things authorized by the Letters Patent or Supplementary Letters Patent, as principals, agents, contractors or otherwise, and either alone or in conjunction with others; (q) To do all such other things as are incidental or conducive to the attainment of the above objects and of the objects set out in the letters patent and supplementary letters patent. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere, by the name of "Canada Light, Heat and Welding Company, Limited," with a capital stock of one million dollars, divided into 10,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 11th day of September, 1916.

THE WHITE COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 5th day of October, 1916, incorporating Wilfrid Maynard Cox and Howard Armour Harrison, barristers-at-law, William John Beattie, student-at-law, and Richard George Roberts and John Frederick Van Lane, accountants, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture, build, buy, sell, repair, convert, alter, let on hire, deal in, import and export, automobiles, motor cars, motor boats, motor trucks, stationary, portable and traction engines, tractors, tools, machinery, implements, gas engines, steam engines and all other types of engines, and the various parts and equipment thereof, and to carry on generally an automobile business in all its branches; (b) To carry on any other business, (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (c) To acquire or undertake the whole or any part of the business, property, good-will and liabilities of any person or company carrying on any portion of the business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company, and to pay for the same in cash, bonds or paid-up shares or partly in cash and partly in bonds or paid-up shares of the company, as may be agreed upon; (d) To apply for, purchase or otherwise acquire any patents, copyrights, licenses, concessions and the like, conferring any exclusive or non-exclusive or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property, rights, or information so acquired; (e) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person, firm, association or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person, firm, association or company, and to take or otherwise acquire shares, bonds, and securities of any such company, and to sell, hold, issue or re-issue, with or without guarantee, or otherwise deal with or dispose of the same; (f) To take, acquire, lease, hold, sell and dispose of real estate and personal property of every nature and kind as security for or in satisfaction wholly or in part of debts, liabilities or obligations incurred or to be incurred in respect of or in connection with the business aforesaid, or any of the purposes or objects of the company; and to purchase, lease, erect, or otherwise acquire, exchange, sell, let, assign, transfer, or otherwise dispose of, own, maintain, develop and improve any and all property, real and personal, necessary to effect the carrying out of the purposes of the company; (g) To consolidate or amalgamate with any other company having objects similar in whole or in part to those of the company; (h) To accept in payment of any debt or debts due or owing to the company, the stock, shares, bonds, debentures of any other company or companies, and, notwithstanding the provisions of section 44 of The Companies Act, to use any of the shares, bonds, debentures or other securities, or the funds of the company, to purchase or otherwise acquire and to take, hold, assign, transfer or sell the shares, bonds, debentures or other securities of or in any other company or corporation, and to guarantee the payment of the principal of and interest on the bonds, debentures or dividends upon the shares of any other company or corporation, and while holding such shares, bonds, debentures or other securities of any other company or corporation to exercise all the rights and powers of ownership thereof, including the right to vote thereon through such agent or agents as the directors may appoint, and to distribute such shares, bonds, debentures or other securities or any assets of such other company in specie upon a division of profits or distribution of capital among the shareholders; (i) To enter into any arrangements with any authorities, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions; (j) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company (or its predecessors in business) or the dependents or connections of such persons, and to grant pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object; (k) To promote any company or companies for the purpose of acquiring all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company; (l) To purchase, take on lease or in exchange, hire or otherwise acquire, any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business and in particular any machinery, plant, stock in trade; (m) To construct, improve, maintain, work, manage, carry out or control any roads, ways, branches or sidings, bridges, reservoirs, water-courses, wharves, manufactories, warehouses, electric works, shops, stores and other works and conveniences which may seem calculated directly or indirectly to advance the company's interests, and to contribute to, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control thereof; (n) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any such persons; (o) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (p) To procure the company to be registered and recognized in any foreign country and to designate persons resident therein according

LEGAL NOTICES

to the laws of such foreign country to represent this company and to accept service for and on behalf of the company of any process or suit; (q) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars or catalogues, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (r) To sell, lease, transfer or dispose of the undertaking of the company or any part thereof, to such person, firm or company for such consideration as the company may think fit, and in particular either for cash or for shares, bonds, debentures or securities of any other company (whether promoted by this company or not) having objects altogether or in part similar to those of the company, or partly for cash or partly for such shares, bonds, debentures or securities; (s) To raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee or otherwise any corporation in the capital stock of which the company holds shares or whose bonds or debentures or obligations are held by the company, or with which it may have business relations, and to do any act or thing for the preservation, protection, improvement or enhancement of the value of any such shares, bonds, debentures or other obligations, and to act as employee, agent or manager of any such corporation and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (t) To lease, purchase, construct, own, maintain and alter any buildings or work necessary or convenient for the purposes of the company and to take options on lands and buildings belonging to others and to exercise such options or not as may be deemed expedient; (u) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the real and personal property, rights and franchises of the company and to give options thereon or any part thereof; (v) To invest and deal with the moneys of the company not immediately required in such manner as the directors may from time to time determine; (w) To employ brokers, commission agents and underwriters upon any issue of shares, bonds, debentures or other securities of the company and to provide for the remuneration of such person or any other persons rendering services of any kind to the company; (x) To remunerate any person, firm, association or company for services rendered or to be rendered in placing or assisting to place or guaranteeing the placing of any of the shares in the company's capital or any debentures or other securities of the company, or in or about the formation, promotion, organization or incorporation of the company or the conduct of its business; (y) To pay all or any costs, charges or expenses preliminary or incidental to or incurred in connection with the promotion, organization, formation, establishment, registration and incorporation of the company; and to purchase or otherwise acquire on such terms and in such manner as the directors of the company from time to time decide any shares of the capital stock of this company, provided that the consideration therefor be paid out of the company's profits or surplus, if any, and not out of the capital of the company; (z) The business or purpose of the company is from time to time to do any one or more of the acts and things herein set forth either alone or in conjunction with others or as principals, factors, contractors or agents, and to do all and everything necessary, suitable and convenient or proper for the accomplishment of any of the purposes or the attainment of any one or more of the objects herein enumerated or incidental to the powers herein named, or which shall at any time appear to be conducive to or expedient for the protection or benefit of the company; and it is hereby declared that in the interpretation of this clause the meaning of any of the objects of the company shall not be restricted by reference to any other object or by the juxtaposition of two or more objects, and that in the event of any ambiguity this clause shall be construed in such manner as to widen and not to restrict the powers of the company. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The White Company, Limited," with a capital stock of forty thousand dollars, divided into 400 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 17th day of October, 1916.

THOMAS MULVEY,
Under-Secretary of State.

C. F. COLE COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 23rd day of September, 1916, incorporating James Steller Lovell and Charles Delamere Magee, accountants; William Bain, bookkeeper, and Robert Gowans and John Joseph Dashwood, solicitors' clerks, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture, import, export, buy, sell and deal in all kinds of drawing and engineering instruments, supplies and scientific instruments; (b) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (c) To acquire or undertake the whole or any part of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company; (d) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (e) To take or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of the company or carrying on any

business capable of being conducted so as directly or indirectly to benefit the company; (f) To lend money to customers and others having dealings with the company, and to guarantee the performance of contracts by any such persons; (g) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (h) To sell or dispose of the undertaking of the company or any part thereof for such consideration as the company may think fit, and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of the company; (i) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (j) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere, by the name of "C. F. Cole Company, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 26th day of September, 1916.

THOMAS MULVEY,
Under-Secretary of State.
BLAKE, LASH, ANGLIN & CASSELS,
Solicitors for the company.

MCGART NOVELTY AND TOY COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the first part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the seal of the Secretary of State of Canada, bearing date the 13th day of September, 1916, incorporating Lester Millman Keachie, student-at-law; Sophia Tutty, bookkeeper, and Susie Ross, Ella Lester Kelly and Myrtle Etoile Thurgarland, stenographers, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture, buy, sell and otherwise deal in all kinds of household furniture, fixtures, appliances and all kinds of toys, games, playthings, novelty and fancy goods, and to sell and manufacture any and all articles, materials and things used in the manufacture, maintenance and working thereof, and also all apparatus and implements and things for use in sports, games or household purposes; (b) To apply for, purchase or otherwise acquire and work the whole or any interest or interests in patents, brevets d'invention, licenses, concessions and the like, and to acquire any real or personal property; (c) To acquire and carry on any business or undertaking calculated directly or indirectly to benefit the company's business or property on such terms as it may deem proper, and to acquire and hold shares in any other company; (d) To sell or dispose of or otherwise deal with the undertaking, property or rights of the company or any part or parts thereof from time to time for such consideration as the company may think fit, and in particular the shares, debentures or securities of any other company, and to promote any company or companies for taking over all or any of the property or liabilities of the company, or for any other purposes calculated to benefit the company; (e) To acquire and undertake the whole of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on or possessed of property suitable for the purposes of the company or calculated to advance the interests of the company; (f) To buy, sell, repair, alter and deal in apparatus, machinery, materials and articles of all kinds which shall be capable of being used for the purposes of any businesses herein mentioned or likely to be required by customers of any such business; (g) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "McGart Novelty and Toy Company, Limited," with a capital stock of forty thousand dollars, divided into 400 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 19th day of September, 1916.

THOMAS MULVEY,
Under-Secretary of State.

Two gold consignments of \$5,000,000 have been deposited at the United States assay office this week, indicating a resumption of British gold shipments from Canada.

An issue of \$75,000 bonds for patriotic purposes has been sanctioned by the Niagara Falls city council. At Aylmer, Ont., a by-law is to be prepared to issue \$3,100 bonds.

It is possible that the average man engaged in the calling of insurance does not realize that he is dealing with the greatest economic principle in modern civilization. Life insurance agents should study their business so that they could go out to serve the public with the greatest efficiency, said Rev. S. Bacon Hillocks, M.L.A., at the Calgary Life Underwriters' Association meeting.

DIVIDENDS AND NOTICES

TENDERS FOR PULPWOOD AND PINE LIMIT

Tenders will be received by the undersigned up to and including the 1st day of December next for the right to cut pulpwood and pine timber on a certain area situated on the Pic River and other territory adjacent thereto, in the District of Thunder Bay.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet, board measure, on pine, that they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, and \$2.00 per thousand feet, board measure for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario—the paper mill to be erected when directed by the Minister of Lands, Forests and Mines.

Parties making tender will be required to deposit with their tender a marked cheque, payable to the Honorable the Treasurer of the Province of Ontario, for twenty-five thousand dollars (\$25,000), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said \$25,000 will be applied on account of bonus dues as they accrue, but the regulation dues, as mentioned above, will require to be paid in the usual manner as returns of cutting of wood and timber are received.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned,

G. H. FERGUSON,
Minister of Lands, Forests and Mines.

Toronto, August 28th, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

THE CONSUMERS' GAS COMPANY OF TORONTO

The Annual General Meeting of the Shareholders of the Consumers' Gas Company, of Toronto, to receive the report of the directors, and for the election of directors for the coming year, will be held in the Company's Board Room, No. 17 Toronto St., on Monday, the 30th day of October, 1916, at 12 o'clock noon.

ARTHUR HEWITT,
General Manager.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended October 13th:—

Alladin Cobalt Mine, 41,000; Nipissing Mining Company, 206,830; La Rose Mines, 166,826; Dominion Reduction Company, 176,000; McKinley-Darragh-Savage Mines, 254,625. Total, 845,281 pounds, or 422.6 tons. From Elk Lake—

Miller Lake O'Brien Mine, 56,600 pounds.

The total shipments since January 1st, 1916, now amount to 24,723,551 pounds, or 12,361.7 tons.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; "Positions Vacant," "Agents or Agencies Wanted," 3c. per word; other condensed advertisements, 5c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over \$5,000.00, and he has built up a future income of over \$3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

FIRE INSURANCE INSPECTOR.—Young married man, six years' experience in the business, would like position as Inspector; have covered the four Western Provinces; best of references and bond if necessary. Apply Box 7, *The Monetary Times* Office, 1208 McArthur Building, Winnipeg.

ACCOUNTANT, 31 years, twelve years' banking experience, wishes to make change. Would like position with financial or commercial firm having good prospects. Apply Box 9, *Monetary Times*, Toronto.

INTERCOLONIAL OPERATION AND RATES

That the losses on the Intercolonial Railway were due to low rates; that politics did not play, and does not play, in the management of the Canadian government system, that part which is ascribed to it; that while there may have been some political interference it was not enough to mark a tendency and was not more than is found on every system; that the facts in regard to the Intercolonial afford no criterion for a judgment as to the soundness and desirability of government ownership or otherwise; that while it might have seemed obvious on the Intercolonial to raise the rates to the level of those of the Canadian Pacific Railway, the fact was that the people of the lower provinces had the deep-rooted idea that the rates of the government line should never produce more than operating expenses, and that the road must never earn interest on its original cost, is the interesting statement of Mr. J. L. Payne, comptroller of statistics, department of railways, in the *Railway Age Gazette*. The system has apparently acted up to that belief.

The article is on the subject of the government railways of Canada, their origin, the motives which influence their operation, etc.

The Ogiivie Flour Mills Co., Limited

REPORTS and BALANCE SHEET

For Year Ended August 31st, 1916, Presented to the Shareholders at Fifteenth Annual Meeting, held at Montreal, Que., October 12th, 1916.

DIRECTORS' REPORT.

A Balance Sheet showing the Assets and Liabilities of the Company, also Profits for the year, is submitted.

The Company's accounts have been audited by Messrs. Creak, Cushing and Hodgson, Chartered Accountants, whose report is presented herewith.

The sum of \$8,500 was added during the year to the Company's Pension Fund, which now amounts to \$115,000.

The Company's system of country elevators in the Northwest has been increased during the year by 21 buildings, making a total of 168 elevators, with a storage capacity of 5,385,000 bushels, and covering a very wide area of territory. With terminal and country elevators combined the Company's total wheat storage capacity now amounts to 10,335,000 bushels.

The Company's flour mills, elevators and other properties are in first-class condition. All charges for repairs and renewals have been written off and the plants maintained at the highest standard of efficiency.

The usual dividends were paid during the year on the Preferred and Common Stocks, and a bonus of four per cent. on the Common stock was provided out of the year's profits, and paid on October 2nd, 1916, making a total distribution of twelve per cent. on this issue.

All of which is respectfully submitted.

(Signed) C. R. HOSMER, President.

VICE-PRESIDENT AND MANAGING DIRECTOR'S ADDRESS.

Addressing the Shareholders present, Mr. W. A. Black, Vice-President and Managing Director, said:—

It is with pleasure we are again able to present you with a very satisfactory statement.

Notwithstanding the fact that since our last meeting the Government war tax was imposed and was retroactive for a year (which will necessitate our paying a very large sum), we have been able to provide for these taxes out of the year's earnings, pay our holders of Common Stock an increased dividend, and carry forward \$334,270.12 to the credit of Profit and Loss Account, which now stands at \$846,330.62.

While the earnings shown are about 25% on the Common Stock, it must be remembered that our reserves represented by Contingent Account \$1,250,000, and Profit and Loss balance as on August 31st, 1915, \$512,060.50, are also Capital, and that taking this into consideration it makes the return about 18%.

While we were not as fortunate in having a large amount of wheat to sell at much enhanced prices, as happened last year, we were more fortunate than in average years in our purchases. We also profited largely in the increase in returns which we received from our investments in business other than flour milling. Our interest charges for borrowed money have been much less owing, of course, to the large Capital now invested in our business, which has been accumulating for some years past out of surplus earnings.

Our mills are now fully employed, and have orders ahead to keep them running for some time.

While the wheat crop in the Northwest is less than half of last year's, the yield as an average is little short of what it usually is, and the prices are very much higher. At this date last year October wheat was 98½ cents per bushel; to-day it is 164 cents. The high prices were in effect before the farmers had actually marketed the new crop, so that they will reap the full benefit, and the return to them as a whole will be little, if any, less than the previous year, and with the very high prices prevailing for all farm products, the country should be established on a most substantial basis.

Like many other manufacturers, we have been handicapped by the absence of a large number of our employees who are doing their duty at the front; but are confidently looking forward to the successful conclusion of the war at no distant date.

BALANCE STATEMENT, AUGUST 31st, 1916.

ASSETS.	
Cash on hand and at Bank	\$ 486,406.58

WAR LOAN PAYMENTS

Large Number of Subscribers Paid in Full This Week— Definitive Bonds Next Year

A large number of allotments of the new Dominion war loan were paid up in full on Monday, at the option of purchasers, by the payment of \$87.22 cash on each \$100. Otherwise the instalment due is \$30, to be followed by \$30 on November 15th and \$27.50 on December 15th. On the occasion of the previous war loan about 75 per cent. of the entire loan was paid in full on the specified date, instead of by instalments. No official information is available in the case of the present loan but banks and bond houses report a great number of payments in full.

What is Paid.

The finance department, Ottawa, named a sum for the payment in full, which represents a net price of 97.221 for the bonds. That is, the discount works out to a reduction of about $\frac{1}{4}$ point on the nominal cost. A subscriber who elected to pay in full on Monday last was required to pay the following amounts:—

Bond.	Full payment.
\$100	\$ 87.22
\$200	174.44
\$300	261.66
\$400	348.88
\$500	436.10
\$600	523.32
\$700	610.54
\$800	697.76
\$900	784.98
\$1,000	872.21
\$10,000	8,722.05
\$100,000	87,220.55

Definitive Bonds Next Year.

Interim certificates will shortly be issued through the banks in exchange for the provisional receipt given with the first payment of 10 per cent. last month. The definitive bonds will probably be issued early in the new year.

A good investment demand exists for the new war loan, due to buying which did not participate in the original offering and due to the fact that many subscribers were left unsatisfied in the allotment. The second war loan price has been around 99 this week, while trading in the first loan was active at 98 $\frac{1}{2}$.

How Bonds Were Allotted.

All subscriptions of \$25,000 or under will be allotted in full. Subscriptions of amounts from \$25,000 to \$100,000 will be allotted on the basis of the first \$25,000 in full and thirty per cent. of the remainder. Subscriptions of amounts from \$100,000 to \$1,000,000 will be allotted according to the same basis for the first \$100,000 and forty per cent. for the remainder. Subscriptions in excess of \$1,000,000 will be allotted according to the basis adopted as above for million-dollar subscriptions and thirty-six per cent. of the remainder accepted. This principle of allotment will result in subscriptions from \$25,000 to \$100,000 being allotted, an average of 58.7-10 per cent. of the sum subscribed; subscriptions from \$100,000 to \$1,000,000 an average of forty per cent. of the sum subscribed; subscriptions over \$1,000,000 an average of 31.2-5 per cent. of the sum subscribed.

TORONTO'S INSURANCE MEN

At the Toronto insurance institute's opening meeting, Mr. A. E. Blogg, of the London and Lancashire Fire Insurance Company, president of the institute, will give his inaugural address. Hon. W. H. Hearst, premier of Ontario, will also address the meeting to be held next week.

The Toronto Life Underwriters' Association received a visit from Mr. J. Burt Morgan, president of Life Underwriters' Association of Canada. Mr. Morgan gave an interesting address. Life agents from Ottawa, Guelph and Hamilton were noted by *The Monetary Times* amongst the audience.

DEBENTURES FOR SALE

TOWN OF HERBERT, SASKATCHEWAN.

Sealed tenders will be received until noon of the 23rd October, 1916, by the undersigned for the following debentures which are to be repayable in equal annual instalments of principal and interest combined.

\$2,000.00 for draining and grading streets repayable in ten years with interest at 6 $\frac{1}{2}$ % per annum.
\$800.00 for building plank sidewalks repayable in seven years with interest at 6 $\frac{1}{2}$ % per annum.

G. L. WHEATLEY,
Town Clerk.

SALE OF DUNNVILLE DEBENTURES

Sealed tenders will be received by the undersigned, endorsed "Tenders for Debentures," up to 8 o'clock p.m., October 25th, 1916, for the purchase of \$53,000.00 30-year debentures bearing 6 per cent. interest annually.

J. W. HOLMES,
Town Clerk.

Dated October 12th, 1916.

TENDERS FOR DEBENTURES

Tenders are invited for Debentures for the Rural Municipality of Wallace as follows:—

Forty-five thousand dollars (\$45,000.00), issued under the Good Roads Act (40-years at 4 $\frac{1}{2}$ %).

The issue is fully guaranteed by the Province of Manitoba, and is repayable in equal annual instalments of principal and interest.

Sealed tenders to be in the hands of the Secretary-Treasurer not later than Friday, the 27th day of October, 1916, at 6 p.m.

The highest or any tender not necessarily accepted.
Further particulars may be obtained from

WM. WHITEFORD,
Secretary-Treasurer, Virden, Man.

COBALT ORE SHIPMENTS

The following are the shipments of ore in pounds from Cobalt Station for the week ended October 6th:—

Hudson Bay Mine, 60,627; Dominion Reduction Company, 88,000; Trethewey Mine, 40,885; Mining Corporation of Canada, 73,912; Nipissing Mining Company, 218,177; Coniagas Mines, 148,402. Total, 630,003 pounds, or 315 tons.

The total shipments since January 1st, 1916, now amount to 23,878,270 pounds, or 11,939.1 tons.

A Free Course In "Salesmanship"

We have thought about the young man who sees no prospects ahead. Would you like to be in a business that will give you

**A Good Living Wage
A Profitable Future
A Provision For Old Age**

We teach a man the Insurance Business, which offers permanent success, does not fluctuate, is a professional occupation, and has been truly named "The best paid hard work in the world."

This is done by a correspondence course and personal assistance, free of charge.

When he is fully prepared for the work, we place him in a position and help him to make good

The first two lessons of the Company's correspondence course will be sent to anyone interested. It will pay young men who desire to get on in the world to look into this

All correspondence strictly confidential.

CANADA LIFE ASSURANCE CO.
HEAD OFFICE, TORONTO.

Prosperous and Progressive

Up-to-date business methods, backed by an unbroken record of fair-dealing with its policyholders, have achieved for the Sun Life of Canada a phenomenal growth.

To-day, the Company operates actively in forty-two countries and upon five continents.

In the past six years its assurances in force have nearly doubled; in the past eleven years they have more than trebled.

More than 166,000 of its policies are now in force for assurances totalling over \$265,000,000—much the largest amount carried by any Canadian life company.

AGGREGATE TRADE.						
Merchandise	88,450,957	89,831,306	170,652,175	1,018,164,346	920,623,507	1,668,880,533
Coin and bullion	11,923,927	5,567,289	50,066,254	45,743,887	217,311,973	276,171,748
Total trade	100,374,885	95,398,595	220,718,429	1,063,908,233	1,137,935,480	1,945,052,281

*Note.—It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending August, 1916, were: imports 1916, \$50,627,035; 1915, \$122,478,271, and exports 1916, \$225,544,713; 1915, \$94,838,702. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

British Capital in Canada, \$2,914,000,000

*UNITED States Investments Are Smaller at \$636,903,000, But
Industrial Interests Make the Most of Their Loans—Estab-
lishment of Branch Plants in Canada—Germany's Investments.*

THE following statement was submitted to the Dominions Royal Commission at their request at the commission's sessions in Toronto last week, by *The Monetary Times*, and is printed here in detail in response to several requests:—

The investment of outside capital in Canada in recent years has been made chiefly by Great Britain and the United States. These investments may be classified broadly under two headings:—

(1) The purchase of Canadian government, railroad, municipal and industrial securities by Great Britain.

(2) The investment of United States capital in industrial enterprises in the Dominion.

The flow of British capital to Canada in any considerable volume through the medium of securities purchases, commenced in 1905, in which year British investors purchased £13,530,000 Canadian securities. Since January, 1905, to October 1st, 1916, British investments in the Dominion through this channel have been approximately £302,969,566, as follows:

Year.	Amount.
1905	£13,530,287
1906	6,427,500
1907	11,203,711
1908	29,354,721
1909	37,411,723
1910	38,453,808
1911	39,855,517
1912	32,456,603
1913	47,363,425
1914	37,777,271
1915	8,235,000
1916 (to October 1st)	1,000,000

£203,069,566

The following table gives details of the purposes of Canadian loans in London during the past six years:—

Purpose.	1911.	1912.	1913.	1914.	1915.	1916.
Government	£1,900,000	£5,500,000	£9,800,600	£16,260,000	£5,000,000	
Municipal	5,323,740	5,472,040	13,926,470	6,460,187		
Railroads	17,122,253	9,002,585	13,179,170	11,943,800	3,236,000	
Mining	600,000	650,000	225,000	175,000		
Financial	2,508,250	2,772,000				
Mortgage, land and lumber	4,122,500	1,704,975	2,451,332	705,320		
Industrial	7,868,765	7,354,094	7,780,847	2,223,655		£1,000,000
Totals	£39,855,517	£32,456,603	£47,363,425	£37,777,271	£8,235,000	£1,000,000

The decreasing totals of the past three years have been due to the closing of the British money market to practically all loans except those for war purposes. The total for 1914 represents loans made to Canada for the period of about six months in that year prior to the outbreak of war. The total for 1916 is represented by loans raised by the Dominion government and two railroad corporations. The total for 1916 is represented by an industrial issue connected with war work.

In an address to the Royal Statistical Society, London, in January, 1911, Sir George Paish estimated that to the end of 1910 £372,541,000 of British capital had been invested in Canada and Newfoundland. Adding the figures for the years 1910-1916 inclusive and noted in the foregoing table, the total to date is £539,228,816.

In addition to the British investments through the medium of public flotations and noted in the foregoing table, the writer's investigations ascertained that between 1905 and 1913 inclusive, the following amounts of British capital had been invested in the channels noted:—

20 branch plants, average capital \$300,000.....	\$6,000,000
Canadian bank shares purchased by individual shareholders	2,000,000
Investments with loan and mortgage companies..	12,000,000
British insurance companies' assets in Canada..	30,000,000
Municipal bonds sold privately	15,000,000
Industrial investments	29,000,000
Mining investments	59,000,000
Land and lumber purchases	40,000,000
Purchases of town and city property	25,000,000
	\$218,000,000

Adding these investments to the foregoing total of £539,228,816 there is a grand total investment of British capital in Canada to date of at least £582,828,816, or approximately \$2,914,144,000.

As a result of investigations made by the writer during recent years, the amount of United States capital invested in Canada was estimated to be, at the end of 1913, £636,903,952. This amount was divided under the following headings:—

450 branch companies with average investment of \$300,000	\$135,000,000
Investments in British Columbia mills and timber	71,000,000
Investments in British Columbia mines.....	62,000,000
Land deals in prairie provinces	41,000,000
Investments in lumber and mines, prairie provinces	10,500,000
Theatrical enterprises	3,500,000
Packing plants	6,750,000
Agricultural implement distributing houses.....	9,255,000
Land deals, British Columbia	60,000,000
Investments of United States life and fire insurance companies	67,831,497
Miscellaneous industrial investments	12,200,000
Purchase of city and town property	20,000,000
Investments in the Maritime Provinces	13,125,000
Purchase of government, municipal and corporation bonds, 1905-1913.....	123,742,455
Fox farm investments, Prince Edward Island....	1,000,000
	\$636,903,952

To this total may now be added the following amounts:—

Purchase of government, municipal and corporation bonds, in 1914	\$53,944,000
“ “ “ in 1915	143,972,000
“ “ “ in 1916	
(to August, 1916)	131,235,000
	\$320,151,000

There have been established in Canada since 1913 about 40 branch establishments of United States industrial firms. Allowing the average investment in these cases to be \$300,000, which is a conservative estimate, the additional investment represented by these 40 firms is \$12,000,000. Adding the amounts represented by securities purchases since 1913 and by establishment of branch plants, we have a total of \$341,151,000. This, with the total of \$636,903,952 of investments noted in the classified table above, gives a grand total of \$978,054,952 to date. Revision of the other items represented in the classified table above, has not been possible at this time.

Generally speaking, it may be stated that no great effort seems to have been made by British manufacturers and bankers to further Canadian trade specifically through the medium of British investments in Canada, although there have been exceptions. The matters of trade and loans apparently have been allowed to take their natural courses without an attempt being made to obtain new business as a result of new loans. The British investor hitherto has been largely content to invest in Canadian securities which bring him a fair income, give him little risk, but do not secure for him control of the enterprise in which his funds have been placed. The case of United States is different.

The bankers and manufacturers of that country have in many instances combined their efforts so that when the banker has arranged a loan to a Canadian borrower and the funds are to be used, say, for the installation of plant or machinery, there is an excellent prospect, or even a definite arrangement, that the plant or machinery in question shall be purchased in the United States and probably from a certain manufacturing firm. This practice has been in evidence even when the share of Canadian securities purchased by United States banking houses has been small compared with the share purchased by British houses.

Since the outbreak of war the bulk of Canadian securities has been marketed in the United States instead of in Great Britain, and it is probably safe to assert that the industrial interests of the neighboring republic will take full advantage of that fact for the enlargement of their trade in the Dominion. The percentage share of Canadian bonds (government, railroad, municipal and industrial) purchased by the two countries in recent years is shown in the following table, based on average annual sales of \$290,000,000 of securities:—

Year.	Percentage share of Canadian bonds purchased by	
	United States.	Great Britain.
1909	3.90	74.00
1910	1.50	81.50
1911	6.58	76.56
1912	11.35	72.6
1913	13.65	74.24
1914	19.77	68.14
1915	42.11	14.18
*1916	75.00	2.00

*Estimated.

The estimate for 1916 is based on approximate figures available at the present time. The figures do not take into account any purchase or transfer of securities for war purposes between the Imperial and the Canadian governments.

It will be noticed that one of the largest items representing United States investments in the Dominion is the establishment of branch plants, warehouses, etc., in Canada.

The largest number of branch plants of United States companies in Canada is located in Ontario, although there is a tendency to utilize Western Canadian points to a greater extent. At least twelve United States manufacturers of agricultural and farm implements have branches in the Dominion and about as many makers of automobiles. In the latter case, the parts are usually imported separately and assembled in this country. Several United States manufacturers of chemicals, drugs, patent foods and cereals have factories or distributing houses on the Canadian side of the international line. A large number of firms manufacturing and supplying various machinery, fittings and plant are also doing business in Canada in a similar way. This United States commercial invasion applies to a lengthy list of articles, including asbestos, barrels, blind rollers, buttons, carpet sweepers, corsets, condensed milk, bags, corks, carriages, couches, brass goods, billiard tables, cords, cash registers, disinfectant, fly paper, files, fire extinguishers, fountain pens, gramophones, hardware, pickles, presses, pulleys, razors, rubbers, sealers, shoes, scales, typewriters, watch cases, tobacco, etc. This list will give an idea of the scope of United States industrial interests in the Dominion.

Since informal discussion in various quarters has been heard as to the possibility of favorable tariffs among the Allies and the Dominions after the war, there has been an impetus given to the movement of United States branch plants to Canada, and a number of inquiries continue to be made by United States firms with a view to their establishment in the Dominion. In the event of favorable tariff treatment as between the Allies and the Dominions, these United States manufacturers in Canada expect to be regarded as Canadian manufacturers and thus entitled to the benefits of any such favorable tariff legislation. These firms are now in a position to cater at close range to the demands of the Canadian market and hope also to be in a position to handle some or all of

their export trade from their Canadian factories, under present or revised tariffs of various countries.

As illustrating the well-matured plans of the average subsidiary company of United States manufacturers, the case of the Canada Creosoting Company may be cited. The American Creosoting Company and the United States Wood Preserving Company jointly control the stock of the Canadian Creosoting Company, a company incorporated in 1913, which has erected a branch plant and conducts business at Trenton, Ontario, for the two United States companies. Forty acres of land on the river front at Trenton have been purchased by the company, which has erected a large plant for erecting timber of all kinds. About one-third of the shareholders of this company are residents of Canada, as a block of the stock of the company was sold privately here. The remainder of the stock is held by the two United States companies mentioned above.

The head sales office of the new company is at Montreal, where a tank station has been erected. Creosoting oils are brought to the Montreal station in tank steamers from Europe. A small tank steamer, specially constructed for going through the St. Lawrence canals, carries oil from the Montreal station to the Trenton plant. The plant is served by the Canadian Northern, the Canadian Pacific and the Grand Trunk railways, and also has the waterfront. A large private dock has been built at the river front. The plant is between the Canadian Northern and the Canadian Pacific railroads, with sidings from both these roads running into the plant, and a siding of the nearby Grand Trunk Railroad was built into the plant. The Trenton plant is practically a duplicate of the United States Wood Preserving Company's Toledo (Ohio) plant.

The investments of countries (other than Great Britain and the United States) in Canada were estimated by the writer after two investigations to be, at the end of 1913, \$174,150,000, divided as follows:—

France	\$99,250,000
Belgium	11,675,000
Germany	31,725,000
Holland	18,000,000
Russia	2,000,000
Turkey	3,000,000
Foreign holdings of Canadian bank shares	11,500,000

The greater part of French investments are in Canada represented by loans on mortgages and the purchase of Canadian securities. Belgian and Dutch investments are largely in the form of mortgage loans and land purchases.

In view of events connected with the war, a few details regarding German investments in Canada, gathered during the writer's investigation of the subject in 1913, may be of interest. Generally speaking, such investments have not been large.

German capital has been interested in acquiring shares of the Canadian Pacific Railway. From figures supplied to the writer by Lord Shaughnessy, president of the railway, it was learned that the percentage of common stockholders of that enterprise, in Germany and France, was 15 per cent. in January, 1911; 15 per cent. in June, 1913, and 10.96 per cent. in August, 1916. The holdings of the two countries respectively was stated only for the latest date and they were: Germany, 5.33 per cent.; France, 5.63 per cent.

Another interest of some importance was that of the Dresdner Bank of Germany in conjunction with Messrs.

J. P. Morgan and Company, New York. This took the shape of a \$2,000,000 investment in the defunct Sovereign Bank of Canada, of which the German bank named contributed \$1,000,000. The Sovereign Bank failed but the Dresdner Bank's investment, it was understood, remained in Canada as that institution agreed to the plan of the formation of a new company to take over the assets of the Sovereign Bank.

Several small investments have been made by German capital in farming lands, but very little interest has been exhibited by Germany in the purchase of Canadian bond issues.

A large part of the output of the asbestos mines in Canada formerly went directly or indirectly to Germany. German capital proposed to interest itself in the financing of several asbestos properties in Canada about the year 1909 but two large amalgamations of these properties under Canadian auspices, led to the abandonment of the German proposal.

The German Development Company in Canada, representing important Berlin bankers, started in this country with a capital of \$60,000 for the purpose of locating and developing mining properties in Canada. Within one year the investment was increased to \$250,000 and later to \$1,000,000. The most important of the company's ventures were coal lands in Alberta. While a little Belgian, French and English capital was interested in these coal lands, the chief funds were of German origin.

German capital to the extent of \$3,500,000 was invested in British Columbia coal lands and in Alberta coal lands there is understood to be about \$3,000,000 of German capital.

JOLTS, WAR AND PEACE

The habit of war is thoroughly acquired after two years. That has been proved since August, 1914. The jolt of a struggle in which fifteen nations have joined, dislocated the strands of trade, finance and everything else. The shock of a world war paralyzed the world's mechanism. If ever there existed the essence of pessimism, it was known in the autumn months of nineteen fourteen. Men who thought they knew hope and faith, failed to see the slightest ray. Business was knocked skewways while national leaders adapted national machinery to war. Now we are accustomed to the terrible business of war. In Europe, it is the daily round and common task. Here, we are trying to make it so, while thousands of sons and brothers and fathers of Canada are bearing arms.

Having become accustomed to war every day for some 824 days, people now talk of the economic jolt which peace will bring. The change from peace to war was an awkward thing. It involved unknown terrors, real and imaginary. It sent theories and precedents sideways. The change from war to peace will be easier. The fact that peace is the centre of things will prove a good foundation. Militarism will be under heel. Trade and credit and finance and men and industry have achieved extraordinary feats of adaptability to new conditions, feats of which prophets would not have dared to dream. With that experience, nations whose manhood and economic systems have survived this severest test of all, will not be appalled at the so-called difficulties of peace.

PERSONAL NOTES

Mr. Hew R. Wood, of Messrs. Hew R. Wood and Company, McGill Building, Montreal, who has been specializing in municipal bonds, has joined the firm of Messrs. Nesbitt, Thomson and Company, Limited, and has closed his offices in the McGill Building. Messrs. Nesbitt, Thomson and Company, who have been making a specialty of public utility and hydro-electric bonds, propose dealing more extensively in municipal bonds, and Mr. Wood will give special attention to this department.
